CITY OF FLINT
Position Description

Class Title:	Water Distribution Operator Trainee	Job Code Number:	16-N-035
Established:	June 26, 1961	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: Under an on-the-job training program with close supervision installs, maintains and repairs water mains, valves, meters, hydrants and other appurtenances of the water supply system; performs related work as required. As the training progresses, supervision may be proportionately decreased and the responsibility of assignments increased. After completion of 2080 paid working hours, not including overtime, of on-the-job training, in the Water Service Center Division, the training period will be considered complete and the employee eligible for examination for promotion to Water Distribution Operator.

SUPERVISION RECEIVED: Works under the direct supervision of a foreman or employee of a higher grade who assigns work and checks for proper performance of duties.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Installs water mains and new service lines; inserts tapping valves for new mains and service lines.
2. Lays and repairs water mains; repairs gate valves; installs, repairs and tests fire hydrants; constructs and repairs wells on line gates.
3. Installs service connections, including tapping water main and laying service pipe; connects and disconnects shut-off valves and stop box; digs and back-fills trenches; locates and digs up curb boxes as necessary; thaws frozen lines in winter.
4. Caulks joints, cuts pipe, cuts out broken pipe, puts on sleeves, shuts off gate valves, repairs stuffing boxes.
5. Installs and removes consumer water meters. Performs water turn on and off's.
6. Operates equipment such as air compressors, valve turning or other equipment associated with water distribution and repair.
7. Drives utility dump trucks or other vehicles; orders materials; makes out simple reports on work performed and materials used.
8. May work with one or more Water Service Center employees.
9. May clean and repack water meters and/or be assigned duties in the stockroom.
10. May be required to perform duties in Sewer Operations.

MINIMUM ENTRANCE REQUIREMENTS:

A. Ability to communicate orally and carry out oral instructions.
B. Skill in the use of the more common shop tools.
C. Ability to perform manual labor for extended periods under unfavorable climatic conditions or in mud or water.
D. Mechanical aptitude.
E. Ability to meet the physical, mental and visual standards of the job.
F. Ability and willingness to work in a manner that will not needlessly endanger the safety to one's self, other persons and equipment.
G. Underground excavation and heavy equipment experience preferred.

NECESSARY SPECIAL REQUIREMENT:

A. Possession and maintenance of a valid Driver's License.
B. Possession and maintenance of a valid CDL Class B Driver's License.
C. Progression in the training series to Senior Operator level is required to remain in the program. Must make continuous satisfactory progress in the training program including promotion to Operator within twelve (12) months to remain employed in the series. Operational knowledge and training progress will be assessed periodically by WSC supervision.
D. Employee must successfully complete six (6) month probationary period.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee regularly works in outside weather conditions. The employee occasionally works near moving mechanical parts and is occasionally exposed to wet and/or humid conditions, fumes or airborne particles, traffic, toxic or caustic chemicals, risk of electrical shock, and vibration. The employee is occasionally required to stand; walk; use hands to finger, handle, feel or operate objects, tools, or controls; and reach with hands and arms. The employee is frequently required to sit; climb or balance; stoop, kneel, crouch, or crawl; talk or hear; and smell. The employee must frequently lift and/or move up to 50 pounds and occasionally lift and/or move up to 100 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and the ability to adjust focus.

CITY OF FLINT

Position Description

Class Title:	Traffic Safety Maintainer	Job Code Number:	22-H-019
Established:	February 11, 1969	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: Installs and maintains permanent and temporary traffic control signs; keeps records of time, date, and place of installation; conducts field studies to determine traffic information; performs related work as required.

SUPERVISION RECEIVED: Works under the supervision of an employee of higher grade who reviews work by inspection and by review of work reports.

SUPERVISION EXERCISED: Exercises working supervision over one or more employees who assist in the performance of assigned tasks.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Assembles, installs, replaces, and repairs street or traffic signs, and pavement markings in accordance with the Michigan Manual of Uniform Traffic Control Devices.
2. Installs detour and traffic control barricades according to instructions, diagrams or plans; installs detours for construction activities, parades, special events and other restricted areas; utilizes aerial truck to install overhead signing and flags; and aids police in barricading during emergencies.
3. Uses pneumatic and hydraulic tools in the installation of signposts and signs. Makes emergency repairs of sign installation tools in the field. Maintains and repairs parts on compressor and air and hydraulic driven equipment.
4. Fabricates signs in sign shop; operates sign machine system, ramset, general machine shop tools, acetylene torch, and welding machine.
5. Installs pavement markings of various types; operates a pavement marking machine (spray gun) in applying paint to various surfaces; applies plastic pavement marking materials to various surfaces; repairs and maintains pavement marking equipment.
6. Provides records of sign installation as to date, time, and place installed for purpose of inventory and for legal reference; credits sign repairs proper work number; makes out daily report sheets of man hours utilized and sign installation work performed.
7. Answers service calls on a 24-hour basis.
8. Conducts the annual traffic count program.
9. Places, secures, and retrieves automatic traffic counters; records data to access the volume, type and movement of vehicular or pedestrian traffic at specified times.
10. Gathers date from hand count sheets, machine count tapes or radar speed checks.
11 Measures and records the speed of vehicular traffic, using electrical timing devices or radar equipment.
12. Study traffic delays by noting times of delays, the number of vehicles affected and vehicle speed through the delay area.
13. Times spotlights or other delays using a stopwatch.
14. Interviews appropriate parties about specific intersections or highways to gather road condition information for use in planning.
15. Obtains pedestrian and vehicle manual turning movement counts, conducts counts for school crossings.

ESSENTIAL DUTIES AND RESPONSIBILITIES CON'T.:

16. Study factors affecting traffic conditions, such as lighting or sign and marking visibility to assess their effectiveness.

17. Prepares work orders for repair, maintenance or changes in traffic systems.

18. Performs various duties assigned by the Supervisor.

MINIMUM ENTRANCE REQUIREMENTS:

a. At least six (6) months experience as a Utility Worker (Traffic), or at least one (1) year experience performing varied semi-skilled mechanical maintenance tasks.
b. Familiarity with the more common practices, methods, materials, and tools used in the fabrication and maintenance of signs, as well as pavement markings and painting.
c. Mechanical aptitude, including ability (any physical strength) to safely operate pavement marking machine, city vehicles and equipment.
d. Ability to read diagrams, route plans, and blueprints, including basic traffic engineering drawings.
e. Ability to understand and follow oral and written instructions.
f. Ability to maintain a variety of work-related records.
g. Ability to perform manual tasks involving physical strength.
h. Ability and willingness to work in a manner that will not needlessly endanger the safety to one's self, other persons and equipment.

NECESSARY SPECIAL REQUIREMENT:

- Possession and maintenance of a valid State of Michigan driver's license.

PHYSICAL DEMANDS: The employee occasionally works near moving mechanical parts and is occasionally exposed to wet and/or humid conditions, fumes or airborne particles, traffic, toxic or caustic chemicals, risk of electrical shock, and vibration. The employee is occasionally required to stand; walk; use hands to finger, handle, feel or operate objects, tools, or controls; and reach with hands and arms. The employee is occasionally required to sit; climb or balance; stoop, kneel, crouch, or crawl; talk or hear; and smell. The employee must frequently lift and/or move up to 25 pounds and occasionally lift and/or move up to 100 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and the ability to adjust focus. Hand-eye coordination is necessary to operate various pieces of equipment.

Vacancy Filled

CITY OF FLINT
Position Description

Class Title: Transportation Operations Manager	Job Code Number: 30-H-102
Established: June 20, 2013	Bargaining Unit: Exempt

GENERAL STATEMENT OF DUTIES

Plans, directs, coordinates, and facilitates the daily operations of the Street Maintenance and Enforcement Divisions in collaboration with Infrastructure and Development Administrators. Duties and responsibilities include formulating and implementing policies and procedures, managing daily operations, and planning the use of materials and human resources. Responsible for monitoring and tracking all activities performed in the public right-of-way including/but not limited to those conducted by in-house staff, contracted service providers, public/private partnerships, and private contractors. Routinely conducts infrastructure maintenance and preservation studies and evaluations.

SUPERVISION RECEIVED

Works under the supervision of a high level Administrator, however is allowed considerable independence of action.

SUPERVISION EXERCISED

Exercises working supervision over clerical, Street Maintenance and Enforcement Division employees to execute plans and activities on behalf of the Administrator in charge of right-of-way related activities.

ESSENTIAL DUTIES AND RESPONSIBILITIES

1. Supervise Street Maintenance and Enforcement Division employees and/or coordinate and facilitate the activities of contracted services providers.
2. Review documents, such as production schedules, work orders, or staffing rosters, to determine personnel or materials required to perform infrastructure repair projects.
3. Plan and organize production schedules to ensure work can be accomplished in a manner that improves efficiency and productivity; coordinates weekly activities of crews, provides scheduling information and site specific mobilization strategy to utilize equipment and manpower efficiently.
4. Assign work to employees based on material or worker requirements of specific jobs.
5. Direct or coordinate the Street Maintenance and Enforcement Divisions' financial or budgetary activities to fund current/future operations, maximize division potential and/or increase efficiency.
6. Analyze operations to evaluate performance of the Street Maintenance Division and its staff in order to meet benchmarks or to determine areas of potential cost reduction, project improvement or policy/ordinance changes.
7. Confer with administrators, councilpersons, city engineering, civic organizations and other county/local officials to discuss issues, coordinate activities and/or resolve problems.
8. Direct, plan or implement policies, objectives or activities with organizations and/or businesses to ensure continuing operations, and/or increase productivity.
9. Prepare activity budgets for approval, including those for funding or implementation of programs and/or projects.
10. Develops infrastructure needs assessment; prepares an annual maintenance and preservation plan that includes a mix of fixes and pricing options to extend and preserve infrastructure assets' life cycles.
11. Direct or coordinate activities of businesses or departments concerned with the implementation of a "mix of fixes" for preserving the city's current infrastructure (i.e. streets and/or sidewalks).
12. Review specifications to determine construction requirements or to plan specific job related procedures.
13. Inspect work in progress, equipment or construction sites to verify safety or to ensure that specifications are met, both for contracted services and city provided services.
14. Coordinate work activities with other construction project activities.

15. Confer with administration or technical personnel, other departments or contractors to resolve problems or to coordinate activities.
16. Prepares graphs, charts, diagrams, and similar aids to illustrate observations and conclusions; prepares pertinent analytical and written reports and statistical studies.
17. Analyze worker or productivity problems and recommend solutions, such as improving productivity methods or implementing motivational plans.
18. Provide 24 hour on-call assistance year-round for all right-of-way related emergencies.
19. During winter maintenance and while on-call, respond to either administration or police within a ½ hour period.
20. Coordinate activities to maintain a safe and hazard free driving surface during the winter months for all city streets (major, local and state trunk line).
21. Coordinate with outside entities for snow/ice removal in case of emergency.

MINIMUM ENTRANCE REQUIREMENTS:

A. Education equivalent to graduation from a two (2) year college; course work including a course in college algebra, and preferably including a course in statistics; or five (5) years experience in the performance of responsible and difficult Transportation related activities, including supervisory responsibilities.
B. Working knowledge of equipment, methods, and terminology used in a Transportation environment.
C. Working knowledge of basic statistical procedures; ability to compile statistics, to analyze data, and to present data in graphic form.
D. Ability to carry out routine administrative and supervisory detail, independently.
E. Ability to courteously interact with the public and to establish and maintain effective relations with administrators, City workers, and outside agency personnel.
F. Ability to use computer software as related to office practices including electronic word processing, database, and spreadsheet packages.
G. Ability to keep involved records; to assemble and organize data; and to prepare effective reports from such data.
I. Ability to make decisions independently in accordance with rules, regulations, and departmental policies and procedures.
J. Ability to understand and effectively carry out oral and written instructions.

PHYSICAL DEMANDS;

While performing the duties of this job, the employee is frequently required to sit and talk, or hear. The employee is required to walk; use hands to finger, handle, or feel objects, tools, or controls; and reach with hands and arms.

The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision and the ability to adjust focus.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

CONTRACT FOR EMERGENCY MANAGER SERVICES

Rick Snyder, Governor of the State of Michigan (Governor) and the Michigan Department of Treasury retain and appoint Darnell Earley as the Emergency Manager (Emergency Manager) for the City of Flint (City) under Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq*, (the Act).

The Emergency Manager will provide services to the City pursuant to the terms and conditions set forth in this Contract and the Act.

The Emergency Manager's role is to remedy the financial distress of the City by requiring, within available resources, prudent fiscal management and an efficient provision of municipal services by exercising the necessary authority conferred herein to take appropriate action on behalf of the City and its residents. In accepting this appointment, the Emergency Manager agrees to leverage all the Emergency Manager's skills and abilities to accomplish these objectives on behalf of City residents.

1. PARTIES, PURPOSE, DUTIES, AND REPORTS

1.1 Parties. The parties to this Contract are the State of Michigan by the Department of Treasury and Darnell Earley.

1.2 Purpose. The parties to this Contract agree that Darnell Earley will act as the Emergency Manager for the City. The Emergency Manager's duties and responsibilities are delineated in the Act and include conducting all aspects of the operations of the City and establishing and implementing a written financial plan as required by Section 11 of the Act.

1.3 Duties. The Emergency Manager shall possess all the powers and duties authorized under the Act, including those specifically related to local governments. In addition, the Emergency Manager shall work cooperatively with the Office of the Governor and the State Treasurer. The Emergency Manager agrees to continue to keep these officials informed of major initiatives to be undertaken in furtherance of this Contract before their public announcement. The Emergency Manager shall seek the approval of the State Treasurer before entering into a new collective bargaining agreement.

1.4 Reports. The Emergency Manager shall file quarterly reports with the Department of Treasury beginning on January 15, 2014, for the immediately preceding quarter and shall file the first report required by Section 17 of the Act within six months of the Emergency Manager's appointment and every three months thereafter.

1.5 Communications. The Emergency Manager shall establish and maintain an appropriate protocol for ongoing communications with officials of the City, City residents, and the media. The communications protocol should include a variety of means, including personal interactions.

2. TERM OF CONTRACT

2.1 The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act.

2.2 Effective Date. This contract is effective on Tuesday October 8, 2013.

3. COMPENSATION FOR SERVICES PROVIDED

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to this Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

4. ADDITIONAL STAFF AND CONSULTANT FEES

4.1 Staff. The Emergency Manager may, as provided in the Act, appoint additional staff as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional staff will be the obligation of the City. While authority to hire additional staff rests with the Emergency Manager, the Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before extending offers of employment for positions paying $50,000.00, or more, annually. The Emergency Manager shall issue a written employment contract to each individual hired pursuant to this Section, regardless of the compensation paid to that individual. The employment contract

issued pursuant to this Section shall, as of the date the individual is hired by the Emergency Manager, prohibit the individual from engaging in any other employment for remuneration without the express written approval of the Emergency Manager. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before approving outside employment for any individual. A breach of this Section shall be a material breach of this Contract.

4.2 Professional Assistance. The Emergency Manager may, as provided in the Act, secure professional assistance as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional professional assistance will be the obligation of the City. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before authorizing professional services contracts of $50,000.00, or more, per engagement or project. If a contract under this Section, or under Section 4.1, has a value of $50,000 or more, the Emergency Manager shall not execute the contract unless the contract is subject to competitive bidding by the Emergency Manager or the Emergency Manager receives prior written approval from the State Treasurer.

4.3 Security. The Emergency Manager will be entitled to receive security protection in connection with the Emergency Manager's duties under this Contract. Security personnel will be retained only upon the approval of the State Treasurer, or the designee of the State Treasurer, and only after consultation with the Director of the Michigan Department of State Police, or the designee of the Director of the Michigan Department of State Police. Payment of compensation for security personnel will be the obligation of the City.

5. REPRESENTATIONS

5.1 Qualifications. By signing this Contract, the Emergency Manager, represents that the Emergency Manager meets the minimum qualifications for appointment set forth in the Act. The Emergency Manager shall perform the duties of that office on a full-time basis, except as otherwise approved by the State Treasurer, and shall not accept any other employment or engage in any other activity for remuneration without the express written approval of the State Treasurer.

5.2 Conflict of Interest. The Emergency Manager represents and warrants that the Emergency Manager has no personal or financial interest, and will not acquire any such interest, that would conflict in any manner or degree with the performance of this Contract.

5.3 Non-competition. The Emergency Manager represents and warrants that the Emergency Manager is not subject to any non-disclosure, non-competition, or similar clause with current or prior clients or employers that will interfere with the performance of this Contract. The State will not be subject to any liability for any such claim.

5.4 Facilities and Personnel. The City will provide the Emergency Manager with proper facilities and personnel to perform the services and work required to be performed pursuant to this Contract.

5.5 Records. The Emergency Manager shall maintain complete records in accordance with

generally accepted accounting practices and sound business practices. This requirement applies to all information maintained or stored in the computer system of the Emergency Manager or computer system of the City. The State Treasurer and his designees shall have the right to inspect all records related to this Contract.

5.6 Non-Discrimination.

a) The Emergency Manager shall comply with Public Act 220 of 1976, the Persons with Disabilities Civil Rights Act, MCL 37.1101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of a disability that is unrelated to the individual's ability to perform the duties of a particular job or position. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

b) The Emergency Manager shall comply with Public Act 453 of 1976, the Elliott-Larsen Civil Rights Act, MCL 37.2101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of race, color, religion, national origin, age, sex, height, weight, or marital status. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

5.7 Unfair Labor Practices. The Emergency Manager shall not enter into a contract for the performance of any obligation imposed by this Contract with a subcontractor, manufacturer, or supplier whose name appears in the register prepared pursuant to Public Act 278 of 1980, MCL 423.322, of employers found in contempt of court for failure to correct unfair labor practices. The State may void this Contract if the Emergency Manager, or any subcontractor, manufacturer, or supplier of the Emergency Manager that is a party to a contract for the performance of any obligation imposed by this Contract, appears in the above mentioned register.

5.8 Independent Contractor. The relationship of the Emergency Manager to the State and to the City under this Contract is that of an independent contractor. Except as specifically provided in the Act, no liability, benefits, workers compensation rights or liabilities, insurance rights or liabilities, or any other rights or liabilities arising out of, or related to, a contract for hire, nor employer-employee relationship, shall arise, accrue, or be implied to either party under this Contract or to an agent, subcontractor, or employee of either party under this Contract, as a result of the performance of this Contract.

6. NOTICES

6.1 The State Treasurer is the designee for this Contract unless notice of another designa-

tion is provided by the Governor. All notices, correspondence, requests, inquiries, billing statements, and other documents mentioned in this Contract shall be directed to the attention of the State Treasurer, Andy Dillon, and to the following:

For the State:

Michigan Department of Treasury
Office of Legal Affairs
Richard H. Austin Building, 430 West Allegan Street
Lansing, Michigan 48922
Phone: (517) 373-3223

For the Emergency Manager:

Darnell Earley
Flint City Hall
1101 South Saginaw Street
Flint, Michigan 48502

7. LIMITATION UPON LIABILITY

7.1 The State. The State, the Governor, the State Treasurer, and all other State officials are not liable for any obligation of or claim against the City resulting from actions taken in accordance with the Act or this Contract.

7.2 The Emergency Manager. Pursuant to the Act, in performing this Contract the Emergency Manager is engaging in a governmental function and is immune from liability for any action taken which the Emergency Manager reasonably believes to be within the scope of the Emergency Manager's authority granted by the Act or by this Contract.

8. INSURANCE

8.1 General. The Emergency Manager may procure and maintain, at the expense of the City, health, worker's compensation, general liability, professional liability, and motor vehicle insurance for the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager as may be provided to elected officials, appointed officials, or employees of the City. The insurance procured and maintained by the Emergency Manager may extend to any claim, demand, or lawsuit asserted or costs recovered against the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager to the extent permitted by the Act.

8.2 Post-Contract. If, after the date that the service of the Emergency Manager is concluded, the Emergency Manager or any employee, agent, appointee, or contractor of the Emergency Manager is subject to a claim, demand, or lawsuit arising from an action taken during the service of the Emergency Manager, and not covered by a procured insurance policy, litigation expenses, including but not limited to attorney fees, payments in satisfaction of judgments, and

payments made in settlement as specified pursuant to the Act, shall be paid by the City. If such expenses are not paid by the City, they shall be treated as a debt owed to this State pursuant to section 17a(5) of Public Act 140 of 1971, the Glenn Steil State Revenue Sharing Act of 1971, MCL 141.917a.

8.3 Additional Insurance. If the City has purchased, or otherwise obtained, an errors and omissions policy, then the Emergency Manager may choose to be covered under such policy at the expense of the City.

8.4 Payment by City. All insurance required under this Contract shall be acquired at the expense of the City under valid and enforceable policies, issued by insurers of recognized responsibility. The State Treasurer reserves the right to reject as unacceptable any insurer.

9. TERMINATION OF CONTRACT AND APPOINTMENT

9.1 Termination by the State.

a) The State. The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act. The Governor has the power to rescind the appointment and terminate this Contract at any time, and without cause, by issuing a Notice of Termination to the Emergency Manager.

9.2 Termination Process. Upon receipt of a Notice of Termination, and except as otherwise directed, the Emergency Manager shall:

a) Cease work under this Contract upon the date and to the extent specified in the Notice of Termination;

b) Incur no costs beyond the date specified by the Notice of Termination;

c) Submit to the State Treasurer on the date the termination is effective all records, reports and documents as this State shall specify and carry out such directives as the State Treasurer may issue concerning the safeguarding and disposition of files and property; and

d) Submit within 30 calendar days a closing memorandum and final billing, which shall be paid within 30 days.

9.3 Termination by Emergency Manager. The Emergency Manager may terminate this Contract at any time, with or without cause, with 30 days written notice to the State Treasurer. Within 30 days of the Emergency Manager's final day of service, the Emergency Manager shall submit a closing memorandum and final billing, which shall be paid within 30 calendar days.

10. GENERAL PROVISIONS

10.1 Governing Law and Jurisdiction. This Contract shall be subject to, and construed according to, the laws of the State of Michigan, and no action shall be commenced against this State,

its agents, or employees for any matter whatsoever arising out of this Contract, in any court other than a Michigan State court.

10.2 No Waiver. A party's failure to insist on the strict performance of this Contract shall not constitute waiver of any breach of the Contract.

10.3 Other Debts. The Emergency Manager represents and warrants that the Emergency Manager is not, and will not become, in arrears on any contract, debt, or other obligation to the State of Michigan, including taxes.

10.4 Invalidity. If any provision of this Contract or its application to any persons or circumstances shall, to any extent, be determined by a court of competent jurisdiction to be invalid or unenforceable, the remainder of this Contract shall not be affected, and each remaining provision of this Contract shall be valid and enforceable to the fullest extent permitted by law.

10.5 Headings. Section headings contained in this Contract are for convenience only and shall not be used to interpret the scope or intent of this Contract.

10.6 Entire Agreement. This Contract represents the entire and exclusive agreement between the parties and supersedes all proposals or other prior agreements, oral or written, and all other communications between the parties.

10.7 Amendment. No Contract amendment will be effective and binding upon the parties to this Contract unless the amendment expressly makes reference to this Contract, is in writing, and is signed by duly authorized representatives of all parties and all the requisite State approvals are obtained.

10.8 Order of Priority. This Contract and the Act shall be read to be consistent one with the other. However, if a conflict is deemed to exist between the terms of this Contract and the Act, the Act shall supersede the terms of this Contract.

10.9 Counterparts. This Contract may be executed in separate counterparts, each of which when executed shall be deemed an original, but all of which when taken together shall constitute one and the same Contract.

IN WITNESS WHEREOF, the Governor and the Emergency Manager have signed and executed this Contract.

STATE OF MICHIGAN

Dated: 10/2/13

Rick Snyder, Governor

Dated: 10-3-13

Darnell Earley, Emergency Manager

Approved as to form and content pursuant to Section 9(3)(e) of Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq.*

Dated: 10/3/13

Andy Dillon, State Treasurer

(g) The salary and benefits of the emergency manager.

Salary and Benefits of the Emergency Manager:

Per the Emergency Manager's Contract Section 3. Compensation For Services Provided

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to the Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

(h) The financial and operating plan as required under section 11. Update #7 to the Financial and Operating Plan for the City of Flint.

Financial and Operating Plan for the City of Flint – Update 7
October 8, 2014

Introduction

This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City, the on-going actions being taken to resolve the financial emergency, and the outline of a plan to prepare for an eventual transition as prescribed in P.A. 436. This update will be posted on the City's website: www.cityofflint.com .

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan

The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. (See Attachment #1)

On December 1, 2011 Governor Rick Snyder appointed Michael K. Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. All nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under P.A. 72. (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of P.A. 72. Utilizing the Advisory Committee and the City of Flint management team, EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013.

When P.A. 436 took effect on March 28, 2013 Mr. Kurtz was re-appointed by Governor Snyder as Flint's Emergency Manager. Mr. Kurtz continued in that capacity until his resignation after the end of fiscal year 2013. At that time Mr. Kurtz submitted his closing

memorandum and the third update to the Financial and Operating Plan. Governor Snyder then reappointed Mr. Brown as Emergency Manager. On October 8, 2013 I was appointed by Governor Snyder as Flint's fifth Emergency Manager following Mr. Brown's resignation. On November 21, 2013 I submitted the 45 Day Plan as required by P.A. 436 Section 11(2); that plan became Update #4. The fifth and sixth updates to the Financial and Operating Plan fulfilled P.A. 436, Section 17 six month and subsequent three month report requirement.

This report, indicated as Update #7, again fulfills P.A. 436, Section 17 requirement for an update each subsequent three months.

Priority List for the Resolution of the Financial Emergency

- Stabilize the financial future of the City: maintain a balanced budget, eliminate the accumulated General Fund deficit, seek increased revenue, and reduce unfunded pension and OPEB liability.

- Re-establish Flint as one of the safest cities in Michigan — both in reality and perception: provide public safety services, focusing on reducing violent crime, commensurate with cities of comparable size and resources, utilizing regional cooperation as appropriate. This includes implementation of the plan for the Flint 9-1-1 Center to join the Genesee County 9-1-1 Consortium.

- Implement the Blight Elimination Plan: manage demolitions, enforce blight ordinances.

- Maintain access to a clean, sustainable water source: implement the steps necessary to participate in the Karegnondi Water Authority (KWA) including interim water supply implementation, disposition of current pipeline sections, City Water Treatment Plant updates, a long term water supply back up plan, and a long term financial plan for the stability of the water and sewer funds.

- Implement the Master Plan of the City of Flint: update the Zoning Ordinance, evaluate the capital investment needs, and incorporate Master Plan activities in the annual budget development.

- Explore Governance Models for the City of Flint: receive report from the citizen's committee which was formed to evaluate city governance models, recommend course of action for Charter revision as a part of transition discussions.

- Implement the 7 Point Transition Management Plan (Attachment #2) which has been adopted by the Flint City Council and Mayor Walling. This Plan incorporates specific objectives which provide a strategy for determining and evaluating criteria for assessing when the City might be prepared to emerge from emergency management to home rule order with oversight of a Receivership

Transition Advisory Board. This plan has been further refined with a chart encompassing specific implementation steps and completion dates.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman.

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided, and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget. Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart July 2014). I have made personnel adjustments to complete this reorganization of the Planning and Development Department.

The FY14/15 and FY15/16 biennial budget has been adopted. This year the budget process involved over 30 hours of active participation by the Mayor and the City Council Finance and Administration Committee sitting as the committee of the whole. As part of this process the Council adopted a five year Strategic Plan and a list of priorities for the development of the two year budget. This document has been updated to show the progress which has been made in each of the department level objectives (See Attachment #4 Strategic Plan of the City of Flint 2015-2019 1st Quarter Update).

When P.A. 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members were required to complete Level One of the Michigan Municipal League (MML) core course for municipal government and receive the MML education award within one year. I determined that this Order was still in effect, and the Council members all individually signed acceptance of these requirements as a condition of receiving compensation. Mayor Walling has fulfilled these obligations. All Council members have begun, but not yet fulfilled these obligations. Through adoption of EM Orders 15 and 16, beginning with the FY14/15 budget, the Mayor and Council received an increase in compensation commensurate with the increased duties assigned to them.

All Orders and Directives issued by the Emergency Financial Manager (under P.A. 72) and Orders issued by the Emergency Manager (under PA4 and P.A. 436) are listed in Attachment #5: Orders and Directives of the EFM and EM.

The 7 Point Transition Management Plan which emphasizes re-engagement of the Mayor and City Council has been a top priority. The Council is meeting monthly on a regular basis; five Council Committees are operational: Finance/Administration, Legislative, Public Works, Public Safety, and Planning and Development. Each Committee is meeting regularly and then reporting at the following Council meeting. Order 8 was issued in March 2014 and defines format of action and participation at the Council meetings. Order 9 established monthly Council and Committee meetings; and Order 10 set the format of the Council meeting agenda. Additionally, Mayor Walling has been assigned day to day oversight of the Department of Public Works and the Department of Planning and Development. These steps as outlined in the 7 Point Transition Management Plan are part of preparing the City to resume local control under a Receivership Transition Advisory Board.

The 7 Point Transition Management Plan has been further refined through the development of a chart entitled: *Steps to Prepare for Transition from Emergency Manager to Receivership Advisory Board.* This chart has set target completion dates for essential steps necessary to prepare for this transition (Attachment # 2).

Financial Status

FY12 Budget and Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the State in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits existed in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $10.2 million plus $8.9 million for FY11. This was anticipated by Emergency Manager Brown shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year.

Pursuant to State statute, Deficit Elimination Plans for both FY11 and FY12 were submitted to the Department of Treasury. Both plans involved a mix of borrowing and expenditure reductions over the next five years. However, no final action was taken to implement the intended courses of action.

FY13 Budget and Audit

FY13 was the first budget developed and administered by the Emergency Manager and his team. Faced with a projected gap of more than $25 million, the FY13 budget was balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Previous reports detail the 25% increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, conversion of the waste collection millage to a fee and the creation of a special assessment for street lighting, elimination of 20% of the City's workforce, compensation decreases equivalent to a 20% wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

Results of FY13 year end show a surplus of revenues over expenses in the General Fund exceeding $6.2 million. This surplus reduced the City's accumulated $19.1 million deficit as of the end of FY12 to less than $12.9 million. Since the goal of the EM team was to assure that FY13 would not end with any additional deficit, this result significantly exceeded expectations.

The FY13 audit was completed and submitted to Treasury on December 20, 2013. All items surrounding the audit, including submission of the Form F-65 and Comprehensive Annual Financial Reporting Program were completed by December 31, 2013. The audit was presented to City Council as well on January 13, 2014.

FY 14 Budget and Strategic Plan

The FY14 budget was adopted via Emergency Manager Edward Kurtz Order #4 on June 7, 2013. This budget was developed with the same goal as FY13 – to assure the provision of essential services within the constraint of a balanced budget and continued deficit reduction. Accordingly, the FY14 budget included a $1.0 million commitment from the General Fund to further reduce the deficit. This is considered a minimum level of deficit reduction.

The Emergency Manager's team, crafted a draft strategic plan in preparation for the FY14 budget development. Vision, Mission and Goals were established for the City government. Department managers then set specific, measurable objectives. Within the strategic plan was a five year financial projection.

Achieving the balanced budget again required reducing the workforce; however, with significant efforts from department heads and others involved in developing the budget, and building on ongoing reorganization of city processes, the level of services currently provided generally continued at FY13 levels. Most importantly, the quest to at least maintain FY13 levels of police and fire staffing was achieved, although one consequence was that the additional reductions in staffing came from non-public safety areas. This was equivalent to an additional 10% reduction of staffing in those areas.

As the city has reached the end of FY14, the unaudited close shows a General Fund balance of more than $4 million of revenue over expenses; this balance will be applied to the deficit as planned. One set of budget adjustments, with approval of Treasury was implemented in December 2013. A second budget adjustment was approved by Treasury and was adopted on April 3, 2014. The closing budget amendment was approved by resolution on June 25, 2014.

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on August 2014 was in excess of $60 million.

Deficit Elimination Plan 2014

A deficit elimination plan which also incorporates a reserve accumulation plan was approved by the Department of Treasury and was adopted by EM Order 18 on July 15, 2014. The City recognizes that a goal needs to be set to develop a reserve equal to 15% of General Fund revenues. This is one of many financial best practices which the City will incorporate to assure a sustainable municipal model. As of June 30, 2014 the deficit stands at approximately $9 million. In budget years FY15-FY20, $1.8 million will be allocated each year which will eliminate the deficit without need for borrowing.

FY 15-19 Strategic Plan and FY 15/FY 16 Budget

The FY14 budget was developed within the context of an updated five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee developed the FY15-19 strategic plan and financial projections. The City Council has adopted a Strategic Plan which included Mission, Vision, Goals and a Budget Priorities statement (Attachment #4: Strategic Plan of the City of Flint 2015-2019 1st Quarter Update). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections.

The EM, in concert with the Mayor, developed a two year budget for FY15 and FY16. The goal continued to be to provide the best level of service possible within available resources while continuing to restore financial solvency. It is clear that in balancing these budgets the City will continue to be faced with addressing an on-going structural deficit; and the biggest challenge by far remains the outcome of the retiree health care lawsuit.

The City Council received the recommended two year budget April 30, 2014. The Finance/Administration Committee (sitting as the committee of the whole) used the first two weeks of May to hold five meetings on specific program areas. At the conclusion of the departmental reviews the Council send a list of budget revision

proposals to me. Several of the recommendations were incorporated into the revised budget. The Council then held a public hearing on June 9, 2014.

This budget does include significant staffing reductions in public safety. In the two prior budgets other General Fund departments were reduced in size, combined, or contracted services. For this budget cycle, there were no other General Fund areas to reduce, except public safety services.

The targeted personnel reductions in public safety will not result in lay-offs prior to December 31, 2014. In the interim, the City has contracted for a comprehensive study of the police and fire operations. Based on the results of this study, and the managed attrition reductions, the personnel levels in both Police and Fire will be re-evaluated.

The State budget which begins October 1, 2014, contains an appropriation of $1.1 million for use in Flint's public safety departments. The boilerplate of the State budget includes:

> *The appropriation of $1,100,000.00 in part 1 for the city of Flint shall be allocated to support city police and firefighters. The emergency manager shall determine which public safety personnel are to be funded from this award. If the city has an appointed receivership transition advisory board, then that board is vested with the authority to make the determination of which personnel are funded from this award.*

The City is grateful to receive this funding and will use this to implement the recommendations of the Public Safety study which will be concluded in October 2014.

The Emergency Manager's Order 13 adopted the biennial budget; Order 11 adopted the street lighting assessment for FY2015 and FY2016; Order 14 adopted the Strategic Plan; Resolution EME3302014 adopted the FY2015 and FY2016 Master Fee Schedule (which includes water and sewer rates, and waste collection fee); Resolution EME3312014 adopted the 2014 and 2015 operating millage rates (Attachment #6 FY15 & FY16 Biennial Budget).

I additionally note that Mayor Walling and the City Council have been fully engaged with City staff and me as this two year budget was developed. Also, as part of FY15, the day-to-day management of the Public Works Department and the Planning & Development Department will be handled by Mayor Walling.

Five Year Projection

FY15/FY16 budgets include more than $5 million each year in increased retiree health care, as a result of Judge Tarnow's injunction. FY15 & FY16 is balanced, but projections for FY17 indicate a deficit between projected revenues and status quo expenses of $5 million. If there is no relief from the $5 million in increased retiree health care expenses, or no new revenue source, balancing the FY17

budget without compromising the City's ability to provide even the most basic level of city services - including public safety, will most likely not be possible.

Retiree Health Insurance Revisions

The City's approach to containing its OPEB liabilities has been to restructure both active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million.

As previously reported, the City's effort to restructure retiree healthcare was challenged by a group of retirees in a federal lawsuit, *Welch v City of Flint.* On January 3, 2014, the U.S. 6th Circuit Court of Appeals reinstated an injunction prohibiting the City from modifying retiree health care benefits. The City is aggressively litigating this matter, as it does not have the resources to afford the current level of healthcare coverage, and projected cost increases for the upcoming fiscal years are substantial. If the federal district court's decision is not reversed, the City will be in an extremely precarious financial position, with insufficient resources to meet basic functions

The City is working to comply with the court's order, beginning with establishment of a reimbursement program for retirees whose expenses since January 3, 2013 are greater than their old plans. Work is also proceeding in anticipation of a court hearing sometime in the future, and settlement options are being explored.

On June 30, 2014 Judge Tarnow issued an order modifying in part his preliminary injunction barring the City from modifying retiree health care benefits. The Judge's order now permits the City to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

While the details of the Judge's recent order are still being reviewed, and while the details of implementing the order are still being developed, it appears that the ruling will have a positive financial impact on the City, at least for the period while the litigation continues.

Otherwise, the City is utilizing the services of Cornerstone Municipal Consulting in ongoing review of various Employee/Retiree health care options including plan design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs. Administration of the City's health insurance benefits program is being handled by Cornerstone. In addition to the retiree lawsuit, attention is now focused on minimizing the City's cost for health care (for current employees and retirees) in the FY15 and FY16 budgets.

Operating Plan

The city continues to review all departments and services to reduce costs through contract rebidding, merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews the City will determine what continuing activities should be subsidized with general property tax dollars, what will be paid by the users, which services can be eliminated, and which services or activities can be handled by lower cost vendors.

The functions, goals and key objectives of each department and functional area of the City of Flint have been encompassed in the Flint Strategic Plan 2015-2019. This plan also contains target dates for completion of each key objective. (Attachment #4: Strategic Plan for the City of Flint 2015-2019: 1st Quarterly Report)

The progress made in this past first quarter of FY15 is presented in Attachment #4 and includes the narrative and the Strategic Plan with all objectives updated to the current status.

Major Up-coming Activities

68th District Court

- The City currently funds the operation of the 68th District Court; in FY14 this amounted to $3.5 million net. Senate Substitute for House Bill 5125 passed the Senate and the House in March 2014. The Bill authorizes consolidation of the 67th and 68th District Courts. It requires that the consolidation be approved by the City and the County. The County approval requires the affirmative vote of at least two-thirds of the County Board members. I strongly encourage the State to continue the process of working to consolidate the 67th and 68th District Courts; the City of Flint will work to support this consolidation.

9-1-1 Operation

- On September 9, 2014 the Genesee County 9-1-1 Consortium voted to admit the City of Flint as a member of the Consortium. The goal to complete the incorporation of the Flint 9-1-1 Center operation into the Consortium is June 30, 2014. As part of this process the City of Flint will contribute $325,000 toward the $1.2 million cost for new equipment and building expansion at the Consortium's Corunna Rd. location. The City will also transfer the ownership of the simulcast tower which is currently under construction. The City will also provide a no cost lease for the area on which the tower stands. The $325,000 is currently allocated for the Flint 9-1-1 phone system upgrade. This upgrade will not be required with the joining of operations.

Public Safety

- A data-driven public safety study to assess the operations of the City's Police and Fire Departments began in May 2014 utilizing the services of the Center for

Public Safety Management. This report is due in October 2014 and will be used to evaluate both departments' organization and staffing.

7 Point Transition Plan

- Within the next quarter the selection process will be completed to hire a City Administrator.

- Six ballot initiatives, which were recommended by the Blue Ribbon Committee, will be voted on during the November general elections. The first proposal begins the process to open the current Charter for a complete review:
  PROPOSAL 1 GENERAL REVISION OF CITY CHARTER
  Shall there be a general revision of the city charter?

- These five initiatives are amendments to the current Flint City Charter:
  PROPOSAL 2 AN AMENDMENT TO REDUCE THE NUMBER OF MAYORAL PRINCIPAL STAFF APPOINTMENTS
  Shall the Flint City Charter Section 4-202(A) and (C) be amended by reducing the number of Mayoral principal staff appointments for legal counsel and administrative services from no more than ten (10) to no more than five (5)?

  PROPOSAL 3 AN AMENDMENT TO REQUIRE BUDGETARY BEST PRACTICES
  Shall the Flint City Charter be amended to provide that the annual budget presented to Council shall be accompanied by a budget message explaining the budget, to provide for multi-year financial plans and revenue projections and the establishment of a budget stabilization fund?

  PROPOSAL 4 AN AMENDMENT TO ELIMINATE FLINT CITY CHARTER SECTION 4-203(A), EXECUTIVE DEPARTMENTS
  Shall the Flint City Charter be amended by eliminating Section 4-203(A), which would eliminate the requirement for specific executive departments?

  PROPOSAL 5 AN AMENDMENT TO ELIMINATE THE CIVIL SERVICE COMMISSION
  Shall the Flint City Charter be amended by eliminating Section 5-101 through Section 5402, which would eliminate the Civil Service Commission?

  PROPOSAL 6 AN AMENDMENT TO ELIMINATE THE OFFICE OF THE OMBUDSMAN
  Shall the Flint City Charter be amended by eliminating Section 3-501 through Section 3-517, which would eliminate the Office of the Ombudsman?

Facilities Management

- The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

- All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The whole organization has been being restructured to reflect a smaller, leaner government operation. Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions which can increase efficiencies are being implemented.

The many improvements to-date and those represented in the Strategic Plan have been based on data-driven management plans. The approval of the KWA participation, water and sewer rates, capital improvements, departments staffing and priorities are all based on using rational data analysis. Collecting, analyzing and then utilizing data concentrates work and dollars where the most beneficial results can be expected.

I acknowledge that substantial progress has been made, however the City is still experiencing an on-going financial emergency. Resolution of the financial emergency will not be complete without providing a basic framework for, and implementation of, an objective model for the organization to follow.

A sustainable municipal organization incorporates the utilization of best practices financially, structures a governance model which clearly delineates between legislative, policy, and administrative responsibilities, and develops a management plan to provide services to residents in a consistent, reliable manner.

The 7 Point Transition Management Plan and the steps to Transition Chart which I have developed provides the roadmap to resolve the financial emergency and to achieve sustainability for the City of Flint.

For two years, FY13 and FY14, the goal of containing overspending has been achieved. The city must continuously function within a balanced budget, eliminate the accumulated deficit and further reduce the legacy and pension costs. Projections through 2019 demonstrate Flint's continuing challenges. Projecting current revenues and expenses into the future shows a continuing gap of $2 to $4 million annually.

Stable revenue is necessary in order for this City, and most other cities in Michigan, to continue to avoid a bankruptcy situation. We have asked our residents to accept a significant 6 mill Police and Fire Protection Millage; and they have done so. We have imposed a street lighting assessment, a waste collection fee and significant water and

sewer rate increases. However, our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options. We are approaching the limit of the City's borrowing capability. Capital improvement funds are fully committed and the property tax millage rate in within .1 mill of maximum. State Revenue Sharing has increased but minimally and is now tied to EVIP and competitive granting. We have made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill has been introduced but has not been acted upon.

While the City will benefit from the temporary revision of Judge Tarnow's order on retiree healthcare, it is important to remember that this lawsuit continues. Final resolution in the lawsuit will determine if the financial emergency is resolved or if it will force the City to consider bankruptcy. Bankruptcy is the alternative which we have worked diligently to avoid. If, by the beginning of FY17 the City of Flint does not receive permanent relief from retiree health care costs, either in the form of reduced city expenditures or additional revenues, it is unlikely that the City will be able to provide even the most basic level of city services.

I do not recommend beginning the transition back to the Mayor/Council management of the City at this time. However, I expect the overall situation to become much clearer in the next three to six months, given the plans and organizational changes which have been put in place. The City still has critical on-going budgeting issues. There has been action on several sections of the 7 Point Transition Management Plan, but more needs to be completed. Also, the City Council is still required to complete the Michigan Municipal League Level 1 Certification as required by Order 2 (04/12/13). So far, only Mayor Walling has met this requirement.

Flint has twice been placed in the hands of a State appointed emergency manager. A third failure should be avoided at all costs. The Blue Ribbon Committee on Governance, which I appointed in January 2014, completed their evaluation of governance revisions needed in the City. The Blue Ribbon Committee's final report (http://www.cityofflint.com/FinancialMgr/2014/IMAGES/BRC%20Final%20Report%20071714.pdf) recommended five amendments to the current Charter; these proposals have been placed on the November ballot. They also recommended return to the Council-Manager form of government. This can be achieved through a multi-step process, beginning with the approval of the Flint voters to agree to a general revision of the City Charter. This proposal has also been placed on the November ballot.

I have now spent one year as Emergency Manager in Flint. Many major steps have been taken to resolve the financial emergency. Flint is on a much more stable footing than it was three years ago. However, the level of services being provided to the citizenry is at a minimal level, at best. I feel strongly that it is incumbent upon me to make sure that the

city reaches it goal of sustained financial solvency. The financial emergency is not fully resolved until the long-term sustainable structure is secured.

Another update of this report is expected to be presented in January 2015 as required by P.A. 436. Other updates will be provided as appropriate.

Respectfully submitted,

Darnell Earley, ICMA-CM, MPA
Emergency Manager
Flint, MI

Attachment 1. Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team
November 2011

- The City has a general fund deficit of$14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of$7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

Attachment 2. 7 Point Transition Management Plan and Transition Status Chart

7 Point Transition Management Plan

Goal: To provide a strategy for determining and evaluating relevant and specific criteria for assessing when the City of Flint might be prepared to emerge from Emergency Manager (EM) oversight to a Transition Advisory Board (TAB), as provided in Public Act 436. The seven points identified provide comprehensive and well defined benchmarks to be reviewed before the determination is made. The Plan also defines a data-driven and measurable process for the objective, results-oriented determination of facts. The Plan establishes the criteria now so that it is clear what the conditions are that will have to be satisfied before the Emergency Manager recommends the establishment of a Transition Advisory Board.

GOAL	STRATEGY	OBJECTIVES	STATUS
1. Deficit Elimination Plan	Deficit Elimination Plan and Reserve Accumulation Plan will be presented by the EM/Mayor/Finance Dir. to City Council through its Finance Committee to receive Council support. Also a commitment by the Mayor and Council to implement the plan will be required.	City Council to pass resolution of support for DEP/RAP from EM/Mayor/Fin. Dir. Receive Treasury acceptance of the DEP/RAP. Confirmation by Mayor and Council that DEP/RAP actions will be a top priority in budgeting.	_____ _____ _____
2. Five-Year Financial Analysis	The development, monitoring and updating of a five-year financial analysis is critical to the ongoing challenges of financial solvency. It must remain an ongoing process to measure the City's ability to fund services, produce budgets, and proactively manage expenditures. It should be an expectation of the Council that the EM/Mayor/Fin. Dir. shall annually prepare and Council shall review and adopt said projection; and shall continue to use the projection as a basis for future budgeting actions.	EM/Mayor/Fin. Dir to annually prepare a 5 yr. R/E projection. Council Finance Committee review 5 yr. analysis and move to Council. City Council adopts 5 Year Analysis. Finance Committee shall annually review analysis in February each year and send to Council for approval.	_____ _____ _____ _____
3. Governance	The EM will consider recommendations from the Blue Ribbon Committee, National Civic League Model Charter, proposed charter amendments, review of electoral structure, Executive appointments, etc. It is expected that a formal agreement would be reached among the EM, Mayor, and Council as to what governance revisions are to be implemented, including time frames for implementation.	Blue Ribbon Cmte. Complete Report and Submit to EM Mayor and Council Submit Comments on Report to EM EM developes proposed governance structure and sends to Governor. Mayor and Council have an opportunity to review and comment on EM proposal. Completion of City Ordinance review by Council as proposed by EM.	_____ _____ _____ _____ _____

GOAL	STRATEGY	OBJECTIVES	STATUS
4. Organization Development	Review the City's organizational structure including: Public Safety, 9-1-1 plan, courts consolidation plan, recommendations on other long-term services, and role of the city administrator (who will be appointed prior to the TAB). Finalize the organizational relationship among Mayor, Administration and Council. This will result in an agreed upon detailed description of the roles and responsibilities of the Mayor and Council, including items such as respective roles in strategic planning, budgeting, monitoring and assessment of results, appointments, and protocols for addressing citizen complaints.	EM/Mayor determines recommended City organizational structure. EM/Mayor to recommend Council action (ordinance changes) to implement organizational structure. Council to review and adopt revised organizational structure. EM/Mayor to hire City Administrator/Manager. Finalize organization structure and roles: Mayor, Council, Administration. Labor contracts to be completed for all City unions	_____ _____ _____ _____ _____ _____
5. Legacy Costs	Retiree Health Care remains the biggest challenge to managing legacy costs and the City is currently facing a legal challenge. It will be unlikely that the financial emergency will be declared resolved until this issue is settled in a manner which does not risk the solvency of the City. Sustaining the changes within RHC are essential to the City's future solvency.	Mayor and Council to support City's position on retiree health care or adopt measures offsetting the increased costs. Annual budgets to include payment of appropriate pension and health care costs and liabilities.	_____ _____
6. Strategic Plan	The adoption of a long-range strategic plan by the Emergency Manager, Mayor, and Council for the governing actions of the City will provide a guidance mechanism for determining budgeting, priorities, goals and objectives.	EM/Mayor/Fin. Dir. to present 5 yr Strategic Plan through Finance Cmte. to Council for approval. Council to set spending priorities. EM/Mayor to utilize Strategic Plan to develop budget. Council to adopt budget in line with Strategic Plan and budget priorities. Council to receive quarterly reports from Mayor/Fin. Dir. on progress of achieving strategic objectives and priorities. Strategic Plan to be updated annually.	_____ _____ _____ _____ _____ _____

GOAL	STRATEGY	OBJECTIVES	STATUS
7. Sustainability	Factors for determining sustainability are rooted in the 7 points. More specifically, the measures that will be evaluated include: achievement of consensus decision-making on the part of the Mayor and the Council, adoption of best practices, continuing commitment to training and development for the Mayor and Council members, ongoing monitoring and updating of plans necessary for the financial stability of the City including but not limited to 2-year budgets, 5-year financial analyses, and the ongoing implementation of the Master Plan.	Council and Mayor update methods to develop policy recommendations and achieving consensus. Council and Mayor attend all training sessions as scheduled by EM. Council and Mayor to actively participate in development and adoption of 2 yr. budget. Implement Master Plan (evidence of Master Plan implementation in annual budget). Define and incorporate financial and organizational best practices. Implement system of performance measurement. Utilize data-driven methods of decision making and performance measurement.

City of Flint Strategic Plan

Quarterly Report

July 1, 2014 – September 30, 2014

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

DATE: October 10, 2014

TO: Scott Kincaid, President, Flint City Council
City Council

FROM: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

RE: City of Flint Strategic Plan, First Quarter Report

Earlier this year, the City Council of Flint adopted a Strategic Plan for the City of Flint. This Plan announced a Vision, Mission, and Goals to guide the operation of the City government for the next five years, and was adopted in the context of the City's recently adopted Master Plan for the community. It was followed by a statement of budget priorities adopted by the City Council, and ultimately by a biennial budget for FY15 and FY16. The budget also projected the City's finances for the following three years – FY17, FY18, and FY19. During this same period a Deficit Elimination Plan and Reserve Accumulation Plan was approved by the State and a Seven Point Transition Management Plan was enacted to guide the way by which the operation of the City will be assumed by the Mayor and City Council . The integration of the Strategic Plan into the organizational processes of the City is a key component of the Seven Point Transition Management Plan.

In total, these actions comprise a broad framework guiding the direction of the Flint City government as it restores financial stability and once again becomes an active leader focused on making Flint a safe, secure city attractive to residents, businesses, students, and visitors.

The first quarter of FY15 ended on September 30, 2014. We are pleased to report on the progress which has been made. While significant progress has been made on many fronts, significant challenges and risks remain.

We wish to commend the Management Team and our employees for their dedicated efforts to move the City forward. We look forward to discussing the contents of the report with you.

Overview

The City of Flint has a vision and a plan and now it is focused on implementation in order to achieve a stronger and financially sound municipal government along with a safer and more stable community To succeed, however, City leaders must follow the plan with discipline and commitment. They cannot stop halfway or leave work half-done—and everyone has an important role to play. Working together as a team, the City of Flint has been successful in the previous quarter in increasing public safety, improving infrastructure, creating jobs and development, eliminating blight, engaging citizens and managing financial and administrative challenges. Areas of success include:

- Law enforcement is working hard with growing community support and total homicide victims is down 28% compared with 2013.
- Utilities is managing with an eye toward the future and the construction of the KWA pipeline is underway, on time and within budget.
- Development activities have increased with new facilities under construction at GM Flint Assembly, on the Buick City brownfield site with American Pipe, and downtown in the Health and Wellness District.
- Blighted properties continue to be eliminated, using state and federal funds, and neighborhood volunteer groups have removed more than 2 million pounds of trash in major clean-up efforts.
- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year.
- Revenues and expenses for the first quarter of FY15 are in line with expectations.
- Internal restructuring of the City continues at it strives to become efficient, effective, and customer service focused in an environment much smaller than in the past.
- The transition from state oversight to tradtional home rule is underway, guided by the Seven Point Plan recently enacted. If progress continues as anticipated, the next step in transition will occur in 2015

Challenges also continue. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures. A badly needed update to the City's web site is underway, progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks. The retiree lawsuit, whose outcome can seriously affect the financial solvency of the City, remains unresolved. Work continues to get done under difficult circumstances with limited resources, however the new strategic planning process is improving the City of Flint's productivity, responsiveness and accountability

Assuring Accountability to Adopted Plans and Budget

The Strategic Plan for FY15-FY19 and the Biennial Budget for FY15 and FY16 charts the course for the Flint City government as it emerges from near financial insolvency and establishes itself as a municipal government providing residents, businesses, students and visitors public services in a customer friendly and financially responsible manner. Near term steps for achieving this have further been defined by a set of priorities set by the Mayor and City Council as the biennial

budget was adopted. Likewise, the Master Plan for a Sustainable Flint, adopted in October 2013 by the Flint City Council and the Flint Planning Commission, provides the framework for ongoing efforts to improve the community as a whole.

Achieving the outcomes desired will be a lengthy and ongoing process. Specific steps to move along this course have been outlined in a series of objectives to be accomplished over the next several years. The purpose of the quarterly report is to hold the City of Flint government accountable to the highlight progress as well as to identify areas of weak performance. The first quarter of FY15 ended on September 30, 2014, and progress has been assessed.

Highlights

Increasing Public Safety

A primary goal of the City is to assure a safe, secure, and healthy environment in which to live, work and play. Well-functioning police, fire and emergency response systems are essential to achieving this. While challenged significantly with less than adequate resources, progress has been made to improve public safety, thanks in part to the assistance and collaboration of the State Police:

- Incidence of Part One crime is down 13%, including a 28% reduction in the number of homicides.
- Response time for police and fire has been decreased
- The decision has been made that the City will rejoin the Genesee County 9-1-1 Consortium. Anticipated to occur by July 1, 2015, this action will result in enhanced service with access to updated technology and will provide some $1 million annually in reduced costs.
- Internal reorganizations and process improvements have been made in the Police and Fire departments to accommodate the reduced staffing made necessary by the City's financial condition. With the assistance of financial assistance from the state, the City is engaged in a comprehensive review of its police and fire structure to determine the most efficient and effective organization for the future.

Improving Infrastructure

A key goal of the City is to provide access to dependable and affordable water sewer, and waste. Another key goal is to assure an adequate and well maintained transportation network. The financial challenges of the past several years has left the City with significant need for reinvestment in virtually all of its infrastructure. While the challenge is enormous, positive steps have been taken:

- The first draft of the City's first comprehensive Capital Improvement Plan has been completed and will shortly be shared with the public for its input.
- The City has recently been notified that it will receive $750,000 in funding for roads, as contained in the new State budget. Planning for use of these funds is beginning, with the expectation that it will be used for badly needed road repairs in the spring

- The construction of the KWA pipeline is underway, on time and within budget. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures.
- Concerns regarding the cost of water to Flint residents and businesses remains a high concern. Investigation of sources of water loss – both from theft and pipe leakage is ongoing. Reports of theft have resulted in criminal investigations, which are significant and ongoing. Several criminal complaints have resulted from the investigation and more are anticipated. Comprehensive programs of water meter replacement and leak detection are being developed.
- Construction will begin in October of a load out facility that will allow the city to shut down the incinerator and realize up to $400,000 a year in operational savings in the sewer fund.
- Investments in the underground utilities infrastructure are being finalized, utilizing budgeted funds for pipe replacement, pipe lining, and installation of technologically advanced water meters.
- Work is being planned to address the condition of city facilities. A contract has been signed to repair the employee and police parking lot and to replace the lighting with LED lights, while a process for evaluating potential energy savings at the Municipal complex is being finalized.

Creating Jobs and Development

One of the goals in the recently adopted Master Plan is to have a growing and diverse economy that spurs innovation and small business development along with an education system that prepares our workforce for jobs paying a livable wage. The Strategic Plan likewise commits the City to foster cooperation between businesses, higher education and medical institutions, nonprofit organizations and community groups to create jobs and development. It also identifies the need for the City to better define the role of the public sector in economic development and also to improve the business climate.

A number of business and community development initiatives are underway across the city.

- Development activities have increased as evidenced by revenues collected from building permits and rental inspections. These revenues are currently projected to exceed budgeted revenues by $300,000 by the end of the fiscal year
- Increased capacity for compliance with the City's Rental Registration Ordinance is being put into place. A contract for services has been executed, with inspections planned to begin before November 1.
- A new Medical Marijuana ordinance has been enacted. Application forms and related materials are being developed.
- Aggressive pursuit of funding for specific projects promoting development has resulted in more than $4 million to the City, including some $2 million for the redevelopment of Chevy Commons, $1.6 million for reconstruction of Dupont Street. Other grants have been awarded for a revitalization plan the South Saginaw corridor, road diet and bike lanes for Harrison Street, and an analysis of housing for the downtown area.

- Smith Village Development - Of 39 new homes built, 21 have sold, there are six purchase agreements, and 12 are remaining to be sold.
- Gundry and Salem NSP1 Purchase-Rehab-Resale – 14 homes were rehabbed, there are seven purchase agreements, and one home has been sold. Six of the 12 deeds that are in litigation with a previous developer by order of the Court.
- 26 units of senior apartments were made available with the ribbon cutting of Oak Street Apartments, a repurposed closed school building. Renovation was kick started with City of Flint CDBG demolition funds.
- An assessment of the development capacity of Flint's network of Community Housing Development Organizations (CHDO) and Community Development Corporations (CDC) has been completed in partnership with Local Initiatives Support Corporation (LISC). A planning is now underway to determine how the network can support implementation of the city's Master Plan and Blight Elimination Framework.
- In partnership with the local community foundation, public library, community college, and non-profits, began a six month community planning process where over 200 volunteers and stakeholders will create a well-coordinated, integrated system for literacy service delivery that increases literacy levels through a well-managed coalition of organizations.
- The $2.3 Million Community Development Block Grant (CDBG) programming allocation has been implemented. This allocation supports $928,000 of blight elimination, $725,000 in housing rehabilitation and emergency repairs, $227,000 to increase literacy, $124,000 for victim advocacy and fair housing and $184,000 in youth initiatives.

Improving Parks

Encouraging partnerships for recreation and access to open space across the City is a key goal of the Strategic Plan. While City support of its park system has been minimal for the past several years, positive steps, and the creation of partnerships in particular, have been taken towards achieving this goal:

- All City parks are being mowed at least twice per month, and their progress monitored on a regular basis
- Partnerships have been formalized with the Crim Foundation for Basset Park; with Friends of Rollingwood for additional park improvements; with Genesee Conservation District for forestry services; and with Mott Community college for Kearsley Softball Field and the Longway Greenbelt.
- A partnership with Mott Park Association for golf course and clubhouse is being developed.
- Substantial progress on park improvements are occurring at Max Brandon, aided by $200,000 in grant funding.
- Grant funding has also aided improvements at McKinley, and fostered progress on the Grand Traverse Greenway.
- Other improvements are occurring at Thread Lake and Flint Park Lake through the Genesee County Parks Partnership.

- The City is working in partnership with stakeholders at Whaley, Berston, Dewey, Kearsley, Hasselbring and Brennan Parks to leverage additional funding and volunteer assistance to construct further improvements
- The Senior Center leases have been completed for Hasselbring and Brennen, assuring that senior citizen programming will continue in the City.

Eliminating Blight

Eliminating blight within the next five years is one of the objectives incorporated into the Master Plan, and is recognized by the City as being critical to creating and maintaining a vibrant and growing community. To date:

- A draft Blight Elimination Framework has been developed and widely circulated for public input, reaching approximately 400 residents who have committed to its implementation. The City has committed to organizing its resources around this plan and has appropriated approximately $928,000 for blight elimination activities including the development of a code enforcement program, demolition, and coordination of extensive neighborhood clean ups.
- Several hundred citizen volunteers, working with Cities of Service, Clean & Green, and many neighborhood associations, have spent countless hours on many projects, including removal of more than 2 million pounds of trash from blighted areas, boarding of 575 vacant properties, and mowing some 12,500 properties a total of 28,000 times.
- Over $900,000 in CDBG allocations has been contracted to the Genesee County Land Bank for demolition of approximately 70 commercial and residential structures.
- $2.6 million in Hardest Hit funds were recently allocated to the City in partnership with the Land Bank to demolish some 225 homes in Civic Park. This funding is in addition to the nearly $23 million of both Michigan Blight Elimination and Hardest Hit Grant Funding for demolition of approximately 2,000 debilitated homes. The City has completed more than 1,500 Cut and Plugs in preparation for scheduled demolitions.
- An average of 240 Code Compliance issues are addressed monthly by the City's Blight Elimination Manager. 80% of these are resolved without further code enforcement action.
- The City has recruited 2 AmeriCorps VISTAs volunteers who will start in November and focus on implementation of the Blight Elimination Framework.

Engaging Citizens

An engaged citizenry is essential to creating and maintaining a vibrant growing community. Citizen engagement in Flint increased significantly over the past few years as the City engaged them in the development of the Master Plan. Master Plan implementation has continued to engage citizens, as have other activities fostered by the City:

- All Master Plan Implementation Task Groups have met twice, working on individual actions plans The City will also be working with 41 neighborhood groups who have

been trained on assessment work and will complete the neighborhood inventory for housing and street lighting by mid-November.

- The Police Department has engaged citizens in several ways, including increased participation by its command officers in community meetings, and by partnership and participation in APLACT (Advocates and Leaders for Police and Community Trust),
- The Department has also expanded use of Blue Badge volunteers in many areas, such as the newly established Citizens Radio Patrol.
- The department also become an active user of social media, promoting Crime Stoppers and Operation Fresh Start, and creating a presence on Facebook and Twitter.
- The Fire Department has also increased its presence in the community through its "Knock and Talk" initiative.
- Citizen engagement has also been enhanced with the placement of national service teams in the City of Flint, one from the National Civilian Community Corps and one from VISTA. More than 800 volunteers have been engaged with these teams on various projects, including removal of more than 2 million pounds of trash from blighted areas, emergency preparedness education for more than 900 residents, and participation in the national day of service on 9/11.

Managing Financial Challenges

Operating in a financially sustainable manner is essential if the City is to achieve its Mission of assuring that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. While the City continues to address an accumulated General Fund deficit, significant legacy costs, and a continuing structural deficit, progress continues to be made·

- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year. The City's cash position is adequate.
- A plan to eliminate the General Fund deficit no later than FY19 and to accumulate an adequate level of financial reserves no later than FY24 has been approved by the State.
- Revenues and expenses for the first quarter of FY15, which ended September 30, are generally in line with expectations.
- The City is vigorously pursuing external funding and resources to implement important projects in areas such as blight elimination, housing, and park improvements. More than $3 million has been received so far this year from federal agencies, state entities and community foundations, and additional applications are pending.

However, the legal challenge to changes made to retiree health care as part of restoring financial solvency continues. The June 30 decision by the Federal Court to permit the City to modify health care for retirees should provide some financial relief to the City while the case is being litigated. Should the City not prevail, however, the $5 million additional cost added to the FY15 budget will be continued, and may result in Flint's return to financial solvency becoming exceedingly difficult if not impossible

Improving Internal Operations

Achieving the goals set forth in the Strategic Plan will require a city organization that is efficient and effective, and capable of operating in an environment of limited resources. Elected leaders, appointed officials, and employees must be highly trained and professional, and place high priority on excellent customer service. Its organizational structures and process must be efficient, modern, and focused on results. Much remains to be done, but progress is being made:

- The search for an experienced professional City Administrator is underway, and several charter amendments are being considered by the voters, which would further enhance the efficiency of the government.
- A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks.
- A comprehensive review of City Ordinances is underway, with revisions in business licensing and zoning ordinances nearly complete.
- The organizational structure of the City has been revised to assure that capacity exists to implement the Master Plan.
- Professional development opportunities have been defined and are being provided for city staff. Current focuses include supervision and use of technology.
- An in-depth evaluation of the structure of the police and fire departments is underway with the goal of identifying the most efficient and effective structure for the delivery of public safety services.
- Nearly all labor contracts and personnel policies have been revised to improved organizational efficiency while containing short and long term costs associated with employee compensation.
- Review of the City's capacity to provide capacity and leadership in economic development is underway, including the potential of collaborative efforts with other entities.
- Reorganization of current staff positions to enhance constituent services is underway.
- Internal reorganizations and policy/procedure updates within the Police and Fire Departments have been enacted.
- The City's Emergency Management Plan has been updated.
- Reorganizations within the Utilities Division are being implemented to increase capacity to respond to maintenance and other needs.
- The Transportation Division has increased its capacity and lowered its costs to perform right-of-way maintenance activities by assigning casual skilled labor to work with street Maintenance crews.
- Agreement executed with Genesee County Conservation District to compile an inventory of street trees in order to develop a sustainable plan for the care and preservation of the urban street tree forestry.
- Improved processes for grant administration and compliance monitoring are being implemented
- Planning is leading an effort to fully utilize GIS capabilities to serve all departments.

- Asset management tools for Transportation and Utilities, such as GPS units, web reporting, and a new work order system, are scheduled for installation in the coming months.
- A city wide program to recognize employees is being evaluated. Currently, recognition programs exist on a departmental basis, including the Police Department, and a new program is scheduled for introduction in Department of Public Works.
- The Community and Economic Development Division continues to enact corrective actions, refine and adopt policies and procedures and provide technical assistance to sub-recipients for federal and state funded programs that reduce the potential repayment from historical HUD OIG monitoring findings and current Field Office and MSHDA monitoring, reducing exposure to General Fund for repayment.

Transitioning Back to Home Rule

The City has been under the jurisdiction of the State this time since November, 2011, as its financial condition placed it on the brink of insolvency. Much progress has been made to address that, and the focus is now preparing for the transition back to Home Rule Progress to date includes.

- A 7 Point Plan enacted by the Emergency Manager identifies specific objectives to be accomplished in order for the transition to proceed
- Target completion dates have been identified for many of the steps
- Specific objectives which have been accomplished include approval of a Deficit Elimination Plan, initiation of the search for a City Administrator, completion of a report by the Blue Ribbon Committee and the placement of 5 Charter Amendments plus the question of forming a Charter Review Commission on the November ballot.

Conclusion

Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness. Steps are also being taken to prepare the City for return to traditional Home Rule governance.

Not surprisingly, because this is a first quarter report, not all objectives have been completed, and some have yet to start In addition, many of the objectives require significant amounts of time and energy to achieve.

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services It still has a significant General Fund deficit to be addressed, along with significant legacy costs. And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint's Governance will adapt to change and be a model of professionalism, transparency and sustainability in order to provide effective government to each of our City's residents (as written in the Charter Preamble)

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits within the context of the City of Flint Master Plan

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
EMERGENCY MANAGER		Promote vision, set priorities, and measure results	Formally assess City readiness for Transition Advisory Board and progress towards achievement of Seven-Point Plan	I
MAYOR & COUNCIL			Participate with MML and others on an ongoing basis in advocating for state reforms in municipal financing, including PP T and EVIP	C
	Management of City Government		Continue to participate with MML and partners with new legislative session in advocating for state reforms in municipal financing, including OPEB and Prop A	I
CITY ADMINISTRATOR	Chief Elected Official	Leadership Provide direction, guidance and support to the leadership in the Departments of Public Safety, Planning & Development, Public Works, and Finance & Administration in order for the achievement of their goals and objectives	Reduce deficit by no less than $1 8 million by end of FY15 and each year thereafter in accord with City Deficit Elimination Plan and continuing to accumulate an appropriate level of reserves	I
	Legislative Body of the City		Begin search for City Administrator	C
MAYOR			Formally assess dept head's progress on attaining objectives and then semi-annually thereafter	I
		Partnerships Seek partnerships with local, state and federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting the City's mission	Conduct organizational review of all departments completing Public Safety in FY15 and Public Works in FY16	I
CITY COUNCIL			Resolve retiree healthcare lawsuit by December 31, 2015	I
			Conduct formal quarterly budget and strategic plan review with Council	I
HUMAN RELATIONS		Training: Prioritize attracting and retaining a highly trained and professional staff of elected leaders, appointed officials and employees by offering training opportunities, encouraging best practices, measuring performance and providing evaluations.	Complete assessment of Hurley's future as a community hospital	I
			Apply for 20 grants annually and receive $10 million in competitive/non-entitlement awards, beginning in FY15	I
CIVIL SERVICE/OMBUDSMAN			Secure ongoing financial and other support for public safety and blight, including city lock-up, for FY15-FY19	I
		Citizen Access Manage municipal services in a customer friendly manner by providing public information, respond to constituent concerns	Develop proposals for 911 consolidation and courts consolidation	I
			Design citizen service system to process up to 500 requests each month	I
			All Council members and Mayor to attain MML Level Two certification	I
			Update the video capabilities of the City Council chambers to finalize in-house recording, production and uploading of video	I
		Volunteer Service Develop a culture of national service and community volunteering that demonstrates how the City and community priorities can be addressed through service solutions	EM and Mayor to approve professional development training schedule for department heads	I
			EM and Mayor to approve professional development training schedule for employees based on recommendations from department heads and Human Resources	I
			Updated web site to be implemented	I
		Climate for Growth. Foster cooperation among business, nonprofit, foundation partners and residents to create a climate that supports community and economic development	All appointments to City boards to be current	I
			Create 1,000 Volunteer opportunities annually	I
			Mayor/EM to implement policies and procedures for improving citizen access to City government	I
			Formally assess future city role in promoting economic and community development for consideration in FY16 budget	I

GOVERNANCE AND ADMINISTRATION

(cont)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
CITY ATTORNEY				
CITY ATTORNEY'S OFFICE	Provide legal advice to Mayor Council City Administrator and Department Heads on matters of City business	Update City ordinances	Revised Business Licensing ordinance to be in effect on July 1, 2014, revised Zoning ordinance by November, 2014 schedule of remaining ordinance revisions to be developed by July 1, 2015	I
	Prosecutes violations of City Ordinances		Develop strategy and timeline for renegotiating Cable Franchise agreement (agreement expires December, 2016)	I
	Responds to FOIA requests	Provide for most cost effective means of litigation	Handle 95% of litigation in-house	C
	Advises in labor relations and employment relations issues		Implement program for increasing amount of delinquent collections	I
	Represents City in lawsuits and other legal matters	Develop and implement administrative efficiencies	Define proposed process for handling paper and digital files including time frame for implementation	I

			Secure a monitoring and compliance contractor to allow staff to focus on proactive community development	I
LONG RANGE PLANNING	Master Plan Implementation	Guide the update and implementation of the Master Plan and provide data-driven, technical expertise to city officials and the public on land use and development matters.	Develop a commercial investment framework based on the Master Plan	N
	Performance Management		In coordination with local, regional, and state economic development agencies, develop a formal long term strategy and role for the City government to help expand existing or attract new businesses, with particular focus on small businesses and brownfields, funding request to be presented for potential funding in	N
	Transportation Planning		Create 8 subarea plans	I
	Public Safety Planning		Develop the City's first combined Capital Improvement Plan	I
	GIS Services		Hold annual engagement to discuss progress of Master Plan and solicit additional feedback on action plan	N
	Infrastructure Planning		Establish short-term (1-3 years) action plans for each chapter of the Master Plan	I
	Sustainability Planning		Develop between 10-15 neighborhood plans covering every residential area by 2020, at the rate of 20% per year	N
	Zone Changes		Develop a citywide sustainability plan	N
	Plan Amendments		Maintain on an ongoing basis updated demographic and housing data easily available to internal and external customers	I
			Develop a proposal for providing citywide Geographic Information Services to internal and external customers and implement plan	I
			Coordinate the implementation of at least 1 strategy in each chapter of the Master Plan every year, with progress measured annually	I
			Submit proposal to the EPA for a Brownfield Area wide Planning Grant or technical assistance grant to create a brownfield development for the area around the Chevy Commons	C
			Present blight elimination framework to the Planning Commission for adoption as part of the Master Plan Implementation	I
			Begin update of the Master Plan	N
			Complete a formal written blight elimination framework for neighborhoods	C
			Implement structure within P&D which has responsibility for developing a plan for improving street lighting within the City for managing the lighting special assessment and payment of bills	I

PLANNING AND DEVELOPMENT

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
PARKS & OPEN SPACE	Parks Maintenance	Establish a new park management framework and secure resources necessary to maintain the City's parks and open spaces	Refine the City's parks classification system and develop service standards that align with the MDNR and the needs and desires of the Flint community	I
			Assure that all city parks are mowed at least twice per month based upon individual plan for land management; contractor performance to be reviewed on a quarterly basis	C
	Parks Planning	Improve the ecological health of the City s parks and open spaces through responsible planning and development.	Complete a naturalization demonstration in Max Brandon Park and then 3 other parks	I
			Complete improvements to Riverbank Park and McKinley Park as specified in the MDNR grant	I
			Complete improvements to McKinley Park as specified in the MDNR grant	I
			Update the Parks and Recreation Master Plan with additional focus on park equity and enhancing recreational use of the Flint River and adjacent parks an open spaces	N
	Parks Partnership	Provide parks open space, and recreation infrastructure that both meets the needs of the community and is maintainable by the City and its community partners.	Establish at least 3 "Adopt A Park" agreements every year complete the establishment of the "Friends of Berston" group	I
			Work with the County to establish a joint maintenance agreement for at least one of the City's larger parks	C
	Parks Programming	Engage the Flint Community to support the programming and use of park and recreation facilities	Develop a management plan for the City's 4 golf courses	I
			Develop the plan to adjust the CANUSA Games Housing and field of play locations	N
	Open Space		Submit at least one grant proposal each year for MDNR funding	C
	Trail Development		Complete construction of the Genesee Valley Trail	I

FINANCE AND ADMINISTRATION

VISION Statement

A robust division capable of meeting the external and internal needs of the City of Flint in the areas of finance, treasury, assessments, human resources information technology and fleet.

MISSION Statement

To manage the financial and administration division of the City of Flint through promoting fiscal responsibility and industry best practices in order to respond to the needs of the City of Flint with efficiency and timeliness

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
FINANCE				
ACCOUNTING	Payroll Production & Reporting	Provides for a financially secure organization with sound business practices providing for the purchase of goods and services and financial reporting. Provides professional and technical advise to departments regarding financial and purchasing needs and on grant administration processes	Reduce the General Fund deficit by $1.8 million in FY15	C
			Reduce the General Fund deficit by $1.8 million in FY16	N
	Vendor Management and Payment		Convert to new fixed asset accounting and develop fixed asset policy	I
			Review rates and master fee schedule to ensure they are appropriately set	N
AUDITING	Monitoring Financial Performance		Implement Finance Department reorganization	I
	Preparation of Financial Reports		Audit completed and filed with state	I
BUDGETING	Monitoring Grant Performance		Schedule and conduct 4 city wide finance and accounting training sessions	I
	Accounting for Revenues and Expenses		Establish and implement internship program for Finance	I
RISK MANAGEMENT	Development of Long Term Financial Projections, Deficit Elimination Plans and Strategies for Financial Solvency		Establish a paperless process for procuring goods and services	I
			Prepare a RPF for copier services in FY15 in time to allow issuance of request before contract expires in FY16	N
PURCHASING	Administration of Property and Liability Insurances		Provide recommendations for updating procurement policies to be used during and after transition and to increase efficiencies	I
	Selection and Monitoring of Benefit Program vendors		Increase the usage of P-cards to boost the City's annual rebate by 15% progress to be measured regularly	I
GRANT ADMIN			Establish management expectations of turn-around time on vendor payments purchasing requests, position filling requests, and other areas monitor performance, beginning with FY15 first quarter results to be evaluated and monitored monthly	I
			Establish formal process for reviewing, processing, and making timely decisions for applications on tax abatements	I
			Adopt stabilization ordinance and fund balance policy	I
			Establish expectations of turn-around time on purchasing requests and monitor performance, beginning with FY15 and evaluated quarterly	I
TREASURY				
CUSTOMER SERVICE		Provides for a customer friendly accountable entity managing receipts and collections. Monitors collections of property taxes, income taxes, water and sewer, and other receivables to assess budgetary compliance	Identify additional $500 000.00 to $1,000,000.00 in unreported income tax, utilizing the 2011 State income tax data.	N
			Increase the collection of delinquent taxes by 15-20% through continued efforts to collect delinquent income tax and personal property taxes and by new efforts to collect delinquent Miscellaneous Receivables and Water bills	N
DELINQUENT COLLECTIONS			Reorganize Customer Service to assure that after that time that all utility bills are mailed two weeks prior to the due date that checks are processed within 10 days from the postmark date, and that customer wait time in the office and on the phone are reduced by 25%	I
			Replace the current vendor for processing electronic payments with Point and Pay in order to allow the City to accept water, property tax miscellaneous receivables, special assessment and permit payments electronically	C
			Install a kiosk in the City Hall lobby in order to allow the City to accept water, property tax, miscellaneous receivables, special assessment and permit payments electronically	I
			Create description of City's efforts to manage delinquent water accounts while obtaining the City's financial goals and assisting those who are facing financial hardships	N
			Implement electronic income tax withholding	I
			Update City efforts to assist those unable to pay for utilities	N
			Re-examine efforts to assist individuals to pay utility bills	N
			Establish and implement an ongoing schedule of Customer Service", "Team Work" and "How to deal with difficult customer" training for all Treasury staff	I

FINANCE AND ADMINISTRATION

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
ASSESSING				
ASSESSORS OFFICE	Assessing of Properties	Assures the assessment of properties within the City in a professional and equitable manner in conformance with state law and professional practices, addresses appeals of values to Board of Review; represents City at state level appeals	Determine schedule of staff training in Assessing.net as necessary and for annual compliance with state requirements during course of FY15 and annually thereafter	C
	Administration of Valuation Appeals		Conduct comprehensive site inspections of residential and commercial tracts between April and November of each year in sufficient number annually to canvas 12 tracts annually	I
	Processing of Poverty exemption requests		Secure contract to achieve the conversion of remaining hard copy records and drawings to digital format utilizing APEX and/or digital scanning, with financial plan submitted for FY15 budget	I
	Provision of property and tax information to businesses and residents		Provide for the timely process of MTT appeals, and split/combination applications 2012 and 2013 appeals will be completed by end of FY15 and appeals filed in 2014 will be resolved by end of FY16 The processing of splits and combination requests is required to be completed end of each year to be incorporated in the following year's assessment roll.	I
			Working with Facilities, finalize plan for relocating Assessing from its temporary site	I
	Maintenance of Property descriptions and tax rolls		Analyze options for lessening the workload impact of processing poverty exemption applications	C
			Participate with Planning and Development, IT and others to develop the ongoing process for establishing and maintaining of the parcel layer for City GIS, and for providing GIS services to internal and external customers.	C
HUMAN RESOURCES			Utilize a master position list for confirming the need to recruit, promote or reduce employees	C
EMPLOYMENT	Recruitment and Selection	Recruit and oversee hiring of qualified employees in compliance with laws and ordinances	Update personnel rules and procedures, including ordinances	I
	Testing		Update testing protocols for recruitment/selection	I
	Contract Negotiations	Recommend changes in personnel polices and labor contracts	Complete FPOA contract	C
			Implement FPOA contract	I
			Implement updated 1799 contract	I
			Implement updated IAFF contract	N
			Implement updated Capt/Lt contract	I
			Update Sergeants contract	I
	Employment law allegations		Inform department heads and supervisors of contract changes prior to implementation	C
LABOR RELATIONS	Grievances and Arbitrations	Train and assist departments in managing employees and resolving disputes	Answer 100% of all new grievances within required time frames, measured with quarterly reports	I
	Benefit administration	Enroll employees in payroll and benefit systems,	Implement updated Exempt and Appointed benefit programs	I
ENROLLMENT	Payroll enrollment and changes		Develop and implement ongoing training curriculum and schedule in conjunction with Department Heads	C
	FMLA oversight	Assure that city FMLA and worker safety policies and practices are in accord with law and properly administered	Implement new FMLA process	I
	Worker's Compensation Administration		Implement new EAP program	C
	MIOSHA/OSHA Administration		Redesign Occupational Health and Safety Program for the City	N
WORKERS SAFETY	Employee Clinic		Administrative policies/procedures to be updated	I

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind – operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities alone from nearly $900 million to less than $325 million as noted in the FY13 audit.

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16.

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

City of Flint Wednesday 9:00am Phone Conference Agenda
October 15, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD –
      i. The City has decided to join the State Records Management System. This is a collaborative measure with SRMS, City of Flint and the Michigan State Police.
      ii. The initial draft reports for the evaluation of both the Police and the Fire departments have been received. These are data compilations. The final drafts with recommendations will be completed by the end of October.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) The legislative initiative to allow a vote on a local income tax increase will be handled by Mayor Walling who will be working through the Governor's Office and H. Hollins.
   c) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Sgts., and Capts. & Lts. bargaining units have achieved Tentative Agreements.
   c) The City is amending the DEP to show future commitment on retiree healthcare.
   d) Need to start to develop a plan to begin pre-funding employee healthcare.
   e) Next benchmark is audit. Budget is on track at this point; preparing for 1st quarter end.

5) **City Council Update**
   a) The Finance Committee of the Flint City Council received the first quarter update of the FY15 budget status and the quarterly update of the objectives in the Strategic Plan. (See attachments).

6) **Blue Ribbon Committee on Governance**
   a) Another forum on the governance ballot proposals was held Oct. 14 at the Flint Public Library.
   b) The Flint Journal has begun a series exploring each of the six Flint ballot proposals.

7) **Water Issues**
   a) Flint will continue to investigate why conditions develop which are favorable for more severe problems to occur. Pursuing these investigations may include seeking additional professional assistance to review both systems and processes. Whenever hydrants are

running to clear lines: new signs are posted to show intended water running. Major line breaks are announced through a press release and include estimated time to resolve.

b) General Motors Water Issues – working through lawyers at this point. We are close to a final agreement regarding their level as a customer with the City of Flint.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.

b) Starting a new communication strategy with an EM press briefing the afternoon of a Council meeting or important Committee meeting.

c) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.

9) 9-1-1 Reconsolidation Plan

a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation is expected to be complete by July 1, 2015. Mayor Walling has been appointed the City's representative on the Membership Board. Work is progressing to complete merger before July 1, 2015.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.

b) Emergency Manager has developed a recruitment package, and a recruitment & appointment timeline; recruitment began September 1, 2014. Over 25 applications have been received to-date. Initial reviews will begin this month and five finalists will be selected for more in-depth interviews.

11) Other Items

City Council

FROM: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

RE: City of Flint Strategic Plan, First Quarter Report

Earlier this year, the City Council of Flint adopted a Strategic Plan for the City of Flint. This Plan announced a Vision, Mission, and Goals to guide the operation of the City government for the next five years, and was adopted in the context of the City's recently adopted Master Plan for the community. It was followed by a statement of budget priorities adopted by the City Council, and ultimately by a biennial budget for FY15 and FY16. The budget also projected the City's finances for the following three years – FY17, FY18, and FY19. During this same period a Deficit Elimination Plan and Reserve Accumulation Plan was approved by the State and a Seven Point Transition Management Plan was enacted to guide the way by which the operation of the City will be assumed by the Mayor and City Council . The integration of the Strategic Plan into the organizational processes of the City is a key component of the Seven Point Transition Management Plan.

In total, these actions comprise a broad framework guiding the direction of the Flint City government as it restores financial stability and once again becomes an active leader focused on making Flint a safe, secure city attractive to residents, businesses, students, and visitors.

The first quarter of FY15 ended on September 30, 2014. We are pleased to report on the progress which has been made. While significant progress has been made on many fronts, significant challenges and risks remain.

We wish to commend the Management Team and our employees for their dedicated efforts to move the City forward. We look forward to discussing the contents of the report with you.

Overview

The City of Flint has a vision and a plan and now it is focused on implementation in order to achieve a stronger and financially sound municipal government along with a safer and more stable community. To succeed, however, City leaders must follow the plan with discipline and commitment. They cannot stop halfway or leave work half-done—and everyone has an important role to play. Working together as a team, the City of Flint has been successful in the previous quarter in increasing public safety, improving infrastructure, creating jobs and development, eliminating blight, engaging citizens and managing financial and administrative challenges. Areas of success include:

- Law enforcement is working hard with growing community support and total homicide victims is down 28% compared with 2013.
- Utilities is managing with an eye toward the future and the construction of the KWA pipeline is underway, on time and within budget.
- Development activities have increased with new facilities under construction at GM Flint Assembly, on the Buick City brownfield site with American Pipe, and downtown in the Health and Wellness District.
- Blighted properties continue to be eliminated, using state and federal funds, and neighborhood volunteer groups have removed more than 2 million pounds of trash in major clean-up efforts.
- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year.
- Revenues and expenses for the first quarter of FY15 are in line with expectations.
- Internal restructuring of the City continues at it strives to become efficient, effective, and customer service focused in an environment much smaller than in the past.
- The transition from state oversight to traditional home rule is underway, guided by the Seven Point Plan recently enacted. If progress continues as anticipated, the next step in transition will occur in 2015.

Challenges also continue. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures. A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks. The retiree lawsuit, whose outcome can seriously affect the financial solvency of the City, remains unresolved. Work continues to get done under difficult circumstances with limited resources, however the new strategic planning process is improving the City of Flint's productivity, responsiveness and accountability.

Assuring Accountability to Adopted Plans and Budget

The Strategic Plan for FY15-FY19 and the Biennial Budget for FY15 and FY16 charts the course for the Flint City government as it emerges from near financial insolvency and establishes itself as a municipal government providing residents, businesses, students and visitors public services in a customer friendly and financially responsible manner. Near term steps for achieving this have further been defined by a set of priorities set by the Mayor and City Council as the biennial

budget was adopted. Likewise, the Master Plan for a Sustainable Flint, adopted in October 2013 by the Flint City Council and the Flint Planning Commission, provides the framework for ongoing efforts to improve the community as a whole.

Achieving the outcomes desired will be a lengthy and ongoing process. Specific steps to move along this course have been outlined in a series of objectives to be accomplished over the next several years. The purpose of the quarterly report is to hold the City of Flint government accountable to the highlight progress as well as to identify areas of weak performance. The first quarter of FY15 ended on September 30, 2014, and progress has been assessed.

Highlights

Increasing Public Safety

A primary goal of the City is to assure a safe, secure, and healthy environment in which to live, work and play. Well-functioning police, fire and emergency response systems are essential to achieving this. While challenged significantly with less than adequate resources, progress has been made to improve public safety, thanks in part to the assistance and collaboration of the State Police:

- Incidence of Part One crime is down 13%, including a 28% reduction in the number of homicides.
- Response time for police and fire has been decreased
- The decision has been made that the City will rejoin the Genesee County 9-1-1 Consortium. Anticipated to occur by July 1, 2015, this action will result in enhanced service with access to updated technology and will provide some $1 million annually in reduced costs
- Internal reorganizations and process improvements have been made in the Police and Fire departments to accommodate the reduced staffing made necessary by the City's financial condition. With the assistance of financial assistance from the state, the City is engaged in a comprehensive review of its police and fire structure to determine the most efficient and effective organization for the future.

Improving Infrastructure

A key goal of the City is to provide access to dependable and affordable water sewer, and waste. Another key goal is to assure an adequate and well maintained transportation network. The financial challenges of the past several years has left the City with significant need for reinvestment in virtually all of its infrastructure. While the challenge is enormous, positive steps have been taken:

- The first draft of the City's first comprehensive Capital Improvement Plan has been completed and will shortly be shared with the public for its input.
- The City has recently been notified that it will receive $750,000 in funding for roads, as contained in the new State budget. Planning for use of these funds is beginning, with the expectation that it will be used for badly needed road repairs in the spring.

- The construction of the KWA pipeline is underway, on time and within budget. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures.
- Concerns regarding the cost of water to Flint residents and businesses remains a high concern. Investigation of sources of water loss – both from theft and pipe leakage is ongoing. Reports of theft have resulted in criminal investigations, which are significant and ongoing. Several criminal complaints have resulted from the investigation and more are anticipated. Comprehensive programs of water meter replacement and leak detection are being developed.
- Construction will begin in October of a load out facility that will allow the city to shut down the incinerator and realize up to $400,000 a year in operational savings in the sewer fund.
- Investments in the underground utilities infrastructure are being finalized, utilizing budgeted funds for pipe replacement, pipe lining, and installation of technologically advanced water meters.
- Work is being planned to address the condition of city facilities. A contract has been signed to repair the employee and police parking lot and to replace the lighting with LED lights, while a process for evaluating potential energy savings at the Municipal complex is being finalized.

Creating Jobs and Development

One of the goals in the recently adopted Master Plan is to have a growing and diverse economy that spurs innovation and small business development along with an education system that prepares our workforce for jobs paying a livable wage. The Strategic Plan likewise commits the City to foster cooperation between businesses, higher education and medical institutions, nonprofit organizations and community groups to create jobs and development. It also identifies the need for the City to better define the role of the public sector in economic development and also to improve the business climate.

A number of business and community development initiatives are underway across the city

- Development activities have increased as evidenced by revenues collected from building permits and rental inspections. These revenues are currently projected to exceed budgeted revenues by $300,000 by the end of the fiscal year
- Increased capacity for compliance with the City's Rental Registration Ordinance is being put into place. A contract for services has been executed, with inspections planned to begin before November 1.
- A new Medical Marijuana ordinance has been enacted. Application forms and related materials are being developed.
- Aggressive pursuit of funding for specific projects promoting development has resulted in more than $4 million to the City, including some $2 million for the redevelopment of Chevy Commons, $1.6 million for reconstruction of Dupont Street. Other grants have been awarded for a revitalization plan the South Saginaw corridor, road diet and bike lanes for Harrison Street, and an analysis of housing for the downtown area.

- Smith Village Development - Of 39 new homes built, 21 have sold, there are six purchase agreements, and 12 are remaining to be sold.
- Gundry and Salem NSP1 Purchase-Rehab-Resale – 14 homes were rehabbed, there are seven purchase agreements, and one home has been sold. Six of the 12 deeds that are in litigation with a previous developer by order of the Court.
- 26 units of senior apartments were made available with the ribbon cutting of Oak Street Apartments, a repurposed closed school building. Renovation was kick started with City of Flint CDBG demolition funds.
- An assessment of the development capacity of Flint's network of Community Housing Development Organizations (CHDO) and Community Development Corporations (CDC) has been completed in partnership with Local Initiatives Support Corporation (LISC). A planning is now underway to determine how the network can support implementation of the city's Master Plan and Blight Elimination Framework.
- In partnership with the local community foundation, public library, community college, and non-profits, began a six month community planning process where over 200 volunteers and stakeholders will create a well-coordinated, integrated system for literacy service delivery that increases literacy levels through a well-managed coalition of organizations.
- The $2.3 Million Community Development Block Grant (CDBG) programming allocation has been implemented. This allocation supports $928,000 of blight elimination, $725,000 in housing rehabilitation and emergency repairs, $227,000 to increase literacy, $124,000 for victim advocacy and fair housing and $184,000 in youth initiatives.

Improving Parks

Encouraging partnerships for recreation and access to open space across the City is a key goal of the Strategic Plan. While City support of its park system has been minimal for the past several years, positive steps, and the creation of partnerships in particular, have been taken towards achieving this goal:

- All City parks are being mowed at least twice per month, and their progress monitored on a regular basis
- Partnerships have been formalized with the Crim Foundation for Basset Park; with Friends of Rollingwood for additional park improvements; with Genesee Conservation District for forestry services; and with Mott Community college for Kearsley Softball Field and the Longway Greenbelt.
- A partnership with Mott Park Association for golf course and clubhouse is being developed.
- Substantial progress on park improvements are occurring at Max Brandon, aided by $200,000 in grant funding.
- Grant funding has also aided improvements at McKinley, and fostered progress on the Grand Traverse Greenway.
- Other improvements are occurring at Thread Lake and Flint Park Lake through the Genesee County Parks Partnership.

- The City is working in partnership with stakeholders at Whaley, Berston, Dewey, Kearsley, Hasselbring and Brennan Parks to leverage additional funding and volunteer assistance to construct further improvements.
- The Senior Center leases have been completed for Hasselbring and Brennen, assuring that senior citizen programming will continue in the City.

Eliminating Blight

Eliminating blight within the next five years is one of the objectives incorporated into the Master Plan, and is recognized by the City as being critical to creating and maintaining a vibrant and growing community. To date:

- A draft Blight Elimination Framework has been developed and widely circulated for public input, reaching approximately 400 residents who have committed to its implementation. The City has committed to organizing its resources around this plan and has appropriated approximately $928,000 for blight elimination activities including the development of a code enforcement program, demolition, and coordination of extensive neighborhood clean ups.
- Several hundred citizen volunteers, working with Cities of Service, Clean & Green, and many neighborhood associations, have spent countless hours on many projects, including removal of more than 2 million pounds of trash from blighted areas, boarding of 575 vacant properties, and mowing some 12,500 properties a total of 28,000 times.
- Over $900,000 in CDBG allocations has been contracted to the Genesee County Land Bank for demolition of approximately 70 commercial and residential structures.
- $2.6 million in Hardest Hit funds were recently allocated to the City in partnership with the Land Bank to demolish some 225 homes in Civic Park. This funding is in addition to the nearly $23 million of both Michigan Blight Elimination and Hardest Hit Grant Funding for demolition of approximately 2,000 debilitated homes. The City has completed more than 1,500 Cut and Plugs in preparation for scheduled demolitions.
- An average of 240 Code Compliance issues are addressed monthly by the City's Blight Elimination Manager. 80% of these are resolved without further code enforcement action.
- The City has recruited 2 AmeriCorps VISTAs volunteers who will start in November and focus on implementation of the Blight Elimination Framework.

Engaging Citizens

An engaged citizenry is essential to creating and maintaining a vibrant growing community. Citizen engagement in Flint increased significantly over the past few years as the City engaged them in the development of the Master Plan. Master Plan implementation has continued to engage citizens, as have other activities fostered by the City:

- All Master Plan Implementation Task Groups have met twice, working on individual actions plans. The City will also be working with 41 neighborhood groups who have

been trained on assessment work and will complete the neighborhood inventory for housing and street lighting by mid-November.

- The Police Department has engaged citizens in several ways, including increased participation by its command officers in community meetings, and by partnership and participation in APLACT (Advocates and Leaders for Police and Community Trust),
- The Department has also expanded use of Blue Badge volunteers in many areas, such as the newly established Citizens Radio Patrol.
- The department also become an active user of social media, promoting Crime Stoppers and Operation Fresh Start, and creating a presence on Facebook and Twitter.
- The Fire Department has also increased its presence in the community through its "Knock and Talk" initiative.
- Citizen engagement has also been enhanced with the placement of national service teams in the City of Flint, one from the National Civilian Community Corps and one from VISTA. More than 800 volunteers have been engaged with these teams on various projects, including removal of more than 2 million pounds of trash from blighted areas, emergency preparedness education for more than 900 residents, and participation in the national day of service on 9/11.

Managing Financial Challenges

Operating in a financially sustainable manner is essential if the City is to achieve its Mission of assuring that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. While the City continues to address an accumulated General Fund deficit, significant legacy costs, and a continuing structural deficit, progress continues to be made:

- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year. The City's cash position is adequate.
- A plan to eliminate the General Fund deficit no later than FY19 and to accumulate an adequate level of financial reserves no later than FY24 has been approved by the State.
- Revenues and expenses for the first quarter of FY15, which ended September 30, are generally in line with expectations.
- The City is vigorously pursuing external funding and resources to implement important projects in areas such as blight elimination, housing, and park improvements. More than $3 million has been received so far this year from federal agencies, state entities and community foundations, and additional applications are pending.

However, the legal challenge to changes made to retiree health care as part of restoring financial solvency continues. The June 30 decision by the Federal Court to permit the City to modify health care for retirees should provide some financial relief to the City while the case is being litigated. Should the City not prevail, however, the $5 million additional cost added to the FY15 budget will be continued, and may result in Flint's return to financial solvency becoming exceedingly difficult if not impossible

Improving Internal Operations

Achieving the goals set forth in the Strategic Plan will require a city organization that is efficient and effective, and capable of operating in an environment of limited resources. Elected leaders, appointed officials, and employees must be highly trained and professional, and place high priority on excellent customer service. Its organizational structures and process must be efficient, modern, and focused on results. Much remains to be done, but progress is being made:

- The search for an experienced professional City Administrator is underway, and several charter amendments are being considered by the voters, which would further enhance the efficiency of the government.
- A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks.
- A comprehensive review of City Ordinances is underway, with revisions in business licensing and zoning ordinances nearly complete.
- The organizational structure of the City has been revised to assure that capacity exists to implement the Master Plan.
- Professional development opportunities have been defined and are being provided for city staff. Current focuses include supervision and use of technology.
- An in-depth evaluation of the structure of the police and fire departments is underway with the goal of identifying the most efficient and effective structure for the delivery of public safety services.
- Nearly all labor contracts and personnel policies have been revised to improved organizational efficiency while containing short and long term costs associated with employee compensation.
- Review of the City's capacity to provide capacity and leadership in economic development is underway, including the potential of collaborative efforts with other entities.
- Reorganization of current staff positions to enhance constituent services is underway.
- Internal reorganizations and policy/procedure updates within the Police and Fire Departments have been enacted.
- The City's Emergency Management Plan has been updated.
- Reorganizations within the Utilities Division are being implemented to increase capacity to respond to maintenance and other needs.
- The Transportation Division has increased its capacity and lowered its costs to perform right-of-way maintenance activities by assigning casual skilled labor to work with street Maintenance crews.
- Agreement executed with Genesee County Conservation District to compile an inventory of street trees in order to develop a sustainable plan for the care and preservation of the urban street tree forestry.
- Improved processes for grant administration and compliance monitoring are being implemented
- Planning is leading an effort to fully utilize GIS capabilities to serve all departments.

- Asset management tools for Transportation and Utilities, such as GPS units, web reporting, and a new work order system, are scheduled for installation in the coming months.
- A city wide program to recognize employees is being evaluated. Currently, recognition programs exist on a departmental basis, including the Police Department, and a new program is scheduled for introduction in Department of Public Works.
- The Community and Economic Development Division continues to enact corrective actions, refine and adopt policies and procedures and provide technical assistance to sub-recipients for federal and state funded programs that reduce the potential repayment from historical HUD OIG monitoring findings and current Field Office and MSHDA monitoring, reducing exposure to General Fund for repayment.

Transitioning Back to Home Rule

The City has been under the jurisdiction of the State this time since November, 2011, as its financial condition placed it on the brink of insolvency. Much progress has been made to address that, and the focus is now preparing for the transition back to Home Rule. Progress to date includes:

- A 7 Point Plan enacted by the Emergency Manager identifies specific objectives to be accomplished in order for the transition to proceed
- Target completion dates have been identified for many of the steps
- Specific objectives which have been accomplished include approval of a Deficit Elimination Plan, initiation of the search for a City Administrator, completion of a report by the Blue Ribbon Committee and the placement of 5 Charter Amendments plus the question of forming a Charter Review Commission on the November ballot.

Conclusion

Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness. Steps are also being taken to prepare the City for return to traditional Home Rule governance.

Not surprisingly, because this is a first quarter report, not all objectives have been completed, and some have yet to start. In addition, many of the objectives require significant amounts of time and energy to achieve.

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services. It still has a significant General Fund deficit to be addressed, along with significant legacy costs. And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

CITY OF FLINT
STRATEGIC PLAN

2014 -2019

Setting a Sustainable Course for the City of Flint

Quarterly Report

July 1, 2014 - September 30, 2014

CITY OF FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life

The Mission of the City Government

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals

In order to realize our Mission, businesses, students and visitors can expect that:

- The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees
- The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play
- The City will provide access to dependable and affordable water, sewer, and waste collection
- The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs
- The City will foster cooperation between business, non-profit, foundation partners and residents to create a climate that supports community and economic development

The City government will also:

- Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission
- Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan
- Encourage partnerships for recreation and access to open space across the City
- Enforce building and occupancy codes and to aggressively work with others to address blighted conditions
- Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development
- Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint's Governance will adapt to change and be a model of professionalism transparency and sustainability in order to provide effective government to each of our City s residents (as written in the Charter Preamble)

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner including improving citizen access focusing on measurable results improving the City s financial position and eliminating accumulated deficits within the context of the City of Flint Master Plan

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
EMERGENCY MANAGER		Promote vision, set priorities and measure results	Formally assess City readiness for Transition Advisory Board and progress towards achievement of Seven-Point Plan	I
MAYOR & COUNCIL			Participate with MML and others on an ongoing basis in advocating for state reforms in municipal financing, including PP T and EVIP	C
	Management of City Government		Continue to participate with MML and partners with new legislative session in advocating for state reforms in municipal financing, including OPEB and Prop A	I
CITY ADMINISTRATOR	Chief Elected Official	Leadership: Provide direction, guidance and support to the leadership in the Departments of Public Safety Planning & Development, Public Works, and Finance & Administration in order for the achievement of their goals and objectives	Reduce deficit by no less than $1 8 million by end of FY15, and each year thereafter in accord with City Deficit Elimination Plan and continuing to accumulate an appropriate level of reserves	I
	Legislative Body of the City		Begin search for City Administrator	C
MAYOR			Formally assess dept head's progress on attaining objectives and then semi-annually thereafter	I
		Partnerships Seek partnerships with local, state and federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting the City's mission	Conduct organizational review of all departments completing Public Safety in FY15 and Public Works in FY16	I
CITY COUNCIL			Resolve retiree healthcare lawsuit by December 31 2015	I
			Conduct formal quarterly budget and strategic plan review with Council	I
HUMAN RELATIONS		Training: Prioritize attracting and retaining a highly trained and professional staff of elected leaders, appointed officials and employees by offering training opportunities, encouraging best practices measuring performance and providing evaluations.	Complete assessment of Hurley's future as a community hospital	I
			Apply for 20 grants annually and receive $10 million in competitive/non-entitlement awards, beginning in FY15	I
CIVIL SERVICE/OMBUDSMAN			Secure ongoing financial and other support for public safety and blight, including city lock-up for FY15-FY19	I
			Develop proposals for 911 consolidation and courts consolidation	I
		Citizen Access Manage municipal services in a customer friendly manner by providing public information respond to constituent concerns.	Design citizen service system to process up to 500 requests each month	I
			All Council members and Mayor to attain MML Level Two certification	I
			Update the video capabilities of the City Council chambers to facilitate in-house recording, production and uploading of video	I
		Volunteer Service: Develop a culture of national service and community volunteering that demonstrates how the City and community priorities can be addressed through service solutions	EM and Mayor to approve professional development training schedule for department heads	I
			EM and Mayor to approve professional development training schedule for employees based on recommendations from department heads and Human Resources	I
			Updated web site to be implemented	I
			All appointments to City boards to be current	I
		Climate for Growth. Foster cooperation among business nonprofit, foundation partners and residents to create a climate that supports community and economic development	Create 1,000 Volunteer opportunities annually	I
			Mayor/EM to implement policies and procedures for improving citizen access to City government	I
			Formally assess future city role in promoting economic and community development for consideration in FY16 budget	I

GOVERNANCE AND ADMINISTRATION

(cont)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
CITY ATTORNEY				
CITY ATTORNEY'S OFFICE	Provide legal advice to Mayor Council City Administrator and Department Heads on matters of City business	Update City ordinances	Revised Business Licensing ordinance to be in effect on July 1 2014 revised Zoning ordinance by November 2014, schedule of remaining ordinance revisions to be developed by July 1 2015	I
	Prosecutes violations of City Ordinances		Develop strategy and timeline for renegotiating Cable Franchise agreement (agreement expires December 2016)	I
	Responds to FOIA requests	Provide for most cost effective means of litigation	Handle 95% of litigation in-house	C
	Advises in labor relations and employment relations issues		Implement program for increasing amount of delinquent collections	I

RE: City of Flint Quarterly Financial Report
July 1, 2014 – September 30, 2014

The City of Flint's Strategic Plan envisions a "well managed financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students and visitors and improve our quality of life."

Operating in a financially sustainable manner is a key component to achieving that vision. As part of this, a biennial budget has been adopted for fiscal years 2015 and 2016, and a commitment has been made to a regular and ongoing review of revenues and expenses. To this end, a quarterly report on the status of the City's budget will be provided to the Finance Committee on an ongoing basis.

Attached is a comparison of the City's budgeted revenues and expenses to actual revenues and expenses as of September 30, 2014.

In summary, at the end of the 1st quarter, the financial outlook for the remaining FY15 appears to be on track. In total, revenues and expenditures are generally meeting expectations. The City continues to make timely pension contributions and healthcare premium payment for both active employees and retirees.

Some further observations on the current budget status:

- In the General Fund, actual revenues are just above 20% of budgeted revenues. At the time of the report, however, the City had not received its portion of State Shared Revenues, and when those revenues are received (approximately $2.4 million), they will be accrued back to the 1st quarter.

- General Fund expenditures are reported at 22% of the budgeted expenditures, in line with expectations. However, it has been discovered that $13,000 in communications expenses was inadvertently deleted from the District Court budget. It will be necessary to consider an adjustment to the District Court budget to address this shortfall.
- Also, we continue to monitor the personnel expenses in the Police and Fire budgets to determine the budgetary impact that reducing staffing levels through attrition rather than layoffs at the beginning of the year will have. It appears that attrition is moving staffing levels down to the budgeted levels, with Fire already at its reduced level of 75, and Police currently at 121, with a target of 115. By the end of the second quarter we anticipate that the reduced levels will be met by then and in addition, we will have the results of the ICMA organizational and staffing study. We will also be beginning to receive a portion of the $1 million allocated for police and fire expenditures in the state budget. We presently anticipate that these funds will be sufficient to offset any shortfall in the personnel line items in these budgets. With the second quarter report, we will provide any necessary budget amendments in these areas.
- Special Revenue Funds, Major and Local Street Funds are operating below budgeted revenues and expenditures. Major Streets, Fund 202, revenues are down due to timing in which State revenues of the Gas and Weight Tax allocations have not been received as of the date of the report. Budgets in the Grant Funds, Funds 274, 295, and 296 reflect timing differences as well. The revenues in these funds have not been received as of the date of the report. In addition, it will be necessary to create a budget for Fund 297 to reflect the final expenditure of a COPS Hiring Grant, with funds carried over into the FY15 budget year.
- Revenues in the Building Safety and Inspections Fund (Fund 542) are coming in higher than anticipated for the first quarter of the year. This was due largely to the new construction of the paint shop on the General Motor's property expansion.
- Revenues in the Water and Sewer funds are coming in at 19% and 16% respectively in comparison to the budgeted totals. At the same time, expenditures are coming in a 13% and 11% of the budgeted totals. It appears that the trend of reduced water billings are continuing, and efforts are underway to increase compliance and to identify areas of water loss from leaks as well as from theft. Actual expenditures currently do not include many of the capital improvement projects that are budgeted this fiscal year. The DPW and the Finance Department will continue to closely monitor the Utilities revenues and expenditures to keep them in line.
- The June 30, 2014 ruling by the Federal Court which modified its injunction to allow the City to implement certain changes to retiree health care benefits should provide some financial relief to the City budget, at least for the time during which the matter is being litigated. However, at this time it is not possible to project the amount of relief from the $5 million which was added to the budget for retiree health care as a result of the Courts initial decision prohibiting any change to retiree health care. This is because implementing the approved changes will not be effective until November 1 because of the time necessary to incorporate the changes into the current plans. With the second quarter report, we anticipate being able to project the anticipated costs in comparison to the budgeted amounts.

Good gravy. First, just to clarify, when Valerie says GM is leaving, she means leaving the Flint water system, not abandoning the City altogether.

Second, to anyone who grew up in Flint as I did, the notion that I would be getting my drinking water from the Flint River is downright scary. Too bad the EM didn't ask me what I thought, though I'm sure he heard it from plenty of others. My Mom is a City resident. Nice to know she's drinking water with elevated chlorine levels and fecal coliform.

I agree with Valerie. They should try to get back on the Detroit system as a stopgap ASAP before this thing gets too far out of control.

Subject: Flint water

As you know there have been problems with the Flint water quality since they left the DWSD system, which was a decision by the emergency manager there. Specifically, there has been a boil water order due to bacterial contamination. What is not yet broadly known is that attempts to fix that have led to some levels of chlorine-related chemicals that can cause long-term damage if not remedied (though we believe they will remedy them before any damage would occur in the population). Now apparently the reduced quality is causing GM to leave due to rusted parts.

I am fairly sure that GM's departure now means the economic rationale for Flint leaving DWSD in the interim while the new intake is constructed has just been eliminated. Moreover, our DEQ has been working with Flint's team to try to address the technical problem, but doing a blend of DWSD water and Flint water, or going back altogether for a year or two while the new lake intake is constructed, have not really been solutions on the table.

Now we are getting comments about being lab rats in the media, which are going to be exacerbated when it comes out that after the boil water order, there were chemicals in the water that exceeded health-based water quality standards. I

think we should ask the EM to consider coming back to the Detroit system in full or in part as an interim solution to both the quality, and now the financial, problems that the current solution is causing. That additional revenue would also help DWSD, obviously, and the infrastructure is already in place, so this could be implemented quickly. I am not sure who is the best person to initiate that conversation with the EM, but I see this as an urgent matter to fix.

--Valerie

P.S. Note:I have not copied DEQ on this message for FOIA reasons. I have sent them the below message from the Senator's office and had conversations with them re making sure to brief the EM directly on the water quality issues.

Hi Valerie,

Hope you're doing well. Senator Ananich asked me to forward you this article about GM's decision to stop using Flint River water: http://www.mlive.com/news/flint/index.ssf/2014/10/gms_decision_to_stop_using_fli.html. He mentioned he'd had a conversation with you about Flint's water issues and just wanted to ensure you saw the latest.

Thanks! Have a wonderful afternoon. :)

Best,

Bryanna

QUARTERLY REPORT TO THE STATE TREASURER
REGARDING THE FINANCIAL CONDITION OF THE CITY OF FLINT

October 15, 2014

This quarterly report covers the period from July 1, 2014 through September 30, 2014 and addresses the financial condition of the City of Flint.

Per P.A. 436 Section 9 (MCL141.1549) requires that you submit quarterly reports to the State Treasurer with respect to the financial condition of your local government, secondly, a copy to each state senator and state representative who represents your local government. In addition, each quarterly report shall be posted on the local government's website within 7 days after the report is submitted to the State Treasurer.

Status of the Financial Condition of the City of Flint
July 1, 2014 through September 30, 2014

The City of Flint has adopted a biennial budget for fiscal years 2015 and 2016, and is committed to ongoing review of revenues and expenses.

Summary of FY15 First Quarter and FY 15 Budget Status

In summary, at the end of the 1st quarter, the financial outlook for the remaining FY15 appears to be on track. In total, revenues and expenditures are generally meeting expectations. The City continues to make timely pension contributions and healthcare premium payment for both active employees and retirees. (Attachment A: Summary and Revenue & Expense Report 1st Quarter FY15)

Some further observations on the current budget status:

- In the General Fund, actual revenues are just above 20% of budgeted revenues. At the time of the report, however, the City had not received its portion of State Shared Revenues, and when those revenues are received (approximately $2.4 million), they will be accrued back to the 1st quarter.
- General Fund expenditures are reported at 22% of the budgeted expenditures, in line with expectations. However, it has been discovered that $13,000 in communications expenses was inadvertently deleted from the District Court budget. It will be necessary to consider an adjustment to the District Court budget to address this shortfall.
- Also, we continue to monitor the personnel expenses in the Police and Fire budgets to determine the budgetary impact that reducing staffing levels through attrition rather than layoffs at the beginning of the year will have. It appears that attrition is moving staffing levels down to the budgeted levels, with Fire already at its reduced level of 75, and Police currently at 121 (VERIFY), with a target of 115. By the end of the second quarter we anticipate that the reduced levels will be met by then and in addition, we will have the results of the ICMA organizational and staffing study. We will also be beginning to receive a portion of the $1 million allocated for police and fire expenditures in the state budget. We presently anticipate that these funds will be sufficient to offset any shortfall in the personnel line items in these budgets. With the second quarter report, we will provide any necessary budget amendments in these areas.
- Special Revenue Funds, Major and Local Street Funds are operating below budgeted revenues and expenditures. Major Streets, Fund 202, revenues are down due to timing in which State revenues of the Gas and Weight Tax allocations have not been received as of the date of the report. Budgets in the Grant Funds, Funds 274, 295, and 296 reflect timing differences as well. The revenues in these funds have not been received as of the date of the report. In addition, it will be necessary to create a budget for Fund 297 to reflect the final expenditure of a COPS Hiring Grant, with funds carried over into the FY15 budget year.
- Revenues in the Building Safety and Inspections Fund (Fund 542) are coming in higher than anticipated for the first quarter of the year. This was due largely to

the new construction of the paint shop on the General Motor's property expansion.

- Revenues in the Water and Sewer funds are coming in at 19% and 16% respectively in comparison to the budgeted totals. At the same time, expenditures are coming in a 13% and 11% of the budgeted totals. It appears that the trend of reduced water billings are continuing, and efforts are underway to increase compliance and to identify areas of water loss from leaks as well as from theft. Actual expenditures currently do not include many of the capital improvement projects that are budgeted this fiscal year. The DPW and the Finance Department will continue to closely monitor the Utilities revenues and expenditures to keep them in line.
- The June 30, 2014 ruling by the Federal Court which modified its injunction to allow the City to implement certain changes to retiree health care benefits should provide some financial relief to the City budget, at least for the time during which the matter is being litigated. However, at this time it is not possible to project the amount of relief from the $5 million which was added to the budget for retiree health care as a result of the Courts initial decision prohibiting any change to retiree health care. This is because implementing the approved changes will not be effective until November 1 because of the time necessary to incorporate the changes into the current plans. With the second quarter report, we anticipate being able to project the anticipated costs in comparison to the budgeted amounts.

Current Cash Flow

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on September 30, 2014 was in excess of $61 million. (Attachment B Cash Flow Comparisons)

FY 15 AND FY 16 Budget

The FY14 budget was developed within the context of a five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee completed the FY15-19 strategic plan and financial projections. The City Council has also adopted a Mission, Vision, Goals and Budget Priorities statement. This was incorporated into the FY 14/15 and FY 15/16 Budget document (Attachment C Final FY15 & FY16 Budget Document). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections. The biennial budget was adopted on June 23, 2014 via EM Order #13.

RE: City of Flint Quarterly Financial Report
July 1, 2014 – September 30, 2014

The City of Flint's Strategic Plan envisions a "well managed financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students and visitors and improve our quality of life."

Operating in a financially sustainable manner is a key component to achieving that vision. As part of this, a biennial budget has been adopted for fiscal years 2015 and 2016, and a commitment has been made to a regular and ongoing review of revenues and expenses. To this end, a quarterly report on the status of the City's budget will be provided to the Finance Committee on an ongoing basis.

Attached is a comparison of the City's budgeted revenues and expenses to actual revenues and expenses as of September 30, 2014.

In summary, at the end of the 1st quarter, the financial outlook for the remaining FY15 appears to be on track. In total, revenues and expenditures are generally meeting expectations. The City continues to make timely pension contributions and healthcare premium payment for both active employees and retirees.

Some further observations on the current budget status:

- In the General Fund, actual revenues are just above 20% of budgeted revenues. At the time of the report, however, the City had not received its portion of State Shared Revenues, and when those revenues are received (approximately $2.4 million), they will be accrued back to the 1st quarter.

- General Fund expenditures are reported at 22% of the budgeted expenditures, in line with expectations. However, it has been discovered that $13,000 in communications expenses was inadvertently deleted from the District Court budget. It will be necessary to consider an adjustment to the District Court budget to address this shortfall.

- Also, we continue to monitor the personnel expenses in the Police and Fire budgets to determine the budgetary impact that reducing staffing levels through attrition rather than layoffs at the beginning of the year will have. It appears that attrition is moving staffing levels down to the budgeted levels, with Fire already at its reduced level of 75, and Police currently at 121, with a target of 115. By the end of the second quarter we anticipate that the reduced levels will be met by then and in addition, we will have the results of the ICMA organizational and staffing study. We will also be beginning to receive a portion of the $1 million allocated for police and fire expenditures in the state budget. We presently anticipate that these funds will be sufficient to offset any shortfall in the personnel line items in these budgets. With the second quarter report, we will provide any necessary budget amendments in these areas.

- Special Revenue Funds, Major and Local Street Funds are operating below budgeted revenues and expenditures. Major Streets, Fund 202, revenues are down due to timing in which State revenues of the Gas and Weight Tax allocations have not been received as of the date of the report. Budgets in the Grant Funds, Funds 274, 295, and 296 reflect timing differences as well. The revenues in these funds have not been received as of the date of the report. In addition, it will be necessary to create a budget for Fund 297 to reflect the final expenditure of a COPS Hiring Grant, with funds carried over into the FY15 budget year.

- Revenues in the Building Safety and Inspections Fund (Fund 542) are coming in higher than anticipated for the first quarter of the year. This was due largely to the new construction of the paint shop on the General Motor's property expansion.

- Revenues in the Water and Sewer funds are coming in at 19% and 16% respectively in comparison to the budgeted totals. At the same time, expenditures are coming in a 13% and 11% of the budgeted totals. It appears that the trend of reduced water billings are continuing, and efforts are underway to increase compliance and to identify areas of water loss from leaks as well as from theft. Actual expenditures currently do not include many of the capital improvement projects that are budgeted this fiscal year. The DPW and the Finance Department will continue to closely monitor the Utilities revenues and expenditures to keep them in line.

- The June 30, 2014 ruling by the Federal Court which modified its injunction to allow the City to implement certain changes to retiree health care benefits should provide some financial relief to the City budget, at least for the time during which the matter is being litigated. However, at this time it is not possible to project the amount of relief from the $5 million which was added to the budget for retiree health care as a result of the Courts initial decision prohibiting any change to retiree health care. This is because implementing the approved changes will not be effective until November 1 because of the time necessary to incorporate the changes into the current plans. With the second quarter report, we anticipate being able to project the anticipated costs in comparison to the budgeted amounts.

Ed,

Darnell and I suggest that it would be useful to have DEQ on the line for the noon call, since we have been working with them continuously on water quality issues. Mike Prysby, District Engineer for MDEQ, has been our primary contact.

RE: City of Flint Water Issues Conference Call Summary

A conference call was held today between the Department of Treasury and the City of Flint to discuss recent water issues in the City. This memo is a summary of that discussion.

1) Department of Environmental Quality – The DEQ has been supportive of the decision for Flint to move to use of the Flint River as a water source. The DEQ receives regular reports from the City's continuous water quality monitoring. They have agreed that the water being produced for distribution is safe. Flint needs the DEQ to make an unequivocal statement that the Flint River water is safe for drinking and all other uses.

2) The City of Flint has been following all of the recommendations from the Water Reliability Study for water production. This study was conducted by Rowe Engineering and Potter Consulting; updated in December 2013. The DEQ has frequently indicated that the guidelines in this study should be used as a basis for water production decisions.

3) The Flint River has some inherent differences as compared to the water from Lake Huron. The lake water comes from deep in the lake and is colder and more consistent than the water in a much less deep river and the conditions of which fluctuate in heavy rain events. These differences do impact the additives required, including chlorine levels. While these variations result in more work at the treatment plant, the end product is still well within DEQ quality standards.

4) History of Boil Water Notices in Flint – The City performs three times/week testing at 10 locations around the City. On one occasion, in one location, a sample was found to have fecal coliform. A boil water notice for only a specific section of the city was issued. Corrective actions were taken: hydrants were flushed, chlorine levels were increased and follow-up samples were taken. Two other situations developed total coliform conditions in areas different than the first boil water notice. Total coliform is naturally developing and means conditions exist for more bacteria to grow. Hydrant flushing began and a failed valve was identified and repaired. Boil water notices were issued in these instances due to the prior fecal coliform condition. This was required by the DEQ in an abundance of caution.

5) Specific General Motors Water Situation – The General Motors Engine Plant in Flint found that a specific machining operation was developing a rust condition. GM identified the source of the rust to higher chloride levels in the Flint River water than were present in the water received through DWSD. This is a condition which is exacerbated by GM's water recycling process which concentrates the chloride levels. Please note: the manufacturing water use that GM requires for its water supply is not a parallel to the potable drinking water standards approved by the DEQ and thus ***is not the same issue.*** The City has agreed to allow this GM plant to use DWSD water through Flint Township for the period between now and the introduction of KWA water. This will cost the City of Flint Water Fund ~ $400,000/year in revenue. This reduction in revenue has not negated the net positive impact of changing to the Flint River water source on a temporary basis.

6) Handling Repairs to the Water Infrastructure – The City has identified a large number of broken valves and main breaks which require repair. Some of these repairs are on large lines which will result in loss of pressure and subsequent boil water advisories in specific areas of the City. We are planning on extensive notification to residents but this is complicated by our other recent water issues. This is part of improving the whole distribution system. As the Water Fund has gotten healthier and there is a willingness on the part of the administration to address these problems, there will be many more short term shut downs and repairs taking place. This is a good thing, but it is not being received in that light by the residents or some of our council members. Additionally, I would note that the Flint Water Service staff is highly capable of managing these repair issues as they occur, as they have always done and will continue to do so.

7) KWA vs DWSD as a Water Source – This has been a long running discussion over several decades. The Flint City Council voted to approve the move to KWA in 2013. We still believe that was and is a good decision. As part of that move, $8 million in upgrades were required to be made at the Flint Water Treatment Plant. Using the Flint River as the primary water source between 2014 and the completion of KWA in 2016 allowed the City to manage these upgrades without needing to borrow this money. Additionally, the Flint River will be our permanent back-up water source.

8) Public Notification – The City is working with the firm Truscott-Rossman to assist us in crafting a clear message to the residents of Flint that the water is safe, the repairs that are being made are part of a much larger plan for infrastructure upgrades. This is just the beginning of the infrastructure replacement work which was defined in the Master Plan and the Capital Improvement Plan. In fact, in the coming Spring 11,000 feet of water line will be replaced. In the following years another 11,000 feet per year will be replaced.

Thank you for your assistance in helping us clarify this issue to the Governor and other interested parties.

MEDIA AVAILABILITY FOR QUESTIONS AND COMMENTS WILL BE 9:00AM, THURSDAY OCTOBER 16, 2014. PLEASE CONTACT THIS OFFICE TO CONFIRM.

For Immediate Release

Major Water Line Repairs Will Take Place in Robert T. Longway Blvd & Dort Hwy. Area, More Repairs to System Scheduled

Flint, Michigan – October 15, 2014 – The City of Flint's Department of Public Works is working to repair a water main break in the area of Dort and Longway. That repair will be followed by more scheduled repairs to the system in the area which will begin on Saturday, October 18, 2014 and which should be completed by evening Sunday, October 19. The work being performed will result in improved operational control over a large transmission line running down Dort Hwy. which will include improving chlorine residuals in the southern portion of Flint. No residential customers are connected to this line; however, there will be a reduction of pressure to the system, which may cause low water pressure in the surrounding area.

In accordance with DEQ regulations the City of Flint will be issuing a Boil Water Advisory for the area (see attached map) ONLY if residents lose water service during this 24 hour period. Residents who lose water service during that time should expect to use boiled water for 24 hours after service is restored based on testing. If residents in the area do not experience a loss of water service, then there is no need to boil water. Any residents who do experience a loss of water should call the Water Service Center at 810-766-7202 between 8:00am and 4:00pm on Saturday to report the issue.

A Boil Water Advisory is restricted to drinking water and un-boiled water used for cooking. Once again, this is merely a precaution as no one in the affected area should be directly connected to the portion of the system being repaired. Low pressure and discoloration may occur for those in the area, but this is no cause for concern. The City of Flint asks that residents watch their local news station for announcement of the completion of repairs.

A break in the sixteen inch water main was discovered a week ago and crews have since been examining the surrounding system. As a result of that examination, a number of valves in the area were identified as "long overdue" for replacement. "The valves we are replacing in this area have needed attention for quite some time," said Flint Utilities Administrator Daugherty Johnson, "the fact that we now have the resources and planning to perform this work is a tremendous benefit for the entire City."

All of the scheduled work taking place is part of an ongoing, broader plan to examine different sections of the water system citywide for needed repairs and upgrades. Upgrading critical infrastructure such as the water system is a key part of the City's Strategic Plan, which is directly guided by the Master Plan, and part of the City's commitment to deliver the highest quality water possible.

Sent: Thursday, October 16, 2014 2:14 PM
Subject: PRESS RELEASE: Statement on GM Water Agreement
Attachments: GM.Water.Agreement.Statement.pdf

For Immediate Release

Water Issues for General Motors are Not Issues for Residents

Flint, Michigan – October 16, 2014 – The City of Flint is committed to ensuring that all Flint residents have safe quality drinking water. That is why we recently reached an agreement with General Motors to allow the company to temporarily use Flint Township as a water source for their manufacturing needs.

The City of Flint uses chloride as an important component in making water safe for drinking, but that can cause problems for GM's machining work. The agreement comes after GM raised concerns about chloride levels in Flint's treated water.

This temporary switch is needed to allow GM to use water that does not have the same level of treatment provided for high quality drinking water. This ensures that Flint residents will continue to have safe quality drinking water but minimizes the impact on GM's machining work. City officials continuously test drinking water to ensure quality.

City of Flint Wednesday 9:00am Phone Conference Agenda
October 29, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD –
      i. The initial draft reports for the evaluation of both the Police and the Fire departments have been received. These are data compilations. The final drafts with recommendations will be completed by the end of October.
      ii. Completing revisions to SRMS MOA.
      iii. The Citizens Radio Patrol will be working tomorrow evening before Halloween.
      iv. Request clarification of State Attorney General's requirement for handling sexual assault kit backlog processing. City has 346 kits in need of processing.
      v. Emergency Manager Earley is setting up a meeting with MSP Post and District Commanders to prepare for transition and keep momentum going with COF PD and MSP.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) The legislative initiative to allow a vote on a local income tax increase will be handled by Mayor Walling who will be working through the Governor's Office and H. Hollins.
   c) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Sgts., and Capts. & Lts. bargaining units have achieved ratified CBAs.
   c) Next benchmark is audit. Budget is on track at 1st quarter end.
   d) Fund balance ordinances including OPEB and BSF have been drafted. Also drafted ordinance for budgeting and strategic planning process will be reviewed by Finance and Admin. Cmte. at the December meeting.

5) **City Council Update**
   a) The Council meeting schedule has been revised for the balance of the year to accommodate election of officers and the November and December holidays. The October meeting has been cancelled.

6) **Blue Ribbon Committee on Governance**
   a) The Flint Journal has published a series of articles exploring each of the six Flint ballot proposals and this past Sunday issued an endorsement of all 6 proposals.

7) **Water Issues**
   a) General Motors Water Issues – working through lawyers at this point. We are close to a final agreement regarding their level as a customer with the City of Flint.
   b) A meeting with the Department of Environmental Quality will follow this meeting today.

8) **Messaging**
   a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.
   b) Starting a new communication strategy with an EM press briefing the afternoon of a Council meeting or important Committee meeting.
   c) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.

9) **9-1-1 Reconsolidation Plan**
   a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation is expected to be complete by July 1, 2015. Mayor Walling has been appointed the City's representative on the Membership Board. Work is progressing to complete merger before July 1, 2015.
   b) C-GAP award for 9-1-1 Tower will have ~$400,000 balance. Would like to use for 9-1-1 consolidation expenses.

10) **Recruitment and Selection of City Administrator/Manager**
   a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.
   b) 25 applications have been received to-date. The interview team will include: Mayor Walling, Councilwoman Galloway, Jerry Ambrose, Randy Byrne, a representative from the Concerned Pastors, a representative of the Flint business community, and Emergency Manager Earley. Preliminary screening has begun and five finalists will be selected for public, in-person interviews. Recruitment timeline is attached.

11) **Other Items**

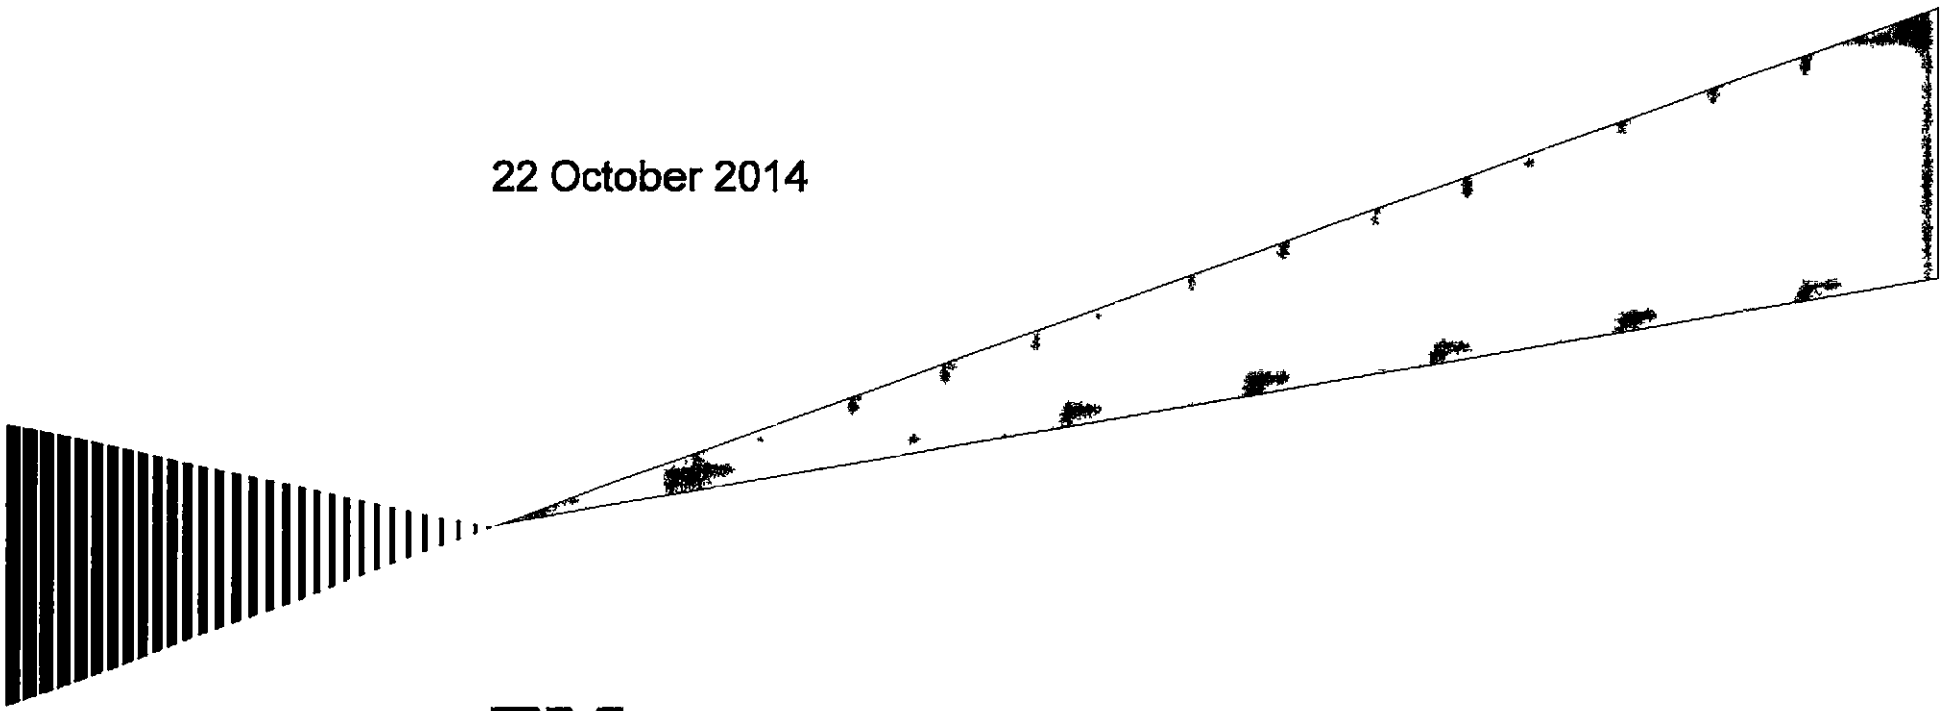
City of Flint

Flint Water Service Center Strategic Analysis

22 October 2014



EY
Building a better working world

Reliance Restricted

Executive summary

The Flint Water Service Center (WSC) houses both the Water Distribution and Sewer Maintenance Divisions of the City of Flint. These Divisions convey water to Flint residents and businesses and remove the sewage to the Water Pollution Control Facility. Management is exploring various strategic alternatives regarding the future direction and ownership of WSC. To support the assessment, you requested EY provide valuation advisory services to evaluate various alternatives for WSC. As part of our analysis, we calculated a range of values for WSC as shown below:

	Range of Calculated Values		
	Low	Mid-point	High
Cost of equity	11.0%	10.0%	9.0%
Calculated net asset value	$125,426,300	$142,899,300	$165,307,200
Indicated range of Calculated Values of City of Flint's net asset value	$125,426,300	$142,899,300	$165,307,200

	Implied range of multiples		
Implied TIC/Book value	1.3x	1.5x	1.7x
Implied TIC/Tangible book value	1.3x	1.5x	1.7x

The calculated range of values reflects the perspective of a strategic investor maximizing its allowable return in a regulated water utility such as WSC. We calculated additional ranges of value based on management's projections, with no adjustments for an investor's allowable return, and our observed findings related to potential operating expense reductions of 10-30% as shown below. The sensitivities were included to illustrate how a potential buyer could achieve its desired return while accomplishing the City of Flint's stated goal of not raising rates to customers above the levels determined by their baseline forecasts.

	Range of Calculated Values		
	Low	Mid-point	High
Discounted cash flow analysis - No rate adjustment	46,519,400	50,779,300	56,220,300

Scope of service
Flint Water Service Center

The valuation services consisted of performing calculations of value related to WSC and performing services related to the development of cash flow forecast sensitivities that are based upon market rate of return considerations for WSC. We performed the following procedures in the completion of our services:

- Research regarding rates of return for regulated utilities operating in a similar industry
- Development of an appropriate discount rate for WSC
- Development of forecast sensitivities based upon market rate of return considerations
- Analysis of the performance and market position of WSC relative to similar publicly-traded companies
- Analysis of financial data and valuation multiples of similar publicly-traded companies
- Calculations[1] of a value for the equity value of WSC utilizing applicable valuation methodologies
- Consideration of the Income Approach to value
- Prepared a presentation summarizing the methodologies employed in our analysis and the assumptions on which our analysis was based

[1]Calculations do not constitute an "appraisal", as that term is defined in BVS-I, General Requirements for Developing a Business Valuation, of the Business Valuation Standards of the American Society of Appraisers. A calculation does not represent EY's opinion or recommendation of value

Valuation methodologies

Three different approaches to value may be employed to estimate value: (i) the Income Approach, (ii) the Market Approach and (iii) the Cost Approach. The nature of the investment or asset and the availability of data will dictate which approaches are ultimately utilized to derive value.

Income Approach

- The Income Approach focuses on the income-producing capability of the subject company or asset. The underlying premise of this approach is that the value of an asset can be measured by the present worth of the net economic benefit (cash receipts, less cash outlays) to be received over the life of the subject asset. The steps followed in applying this approach include:
  - Estimating the expected after-tax cash flows attributable to the asset over its life
  - Converting these after-tax cash flows to present value through "discounting"
- The discounting process uses a rate of return that accounts for both the time value of money and investment risk factors. Finally, the present values of the after-tax cash flows over the life of the asset are totaled to arrive at an indication of the calculated value for the asset.

Market Approach

- The Market Approach measures value based on what other purchasers in the market have paid for assets that can be considered reasonably similar to those being valued. When the Market Approach is utilized, data is collected on the prices paid for reasonably comparable assets. Adjustments are made to the prices paid to compensate for differences between reasonably similar assets and the asset being valued.

Cost Approach

- The Cost Approach is based on the premise that a prudent investor would pay no more for an asset than its replacement or reproduction cost new. The cost to replace the asset would include the cost of constructing a similar asset of equivalent utility at prices applicable at the time of the valuation analysis. To arrive at an estimate of value using the Cost Approach, the replacement or reproduction cost new is estimated and reduced for appraisal depreciation.

Selected approach

- Based on facts and circumstances and availability of information, we utilized the Income Approach in arriving at the calculated range of equity values for WSC.

Strategic Value Assumptions Summary

We utilized the following assumptions in our valuation analysis, which were developed based on discussions with management and/or through industry research:

- Transaction expected to be financed with 45.0% equity and 55.0% debt
- City of Flint expected to retain and redeploy existing cash
- Future capital expenditures expected to be financed with 45.0% equity and 55.0% debt
- Allowable return on equity assumed to be equal to 11.0%
- Outstanding collectibles available to a strategic buyer immediately
- Transition to raw water from Karegnondi Water Authority (KWA) in 2015
- Post-employment benefits liability currently funded through cash flows
- Outstanding debt of $21.8 million extinguished at time of transaction
- Deferred tax liability available to the buyer due to temporary differences between book and tax calculations

Notes
BV = Book value EBIT = Earnings before interest and taxes EBITDA = Earnings before interest tax depreciation and amortization N/A = not applicable NWC = Net working capital OPEB = Other post employment benefits P= Price ROR = Rate of return, ROE = Return on equity TBV = Tangible book value
(a) Based on projections provided by Raftelis Financial Consultants Inc
(b) Equals revenue rate adjustment required to achieve annual return on equity
(c) Based on discussions with Management this represents agreed payments to the Karegnondi Water Authority
(d) Based on 20-year straight line depreciation of current fixed assets and capital expenditures.
(e) Equals effective tax rate for the State of Michigan
(f) Based on the LTM average days sales outstanding and days sales payable outstanding of the guideline companies
(g) Based on a review of pending and historical rate cases in the utility industry
(h) Based on the Moody's BAA bond rating as of the valuation date
(i) Assumes additional capex financed over a 20-year term with new debt

Notes

BV = Book value EBIT = Earnings before interest and taxes EBITDA = Earnings before interest tax depreciation and amortization N/A = not applicable NWC = Net working capital OPEB = Other post employment benefits P= Price ROR = Rate of return ROE = Return on equity TBV = Tangible book value

(a) Based on projections provided by Raftelis Financial Consultants, Inc.
(b) Equals revenue rate adjustment required to achieve annual return on equity
(c) Based on discussions with Management this represents agreed payments to the Karegnondi Water Authority
(d) Based on 20-year straight line depreciation of current fixed assets and capital expenditures.
(e) Equals effective tax rate for the State of Michigan
(f) Based on the LTM average days sales outstanding and days sales payable outstanding of the guideline companies
(g) Based on a review of pending and historical rate cases in the utility industry
(h) Based on the Moody's BAA bond rating as of the valuation date.
(i) Assumes additional capex financed over a 20-year term with new debt

Notes
EV = Book value EBIT = Earnings before interest and taxes EBITDA = Earnings before interest tax depreciation and amortization N/A = not applicable NWC = Net working capital OPEB = Other post employment benefits P= Price ROR = Rate of return, ROE = Return on equity TBV = Tangible book value
(a) Based on projections provided by Rafalis Financial Consultants, Inc
(b) Equals revenue rate adjustment required to achieve annual return on equity
(c) Based on discussions with Management this represents agreed payments to the Karegnondi Water Authority
(d) Based on 20-year straight line depreciation of current fixed assets and capital expenditures.
(e) Equals effective tax rate for the State of Michigan.
(f) Based on the 1 TM average days sales outstanding and days sales payable outstanding of the guideline companies
(g) Based on a review of pending and historical rate cases in the utility industry
(h) Based on the Moody's BAA bond rating as of the valuation date.
(i) Assumes additional capex financed over a 20-year term with new debt

Notes
BV = Book value EBIT = Earnings before interest and taxes EBITDA = Earnings before interest tax depreciation and amortization N/A = not applicable NWC = Net working capital OPEB = Other post employment benefits P= Price ROR = Rate of return ROE = Return on equity TBV = Tangible book value.
(a) Based on projections provided by Rafalis Financial Consultants Inc.
(b) Equals revenue rate adjustment required to achieve annual return on equity
(c) Based on discussions with Management the represents agreed payments to the Karegnondi Water Authority
(d) Based on 20-year straight line depreciation of current fixed assets and capital expenditures.
(e) Equals effective tax rate for the State of Michigan.
(f) Based on the LTM average days sales outstanding and days sales payable outstanding of the guideline companies
(g) Based on a review of pending and historical rate cases in the utility industry
(h) Based on the Moody's BAA bond rating as of the valuation date
(i) Assumes additional capex financed over a 20-year term with new debt.

American Water Works Company, Inc.	American Water Works Company, Inc., through its subsidiaries, provides water and wastewater services in the United States and Canada. The company's Regulated Businesses segment offers water and wastewater services to approximately 1,500 communities in 16 states. It operates approximately 80 surface water treatment plants, 500 groundwater treatment plants; 1,000 groundwater wells, 100 wastewater treatment facilities, 1,200 treated water storage facilities, 1,300 pumping stations, 87 dams; and 47,000 miles of mains and collection pipes. This segment serves residential customers, commercial customers, such as shops and businesses, industrial customers, including manufacturing and production operations, public authorities, which comprise government buildings and other public sector facilities; and other water utilities, as well as supplies water to public fire hydrants for firefighting purposes, and private fire customers for use in fire suppression systems in office buildings and other facilities. Its Market-Based Operations segment undertakes contracts to design, build, operate, and maintain water and wastewater facilities for the United States military, municipalities, the food and beverage industry, and other customers, provides services to homeowners and smaller commercial establishments to protect against the cost of repairing broken or leaking water pipes, and clogged or blocked sewer pipes inside and outside their accommodations, and offers biosolids management, transport, and disposal services to municipal and industrial customers, as well as products for cleansing water and wastewater, and wastewater residuals management services American Water Works Company, Inc. serves approximately 14 million people with drinking water, wastewater, and other water-related services in approximately 40 states and 2 Canadian provinces. The company was founded in 1886 and is headquartered in Voorhees, New Jersey.
Aqua America Inc.	Aqua America, Inc., through its subsidiaries, operates regulated utilities that provide water or wastewater services in the United States. The company offers liquid waste hauling and disposal, and water and wastewater services through operating and maintenance contracts with municipal authorities and other parties. It also provides water and sewer line repair services, and protection solutions to households, backflow prevention, construction, and other non-regulated water and wastewater services, and non-utility raw water supply services for firms in the natural gas drilling industry. The company serves residential, commercial, fire protection, industrial, other water, wastewater, and other utility customers. As of February 28, 2014, it served 3 million residents in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia. The company was formerly known as Philadelphia Suburban Corporation and changed its name to Aqua America, Inc. in 2004. Aqua America, Inc. was founded in 1968 and is based in Bryn Mawr, Pennsylvania.
Artesian Resources Corp	Artesian Resources Corporation, through its subsidiaries, provides water, wastewater, and other services on the Delmarva Peninsula. It distributes and sells water to residential, commercial, industrial, municipal, and utility customers in the states of Delaware, Maryland, and Pennsylvania. The company also offers water for public and private fire protection to customers in its service territories. In addition, it provides contract water and wastewater services, water and sewer service line protection plans, and wastewater management services, as well as design, construction, and engineering services. As of December 31, 2013, the company served approximately 79,700 metered water customers through 1,182 miles of transmission and distribution mains. Artesian Resources Corporation was founded in 1905 and is headquartered in Newark, Delaware.
California Water Service Group	California Water Service Group, through its subsidiaries, provides water utility and other related services in California, Washington, New Mexico, and Hawaii. The company is engaged in the production, purchase, storage, treatment, testing, distribution, and sale of water for domestic, industrial, public, and irrigation uses, as well as for fire protection. It provides its services to approximately 475,100 customers in 83 California communities, 4,200 water and wastewater customers on the islands of Maui and Hawaii; 16,000 customers in the Tacoma and Olympia areas in Washington and 7,600 water and wastewater customers in the Belen, Los Lunes, and Elephant Butte areas in New Mexico. The company is also involved in the non-regulated water-related services, including operating water and waste water systems, providing operating and maintenance, meter reading, and billing services to municipalities and private companies, leasing communication antenna sites on its properties to telecommunication companies, operating recycled water systems; providing lab services for water quality testing, billing of third-party insurance programs to its residential customers, and offering sewer and refuse billing services to various municipalities. California Water Service Group was founded in 1926 and is headquartered in San Jose California.

Date of valuation: 31 March 2014
(US$)

Connecticut Water Service Inc.	Connecticut Water Service, Inc., through its subsidiaries, operates as a regulated water company. The company operates in three segments: Water Activities, Real Estate Transactions, and Services and Rentals. The Water Activities segment supplies public drinking water. The Real Estate Transactions segment is involved in the sale or donation of its real estate holdings. The Services and Rentals segment provides contracted services to water and wastewater utilities, and other clients. Its services include contract operations of water and wastewater facilities. Linebacker, a service line protection plan for public drinking water customers; and providing bulk deliveries of emergency drinking water to businesses and residences through tanker trucks. This segment also rents and leases residential and commercial properties to third parties. As of December 31, 2013, the company supplied water to 121,768 customers in Connecticut and Maine, the United States. Connecticut Water Service, Inc. was founded in 1956 and is headquartered in Clinton, Connecticut.
Middlesex Water Co.	Middlesex Water Company, through its subsidiaries, provides regulated and unregulated water, and wastewater utility services. The company operates in two segments, Regulated and Non-Regulated. The Regulated segment is involved in collecting, treating, and distributing water on a retail and wholesale basis to residential, commercial, industrial, and fire protection customers in parts of New Jersey, Delaware, and Pennsylvania. This segment also operates regulated wastewater systems in New Jersey and Delaware. The Non-Regulated segment provides non-regulated contract services for the operation and maintenance of municipal and private water and wastewater systems in New Jersey and Delaware. Middlesex Water Company was founded in 1897 and is headquartered in, New Jersey.
SJW Corp	SJW Corp., through its subsidiaries, operates as a water utility company. The company operates through two segments, Water Utility Services and Real Estate Services. It is engaged in the production, purchase, storage, purification, distribution, wholesale, and retail sale of water. The company also provides non-tariffed services, including water system operations, maintenance agreements, and antenna leases. Its water supply consists of groundwater from wells, surface water from watershed run-off and diversion, and imported water purchased from the Santa Clara Valley Water District. The company offers water service to approximately 228,000 connections that serve customers in portions of the cities of Cupertino and San Jose, as well as in Campbell, Monte Sereno, Saratoga, the Town of Los Gatos, and adjacent unincorporated territories in Santa Clara County, California. It also provides water service to approximately 11,000 connections, which serve approximately 36,000 people in a service area comprising approximately 240 square miles in the region between San Antonio and Austin, Texas. In addition, the company, through its subsidiary, SJW Land Company, owns undeveloped land in California and Tennessee, owns and operates commercial buildings in California, Texas, Arizona, and Tennessee, and holds a 70% limited partnership interest in 444 West Santa Clara Street, L.P., a real estate limited partnership that operates commercial building rentals. SJW Corp. was founded in 1866 and is headquartered in San Jose, California.
The York Water Company	The York Water Company is engaged in impounding, purifying, and distributing drinking water. It operates two wastewater collection and treatment systems, and has two reservoirs comprising Lake Williams and Lake Redman, which together hold up to approximately 2.2 billion gallons of water. The company also has a 15-mile pipeline from the Susquehanna River to Lake Redman, which provides access to an additional supply of 12.0 million gallons of untreated water per day; and owns two wells providing approximately 100,000 gallons per day to supply water to its customers in Carroll Valley, Adams County. As of December 31, 2013, it served 63,774 customers in 39 municipalities within York County and 8 municipalities within Adams County in Pennsylvania. The company serves various customers in fixtures and furniture, electrical machinery, food products, paper, ordnance units, textile products, air conditioning systems, laundry detergent, barbells, and motorcycles industries. The York Water Company was founded in 1816 and is based in York, Pennsylvania.

Statement of limiting conditions

- Nothing has come to our attention to cause us to believe that the facts and data set forth in this presentation are not correct.
- Provision of calculations of values and considerations of the issues described herein are areas of regular valuation practice for which we believe that we have, and hold ourselves out to the public as having, substantial knowledge and experience. The services provided are limited to such knowledge and experience and do not represent audit, advisory or tax-related services that may otherwise be provided by Ernst & Young LLP. Notwithstanding this limitation, the advice contained herein was not intended or written by Ernst & Young LLP to be used, and cannot be used, by the recipient or any other taxpayer for the purposes of avoiding penalties that may be imposed under the Internal Revenue Code or applicable state or local tax laws.
- No investigation of the title to the subject Client and subject assets has been made, and the owner's claim to the subject Client and subject assets is assumed to be valid. To the extent that Ernst & Young LLP's services include any analysis of assets, properties or business interests, Ernst & Young LLP assumes no responsibility for matters of legal description or title, and Ernst & Young LLP shall be entitled to make the following assumptions: (i) title is good and marketable, (ii) there exist no liens or encumbrances, (iii) there is full compliance with all applicable Federal, state, local and national regulations and laws (including, without limitation, usage, environmental, zoning and similar laws and/or regulations), and (iv) all required licenses, certificates of occupancy, consents, or legislative or administrative authority from any Federal, state, local, or national government, private entity or organization have been or can be obtained or renewed for any use on which Ernst & Young LLP services are to be based.
- This presentation has been prepared solely for the purpose stated, and may not be used for any other purpose. Neither this presentation nor any portions hereof may be copied or disseminated through advertising, public relations, news, sales, Securities and Exchange Commission disclosure documents or any other public (or private) media without the express prior written approval of Ernst & Young LLP.
- The calculations of value contained herein are not intended to represent the values of the subject assets at any time other than the effective date that is specifically stated in this presentation. Changes in market conditions could result in recommendations of value substantially different than those presented at the stated effective date. We assume no responsibility for changes in market conditions or for the inability of the owner to locate a purchaser of the subject assets at the values stated herein.
- No responsibility is assumed for information furnished by others, including management, and such information is believed to be reliable.

Statement of limiting conditions (Continued)

- In the course of our analysis, we were provided with written information, oral information, and/or data in electronic form, related to the structure, operation, and financial performance of the subject Client and subject assets. We have relied upon this information in our analyses and in the preparation of this presentation and have not independently verified its accuracy or completeness.
- Certain historical financial data used in our valuation were derived from audited and/or unaudited financial statements and are the responsibility of management. The financial statements may include disclosures required by generally accepted accounting principles. We have not independently verified the accuracy or completeness of this data provided and do not express an opinion or offer any form of assurance regarding its accuracy or completeness.
- The estimates of cash flow data included herein are solely for use in the valuation analysis and are not intended for use as forecasts or projections of future operations. We have not performed an examination or compilation, nor have we performed an agreed-upon procedures engagement with regard to the accompanying cash flow data in accordance with standards prescribed by the American Institute of Certified Public Accountants, and, accordingly, do not express an opinion or offer any form of assurance on the accompanying cash flow data or their underlying assumptions. Furthermore, there will usually be differences between estimated and actual results because events and circumstances frequently do not occur as expected, and those differences may be material.
- We assume no responsibility for any financial and tax reporting judgments, which are appropriately those of management. It is our understanding that management accepts responsibility for any financial statement and tax reporting issues with respect to the assets covered by our analysis, and for the ultimate use of our presentation.
- Ernst & Young LLP is not required to furnish additional work or services, or to give testimony, or be in attendance in court with reference to the assets, properties, or business interest in question or to update any presentation, recommendation, analysis, conclusion or other document relating to its services for any events or circumstances unless arrangements acceptable to Ernst & Young LLP have been separately agreed with the Client.
- This presentation does not comprise a Comprehensive Written Business Valuation Report as described in BVS-VIII, by the Business Valuation Committee of the American Society of Appraisers (ASA) and approved by the ASA Board of Governors. Sections consisting of descriptions concerning the history and nature of the business, industry and economic outlook and historical financial analysis may have been omitted from this presentation. Where applicable, the data underlying these sections will be retained in our working papers.

RECEIVED
OCT 31 2014
Office of Revenue & Tax Analysis

Application Due Date: October 31, 2014

Financially Distressed Cities, Villages, and Townships Application (FY 2015)

Issued under authority of 2014 Public Act 252.

PART 1: APPLICANT INFORMATION

1. Applicant Name	2. Applicant Local Unit Code
City of Flint	252040
3. Applicant FEIN	**4. Applicant County**
38-6004611	Genesee

5. Mailing Address	6. City	7. State	8. ZIP Code
1101 S. Saginaw St.	Flint	MI	48502

PART 2: PROPOSAL OVERVIEW

9. Proposal Title
Water Main Leak Detection Survey and Condition Assessment

10. Estimated Start Date	11. Estimated Completion Date
04/15/2015	06/30/0215
12. Estimated Total Proposal Cost	**13. Grant Amount Requested**
$ 900,000.00	$ 900,000.00

14. Additional Local Units. If Participating in a Shared Service Project (include county and local unit code). Attach letters of support from each of the participating local units.

See attached.

15. Is the applicant(s) willing to devote appropriate resources and time to this proposal?

☒ Yes ☐ No If no, explain why the applicant(s) is unable to devote appropriate resources and time to the proposal.

PART 3: PROPOSAL CONTACT INFORMATION

Note: The proposal contact individual should be a vital part of the grant proposal and will be the Michigan Department of Treasury's contact.

16. Contact Name	17. Contact Title
Howard Croft	Director, Department of Public Works
18. Contact Telephone Number	**19. Contact Fax Number**
(810) 237-2043	(810) 766-7218

20. Contact E-mail Address
hcroft@cityofflint.com

21. Contact Entity Name
City of Flint

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS

22. Indicate the conditions affecting the applicant that indicate probable financial distress (check all that apply and attach proof of existence for each condition checked).

☐ 1. The governing body or the chief administrative officer of the city, village or township has requested a preliminary review. The request shall be in writing and shall identify the existing or anticipated financial conditions or events that make the request necessary.

☐ 2. The state financial authority has received a written request from a creditor with an undisputed claim that remains unpaid 6 months after its due date against the city, village, or township that exceeds the greater of $10,000.00 or 1% of the annual general fund budget of the city, village, or township, provided that the creditor has notified the city, village or township in writing at least 30 days before the creditor's request to the state financial authority of the creditor's intention to submit a written request.

☐ 3. The state financial authority has received a petition containing specific allegations of financial distress signed by a number of registered electors residing within the city's, village's, or township's jurisdiction equal to not less than 5% of the total vote cast for all candidates for governor within the city's, village's, or township's jurisdiction at the last preceding election at which a governor was elected. The petition shall not have been filed within 60 days before any election of the city, village, or township.

☐ 4. The state financial authority has received a written notification that the city, village, or township has not timely deposited its minimum obligation payment to the city's, village's, or township's pension fund, as required by law.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

October 30, 2014

Michigan Department of Treasury
Office of Revenue and Tax Analysis
P. O. Box 30722
Lansing, MI 48909

County: Genesee Local Unit Code: 252040

Please accept this letter as the City of flint's commitment to the Michigan Department of Treasury Financially Distressed Cities, Villages, and Townships Grant Program for the *Water Main Leak Detection Survey and Condition Assessment* project.

The City of Flint needs to implement this project in order to develop a baseline of the condition of its one hundred twenty-five miles of aging water mains. Leak detection, and ultimately repair, is needed to significantly reduce the unbilled water volume, which can approach 30% of produced water. The City of Flint expects this project can result in over $182,500 in annual savings. This project will strengthen the Water Enterprise Fund and provide the capability for needed investment in the water infrastructure.

I am committed to ensuring the success and sustainability of this initiative.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS, CONTINUED

- ☐ 5. The state financial authority has received a written notification that the city, village, or township has failed for a period of 7 days or more after the scheduled date of payment to pay wages and salaries or other compensation owed to employees or benefits owed to retirees.
- ☐ 6. The state financial authority has received a written notification from a trustee, paying agent, bondholder, or auditor engaged by the city, village, or township of a default in a bond or note payment or a violation of 1 or more bond or note covenants.
- ☐ 7. The state financial authority has received a resolution from either the senate or the house of representatives requesting a preliminary review of the city, village, or township.
- ☐ 8. The city, village, or township has violated a requirement of, or a condition of an order issued pursuant to, former 1943 PA 202, revenue bond act of 1933, 1933 PA 94, MCL 141.101 to 141.140, the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, or any other law governing the issuance of bonds or notes.
- ☐ 9. The city, village, or township has violated the conditions of an order issued by the local emergency financial assistance loan board pursuant to the emergency municipal loan act, 1980 PA 243, MCL 141.931 to 141.942.
- ☐ 10. The city, village, or township has violated a requirement of sections 17 to 20 of the uniform budgeting and accounting act, 1968 PA 2, MCL 141.437 to 141.440.
- ☐ 11. The city, village, or township has failed to timely file an annual financial report or audit that conforms with the minimum procedures and standards of the state financial authority and is required for cities, villages, and townships under the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a.
- ☐ 12. The city, village, or township is delinquent in the distribution of tax revenues, as required by law, that it has collected for another taxing jurisdiction, and that taxing jurisdiction requests a preliminary review.
- ☐ 13. The city, village, or township is in breach of its obligations under a deficit elimination plan or an agreement entered into pursuant to a deficit elimination plan.
- ☐ 14. A court has ordered an additional tax levy without the prior approval of the governing body of the city, village, or township.
- ☒ 15. The city, village, or township has ended a fiscal year in a deficit condition as defined in section 21 of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.921, or has failed to comply with the requirements of that section for filing or instituting a financial plan to correct the deficit condition.
- ☐ 16. The city, village, or township has been assigned a long-term debt rating within or below the BBB category or its equivalent by 1 or more nationally recognized credit rating agencies.
- ☒ 17. There is an existence of other facts or circumstances that, in the state treasurer's sole discretion for a city, village or township, are indicative of probable financial stress. See attached for more information

PART 5: PROPOSAL DETAILS

23. Describe Current Services: What is working well? What is not working?

The City of Flint has historically noted a 25-35% rate in unbilled water amounts when it was purchasing water from DWSD and selling approximately 50% of that amount to Genesee County. The City no longer purchases water from DWSD and no longer sells any water to Genesee County. With these changes, it has become apparent that the amount of unbilled water, as a percentage of water produced, appears to be is significantly higher than historically. The signficant amount of unbilled water appears to be due to a combination of factors - water theft, malfunctioning meters, and faulty infrastructure. (Continued on attached page)

24. Describe Strategy, Project, or Service Proposal:

The City of Flint proposes to hire a qualified contractor to perform a leak detection survey of the 124 miles of water lines, which includes 1.5 miles of greater than 16" diameter pipe. Additionally, the contractor will conduct a condition assessment, known as Acoustic Average Wall Thickness of approximately 2 miles of pipe. The City will receive a mapping of leak locations and an assessment of leak severity. This data will allow the City to prioritize leak repair in order to receive the most beneficial water savings result. The condition assessment will guide the City's water main replacement program, with the most vunerable and lines of greatest impact replaced first.

PART 5: PROPOSAL DETAILS, CONTINUED

25. Describe How Grant Funding will Lead the Applicant Toward Financial Stability:

The Water Treatment Plant and the water distribution system is funded through the Water Enterprise Fund which receives revenue via residential and commercial water bills. The fund has been replenished in recent years, but significant rate increases were required to do so. Also, savings in operations are sought to decrease expenditures and stabilize rates. A healthy fund balance allows the City to make needed investment in water system infrastructure improvements.

26. Goals, Measures, and Business Objectives of this Proposal: What are the outcomes you hope to achieve? How will you measure the outcomes? Provide the measures which will be used to determine the success of the proposal.

The overarching goal is to identify and reduce unbilled produced water. Leak detection and follow-up repair reduces the volume of water which must be produced. The current production of 16-17 MGD requires use of both the main and back-up production lines. A reduction to 12-14 MGD eliminates the need to use the back-up portion of the water plant, reduces the treatment chemical use and cost, and provides flexibility in the production paths. Measures of success include decreased daily water production volumes, number of leaks repaired, and monthly total costs of treatment plant operation.

27. Potential Barriers: Describe any barriers that currently exist that may have an impact on the implementation of the proposal.

The start date of the project may be impacted depending upon the severity of the winter and the frost level. All frost needs to be out of the ground prior to testing launch.

28. Cost Savings: Will the proposal save money? ☒ Yes ☐ No

A. SHORT-TERM (1 year or less)	☒ Yes	☐ No	Estimated Short-Term Savings: $ 182,500.00
B. LONG-TERM (Greater than 1 year)	☒ Yes	☐ No	Estimated Annual Long-Term Savings: $ 182,500.00
			Estimated 5 Year Total Savings: $ 912,500.00

C. Did you attach a detailed calculation of the cost savings and provide an explanation of how the cost savings were calculated?

☒ Yes ☐ No

29. Work Plan and Proposal Timeline: What are the implementation steps to ensure this proposal's success? What are the projected outcomes at each step?

See attached.

PART 5: PROPOSAL DETAILS, CONTINUED

30. Total Grant Budget Worksheet: For each budget category, attach a detailed list of proposed expenditures. Explain how the expenditures support and are essential to the proposal.

Budget Category	Estimated Total Proposal Cost	Grant Budget Amount Requested (Total Limited to $2.0 million)
Project Planning	$ 90,000.00	$ 90,000.00
Mobilization of Crew to Site	$ 27,000.00	$ 27,000.00
Leak detection < 16" dia.	$ 378,000.00	$ 378,000.00
Leak detection 16" dia. or >	$ 270,000.00	$ 270,000.00
Pipe Condition Assessments	$ 135,000.00	$ 135,000.00
	TOTAL ESTIMATED PROPOSAL COST $ 900,000.00	TOTAL GRANT AMOUNT REQUESTED $ 900,000.00

31. Additional Information and Comments:

The Flint water distribution system averages 50 years of age for pipe sections. The system now serves half of the peak population, and expenses are distributed over many fewer users. This has raised costs for all users. Produced, unbilled water is wasteful, costly, and causes additional problems such as sinkholes. This project is independent of the source water. Leak detection is a responsible management tool to identify and prioritize leak repairs and/or pipe section replacement planning and budgeting. The annual water production savings can be redirected to leak repair and pipe replacement. Timely maintenance increases the stability of the distribution system.

PART 6: CERTIFICATION

32 I certify that all statements in this application, including all requested supplemental information, are true, complete and accurate to the best of my knowledge. If awarded, I agree to allow the Michigan Department of Treasury and the State Auditor General's Office (and/or any of their duly authorized representatives) access, for the purposes of inspection, audit, and examination, to any books, documents, papers, and records of the grantee which are related to this proposal. I agree to allow the Michigan Department of Treasury to conduct periodic program reviews of the proposal. The purpose of these reviews will be to determine adherence to stated proposal goals and to review progress of the proposal in meeting its objectives. I agree to submit semiannual and final narrative and financial status reports and a one-year Final Follow-up Report to the Michigan Department of Treasury. I understand that failure to submit any required reports may result in the termination of the grant. I understand that this grant may be terminated if the Michigan Department of Treasury concludes that I am not in compliance with the conditions and provisions of this grant, or have falsified any information. By way of signature, I agree with all conditions of this grant program

Applicant's Chief Administrative Officer Signature (as defined in MCL 141 422b)	Date
	10-31-14
Printed Name of Applicant's Chief Administrative Officer (as defined in MCL 141.422b)	**Title**
Darnell Earley, ICMA-CM, MPA	Emergency Manager

Applications are due October 31, 2014. Completed applications submitted via mail or e-mail must be received by the Michigan Department of Treasury no later than 11:59 p.m. on Friday, October 31, 2014. Incomplete applications may not be considered.

A signed and completed application (including attachments) can be submitted by e-mail to TreasRevenueSharing@michigan.gov or by mail to.

Lansing, MI 48909

Water Main Leak Detection Survey and Condition Assessment Grant Application

Supplemental Responses

Part 4 Question 17.

The City of Flint has been in receivership since December 2011. At that time the State of Michigan Financial Review Team found:

- The City has a general fund deficit of$ 14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.
- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of $7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.
- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

The Comprehensive Annual Financial Report for the Fiscal Year ended June 30, 2011 was received in December 2011. The City's General Fund, which had a $14.6 million deficit at the beginning of the year, ended it with an $8.9 million deficit. The reduction in the deficit was due solely to an $8 million Fiscal Stabilization Bond issued by the city in March 2011. In total, excluding the impact of the FSB proceeds and the Genesee Towers judgment levy, expenses in the General Fund exceeded revenues.

The City's Water Supply and Sewage Disposal systems also reported losses of $6.6 million and $14.1 million respectively. Increases in water and sewer fees have been implemented since the end of the fiscal year in an effort to forestall additional losses. However, the increases do not appear sufficient to address past deficits.

The City had actuarial accrued liability for post-employment benefits other than pension (OPEB) of $862 million at June 30, 2011. Currently, the City is operating on a pay-as-you-go basis. In FYI I, $19.6 million was spent on premiums for health care, compared to the recommended amount of $61.4 million.

The Auditors comments continued to note concerns with cash flow and with the timeliness of certain account and bank reconciliations.

Part 5. Question 23. (Continued)

The City has committed dedicated resources to criminal investigations of water theft, has replaced all commercial meters and is beginning the process of replacing all residential meters. It also desires to move quickly into a comprehensive leak detection program, examining its aged distribution system for

major leaks. Unfortunately, at this time, city resources are limited and are primarily occupied with responding to obvious leaks.

Question 28(c)

Provide a detailed calculation of cost savings and provide an explanation of how cost savings were calculated.

Current daily volume water produced: 16-17 MGD

Expected daily volume based on customer use: 12-14 MGD

Net produced, unbilled: 3MGD average X 365 days/yr = 1095 MG/ 1 year

Estimated volume lost due to system leaks: 33% (1095 MG/yr) = 365MG/yr

Produced cost $/Gallon: $.0005/gallon

Total cost saved: 365,000,000 gallons/yr x $.0005/gallon = $182,500/ yr

The total volume of water produced but unbilled averages 3 MGD. System leaks is the major reason for lost, unbilled water. Other reasons include water theft and metering error. For this calculation leaks were assumed to 33% of this loss.

Once identified and repaired it was assumed that 100% of the loss could be avoided. The earlier a leak is identified the greater the savings. Also, the more severe the leak that is repaired, the greater the savings and the greater the probability a more catastrophic failure is avoided.

Produced water is billed at $ 7.51/unit. A unit = 748 gallons; each gallon is billed at $.01/gal. The savings is approximately 5% of the billed value. Production costs would be saved, but distribution costs would continue.

Question 29.

Work Plan and Proposed Timeline

Implementation Steps to ensure proposals success and projected outcomes at each step.

Issue Request for Proposal November 1, 2014 (proposal sample attached)

1. Select Vendor and sign contract January 6, 2015
2. Vendor Project Planning January – March 2015
3. Vendor mobilizes all personnel and ancillary equipment to perform work April, 2015
4. Pipe Condition Assessments May 2015
5. Leak detection 16" diameter or greater pipes April – May 2015
6. Leak detection less than 16" diameter pipes April – June 2015

Steps 4-6 will identify leaks and/or severe pipe weakness which can be scheduled for repair and or replacement. Each repair saves thousands of gallons of lost, unbilled water.

Question 30.

Detailed list of proposed expenditures. Explain how the expenditures support and are essential to the proposal.

Project Planning – identify all water main locations, plan access points and any associated street or lane closings required, plan equipment holding location, plan format of data and final report format.

Mobilization of Crew to Site – the contractor will be responsible for providing all ancillary equipment required to perform the work including vehicles to transport the leak detection team, ground microphones for confirming leak locations, tools for accessing valve chambers, confined space entry equipment, GPS receivers to accurately record leak locations, all hand tools required for the work, and any other site specific equipment.

Leak Detection < 16" Diameter Water Mains – the majority of the water mains in the City are < 16" diameter. This work will comprise the bulk of the detection work; these are also the lines which can be most easily overlooked when a lead occurs as it takes the longest for these leaks to reach the surface.

Leak Detection 16" diameter or > - Water mains measuring 16" diameter or greater are the major lines carrying water in the City. A leak in these lines can result in thousands of gallons being lost in a short period of time.

Pipe Condition Assessments – This section would be conducted on 2 miles of pipe using an acoustic average wall thickness testing system to measure the average minimum structural wall thickness of water distribution pipelines. Leak detection must be conducted concurrently with this test. This evaluation will allow the City to plan the rate of pipe deterioration and to develop a pipeline replacement schedule.

Michigan Department of Treasury
Office of Revenue and Tax Analysis
P.O. Box 30722
Lansing, MI 48909

To Whom It May Concern:

Please accept this letter as my strong support for the City of Flint's application to the Michigan Department of Treasury Financially Distressed Cities, Villages, and Townships Grant Program for the ***Water Main Leak Detection Survey and Condition Assessment*** project.

The City of Flint needs to implement this project in order to develop a baseline of the condition of its one hundred and twenty-five miles of aging water mains. Leak detection, and ultimately repair, is needed to significantly reduce the unbilled water volume which can approach 30% of produced water. The City Flint expects this project can result in over $182,000 in annual savings. This project will strengthen the Water Enterprise Fund and provide the capability for needed investment in the water infrastructure.

In addition to Flint's recent water contamination issues, there are also *huge* cost concerns that have resulted in major water thefts, protests over high rates, and people having their water shutoff daily. This grant would not only help the City of Flint update their water infrastructure, but ultimately reduce costs on residents.

For the above reasons and many more, I want to again express my strong support of this proposal. It is my hope that you give the ***Water Main Leak Detection Survey and Condition Assessment*** proposal strong consideration. If you have any additional questions about this proposal and my reasons for supporting it, please don't hesitate to contact me at my office: (517) 373-0142.

Sincerely,

Jim Ananich
State Senator
27th District

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: September 1, 2014

TO: Rick Snyder, Governor

FROM: R. Kevin Clinton, Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Allen Park
Emergency Manager: Joyce Parker
Appointed: October 26, 2012
Anticipated Exit: September 2014

Recent Developments
- The Southfield Lease Properties were sold on August 22 to Time Equities for $12M. took place
- The City's request for a $2.7M emergency loan will be considered by the Emergency Loan Board during September. If approved, proceeds would be used to pay the delinquent pension obligation. Recent actuarial valuation revealed pension funding for General Employees at 79.22% and Police/Fire at 79.5%.
- EM Joyce Parker's proposed exit date is Thursday, September 25, 2014.

Significant Actions/Issues
- Future OPEB liabilities reduced by $48.8M (33%).
- Litigation was filed by retirees challenging the Emergency Manager's authority to reduce OPEB liabilities. A court date on this matter is pending.

Issues to Resolve before EM Exit
- Complete tender offer and debt refinancing related to the Southfield Lease Properties by September 2014.
- Finalize compliance settlement with SEC.
- Reduce pension liabilities.

Detroit
Emergency Manager: Kevyn Orr
Appointed: March 14, 2013
Anticipated Exit: September 2014

Recent Developments
- The Department of Treasury is coordinating with the Governor's Office to implement the new Financial Review Commission, which is required by the "Grand Bargain" legislation.
- Participating with City advisors on two contemplated financings: 1) exit financing – DIP 'take out' and 2) DWSD new money and restructuring.

Flint
Emergency Manager: Darnell Earley
Appointed: November 28, 2013
Anticipated Exit: April 2015

Recent Developments
- Overall deficit reduced to $9M in FY 2014.
- In August, Treasury staff met with the Mayor and City Council members in one-on-one meetings to discuss the possible Emergency Manager exit in April 2015 and to explain the function of a Receivership Transition Advisory Board.

Significant Actions/Issues
- The sale of the water pipeline for $3.7M was completed in June 2014. KWA project is still moving forward as planned.
- Water Plant placed into full-time service in April 2014, ending the contractual relationship with DWSD.
- A $1.1M State appropriation was received to fund front-line public safety positions for FY 2015.
- The Federal District Court Judge modified the preliminary injunction on June 30, 2014 (six retirees challenged modifications made by the Emergency Manager to retiree healthcare coverage). The City can implement cost saving measures pending the trial outcome. However, if the challenge stands, the City's cost will increase by approximately $5M annually.
- The Emergency Manager has imposed collective bargaining agreement terms that will save the City $336K annually with long-term projected savings of $4.3M effective July 2014.

Issues to Resolve before EM Exit
- Eliminate annual operating/structural deficit which is projected at $1.7M for FY 2015 and grows to $11.9M during FY 2019 if the City loses the lawsuit over retiree healthcare.

Hamtramck
Emergency Manager: Cathy Square
Appointed: July 1, 2013
Anticipated Exit: October 2014

Recent Developments
- A firm has been hired to conduct the search for a qualified City Manager candidate.

Significant Actions/Issues
- The City requested a $2.1M emergency loan, which was approved by the Emergency Loan Board on June 26, 2014. Proceeds will resolve a $2.1M liability to MERS.
- Retiree healthcare changes were implemented in December 2013 at a cost savings of over $1.8M.

Issues to Resolve before EM Exit
- Retiree healthcare litigation must be addressed.
- Hire a qualified City Manager before exit.
- The annual pension liability is anticipated to increase from $3.5M in FY 2015 to $4.3M in 2019.

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments
- A Financial and Operating Plan was submitted to the Treasurer on August 22.
- .

Significant Actions/Issues
- The Police and Fire pension plan is 30% funded. The General Employee plan is 22% funded.
- Brad Coulter was appointed as Emergency Manager July 3, 2014
- FY 2013 ended with a General Fund deficit of $89K. In the prior fiscal year, the City had a positive fund balance of $2M.

Issues to Resolve before EM Exit
- Police and fire contracts need to be renegotiated.
-

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Cary Vaughn, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- A study was initiated to review the cost of ongoing litigation issues.
- FY 2015 budget is balanced.
- The City Commission appointed Mary Donald to the fill the vacant Commission seat.
- Due to the resignation of another City Commissioner a new vacancy has occurred on the City Commission.
- Berrien County Circuit Court approved the ballot signatures necessary to recall Mayor Hightower. This is the disputed second recall attempt against the Mayor. The recall question will appear on the November 2014 ballot. The Berrien County Clerk's Office has appealed the Court's decision. A recall effort has been initiated against the Berrien County Clerk for challenging the Court's decision.

Significant Actions/Issues
- Former Department of Public Works Director Darwin Watson was appointed City Manager in February 2014.
- General Fund revenues are projected to exceed expenditures by $2.9M for FY 2014.
- A six-year capital improvement plan has been developed and has identified capital needs exceeding $4.8M. RTAB approval is pending.
- The City Manager implemented a twelve-month operational plan to guide City operations.
- Lawsuit filed during October 2013 against the City and former EM Suanders by former Public Saftey Director alleging he was dismissed for complaining to the State.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- The City is still operating without a City Administrator; an interim search is ongoing. The Michigan Municipal League has submitted a proposal to perform a search for a permanent City Administrator. Treasury has agreed to assume 50% the cost of the search ($6,500)
- The State has approved $750K in SRF funds for a sewer project.
- The first annual RTAB evaluation will be submitted to the Board in September.
-

Significant Actions/Issues
- City Council has repeatedly rejected a CGAP grant which would have saved the City $1M, offsetting the lost tax settlement revenue.

- Pension contributions are anticipated to increase from $1.8M in FY 2015 to $2.4M in FY 2016.
- The RTAB rejected the City's proposed five-year budget in June 2014 due to unrealistic projections. The firing of the City Administrator and the uncertainty of Plante Moran's continued financial services have delayed the completion of a viable five-year budget. The amended budget completion date is unknown.
- Plante Moran has suspended their previous letter of termination, contingent on certain conditions. (e.g. begin immediate search for permanent City Administrator, contract with neighboring community or an outside agency to provide HR services to the City).
-

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

-
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. Thirty-six candidates applied and applications are being reviewed.

Significant Actions/Issues

- A $6M annual retiree healthcare obligation and related federal litigation must be resolved prior to August 2015, when the Emergency Manager Final Order expires.
- The RTAB continues to review the financial impact of the IRS 420 Transfer for payment of retiree healthcare costs approved by the Pontiac Pension Board and City Council. The tax exempt status of the pension system was extended by the IRS until December 2019.
- Resolve condemnation litigation and proceed with the budgeted $2M demolition of the Phoenix Center.
- General Fund revenues are projected to exceed expenditures by $4M in FY 2014.
-

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consultant/Treasury Representative: Mark Stuhldreher
Term of Consent Agreement: N/A

Recent Developments

-
- The Police Chief resigned in July; Interim Chief Vicky Yost was appointed August 4, 2014; search firm has been retained to find a permanent chief.
-

Significant Actions/Issues

- Mary Stubbleber, City Treasurer, was granted certain Emergency Manager powers in February 2012.
- Richard Marsh was appointed as City Manager in August of 2013.
- The City was awarded a $486K CGAP grant on April 1, 2014 to contract with the Wayne County Sheriff's Department; the City is working with Michigan State Police to augment police staffing (on hold pending the hiring of a permanent chief).
- The City of Westland was awarded a $347K CGAP grant to consolidate the Inkster Fire Department into the Wayne/Westland Fire Authority on April 1, 2014.
- A study of the Police Department has been completed and was very critical of the Police Chief and the City Administration.
- General Fund revenues are projected to exceed expenditures by $1.5M in FY 2014.
-

River Rouge
Date Executed: December 15, 2009
Consultant/Treasury Representative: N/A (P.A. 72)
Term of Consent Agreement: N/A

Recent Developments

-
- Implemented a reduction in healthcare benefits for employees.

Significant Actions/Issues
- U.S. Steel annual $1M tax settlement payment to the City expires in FY 2015.
- General Fund revenues are expected to exceed expenditures by $986k in FY 2014.

Royal Oak Township
Effective Date: April 21, 2014
Consultant/Treasury Representative: Robert Burgess
Term of Consent Agreement: October 31, 2017

Recent Developments
- A consulting firm (UHY) is assisting the Consent Agreement Consultant and the Township in developing a Finance & Operating Plan. The deadline to complete the Financial & Operating Plan has been extended to September 30, 2014 by the State Treasurer.
- Surplus pension assets of $619K administered by MERS were transferred to the Township. The State Treasurer approved the issuance of a Consent Agreement Order by the Township Supervisor prohibiting the use of these funds until the Finance & Operating Plan is approved. The Office of the Attorney General is reviewing the legal authority regarding the use of these funds for any purpose other than pension expenses.
-

Significant Actions/Issues
- The Michigan State Police continues to provide police services to the Township.

- A committee consisting of the Township Supervisor, Consent Agreement Consultant, and one Township Trustee met with the City of Ferndale on August 19th to explore contracting police and fire services. The Michigan State Police and Department of Treasury participated in these negotiations. The City of Oak Park will also be contacted to determine if they can provide police and fire services to the Township.
- A Deficit Elimination Plan for Police, Fire, and Street Lighting Funds must be submitted.
- An assistant was hired to aid the Consent Agreement Consultant.The Township must submit a Corrective Action Plan to address deficiencies identified in its 2013 Audit. On July 30, 2014 the Township submitted a Corrective Action Plan; it is currently under review by LAFD.

NEUTRAL EVALUATION

Highland Park
Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: May 1, 2014

Recent Developments
- A long-term lease of its 32-acre tree farm in Rochester Hills for $1M was announced by the City.
- The City is discussing the preparation of a RFP to privatize water and sewer system operations.
- A draft Plan of Adjustment was prepared by the City. The City is seeking an Emergency Loan from Treasury to refinance a portion of its debt. This will have to be re-evaluated on Thursday.

Significant Actions/Issues
- Ronald Rose, former Dykema Gossett bankruptcy attorney, was appointed as a Neutral Evaluator in May 2014.
- The City announced that it has exercised its right under PA 436 to extend the neutral evaluation process another 30 days, ending on August 28, 2014.
- Liabilities total $117.6M; of which some of the major components are: $55.3M is debt, including $20.7M owed to DWSD, $17.7M is pension bonds, and $26.1M is unfunded OPEB liabilities.
- OPEB costs are paid from the General Fund on a pay-as-you-go basis.
- Fifth Third Bank notified the City on September 11, 2013 that "Event of Defaults" have occurred regarding the Letter of Credit held by the bank. The bank terminated the Letter of Credit, transferred $7M in unexpended bond proceeds, and is seeking to capture pledged state revenue sharing.
- The City defaulted on its State emergency loan payment due May 19, 2014. Treasury withheld $101K from State Revenue Sharing on June 30, 2014 to cover the default.

OTHER COMMUNITIES

Melvindale

Significant Actions/Issues
- The General fund deficit for FY 2013 is $1.9M, an increase of $248K from the FY 2012 deficit.
- The City's ice arena unrestricted annual deficit for FY 2013 is $1.9M, which is approximately $160K more than what the City projected. It continues to negatively impact the General Fund.
- .

Treasury representatives will meet with city officials in August to discuss strategies of addressing deficits. Suzanne will provide additional language

- The City is considering millage proposals for the November ballot. The first is to pay the debt on the ice arena and the other is for street/sidewalk repair.

Taylor

Significant Actions/Issues

- The General Fund has an unrestricted deficit of $2.2M.
- The City made only 47% of its required annual contribution for OPEB. The unfunded liability is $232.7M and continues to grow.
- There are several contingent liabilities that may impact the financial stability of the City, including the possible need to subsidize Brownfield Redevelopment bonds of $14.2M.
- A 1996 levy to pay a general obligation bond expires in 2015, potentially resulting in a $6.2M drain per year on the General Fund during FY 2016 and FY 2017.

City of Wayne

Significant Actions/Issues

- Projected General Fund deficits for FY 2014 and beyond.
- Treasury prepared and presented recommendations for the City during April 2014.
- The City is discussing a May 2015 ballot proposal that would seek voter approval for additional millage.

Wayne County

Recent Developments

- Warren Evans defeated Robert Ficano with 44% of the vote in the primary election for Wayne County Executive held August 5, 2014.
- The County Finance Director continues to pursue the implementation of the Waste Water Authority by meeting with the affected local units and the attorneys for several of the existing systems.
- The County believes it has sufficient documentation to support the County's ownership of the various waste water systems.

Significant Actions/Issues

- Treasury met with County Finance officials on July 1, 2014 to discuss progress on the Deficit Elimination Plan (DEP). Another meeting is scheduled for August 18, 2014. The County submitted a revised DEP, approved by the County Commission, which removes the changes to retiree healthcare. The loss of the $9.2M in savings will be offset by the $10M anticipated increase in revenue sharing.
- County Treasurer agreed to transfer $150M from the Delinquent Tax Revolving Fund to the General Fund. Of that $150M, $82M has already been transferred and applied to the accumulated deficit, and $44M has been applied to the operating/structural deficit in accordance with the DEP. The additional $24M, which was not part of the DEP, will be used to help reduce the accumulated deficit.
- The elimination of the accumulated deficit is dependent upon the transfer of excess funds held in the Delinquent Tax Revolving Fund and the creation of a Wastewater Authority.

The plan to eliminate the operating/structural deficit depends on significant labor costs savings and pension revisions.

- The Treasurer received letters from the law firm of Foster Swift and the Downriver Utility Wastewater Authority on behalf of several communities affected by the Waste Water Authority proposed in the County's DEP. They expressed disagreement with the plan and also questioned the ownership of the assets.
- The County reduced the amount needed to borrow for general operating cash flow purposes from $100M to $75M. The Tax Anticipation note was issued on May 28, 2014 and the proceeds were placed in escrow.
- The County received $25M of its cash flow borrowing of May 28, 2014 upon closing. A second draw in the amount of $25M was approved by Treasury on July 2, 2014 leaving a balance of $25M in escrow. Estimated final release date is expected to be by August 15, 2014.

City of Flint Wednesday 9:00am Phone Conference Agenda
September 3, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD
      i. Water Theft Warrants issue – may need assistance from Attorney General
   b) FFD
   c) Traffic Accidents Resulting in Death of Flint Citizens – Update on Strategies Special ALPACT Meeting held August 22, 2014
   d) Would like to have a statement of the mission, goals, and objectives of MSP/FPD collaboration.
   e) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates
   b) MSP - Crash Lawsuit – Flint street design and maintenance

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire, Sgts., and Capts. & Lts. Parties have exchanged proposals.
   b) Need to start to develop a plan to begin pre-funding employee healthcare.
   c) Next benchmark is audit. Budget is on track at this point.

5) **City Council Update**
   a) A grid-timeline has been developed using the 7 point Transition Management plan. This will be used as an itemized list of steps to be completed in order to prepare for transition. This was reviewed with each Council member in individual meetings with Treasury on August 20, 2014.

6) **Blue Ribbon Committee on Governance**
   a) Five Charter Amendments and the question of whether to have a general revision of the current charter have been placed on the November ballot. These were as recommended by the BRC.

7) **Water Issues**
   a) Glenn Acres – water turn-on order from Judge Hayman. Judge has put complex in hands of a receiver.

b) Limited area boil-water notice – resolved.
c) General Motors Water Issues – resolved. However, if this should become an issue for the GCDC with DWSD we would hope Treasury will be supportive of the GM-GCDC franchise customer agreement.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.
b) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.

9) 9-1-1 Reconsolidation Plan

a) Genesee County Consortium plans to hold a full membership meeting to discuss allowing flint to rejoin the County 9-1-1 Consortium on September 9, 2014. Reconsolidation is both a financial and resident benefit for Flint. General Fund currently supplements 9-1-1 operations $2.4 million per year. Significant feature and equipment upgrades will be required of the Flint system if it continues as a stand-alone operation.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.
b) Emergency Manager has developed a recruitment package and a recruitment and appointment timeline; recruitment to begin September 1, 2014. (See attached)

11)Other Items

City of Flint Boil Water Advisory in Effect for Area Affected Due to Abnormal Water Sample

Flint, Michigan – September 5, 2014 – The City of Flint's Utilities Department in conjunction with the Department of Environmental Quality has issued a boil water advisory for a portion of the city. The boil water advisory is in effect for the area bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road (to the Flint River) on the west. Testing over the last 48 hours has shown that the water in the area above tests positive for the presence of total coliform bacteria. Residents in the area should continue to boil water or use bottled water for drinking, bathing, making ice, brushing teeth, washing dishes, and preparing food until further notice. Boiling the water kills bacteria or other harmful organisms.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria *may be present.* Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes).

–CONTINUE–

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

The City of Flint Utilities Department will be flushing the system in that part of the city and increasing the chlorine added to water in the area. The City anticipates that the problem will be resolved within the next three days, which is the minimum amount of time for a boil water notice. All water testing results at the City of Flint Water Treatment Plant have shown the City's drinking water meets all Safe Water Drinking Standards. Testing of the drinking water is a part of the routine process for ensuring the quality and safety of the system which happens weekly at ten different sites around the city. Anyone with questions about the advisory or any other water issues should call 810-787-6537.

–END–

LOCALIZED DRINKING WATER WARNING

Coliform bacteria detected in localized area of Flint water system

BOIL YOUR WATER BEFORE USING

Our water system detected the presence of coliform bacteria in the water supply on September 3, 2014. We routinely monitor for the presence of drinking water contaminants. We took routine samples for coliform bacteria during on September 2, 2014 from all sampling locations throughout the city. The location near Flushing Road and Chevrolet Avenue showed the presence of coliform bacteria. We took three repeat samples at this location and at adjacent locations on September 3 and again on September 4, 2014. Two of the three samples on the 3rd showed the presence of total coliform bacteria and three of the three samples collected on the 4th in this same area showed the presence of total coliform bacteria. All other monitoring locations in the City continue to show no presence of Coliform bacteria.

What should I do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. **Continue using boiled or bottled water until further notice.** This boil notice is limited to the area bordered by Dayton Street (north), DuPont Street (east), Flint River (south), and LaVelle Road to Flint River (west)

If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

What does this mean?

Total coliform bacteria are generally not harmful themselves. *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.*

Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

What happened? What is being done?

We are still detecting coliform bacteria. We will inform you when our sampling shows that no bacteria are detected. We are flushing the system and increasing the chlorine residual within the affected area. We anticipate resolving the problem within the next two to three days. In the meantime, please continue using boiled or bottled water until we notify you otherwise.

If you have questions, you may contact Mr. Brent Wright of the City of Flint at 810-787-6537, bwright@cityofflint.com , 4500 North Dort Highway, Flint MI. 48505 or Daughtry Johnson, Utilities Administrator (810) 766-7135, ext. 2602. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

Attachments: Boil Water Advisory 9.8.2014.pdf

For Immediate Release

City of Flint Boil Water Advisory Remains in Effect for Previously Identified Area

Flint, Michigan – September 8, 2014 – The City of Flint's Utilities Department has extended both of the boil water advisories from Friday and Saturday for a portion of the city. Friday's boil water advisory is in effect for the area bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road (to the Flint River) on the west. Saturday's boil water advisory also covered the area bordered by Stewart Ave. (north), Saginaw (east) Hamilton Ave (south), and Clio Rd (west). This remains a localized issue to those portions of the city.

The Utilities Department believes that due to the low usage and demand of the area, water remains in the system for a longer period of time compared to the rest of the city. The City of Flint Utilities Department is increasing the chlorine added to water in the area, and to improve water circulation, will continue flushing the system in that part of the city. Residents can expect to see open hydrants in the area. The City of Flint will continue to aggressively investigate this issue until it has been corrected.

The Utilities Department has opted to keep the advisory in effect until the results of a citywide sampling taken today are known. This advisory is a precautionary measure to ensure the safety of drinking water for city residents. Residents in the area should continue to boil water or use bottled water for drinking, making ice,

brushing teeth, washing dishes, and preparing food until further notice. Boiling the water kills bacteria or other harmful organisms.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria

which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria *may be present.* Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes).

Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

All water testing results at the City of Flint Water Treatment Plant have shown the City's drinking water meets all Safe Water Drinking Standards and this remains a localized problem. Testing of the drinking water is a part of the routine process for ensuring the quality and safety of the system which happens weekly at ten different sites around the city. Anyone with questions about the advisory or any other water issues should call 810-787-6537.

Two of the three samples on the 3rd showed the presence of total coliform bacteria and three of the three samples collected on the 4th in this same area showed the presence of total coliform bacteria. On September 5th two of three sample showed presence of total coliform bacteria. **Updated area of ML King and Pasadena.** On September 4th one sample showed presence of total coliform bacteria. On September 5th two of the three samples at adjacent locations showed presence of total coliform bacteria. All other monitoring locations in the City continue to show no presence of Coliform bacteria.

What should I do?
DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. **Continue using boiled or bottled water until further notice.** This boil notice is limited to the area bordered by Dayton Street (north), DuPont Street (east), Flint River (south), and LaVelle Road to Flint River (west).
The current boil water notice is being expanded to the north. This boil water notice is being expanded to the area bordered by Stewart Ave. (north), Saginaw (east), Hamilton Ave (south), and Clio Rd (west).

If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

What does this mean?
Total coliform bacteria are generally not harmful themselves. *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.*

Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

2310

CERTIFICATION: WSSN: «WSSN»

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

	Title	Date Distributed

Reminder to water supplier This notice / certification must be sent to the DNRE

What happened? What is being done?
We are still detecting coliform bacteria. We will inform you when our sampling shows that no bacteria are detected. We are flushing the system and increasing the chlorine residual within the affected area. We anticipate resolving the problem within the next two to three days. In the meantime, please continue using boiled or bottled water until we notify you otherwise.

If you have questions, you may contact Mr. Brent Wright of the City of Flint at 810-787-6537,bwright@cityofflint.com , 4500 North Dort Highway, Flint MI. 48505 or Daughtry Johnson, Utilities Administrator
(810) 766-7135, ext. 2602. General guidelines on ways to lessen the risk of infection by microbes are
available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

City of Flint Boil Water Advisory Lifted

Flint, Michigan – September 9, 2014 – The City of Flint's Utilities Department and the DEQ have lifted both of the boil water advisories from this week for a western portion of the city. Testing results from all areas of the city confirm that the water is safe for all purposes. "The investigation into the cause of the boil water advisories continues," said Emergency Manager Darnell Earley, "we will share the results from that investigation once it is available."

The boil water advisory was lifted yesterday while I was talking to John Gleason. The source has still not been identified and the plant and DEQ are working to figure it out. I told Gleason that his suggestion to have contingency plans for these water events makes great sense but I had to look into the specifics of using the Guard and I would get back to him. This is more for DEQ and the Guard to assist with at this time but please keep us posted on what the EM may share as far as updates.

CITY OF FLINT

Department of Public Works

Dayne Walling
Mayor

Darnell Earley, ICMA-CM, MPA
Emergency Manager

Howard Croft
Director

MEMORANDUM

TO: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

FROM: Howard Croft, Public Works Director

DATE: September 16, 2014

RE: Recent Boil Water Advisory

Mr. Earley,

I have compiled a bullet point list of the pertinent events surrounding the recent boil water advisory in the City of Flint. I have separated the events into five categories and attempted to condense them into a comprehensive sequence for your review.

OVERVIEW

- On Friday September 5, 2014 the City of Flint issued a boil water advisory to residents in two of ten test areas around the city.
- The advisory was due to multiple positive tests for "total coliform" and the area covered approximately 9 square miles.
- On Sunday September 7, 2014 the City expanded the advisory to include another of the ten test areas due to a subsequent positive total coliform test.
- The boil water advisories were lifted on Tuesday September 9th at 5:00pm after consultation with the DEQ.

BACKGROUND

- State of Michigan Regulations requires that the City of Flint Water Treatment Plant perform testing of its water distribution system on a routine basis in ten different locations around the City.
- The tests take twenty four hours to produce valid results and are sent directly to the Department of Environmental Quality for review.
- Test results which show positive for "E.coli" or "fecal coliform" trigger boil water notices for the test area and the advisories usually remain in effect until three consecutive tests return negative results.
- A single positive test for "total coliform" does not generally result in a boil water advisory, rather it indicates that the environment is conducive for bacteria.
- Typically, investigation into possible causes followed by corrective measures such as flushing the affected area with open hydrants will cleanse the system.
- This process is overseen by an employee who is required to hold an F-1 State License and is listed as the Operator in Charge of the Water Plant and an employee who holds an S-1 State License which is required to maintain distribution systems of this municipal size.
- The City of Flint has over 500 miles of pipe in its distribution system, much of which is over 70 years old.
- The City of Flint has over ten-thousand valves throughout its distribution system.
- The City of Flint has a professional reliability study of its system which was updated in December 2013.

PROBLEM

- ❖ After detecting the initial positive test for total coliform, normal procedures did not clear the condition and multiple positive tests ensued.
- ❖ The continued positive total coliform tests were the cause for issuing the boil water notice.
- ❖ Additional discoveries showed that residual chlorine levels in the affected area were considerably lower than normal.

SOLUTION

- ✓ On Monday September 8, 2014 the City convened all licensed personnel, Utility Supervisors, and DPW Director to a single meeting location and held a brainstorming session with the DEQ on conference call.
- ✓ It was agreed that while not totally isolated, the concern was mainly present in a specific large transmission line that ran through all positive testing areas.
- ✓ It was determined to expand the hydrant flushing outside of the immediate impact area.
- ✓ It was found that a 24" valve which feeds this transition main was broken in the OFF position outside of the immediate impact area.
- ✓ The broken valve was preventing fresh water from being pushed directly into the impacted area while causing water to travel from the water plant around the entire city and preventing adequate circulation of fresh water.
- ✓ After repairing the broken valve, virtually all of the symptoms were erased over a 24 hour period and the chlorine count has steadily risen back to normal levels throughout the transmission main.

CONCLUSION

- ✓ It was determined that the broken valve was not the single cause of the problem but was a significant factor in the development of the problem.
- ✓ Other possible factors include:
  - Low usage in the area
  - Pipe size in relation to volume of usage
  - Temperature change of surface water
  - Water Pressure in the area
- ✓ It was determined that the broken valve was the main reason that normal remedies were ineffective.
- ✓ Throughout the event, the City was in direct contact with DEQ personnel daily.
- ✓ The positive tests were for "total coliform" only.
- ✓ The following statement about total coliform was approved by the DEQ and distributed to the public as part of the recent boil water advisory:

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.
Usually, coliforms are a sign that there could be a problem with the treatment or

distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

- ✓ The City of Flint is in the first year of strategic budgetary investment in an infrastructure strategy.
- ✓ The City of Flint infrastructure strategy has been, and will continue to be developed with state licensed employees, industry experts, and proven experienced consultants.

City of Flint Wednesday 9:00am Phone Conference Agenda
September 17, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD
      i. Water Theft Warrants issue – Update/may need assistance from Attorney General
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Sgts., and Capts. & Lts. bargaining units have achieved Tentative Agreements.
   c) The City is amending the DEP to show future commitment on retiree healthcare.
   d) Working to enact a budget stabilization ordinance.
   e) Need to start to develop a plan to begin pre-funding employee healthcare.
   f) Next benchmark is audit. Budget is on track at this point.
   g) Status of legislative initiative to allow vote on local income tax increase.

5) **City Council Update**
   a) The next City Council meeting is scheduled for Monday, September 22, 2014.
   EM shared w/ media regarding level one mmc training
   • Have until transition.

6) **Blue Ribbon Committee on Governance**
   a) Five Charter Amendments and the question of whether to have a general revision of the current charter have been placed on the November ballot. These were as recommended by the BRC. Group of BRC members met 9/8/14 to discuss forming a committee to promote these initiatives.
   • Update next time.

7) **Water Issues**
   a) Two more areas had five day boil-water notices – resolved, broken 24" valve was a major contributor to the problem.
   b) Flint will continue to investigate why conditions develop which are favorable for more severe problems to occur. Pursuing these investigations may include seeking additional professional assistance to review both systems and processes.

What is causing the ↑ issues?

c) General Motors Water Issues – working through lawyers at this point. However, if this should become an issue for the GCDC with DWSD we would hope Treasury will be supportive of the GM-GCDC franchise customer agreement.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.

b) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.

9) 9-1-1 Reconsolidation Plan

a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation expected to be complete by July 1, 2015.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.

b) Emergency Manager has developed a recruitment package and a recruitment and appointment timeline; recruitment began September 1, 2014.

11) Other Items

1-888-[redacted], access code [redacted]
Created on: 09/12/14

CoF - Call 09/17/14

EM, Harvey Hollins, BD, DST, SAR, Gery Ambrose, MSP, CoF chief

1)

a. Hs very high with people who are obtaining water illegally
- Full cooperation w/ prosecuters ~~office~~ office.
- FBI will sit in on interviews to ensure this doesn't go acrosse multiple city offices.

b. Increase in fires (not arson)

c. MSP - ICMA will be in town - looking to expand patrol.
123 total officers + cavilians
40% reduction in homicide
19% reduction in assult
13.9% overall reduction in Stat 1 crime.
- ATF working to get guns/felons off the streets.

9) 911 → allowed/accepted CoF to join end of FY (July)
- $1M savings to the City - Need to ajust the budget.

2) Gov:

3) Retirees received letters that they can change preimums.

4) Meeting w/ Fire this AM

b - d) Fund balance policy
Updated 'budget stabilization fund'
- finalized around end of Nov
• Updating cancil in Oct on the End of first quarter

G) Reviewing w/ Treasury, Cancil + Mayor
Income Tax: Looking to increase local income tax,
+ Stanley is supportave of it - submitted a bill
Note: Not before november → West side communities, I-69 corridor,
> In for City? Govs office interested.
* Allow local income tax collected w/ State income tax.
• Task force in treasury working on this

6) Charter amendments - NAACP apposed to the idea.
• Also charter commission → they will bok @ the charter.

7. Boil water. broken valve
• Working w/ DEQ → they've okayed water to drink.
> System needs to be fixed.
Note: Look @ potential grant applications ~~FDCVT~~ (FDCVT)
• GM situation: In hands of the attorney
- Solution: location of plant @ SW corner of City; allow GM to tap into county line.
• Use Flint Cityseweg not City water.
8. Positive messeging system - talk about the positive ideas
(Hurley, water, crime, Blue Ribbon, etc...)

10) Recruitment of CM etc.

1)

Govts office — water issue

City of Flint Wednesday 9:00am Phone Conference Agenda
October 1, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD
      i) Status of Sherman St. house demo and site clean-up? MSP initially agreed and now the decision appears to have changed.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Sgts., and Capts. & Lts. bargaining units have achieved Tentative Agreements.
   c) The City is amending the DEP to show future commitment on retiree healthcare.
   d) Need to start to develop a plan to begin pre-funding employee healthcare.
   e) Next benchmark is audit. Budget is on track at this point; preparing for 1st quarter end.
   f) Status of legislative initiative to allow vote on local income tax increase.

5) **City Council Update**
   a) Flint City Council postponed action on the Budget Stabilization ordinance and fund Balance policy and the primary reason given was that these recommendations came from the EM. This editorial from the Flint Journal is an excellent summation: http://www.mlive.com/opinion/flint/index.ssf/2014/09/editorial_flint_city_council.html#incart_river

6) **Blue Ribbon Committee on Governance**
   a) The "Vote YES for Change" committee held its first community discussion on Thursday, September 25.

7) **Water Issues**
   a) Flint will continue to investigate why conditions develop which are favorable for more severe problems to occur. Pursuing these investigations may include seeking additional professional assistance to review both systems and processes.

b) General Motors Water Issues – working through lawyers at this point. However, if this should become an issue for the GCDC with DWSD we would hope Treasury will be supportive of the GM-GCDC franchise customer agreement.

Independent Auditor's Report

To the Board of Directors
Karegnondi Water Authority

Report on the Financial Statements

We have audited the accompanying basic financial statements of Karegnondi Water Authority, a component unit of Genesee County Water and Waste Services, from inception through the year ended September 30, 2014, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Praxity
MEMBER
GLOBAL ALLIANCE OF INDEPENDENT FIRMS

The Karegnondi Water Authority (KWA) was incorporated in October, 2010 pursuant to Act 233, Public Acts of Michigan, 1955, as amended, by the County of Genesee ("Genesee Co."), the County of Lapeer, the County of Sanilac, the City of Flint ("Flint"), and the City of Lapeer for the purpose of providing its member communities with a new source of water for treatment and distribution. This new water source will come from a Water Supply System (the "System") which is currently being constructed. The System will use Lake Huron as its source.

The System is expected ultimately to supply raw water for the three-county area consisting of over 2,200 square miles and a population of over one half million residents, but the System will initially provide raw water primarily to residents in Flint and Genesee Co. Currently, Genesee Co. receives finished water from the City of Detroit, through its Detroit Water and Sewerage Department (DWSD). Flint, which received water from DWSD through April 2014, is temporarily using and treating water from the Flint River. Genesee Co. and Flint participated in the establishment of the KWA in order to have a more reliable supply of water and long-term stabilization of rates.

The KWA will supply metered, untreated water to contracting members who will in turn be responsible for treating and distributing treated water to their individual customers. The actual cost for administration, operation, and maintenance of the System will be allocated based on water sold, and each contracting member will be responsible for its proportional share of these costs.

The KWA currently has entered into two Water Purchase Contracts (the "Contracts") effective October 1, 2013: one with Flint to supply up to 18 million gallons per day (mgd), and one with the Genesee County Drain Commissioner, as County Agency of Genesee Co. under Act 342, Public Acts of Michigan, 1939, as amended (the "County Agency"), on behalf of Genesee Co., to supply up to 42 mgd. The charges to be paid by Flint and the County Agency in the Contracts are broken down into two distinct portions: an annual fixed or capital fee and an annual commodity or operations and maintenance fee. Flint and the County Agency expect to pay such charges from the revenues of their respective water supply systems as an operation and maintenance expense in the same manner that each paid or presently pays for water furnished by DWSD.

The size of the System is based on the volume identified in the above Contracts. Each contracting party is responsible for the annual fixed fee regardless of the amount of water taken. The other members of the KWA had until October 16, 2013 to enter into a water purchase contract with the KWA at the same rates set forth in the Contracts. No additional water purchase contracts were entered into on or before that date and as a result, members entering into water purchase contracts with the KWA subsequent to that date will pay all incremental costs associated with accommodating their water purchase contracts.

The intake facility and property were financed through the issuance of bonds by the Genesee Co. Agency in the principal amount of $35,000,000 in October 2013, with the understanding that the County Agency would make the intake and property available to the KWA for use by the KWA as part of the System. Genesee Co. is solely responsible for paying the principal of and interest on these bonds from the net revenues derived from its users. Genesee Co. has pledged its limited tax full faith and credit as additional security for the bonds. The lake intake is currently under construction. The County Agency supervised the design of the facility and the receipt and award of construction bids for the facility. The lake intake is expected to be completed in 2015.

The KWA has retained the services of the County Agency to administer the design and construction of the System. The County Agency provided these services at no cost to the KWA since its inception through September 2014. In October 2014, the KWA began paying the County Agency $3,000.00 monthly for these services. In addition, it is expected that the KWA will also contract with the County Agency for operation and maintenance of the System after the System is completed and fully operational. The County Agency has significant experience in planning, operating and managing water and wastewater systems, having been responsible for planning, operating and managing its own system since 1966. The County Agency currently employs approximately 128 people in connection with the operation and management of its current system, and it is expected that from this group, five full-time equivalent employees will be involved in the operation and maintenance of the System. The KWA is not expected to have any employees.

On behalf of the KWA, the County Agency has acquired 40 acres of land with 100 feet of frontage on Lake Huron in Sanilac County for the intake plant and first pump station, and 40 acres of land on the northwest corner of Martin Road and Hull Road in Lynn Township in St. Clair County for the standpipe and second pump station. The County Agency has also acquired approximately 80 acres of land on the northeast corner of Marathon Road and Stanley Road in Oregon Township in Lapeer County to serve as the site for the County Agency's new water treatment plant, reservoir, and the Westside Pump Station.

In anticipation of the construction of the System, the County Agency previously obtained a permit from the Michigan Department of Environmental Quality ("MDEQ") authorizing the withdrawal of up to 85 mgd from Lake Huron. In addition, the County Agency has hired project managers which have to date secured the route of the pipe line, identified all environmental issues and obtained preliminary permits for the entire 63-mile route, and retained consulting firms to complete the design of the remaining System facilities. At this time, the intake, the first two pumping stations, and portions of the pipeline are under construction.

The estimated construction costs for the System, including the lake intake and site financed by the County Agency, are approximately $269,000,000 based on water purchase contracts of 60 mgd. The KWA and the Local Units have entered into contracts, whereby the KWA has agreed to issue bonds in an aggregate amount not to exceed $300,000,000 (collectively, the "System Bonds"), to finance the remaining facilities for the System in anticipation of the Contractual Payments to be made by the Local Units as provided therein. The Contract is contemplated in the Water Purchase Contracts and sets forth the manner in which the capital costs of the System facilities will be allocated. Under the Contracts, Flint and the County Agency are responsible for paying approximately 34.2% and 65.8%, respectively, of the debt service on the System Bonds. This allocation takes into account and credits the County Agency for financing and being responsible for the payment of 100% of the costs of the Intake. In addition, Genesee Co. has pledged its limited tax full faith and credit to 100% of the debt service on the System Bonds.

Interim Water Supply Arrangements for Genesee Co. and Flint

Flint had purchased treated water from DWSD for approximately 30 years, during which time the County Agency had a contract with Flint that required Flint to purchase water from DWSD and provide that water to the County Agency. Flint is currently using the Flint River as a temporary water source, while the County Agency is purchasing treated water directly from DWSD.

Related Facilities

In order to provide finished water to its customers, Flint made numerous upgrades to its existing water treatment plant (which had been operating in a back-up only role) and is currently permitted to treat water drawn from the Flint River until the System is operational. In order to provide finished water to Genesee Co. customers, the County Agency will be required to build a new water treatment plant, reservoir, and approximately five miles of watermain running from the new treatment plant to the County Agency's main distribution facility at Henderson Road, at an estimated cost of $80,000,000.

The completion date for the System is projected for no later than July 31, 2016, at which time Flint expects to cease treating water from the Flint River, and will begin purchasing and treating water from the KWA . Once the County Agency completes its water treatment plant and associated pipeline in 2017, it will discontinue purchasing water from DWSD, and will also begin purchasing and treating water from the KWA.

Objectives

The main objectives of the KWA are to build and maintain a high quality water delivery system at rates which will be fair and cost-effective to all concerned. And in accordance with its bylaws, the KWA maintains a yearly budget of income and expenses. The budget is reviewed and approved by the KWA board.

Karegnondi Water Authority

Statement of Net Position
September 30, 2014

Assets	
Current assets:	
Cash and cash equivalents (Note 2)	$ 3,587,535
Receivables:	
Accrued interest receivable	32,667
Bond proceeds receivable	4,679,146
Total current assets	8,299,348
Noncurrent assets:	
Restricted assets (Note 3)	176,961,787
Capital assets - Assets not subject to depreciation (Note 4)	60,169,807
Deposit with pipe supplier	33,960,593
Total noncurrent assets	271,092,187
Total assets	279,391,535
Liabilities	
Current liabilities - Accounts payable	2,808

Reconciliation of Operating Loss to Net Cash from Operating Activities	
Operating loss	$ (134,178)
Changes in assets and liabilities - Accounts payable	2,808
Net cash used in operating activities	**$ (131,370)**

The Notes to Financial Statements are an Integral Part of this Statement.

Note 1 - Summary of Significant Accounting Policies (Continued)

Specific Balances and Transactions

Cash and Cash Equivalents - Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired.

Investments - Investments are reported at fair value or estimated fair value. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

Prepaid Items - Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in the fund financial statements.

Restricted Assets - The Authority's bond indenture requires amounts to be set aside in a construction account and a debt service reserve. These amounts have been classified as restricted assets, as well as amounts on deposit at the county being held for the construction or debt service of Karegnondi Water Authority water lines.

Liabilities Payable from Restricted Assets - The portion of interest due within the next year will be payable from these restricted assets and therefore has been reported as a noncurrent liability. The construction accounts payable will also be liquidated from the construction account and has been reported in this category.

Capital Assets - Capital assets are defined by the Authority as assets with an initial individual cost of more than $1,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Currently, the Authority is in the process of constructing a water transmission line from Lake Huron; these costs are being reported as construction in progress during construction, after which time they will be depreciated over their estimated useful lives.

Interest incurred during the construction of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. During the current year, $5,029,289 of interest expense was capitalized as part of the cost of assets under construction.

Long-term Obligations - Bond premiums are deferred and amortized over the life of the bonds using the effective interest method; bonds payable are reported net of the applicable bond premium. Bond issuance costs are expensed at the time they are incurred.

Note 2 - Deposits and Investments (Continued)

Michigan Compiled Laws Section 129 91 (Public Act 20 of 1943, as amended) authorizes local governmental units to make deposits and invest in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The law also allows investments outside the State of Michigan when fully insured. The local unit is allowed to invest in bonds, securities, and other direct obligations of the United States or any agency or instrumentality of the United States; repurchase agreements; bankers' acceptances of United States banks; commercial paper rated within the two highest classifications, which mature not more than 270 days after the date of purchase; obligations of the State of Michigan or its political subdivisions, which are rated as investment grade; and mutual funds composed of investment vehicles that are legal for direct investment by local units of government in Michigan.

The Authority has designated three banks for the deposit of its funds. The investment policy adopted by the board in accordance with Public Act 196 of 1997 has authorized investment in bonds and securities of the United States government and bank accounts and CDs, but not the remainder of state statutory authority as listed above. The Authority's deposits and investment policies are in accordance with statutory authority.

The Authority's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits - Custodial credit risk is the risk that in the event of a bank failure, the Authority's deposits may not be returned to it. The Authority does not have a deposit policy for custodial credit risk. At year end, the Authority had no bank deposits (certificates of deposit, checking and savings accounts) that were not fully insured or collateralized.

Custodial Credit Risk of Investments - Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Authority will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Authority does not have a policy for custodial credit risk. At year end, $120,000,000 of investment securities were uninsured and unregistered, with securities held by the counterparty or by its trust department or agent but not in the Authority's name.

Investment Type	Carrying Value	How Held
Repurchase agreements	$ 120,000,000	Agent

Note 4 - Capital Assets (Continued)

Construction Commitments - The Authority has active construction projects at year end. The project is to complete the water pipeline. At year end, the Authority's commitments with contractors are as follows:

	Spent to Date	Remaining Commitment
Water pipeline	$ 28,443,815	$ 205,515,229

Note 5 - Long-term Debt

The Authority issues bonds to provide for the acquisition and construction of major capital facilities. General obligation bonds are direct obligations and pledge the full faith and credit of the Authority.

Description	Amount
Business-type Activities	
General Obligations -	
2014A Water supply system bond, used to construct water pipeline, bearing interest from 3% to 5.25%, maturing in 2043	$ 220,500,000

	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Business-type Activities					
Bonds	$ -	$220,500,000	$ -	$220,500,000	$ -
Plus deferred amounts - Issuance premiums	-	11,815,544	393,851	11,421,693	393,851
Total bonds payable	$ -	$232,315,544	$ 393,851	$231,921,693	$ 393,851
Capital lease (Note 6)	-	35,000,000	-	35,000,000	-
Total business-type activities	$ -	$267,315,544	$ 393,851	$266,921,693	$ 393,851

Note 6 - Capital Lease

Capital Leases - The Authority has entered into a lease agreement as lessee for financing the purchase of the intake pump station. This lease agreement qualifies as a capital lease for accounting purposes and, therefore, has been recorded at the present value of the future minimum lease payments as of the inception date. The future minimum lease obligations and the net present value are as follows:

Years Ending September 30	Amount
2015	$ 2,529,423
2016	2,526,837
2017	2,527,388
2018	2,527,188
2019	2,527,588
2020-2024	12,636,337
2025-2029	12,639,975
2030-2034	12,632,175
2035-2039	12,637,343
Total minimum lease payments	63,184,254
Less amount representing interest	(28,184,254)
Present value	$ 35,000,000

Note 7 - Water Supply Contract Operating Subsidy

Understanding that the goal of the Authority is to provide water to both the City of Flint and Genesee County Drain Commision (local units), the local units have agreed to pay the Authority a good faith payment equal to $32,300 per unit of water that the local unit has contractually agreed to purchase once the pipeline is fully operational. The City of Flint and Genesee County Drain Commission have contractually agreed to purchase 18 and 42 units, respectively, on a yearly basis. The yearly good faith payment will be paid through monthly installments and is expected to bring cash flows of $1,938,000 to the Authority. When the pipeline becomes fully operational, the monthly payments will be suspended and the contract with the local units indicates that a credit will be given on their monthly bills to return the funds contributed to the Authority. The terms of the repayment will be decided by the Board of Directors at the time that the pipeline is operational; however, the funds must be repaid within a maximum of 40 years.

To the Board of Directors
Karegnondi Water Authority

We have audited the financial statements of Karegnondi Water Authority (KWA or the "Authority") as of and for the year ended September 30, 2014 and have issued our report thereon dated March 17, 2015. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility Under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated November 5, 2014, our responsibility, as described by professional standards, is to express an opinion about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management of your responsibilities. Our responsibility is to plan and perform the audit to obtain reasonable, but not absolute, assurance that the financial statements are free of material misstatement.

As part of our audit, we considered the internal control of Karegnondi Water Authority. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures specifically to identify such matters.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our meeting about planning matters on November 14, 2014.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by Karegnondi Water Authority are described in Note 1 to the financial statements.

Praxity
MEMBER
GLOBAL ALLIANCE OF INDEPENDENT FIRMS

To the Board of Directors
Karegnondi Water Authority

March 17, 2015

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. We did not detect any misstatements as a result of audit procedures.

Significant Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, business conditions affecting the Authority, and business plans and strategies that may affect the risks of material misstatement with management each year prior to retention as the Authority's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated March 17, 2015.

Other Information in Documents Containing Audited Financial Statements

Our responsibility for other information in documents containing the Authority's financial statements and report does not extend beyond the financial statements. We do not have an obligation to determine whether or not such other information is properly stated.

This information is intended solely for the use of the Board of Directors and management of Karegnondi Water Authority and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Plante & Moran, PLLC

Jason: We are working on a story about a recent Facebook comment of Councilman Wantwaz Davis, which I've included.

I've asked the governor's office for comment as well.

Davis says the emergency manager and governor are "creating an obvious genocide against the residents in Flint, Michigan, who are forced to drink the contaminated, unhealthy water …"

He actually claims a genocide is occurring three times in the one post.

Would Jerry Ambrose want to comment?

Wantwaz Davis

18 hrs Edited

It has become apparent to me that the emergency manager and Governor Rick Snyder is creating an obvious genocide against the residents in Flint, Michigan, who are forced to drink the contaminated, unhealthy water, that is going to commit an imminent danger to the lives of those who have a compromised immune system, and infants who biologically doesn't have a fully developed immune system. When I become mayor, I will certainly make the governor and all who took part in continuing to have the residents in Flint, Michigan exposed to this injustice and inexcusable danger accountable; this cannot carry on without someone becoming accountable and or responsible; It is so unfair that people in the future may contract a disease that will carry through the duration of their lives. The emergency manager is choosing finances and fixture of infrastructure, i.e., old pipes that hasn't been worked on for the past 60 to 70 years over lives and welfare of innocent civilians. Someone has to be charged with this neglect and imposition of danger amongst a helpless people; all of this is the effects of bad leadership. I must reiterate and can never say it enough, when I become mayor, which will be the best leader and or Chief administrator the City Of Flint, Michigan has ever chose. I will fight hard, not only against the unjust conditions we have long suffered from, but will make someone accountable for this genocide and address these unfortunate conditions around the nation and beg for the assistance of the Department of Justice (United States Attorney General's office) to do a through investigation, so in the end, if any one contracts a disease in the future, I would attempt to have them charged and brought to justice, including a civil suit, in the federal courts; someone has to be punished for the ills of the residents of Flint, Michigan. In conclusion, please vote August 4, 2015, for Wantwaz Davis for Mayor. Bad leadership and decision making has to come to an end at some point and time, and that will certainly be the day I am sworn in as your new mayor and Chief Administrator. This is a picture of reminder that in the past summer, I conducted 4 protest against the contaminated water and high water bills, I was telling people about the unhealthy water, before any notices came out to the public, attempting to keep these issues at the forefront, as mayor I will continue to fight even harder, these issues will not die until justice is brought to the people and someone is charged for this imminent genocide.

For Immediate Release

City of Flint Announces Action Plan to Maintain Safety and Improve Quality of Flint Water

Flint, Michigan – April 8, 2015 – The City of Flint is proceeding with a series of actions to ensure the continued safety of Flint drinking water is maintained and that issues of discoloration and odor continue to be addressed. Most notably, the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant is expected to be authorized this week by Emergency Manager Jerry Ambrose.

The introduction of the GAC to the treatment process at Flint's plant will absorb or reduce the chemical precursors which will block or eliminate the formation of TTHM during the filtration process. Engineering and design are underway and installation of the GAC is targeted for completion by mid-July. Cost of this improvement is projected at $1.5 million and will be paid for by the proceeds from the state approved restructuring of the City's Drinking Water Revolving Fund loans.

In addition to the installation of the GAC, the City of Flint is undertaking a number of other improvements to the water system in the coming months, including a water leak detection monitoring, completion of the hydraulic model and subsequent targeted hydrant flushing program, and the replacement of two miles of water main pipe in a critical area of the city. All of these improvements scheduled to occur within the next six months.

"The replacement of this two mile section of pipe along Dupont Street has been identified by a water reliability study as a significant piece of infrastructure and will greatly improve the movement of water in that area of the city," said Dept. of Public Works Director Howard Croft. Increasing the circulation of the water in the system will immediately result in improvements in water aesthetics, such as discoloration and odor. The MDEQ has given its approval to the project and the process of bidding for construction will begin next week. Construction will take place during the summer of this year.

Ongoing repairs and maintenance also continue to improve the health of the system. To date, about 200 water main breaks have been repaired this year. Whenever major work that may disrupt service is scheduled, the City works to notify residents in the affected area with signage and with posts to cityofflint.com. Updates will include the area of work and the estimated time of completion.

Each main break repair stirs sediments in the line. "Residents should know that there is a chance of discoloration or odor any time work is being done on a main in their area," said Croft. "This is nothing to be alarmed about and it doesn't mean the water is unsafe." If discoloration of water or odor occurs due to repairs, residents are reminded that running the water for a few minutes should clear the line. Anyone with water questions should call 810-787-6537.

The City of Flint remains committed to addressing water related issues. Along with maintaining the safety of the water, addressing quality and affordability are top priorities. The steps outlined above are indicators of the City's progress in addressing the most pressing concerns surrounding water. Emergency Manager Ambrose reiterated that development of a contract with DWSD was not going to happen.

"Those advocating for a return to DWSD do not want to recognize the financial realities of such a move. Not only would such a move increase the City's costs by more than $1million per month, but the water from Detroit is no safer than Flint water, as both entities are measured by the same MDEQ standards that have been in place for years. Why anyone would want to send a million dollars a month to DWSD rather than make necessary repairs to the City's own system is beyond me."

Further updates on the progress being made to improve Flint's water system will released in regular updates to the media and in updates to the City's website, cityofflint.com. Anyone wishing to report an issue can do so under "Online Services". Anyone with questions about these or any other water issues should call the water treatment plant at 810-787-6537.

RESOLUTION STAFF REVIEW

DATE: April 8, 2015

Agenda Item Title: Resolution Authorizing Appropriate City Officials to Enter Into Change Order #4 with Lockwood, Andrews, & Newnam

Prepared By: Yolanda Gray, Utilities Accounting Coordinator

Background/Summary of Proposed Action
The City of Flint Department of Public Works & Utilities (DPW & Utilities) entered into a contract with Lockwood, Newnam, to study the feasibility and develop cost estimates for utilizing the Water Plant as a primary drinking water source in a contract amount not to exceed $1,378,700.00.

The DPW & Utilities through recommendations of Veolia North America water consultants is requesting additional services due to TTHM concerns. The additional services will provide a turn key system of new GAC media in the twelve (12) filters at the Flint Water Plant including MDEQ permitting. The focus will be to provide design, procurement, and construction implementation services for upgrading the filters to address TTHM concerns. The additional cost for these services is not to exceed $1,601,740.00, for a total contract price of $2,980,440.00.

Financial Implications: Funding will be made available in professional services account 591-536.100-801.000.

Account: 591-536.100-801.000

Subject of Additional Services	**Original Contract Date**

Description

Deliver a new GAC media to replace current anthracite media in the 12 filters at the Flint Water Treatment Plant (FWTP) through design-construction management at agency services. The purpose of the project will to be replace the existing filter system with a new GAC media in order to assist the city in addressing TTHM concerns as detailed in the "Flint, Michigan Water Quality Report" dated March 12, 2015 by Veolia North America (Veoila Report). The services shall include:

1- Design the GAC Filter replacement for the FWTP, which will include assisting the City in obtaining the necessary MDEQ Permit(s) and providing construction oversight; ($147,840.00)
2- Provide construction management at agency services for the removal of the existing media and the installation of the GAC filter at the FWTP. On behalf of the City, as City's CM Agent, engage a vendor that will procure new GAC Media, remove existing 18" anthracite and replace it with the new 18" GAC; (approximately $1,300,000.00)
3- Set up, upgrade and calibrate the Flint Distribution Water System to include field Tesing Verification and Support in order to analyze system perfomance and water age mapping and assist the City with line flushing/and or Ice Pigging Program; ($99,900.00)
4- Project Engineering Services to assist the City with monitoring and coordinating activities with city staff, MDEQ and vendors during the maintenance and implementation of improvements needed thru the August TTHM Sampling period. Services will be provided based on 60 hours/month for a total of five (5) months period; ($54,000)

Reason for Change

1) Pursuant to the Veolia Report replacing the anthracite in the filters with new GAC Media will assist in lowering the levels of TTHM. The replacement of the existing filter requires the performance of CT Analyses, conducting an evaluation of Hydraulic Loading and Backwash Capacities of the new GAC cross section, and meeting and coordinating with MDEQ to obtain MDEQ's approval of changes to the current permit;
2) In addition to the design, the replacement requires managing, on behalf of the City, the construction services of a vendor to implement design improvements of the filter system upgrade to the GAC media.
3) Modificaions to the hydraulic model are needed to upgrade the model and calibrate actual system performance and operation to include valve operational performance based on Service Center Report.
4) Provide a project engineer to work with the City, MDEQ and the vendors will assist in implementing Veolia's recommendations to the extent accepted by the City. Such engineering services will provide weekly progress reports to the City allowing the City to monitor the progress of the Project.

Compensation:

☐ Will be an amount equal to _____ times Salary Cost plus reimbursable expenses, both defined in the **PROFESSIONAL SERVICES AGREEMENT**, and in addition to the compensation for **BASIC SERVICES**. Total charges for these **ADDITIONAL SERVICES** are estimated to be approximately $_____.

☐ Will be the lump sum of $_____ for these **ADDITIONAL SERVICES.**

☒ Other Cost plus based on current rates for a Not-To Exceed amount of $1,601,740.00 *(use reverse if necessary)*

Completion:	Current Date	6-15-14	
	This Extension	3 months	
	New Date	9-15-15

> I submitted this afternoon through our normal process a request for approval to install the GAC filter at the water treatment plant. The most expeditious way to get it done is by amending our contract with LAN, who will be responsible for the design, procurement and install. The price quoted for the material and install is within the estimates provided by Velioa. Veolia did provide us with a comprehensive proposal to oversee all improvements, but it was very expensive.

In my judgement, this is the way to go. Completion of the install is mid July which I am told will be in sufficient time to forestall another TTHM violation. Funding will come from the restructuring of the DWRF loan.

Thanks for your help and your quick approval is requested.

RICK SNYDER
72 (Rev 11-13) GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

R. KEVIN CLINTON
STATE TREASURER

DATE: April 10, 2015

TO: Kevin Clinton, State Treasurer

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Sole Source Contract Approval – GAC Filters

On April 9, 2015, the City of Flint requested approval to amend the existing contract with Lockwood, Andrews and Newnam, for additional design, procurement, and construction services, not to exceed $1,601,740, for a total revised contract price of $2,980,440. The purpose of the project is to replace the existing filter system with a new Granulated Activated Carbon (GAC) media that will assist the City in reducing the levels of TTHM.

As the monetary value of this proposal exceeds $50,000, Section 12(3) of P.A. 436 of 2012 is implicated. To satisfy this section, the State Treasurer must approve this request. Because the purchase of the GAC Filters is necessary for the City to provide essential services to its residents and address TTHM concerns detailed in the Flint, Michigan Water Quality Report, I recommend that this contract be approved.

Because there has been so much controversy regarding the water quality in the City of Flint, we consider this water improvement project to be urgent.

If additional information is desired, please let me know.

Gerald Ambrose, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Mr. Ambrose:

I am in receipt of your request dated April 9, 2015 in which you are requesting approval to amend the existing contract with Lockwood, Andrews and Newnam, for additional design, procurement, and construction services, not to exceed $1,601,740, for a total revised contract price of $2,980,440.00.

Pursuant to P.A. 436 of 2012, any no-bid contract with a value exceeding $50,000 must receive approval from the State Treasurer. I am approving this request based on the City's need for new Granulated Activated Carbon (GAC) Filters to assist reducing the levels of TTHM.

State Treasurer Approval:

I, R. Kevin Clinton, State Treasurer for the State of Michigan, pursuant to the authority assigned by Public Act 436 of 2012, do hereby:

RESOLUTION AUTHORIZING APPROPIRATE CITY OFFICIALS TO ENTER INTO CHANGE ORDER #4 WITH LOCKWOOD, ANDREWS, & NEWNAM

BY THE EMERGENCY MANAGER:

The City of Flint Department of Public Works & Utilities (DPW & Utilities) entered into a contract with Lockwood, Andrews, and Newnam to study the feasibility and develop cost estimates for the Water Plant as a primary drinking water source in a contract amount not to exceed $1,378,700.00; and

The DPW & Utilities through recommendations of Veolia North America water consultants have identified additional services due to TTHM concerns. The additional services will provide a turn key system of new GAC media in the twelve (12) filters at the Flint Water Plant including MDEQ permitting. The focus will be to provide design, procurement, and construction implementation services for upgrading the filters to address TTHM. The additional cost for these services is not to exceed $1,601,740.00. Funding for said services will come from the following account: 591-545.300-801.000; and

IT IS RESOLVED, that the appropriate City of Flint officials, upon the Emergency Manager's approval, is authorized to enter into change order #4 with Lockwood, Andrews and Newnam, for additional design, procurement, and construction services, not to exceed $1,601,740.00, for a total revised contract price of $2,980,440.00.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

APPROVED AS TO FINANCE:

Dawn L Steele

Dawn Steele, Deputy Finance Director

Natasha L. Henderson, City Administrator

EM DISPOSITION:

RESOLUTION STAFF REVIEW

DATE: April 8, 2015

Agenda Item Title: Resolution Authorizing Appropriate City Officials to Enter Into Change Order #4 with Lockwood, Andrews, & Newnam

Prepared By: Yolanda Gray, Utilities Accounting Coordinator

Background/Summary of Proposed Action
The City of Flint Department of Public Works & Utilities (DPW & Utilities) entered into a contract with Lockwood, Newnam, to study the feasibility and develop cost estimates for utilizing the Water Plant as a primary drinking water source in a contract amount not to exceed $1,378,700.00.

The DPW & Utilities through recommendations of Veolia North America water consultants is requesting additional services due to TTHM concerns. The additional services will provide a turn key system of new GAC media in the twelve (12) filters at the Flint Water Plant including MDEQ permitting. The focus will be to provide design, procurement, and construction implementation services for upgrading the filters to address TTHM concerns. The additional cost for these services is not to exceed $1,601,740.00, for a total contract price of $2,980,440.00.

Financial Implications: Funding will be made available in professional services account 591-536.100-801.000.

Account: 591-536.100-801.000

Pre-encumbered: Yes____ No _x_ Requisition:

Other Implications (i.e., collective bargaining):

Staff Recommendation: Recommend Approval

Staff Person: _____
(Dept Head or other authorized staff)

Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY

Client Additional Services Authorization Date: 4-7-15

Project Name Flint WTP Phase II Segment I Initial Watermain Cut-in Flint WTP Phase II Segment I Rehab Flint WTP Ph II-Seg II - Lime Residual Disposal	**Additional Services Authorization No.**
Client Name City of Flint	**To Project No.** 130-10701-001
Subject of Additional Services	**Original Contract Date**

Description

Deliver a new GAC media to replace current anthracite media in the 12 filters at the Flint Water Treatment Plant (FWTP) through design-construction management at agency services. The purpose of the project will to be replace the existing filter system with a new GAC media in order to assist the city in addressing TTHM concerns as detailed in the "Flint, Michigan Water Quality Report" dated March 12, 2015 by Veolia North America (Veolia Report). The services shall include:

1- Design the GAC Filter replacement for the FWTP, which will include assisting the City in obtaining the necessary MDEQ Permit(s) and providing construction oversight; ($147,840.00)
2- Provide construction management at agency services for the removal of the existing media and the installation of the GAC filter at the FWTP. On behalf of the City, as City's CM Agent, engage a vendor that will procure new GAC Media, remove existing 18" anthracite and replace it with the new 18" GAC; (approximately $1,300,000.00)
3- Set up, upgrade and calibrate the Flint Distribution Water System to include field Tesing Verification and Support in order to analyze system perfomance and water age mapping and assist the City with line flushing/and or Ice Pigging Program; ($99,900.00)
4- Project Engineering Services to assist the City with monitoring and coordinating activities with city staff, MDEQ and vendors during the maintenance and implementation of improvements needed thru the August TTHM Sampling period. Services will be provided based on 60 hours/month for a total of five (5) months period; ($54,000)

Reason for Change

1) Pursuant to the Veolia Report replacing the anthracite in the filters with new GAC Media will assist in lowering the levels of TTHM. The replacement of the existing filter requires the performance of CT Analyses, conducting an evaluation of Hydraulic Loading and Backwash Capacities of the new GAC cross section, and meeting and coordinating with MDEQ to obtain MDEQ's approval of changes to the current permit;
2) In addition to the design, the replacement requires managing, on behalf of the City, the construction services of a vendor to implement design improvements of the filter system upgrade to the GAC media.
3) Modificaions to the hydraulic model are needed to upgrade the model and calibrate actual system performance and operation to include valve operational performance based on Service Center Report.
4) Provide a project engineer to work with the City, MDEQ and the vendors will assist in implementing Veolia's recommendations to the extent accepted by the City. Such engineering services will provide weekly progress reports to the City allowing the City to monitor the progress of the Project.

Compensation:

☐ Will be an amount equal to _____ times Salary Cost plus reimbursable expenses, both defined in the **PROFESSIONAL SERVICES AGREEMENT**, and in addition to the compensation for **BASIC SERVICES**. Total charges for these **ADDITIONAL SERVICES** are estimated to be approximately $_____.

☐ Will be the lump sum of $_____ for these **ADDITIONAL SERVICES.**

☒ Other Cost plus based on current rates for a Not-To Exceed amount of $1,601,740.00 (use reverse if necessary)

Completion:	Current Date	6-15-14	
	This Extension	3 months	
	New Date	9-15-15	
	All terms and conditions of the original agreement remain in full force and effect.

Thanks, this is good. Also, am I correct that Flint is the only EM's office with a press guy (for lack of a better term)? That is to say, they're actually some of the more proactive and savvy when it comes to messaging?

Just trying to build the case that we need the community liaison thing to be most effective. Thanks again.

Please find the updated Flint Water talking points.

Let me know if you have any questions, etc.

TS

City of Flint

Water Quality Talking Points:

The City, in conjunction with the Dept. of Environmental Quality, has been working diligently, since December, to address water quality issues in the City and ensure Flint residents have access to clean, safe water.

The City has contracted with international urban water quality expert Veolia North America, which has been on site since mid-February, and has recommended several remedial actions, including operational changes, changes in water treatment, increased maintenance for the aging urban system, and increased training.

Additionally, the city is in regular contact with MDEQ to ensure that residents receive water that complies with state drinking water standards. This system is tested regularly and rigorously, and the results are reported to customers as outlined in the Safe Drinking Water Act.

Last month, Flint issued a Water Quality Update to residents and water customers, as required by DEQ, which indicated that water testing results for the month of March showed Flint Water met all Michigan DEQ and U.S. EPA standards for safety. Total TTHM levels, which caused the issuance of a violation notice in November, are significantly below the maximum acceptable levels at all eight testing sites. This progress was accomplished by:

- **Upgrading the ozone treatment process at the Water Treatment Plant**
- **Increasing water main/hydrant flushing to reduce stagnation**
- **Conducting additional testing of treatment to identify areas of improvement**
- **Improving water circulation by repairing valves and adjusting reservoir levels**

The City has received significant financial assistance through both grant programs and bond restructuring initiatives administered by the MI Department of Treasury. This financial assistance has allowed the City to replace miles of aged pipeline and begin efforts to install a specialized filter at the Water Treatment Plant.

In February, Flint was awarded a total of $2 million through two *Financially Distressed Cities, Villages, and Townships Grants*. $1.1 million was awarded for water system enhancements

through improved waste management while $900,000 was awarded for water system enhancements through leak detection and pipe assessments.

On April 8th, the City announced that it was moving forward with a series of actions to ensure the continued safety of Flint drinking water and address issues of discoloration and odor. The most significant step will be the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant. The GAC filter will help block or eliminate the formation of TTHM during the filtration process.

A contract for the filter installation is expected to be approved by the State Treasurer next week with the project targeted for completion by mid-July. The $1.5 million project will be funded with proceeds from the state-approved restructuring of Flint's Drinking Water Revolving Fund loans ($2.24 million).

The City is undertaking a number of other improvements to the water system including the acceleration of valve replacements, targeted hydrant flushing, the replacement of two miles of water main in a critical area of the city, and acceleration of the project to automate plant operations.

Wayne and I discussed this further. I think it would be good if this group could meet early next week to have another discussion on Flint.

The purpose of the meeting would be to discuss and finalize Flint RTAB members, and also to discuss the potential ramifications of Rep. Kildee's recommendation that the state forgive Flint's $22M water loan:
http://www.mlive.com/news/flint/index.ssf/2015/04/kildee_asks_feds_about_forgive.html

If you agree, perhaps Wendy (or Laura, in her absence) and Beth can help us find some time. Thanks much.

For Immediate Release

City of Flint Moves Ahead with $5 million in Water Treatment Improvements

Flint, Michigan – April 16, 2015 – Emergency Manager Jerry Ambrose, with approval from the Department of Treasury, has authorized a contract with LAN, the City's consulting engineers, to immediately proceed with design and installation of granulated activated carbon filter for the Water Treatment Plant. Installation of the filter was one of the primary recommendations from Veolia and others as a means to help assure that City water will continue to be within EPA guidelines. Installation is scheduled to begin in Mid-June, with completion by mid-July.

Other action steps are also underway at the plant, including cleaning plate settlers, repairing the clarifier, and adjusting chemical dosing and levels as also recommended. Additionally, a contract is being finalized for the water main leak detection project, hydraulic modeling and flushing is underway, and bids for the replacement of 2 miles of major pipe are being reviewed.

Nearly $5 million has been budgeted to implement these actions, which in large measure are the ongoing types of action necessary to maintain the water treatment and distribution system. $2.1 million of this amount is budgeted for replacement of the pipe along Dupont St., and $1.6 million is budgeted for the GAC, with $900,000 budgeted for water main leak detection. Actual replacement of the pipe is scheduled to begin in June, and to be completed by early September.

–CONTINUE–

Gerald Ambrose
Emergency Manager

Dayne Walling
Mayor

These steps are all part of the action plan recently released by the City as it continues its work to maintain the safety of the water and improve its quality. Recent testing has shown that Flint's water is meeting all regulatory safety standards, with TTHM levels being significantly below the maximum level accepted.

The measures that have been taken to date by the Flint Water Plant staff have resulted in a significant improvement in the quality of Flint water since last summer. "Both the hardness and TTHM levels are at the lowest point since the switch to the Flint river last April," said DPW Director Howard Croft. "Installing the GAC filter, in addition to these other steps, will further bolster the positive direction we are moving in to continue improving the quality of water in the City."

–END–

Subject: Re: Quick Questions...

Hi Terry,

We have not yet discussed issuing a release announcing approval of the GAC, but we did make an announcement about it last week so that it's known that we are pursuing that option. I can talk to Jerry about another release.

As far as the Karegnondi project timeline, that would need to come from Jeff Wright, the Genesee County Drain Commissioner, who heads the project. I know that there was talk of an early start to the construction season being beneficial to moving the project ahead, but the ETA of the pipeline to Flint is still "mid 2016". Kevin Sylvester handles communications for Wright, he should be able to get more solid information: k_sylvester@gcdcwws.com

Let me know if there is anything I can help you with.

Best,

Jason

Hi Jason...

Are you folks planning to issue a release on the Treasurer's approval of the carbon filter contract? Seems like good collaboration/partnership type news to address the water...

Also, what is the timeline for the Karegondi project? Some here thought that with a mild winter and good spring/summer weather, it might be done sooner...

When is it "supposed" to be done...and has the timeline changed at all (for the good)?

Subject: City of Flint EM'S FINAL ORDER

Dennis & Beth,

Please find attached the City of Flint EM's Final Order. The EM's exit letter is expected to be sent to the Governor's office shortly. I have not heard that Jerry's final exit letter has been revised significantly from the draft I sent over on Friday. I will send the final letter upon receipt.

Thank you.

Subject: City of Flint EM Transition Plan for TODAY & TOMORROW - Materials and Communication Plan

Dennis & Beth,

PLEASE NOTE REVISIONS TO DATES FROM MY PREVIOUS EMAIL (DATES HAVE MOVED UP BY ONE DAY). SEE REVISED COMMS PLAN ATTACHED.

With the exception of the change in date, the following events outlined below are unchanged from my email sent out this past Friday.

The proposed schedule for today (April 28th) and tomorrow (April 29th) – items listed in order of occurrence:

1. Today – City of Flint's Emergency Manager (EM) Jerry Ambrose issues letter to Governor declaring the financial emergency in the city has been rectified. He will also recommend that a Receivership Transition Advisory Board (RTAB) be appointed in the city.

2. On April 29th, EM Jerry Ambrose issues final order *[this document has been revised from the previous draft sent last week – I will distribute final version of the EM's final order as soon as it is available]* outlining duties of the mayor, city council and soon-to-be-appointed RTAB, effective immediately. This needs a time stamp, either through the Clerk or by transmitting it in an email. Jerry to notify Treasury of issuance.

3. ONLY AFTER NOTIFICATION OF FINAL ORDER BEING ISSUED - Governor's Office issues termination letter to Jerry Ambrose. A copy of the letter is attached. Transmittal of signed letter by email to include a time stamp.

4. AFTER CONFIRMATION OF TERMINATION LETTER BEING SENT - Governor's Appointments Office transmits appointment letter for RTAB. A copy of the letter is attached.

Summary of Governor's Transition Advisory Board Appointment Letter –

The Governor's letter appointing the RTAB contains the following requirements: enforcement of the requirements contained in the EM's final order; recommendation of modifications or termination of the EM's final order; formal evaluation of the City's financial and operational progress and sharing of that information with city officials, residents and stakeholders. The letter also contains conditions which must be satisfied before receivership is waived. These are implementing the Financial Officials Association best practices; implement charter amendments consistent with applicable model charters, and completion of financial and managerial training by city officials.

Pursuant to the updated Communication Plan, a press avail is scheduled for 1:30 pm on Wednesday, April 29th.

Please do not hesitate to let me know if you have any questions. Thank you.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

April 28, 2015

Honorable Rick Snyder
Governor of Michigan
111 South Capitol Avenue
Lansing, MI 48909

Dear Governor Snyder:

The City of Flint has been in a state of receivership since your declaration of a financial emergency in November 2011. Since that time a number of substantial changes have been implemented and I feel that the financial emergency has been sufficiently addressed. I feel it is appropriate to relinquish my position as Emergency Manager (EM) at this time.

As you are aware, I was appointed Emergency Manager on January 13, 2015, under the authority of PA 436 of 2012. I am the fourth EM to serve the City of Flint; my predecessors were Michael K. Brown (PA 4 and PA 436), Edward Kurtz (PA 72 and PA 436) and Darnell Earley (PA 436). Each EM took major steps toward rectifying the financial emergency. These steps included implementing budgetary and financial best practices, restructuring the City departmental organization, implementing new means and levels of service provision, and preparing the City for long term stability.

Addressing the Financial Emergency:

At the time of placement into state receivership, the City of Flint was a city in financial crisis, characterized by accumulated deficits in the General Fund and Water Fund, marginal cash flow, and unsustainable legacy costs. At the conclusion of FY12, the fiscal year in which an Emergency Manager was appointed, the City's General Fund deficit stood at $19.1 million; its Water Fund had a deficit of $8.8 million; and cash flow was $13 million, or less than one month's expenses. Unfunded OPEB liabilities were more that $850 million.

Addressing these issues and putting Flint back onto a path to sustain financial solvency has been difficult for taxpayers, employees, retirees, and those utilizing city services. Taxes and fees have been raised, including a voter approved six mill special levy for police and fire; a special assessment for street lighting; waste collection was changed to a fee for service from a millage rate; and increases in utility rates to among the highest in the state. Services have been reduced to marginal levels (including public

safety), as the workforce and employee compensation has shrunk by more than 20%. And, retirees have seen their cost of retiree health care increase.

As a result, much progress has been made:

- The deficits in the General Fund and Water Fund have been addressed. The Water Fund is now solvent, although not at the level indicated as adequate; and the remaining $7 million General Fund deficit will be eliminated by June 30, 2015, with a loan authorized by the Emergency Loan Board. City wide cash flow is now more than $67 million.
- New ordinances addressing the achievement and maintenance of financial sustainability have been enacted by the City Council, with support of the Mayor. These ordinances include the requirement for creation and maintenance of a strategic plan; requirement for creation and maintenance of a biennial budget and five year financial projections; establishment of a fund balance reserve, including establishment of a budget stabilization fund; establishment of a requirement to begin funding of OPEB liabilities; and an update of the City's purchasing ordinance.
- Long term liability costs have been reduced significantly. $850 million in OPEB liabilities have been reduced to $240 million, and new employees are given a contribution towards future health care costs at retirement instead of the promise of retiree health care. Current retirees now pay a significant amount towards their health care. Multipliers for remaining employees in defined benefit programs have been reduced, and new employees are enrolled in a hybrid pension plan, which has less long term liability for the City. The Flint Employees Retirement System has been dissolved, with pension administration now handled by the Municipal Employees Retirement System.
- The structure of the City organization has been changed significantly. A new City Administrator has been hired, selected on the basis of professional expertise, and with expanded control over daily activities of the City. The workforce has been reduced by more than 20%, and City operations have been reorganized into four program areas. Waste collection and demolition is no longer being done internally, 911 operations will be transferred to the County effective July 1, 2015, and the City-funded 68th District Court is expected to become part of the County- funded 67th District Court in January, 2016. The purchase of water is now planned to come from the Karegondi Water Authority instead of the Detroit Water and Sewerage Department. Collective bargaining contracts have also been revised; increasing flexibility for management and setting the stage for permanent reductions in legacy costs. Partnerships have been established to improve the level of parks maintenance. Senior Centers are now run by independent non-profit organizations, with reduced assistance from the City; and the City golf courses have been leased to private operators.
- The City has put into place a plan for long term stabilization and future development. A new Master Plan (the first since the 1960's) has been adopted, a new Capital Improvement Plan has been completed, and a new framework for a Blight Elimination Plan has been developed. A new zoning ordinance is well on its way to completion. Each of these major planning pieces significantly engaged members of the community and the final products were approved by the Flint City Council, with the support of the Mayor.

- A Blue Ribbon Committee on Governance was established by EM Earley in 2014. The committee recommended a number of Charter revisions and recommended the election of a Charter Review Committee. In November 2014 the voters in Flint approved several revisions to the current Charter and also approved establishing a Charter Review Commission, the members of which will be elected in May 2015. The Commission will consider whether to maintain the current Strong Mayor form of governance or to propose a new Council-Manager format.
- A formal assessment of the values of both Hurley Hospital and the City's utility system have been completed; and concluded that no change in ownership status would be beneficial at this time.

Continuing Challenges:

Significant work has been accomplished to resolve the conditions which put the City of Flint into State receivership. However, there also still exist several major challenges which will require continued work on the part of the City leaders:

- Retiree health care continues to be a significant concern as the City still faces a federal lawsuit over its decision to change (but not eliminate) health care for current retirees. While the City is currently operating under a judge's order which allows modification of the City's historical level of health care for retirees, a loss could have an impact of more than $5 million annually.
- The five year revenue projections still identify a structural deficit. Annual costs for wages and fringes will continue to rise at an approximate 2.4% rate. There is not a comparable increase in projected revenue, which is closer to 1%. While it may be possible to continue the low level of services that Flint now provides for a short while, even that level will be in jeopardy without a long term sustainable new source of revenue. The low level of services that Flint currently provides is not at the level which will help the City to become an attractive place to live, work, study, and play.
- Aging water and sewer systems designed to serve twice as many customers as the number now using the systems have resulted in water and sewer rates that are among the highest in the state. This is another factor impeding the City's ability to attract and retain businesses and residents. There needs to be a concerted effort to reduce rates by as much as 50%, but that cannot even be contemplated without the commitment of financial assistance from the state and federal governments. While the decision to join with Genesee County in the creation of the KWA will result in costs for purchasing water increasing at a rate less than historically paid to the previous supplier, it will not be sufficient to lower costs.
- Continuing voter support for special millages financing public safety is a concern. In 2012 voters approved a 6 mill property tax levy for police and fire, bringing Flint's total level to within 1 mill of its maximum 20 mill limit. This millage, plus one for 2 mills approved some time ago, are expiring in 2017, and without renewal, the resulting level of public safety services, even with the current level of greatly appreciated State Police support, would be unworkable. This was recently confirmed by an evaluation of the organization and staffing for both the Police and Fire departments. The evaluations found both departments are understaffed, but the understaffing situation is significantly more acute in the Police Department, where it was noted that comparable cities have on average 100 more officers on the street than Flint does.

- Equally important to providing State support in the form of Michigan State Police has been the financial commitment by the State to fund the City's lock up at a cost of more than $2.5 million annually – without which there would be no lock-up. Both FPD and MSP have noted that the opening of the City's 72-hour lock-up has been a key component in the reduction in crime.

Emergency Manager's Recommendation:

Section 22(1) of P.A. 436 of 2012, the Local Financial Stability and Choice Act, provides that if the Emergency Manager determines that the financial emergency has been rectified, he or she is required to inform you and the State Treasurer. Based on the examples presented above, I am prepared to say that I have determined the financial emergency in the City of Flint has been rectified. In addition, as required by Section 21(1) of the Act, a two-year budget has been implemented and all bargaining unit contracts have been settled.

Although the financial emergency has been resolved, I recommend the appointment of a Receivership Transition Advisory Board (RTAB) as allowed by Section 23 of the Act. I believe it is critical that the RTAB oversee and provide guidance to the City as they address the continuing challenges facing the City of Flint and complete transition back to full local control.

The path to sustainable financial solvency for the City of Flint will be very difficult, but doable. The new financial policies and practices, and the new organizational structure, are designed to assist City leaders in achieving this goal. Achieving the goal will allow City leaders to become a positive force in leading the City to become an attractive place to live, work, study, and play. I applaud the efforts of the Mayor and Council members who have worked actively and positively to effectuate these changes and are committed to carrying them into the future.

If, however, the new policies, practices, and organizational changes are ignored in favor of returning to the historic ways of doing business, it is not likely the City will succeed over the long term. The focus of City leaders will then likely once again return to confronting financial insolvency.

I have greatly appreciated the opportunity to have been of service to the City of Flint and to the State of Michigan.

Sincerely,

Gerald Ambrose
Emergency Manager
City of Flint

Cc: Nick A. Khouri, State Treasurer

4/29/2015 ELB Notes

Prepared for Wayne Workman
Prepared by Drew Van de Grift

Accomplishments:

- Complete elimination of operating deficits through cost reductions and the implementation of financial best practices. .
- General Fund accumulated deficit reduction from 19.1 million in 2012 to approximately 7 million currently. ~ 0 by June 30, 15 Water department was 8.8 million now 20.
- ~~Workforce and~~ employee compensation both have been reduced by 20%.
- $850 in unfunded OPEB liabilities has been reduced to $240 million,
- A qualified city administrator has been hired.
- Consolidation of the city-funded 68th District Court into the county-funded 67th District Court. $800k in annual savings
- Consolidation of 911 dispatch services into the county system. More than $1 million in annual savings.
- EM Administrations:
  - Michael Brown December 2011*
  - Ed Kurtz August 2012
  - Michael Brown July 2013
  - Darnell Earley October 2013
  - Gerald Ambrose January 2015

Continuing Challenges:

- OPEB reductions are subject to a federal lawsuit. Loss of this legal action means an additional $5 million annual OPEB expense.
- Future expense reductions are necessary to balance multi-year projections.
- The transition to KWA and maintenance of the aging water distribution infrastructure are important challenges which require significant funding and continued leadership.
- The City must reappraise all of the real property in the City prior to the 2018 Assessment Roll. This will be a costly, but necessary undertaking.

Post Emergency Manager Flint

- It is anticipated that the Governor will appoint a Receivership Transition Advisory Board to assist the City as it navigates future challenges.
- The City has adopted its first Master Plan since the 1960s. This Plan is sound and will provide direction for future years.
- A new Capital Improvement Plan has been adopted.
- A new methodology for blight elimination has been implemented, which will improve the city and the lives of the residents.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A KHOURI
STATE TREASURER

DATE: April 29, 2015

TO: Local Emergency Financial Assistance Loan Board (ELB)

FROM: Drew Van de Grift, Michigan Department of Treasury

SUBJECT: City of Flint Emergency Loan

Executive Summary

Major financial and operational progress has occurred in the City of Flint, under the direction of emergency management. The City of Flint is now requesting a $7 million emergency loan to fully eliminate its remaining General Fund accumulated deficit. Such a loan will enable the successful exit of Mr. Ambrose as emergency manager on April 30, 2015.

Financial Background

In November 2011, a financial emergency was declared by Governor Snyder. By the close of fiscal year 2012, the City's General Fund accumulated deficit increased to $19.1 million, while its Water Fund had an $8.8 million accumulated deficit. The City had not complied with previous deficit elimination plans and had engaged in deficit spending for each of the preceding five fiscal years. Additionally, the City's pension and retiree healthcare systems were underfunded to a point of insolvency, with pension assets approximating less than 60% of the correlating liability. Unfunded OPEB liabilities exceeded $850 million. These circumstances were dire and jeopardized the continued delivery of essential municipal services.

Progress and Accomplishments

Four emergency managers have been appointed since the City entered receivership. Great progress has been made during these administrations, and the financial condition of the City has improved markedly. Changes in the structure of the City have led to more professional and responsible management of municipal assets and to reduction of expenses. The new city administrator operates with an emergency manager approved plan for increased efficiencies. New ordinances have been enacted by the City, ordinances which control the City's strategic plan, balanced multi-year budget, fund balance usage, the establishment of a budget stabilization fund, and the purchasing process for the City. Modifications to certain collective bargaining agreements have reduced the unfunded OPEB liability, which the City currently calculates to be $240 million - less than a third of what it was only four years ago. These collective bargaining agreement modifications are contested in a pending federal lawsuit, the loss of which could reverse these savings and reinstate the full unfunded OPEB liability. In this event, the City calculates that its cost of OPEB will increase by approximately $5 million a year.

These best practices have largely addressed the financial emergency in Flint. Budgets have been balanced, and accumulated deficits have shrunken precipitously. The City indicates that the accumulated deficit in the Water Fund has been eliminated. The General Fund accumulated deficit now has been reduced to approximately $7 million.

Rational for Emergency Loan

This $7 million emergency loan would fully eliminate the existing accumulated deficit in the City's General Fund. These emergency loan proceeds would also repay a previous loan from the City's Water Fund and enable further water system improvements. This final step would allow Mr. Ambrose to successfully exit as emergency manager and for the City to transition back to local control. The City will be bound to implement the financial and operational best practices covenanted to in the loan agreement, for the life of the outstanding loan. Lastly, the City meets all of the statutory prerequisites to be eligible for this loan under the Emergency Municipal Loan Act, MCL 141.931 *et seq*.

Loan Properties

This $7 million loan will be repaid over 15 years, and carries a 2.09% annual interest rate. The debt service is level throughout the duration of the loan. Further detail is found in the repayment schedule included in this packet.

Conclusion

This emergency loan request comes at a time when the City of Flint has made considerable financial and operational progress. The proceeds of this loan would be used to eliminate the last significant deficit in the City. This action would allow the exit of the emergency manager and bind the City to the terms of this loan to ensure prudent financial management for the future of the City of Flint. The strategy of providing exit financing is consistent with treatment of all other cities upon the exit of the emergency manager.

MICHIGAN DEPARTMENT OF TREASURY
Bureau of Local Government Services
PO Box 30728
Lansing, Michigan 48909
EMERGENCY MUNICIPAL LOAN APPLICATION

Applicant:	City of Flint		
County/Counties of:	Genesee County		
Mailing Address:	1101 S. Saginaw St. Flint MI 48502		
Chief Financial Officer:	Gerald Ambrose	Phone:	810-766-7470 ext. 2062
Contact Person:	Gerald Ambrose	Phone:	810-766-7470 ext. 2062
Loan Amount Requested:	$7,000,000.00		

1. Projected General Fund deficit for the current fiscal year: $7,000,000

2. Date of last Tax Anticipation Note or
   date of last application made to Department of Treasury to issue a Tax Anticipation Note: N/A
   For school districts, date of last State Aid Note:

3. Income Tax Revenue Growth Rate

A. Calendar year preceding application:	2014	Income tax revenue:	$13,038,276
B. Calendar year preceding above year:	2013	Income tax revenue:	$14,674,274
		A/B	0.89

4. Local and State Tax Base Growth Rates

C. Tax year of most recent municipal State Equalized Value:	2014	Municipal SEV (real and personal):	$773,073,560
D. Tax year five years preceding above year:	2009	Municipal SEV (real and personal):	$1,548,866,055
E. Tax year of most recent statewide State Equalized Value:	2014	Statewide SEV (real and personal):	$360,592,938,004
F. Tax year five years preceding above year:	2009	Statewide SEV (real and personal):	$423,901,291,288
		C/D	0.50
		E/F	0.85
		(C/D)/(E/F)	0.59

5. Decrease in State Equalized Value

G. Tax year of most recent municipal SEV:	2014	Municipal SEV (real and personal):	$773,073,560
H. Tax year preceding above year:	2013	Municipal SEV (real and personal):	$797,212,769

6. Ad valorem operating tax millage

I. Maximum levy per charter:	10.0000
J. Maximum levy authorized as approved by voters:	9.1000
K. Current levy:	19.1000

7. Does the municipality have one or more delinquent special assessments? Yes or No. No

   If yes, provide explanation:

8. Does the municipality have outstanding bonds, notes, or other evidences of indebtedness that were issued in anticipation of a contract obligation with, or an assessment obligation against, another municipality that has one or more delinquent special assessments that were levied to satisfy, in whole or in part, the contract or assessment obligation? Yes or No. No

   If yes, provide explanation:

9. School district enrollment

L. Current fiscal year:	2015	Enrollment:	N/A
M. Three years preceding above year:	2012	Enrollment:	N/A
		(M-L)/M	#VALUE!

10. Is the municipality in receivership or subject to a consent agreement under the Local Financial Stability and Choice Act, Public Act 436 of 2012? Yes or No. Yes

ADDITIONAL REQUIRED INFORMATION

11. Resolution adopted by the governing body of the municipality approving the application.

12. Resolution adopted by the governing body of the municipality approving the Deficit Elimination Plan.

13. Deficit Elimination Plan, not less than five years, that eliminates the General Fund deficit and balances future expenditures with anticipated revenues.

14. Budget for current fiscal year and proceding fiscal year(s) if available.

15. Projected monthly cash flows for the proceding 12 months.

16. Accounts Payable Aging Report.

17. Additional comments. Taxable Values are from the tax roll settlement reports and do not reflect the distributions that occur for the Flint DDA, the Brownfield Authority, etc...

Chief Administrative Officer Name: Gerald Ambrose

Chief Administrative Officer Signature: Date: 4/17/15

City of Flint- Deficit Elimination Plan - April 17, 2015

With the currently approved Deficit Elimination/ Reserve Accumulation Plan, adjusted for revised revenue estimates, the current $7 million deficit would not be eliminated until FY22. With the $7 million loan, the deficit is eliminated by the end of FY15, and General Fund reserves accumulate to as much as 10% of projected revenues by FY20, assuming $1 million continues to be budgeted for reserve accumulation as provided for in the current DEP/RAP and City Ordinance.

Impact of Emergency Loan on General Fund Deficit:

1 **Status Quo - No Loan:**

$1 million surplus committed annually by ordinance for deficit elimination/reserve accumulation/OPEB reduction
Assumes revenue-expense gap is not eliminated each year

	Tentative FY16	Tentative FY17	Projected FY18	Projected FY19	Projected FY20
General Fund (101)					
Revenues	$51,239,208	$50,029,123	$50,638,175	$51,160,184	$51,762,300
Expenses	$51,239,208	$50,029,123	$50,638,175	$51,160,184	$51,762,300
Revenues - Expenses Gap	$0	$0	$0	$0	$0
Committed for Deficit Reserve	$1,000,000	$1,000,000	$1,000,000	$1,000,000	$1,000,000
Projected Fund Balance June 30, 2015*	($7,000,000)				
Projected Fund Balance FY17 - FY20		($6,000,000)	($5,000,000)	($4,000,000)	($3,000,000)
Ending Fund Balance	($6,000,000)	($5,000,000)	($4,000,000)	($3,000,000)	($2,000,000)

* Accumulated GF Deficit per audit, June 30, 2014	($8,961,427)
$1,000,000 revenue surplus budgeted in GF for FY15 for deficit elimination	$1,000,000
$800,000 budgeted in Public Improvement Fund for FY15 to reduce GF deficit per previous EM order	$800,000
Additional projected GF surplus for FY15 which will reduce deficit	$161,427
	($7,000,000)

2 **With $7 million Loan:**

$1 million surplus committed annually by ordinance for deficit elimination/reserve accumulation/OPEB reduction
Revenue - expense gap is eliminated each year

	Projected FY16	Projected FY17	Projected FY18	Projected FY19	Projected FY20
General Fund (101)					
Revenues	$51,239,208	$50,029,123	$50,638,175	$51,160,184	$51,762,300
Expenses	$51,239,208	$50,029,123	$50,638,175	$51,160,184	$51,762,300
Revenues - Expenses Gap	$0	$0	$0	$0	$0
Committed for Deficit Reserve	$1,000,000	$1,000,000	$1,000,000	$1,000,000	$1,000,000
Projected Fund Balance June 30, 2015*	$0				
Projected Fund Balance FY17 - FY20		$1,000,000	$2,000,000	$3,000,000	$4,000,000
Ending Fund Balance	$1,000,000	$2,000,000	$3,000,000	$4,000,000	$5,000,000
Reserves as % of Revenues	2%	4%	6%	8%	10%

* Accumulated GF Deficit per audit, June 30, 2014	($8,961,427)
$1,000,000 revenue surplus budgeted in GF for FY15 for deficit elimination	$1,000,000
$800,000 budgeted in Public Improvement Fund for FY15 to reduce GF deficit per previous EM order	$800,000
Additional projected GF surplus for FY15 which will reduce deficit	$161,427
	($7,000,000)
Loan	$7,000,000
	$0

Here's one that showcases the local clergy. I presume most of these folks will be with us tomorrow?
http://www.mlive.com/news/flint/index.ssf/2015/06/judge_says_flint_doesnt_have_t_1.html#incart_related_stories

Just had a pre-meet with Stephen Busch, our drinking water expert who oversees the staff regulating Flint. He's planning to bring some information on the history of the water / lead issue in Flint, as well as some data about the most recent statutorily required testing. He'll be able to discuss the state program (which implements the federal statute), what we've been doing by way of testing, what we're finding, and what residents should do if they have concerns.

Anything else anyone wants us to be prepared for?
b

Flint pastors tell residents to get their water tested

Some area pastors held a rally Sunday to urge residents to get their tap water tested

Check out this story on detroitnews.com: http://detne.ws/1SAH1K6

Weekly Conference Call Notes – August 3, 2015

Allen Park –July 24 –Mayor Matakas, M. Kibby, B. Cady, R. Byrne, E. Cline, P. Dostine, C. Porubsky

- **Weekly Priorities/Misc:**
  - Engineering bids are in. Wade Trim is the City's current engineer.
  - Master Plan bids are due July 28.
  - Five-year financial plan: the City expects to have hard copies available at the next RTAB meeting; Eric asked them to also provide a brief verbal summary.
  - RFP for sewer project due October 5.
  - Master Plan RFP due in August.
  - Salary survey is coming up.
  - Bids are open for engineer.
- **Police Contract Negotiations:**
  - Tentative agreement reached, but have not ratified, lawyers will work on again in August.
  - PPOAM reached an agreement today.
- **FDCVT:**
  - The City was informed that $5M would be available in grant money soon; applications should be available in late August or early September.
- **Retiree Healthcare:**
  - If the City does not switch from BCBS, their costs will increase by 23%, or $644K on October 1. Bob needs the okay from Treasury to proceed with Humana or the deal may not happen.
  - BCBS discovered an $834K arrearage.
  - If the deal with Humana goes through, 192/220 65+ retirees would be switched to that plan.
- **Prescription Drug Bid:**
  - Treasury has received the information, but hasn't had a chance to review yet.
- **Bond Issue:**
  - This should be completed next week, by Thursday or Friday.
  - The City has due diligence questions to turn in by Monday, the lender will have the same by Wednesday.
- **Settlement Conference:**
  - Did not go well; mediation was ordered by the Judge and will take place July 31.
  - The League is willing to pay $75K; the City is hoping for more, however it has not been authorized yet. Settlement is expected to come in around $375K.
- **City Hall Elevators & Status:**
  - The waterproofing work is complete. There is still a little water, but the crew says that it's okay. Walls are going up now, but the inspection was moved back another week.
  - Handicap rails are open, waiting for railing on stairs, cameras have been installed.
- **Boji/City Hall:**

- Eric drafting an amendment to the Order concerning this sale in lieu of recent interest in property.

- **Roof at Community Center:**
  - Only one wing, approximately $30K job.
  - City is soliciting bids, will hopefully go before RTAB in August.

Benton Harbor –July 16 – D. Watson, R. Byrne, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - At the 07/15/15 Legislative Committee meeting it was discussed that the City will send a resolution to the State saying that the State owes the City for the actions of the former EM and the costs of the lawsuits.
  - Commissioners have been tabling items because they know that the City Manager and State can't force them to act on them.
    - Rob will review the Final Order for a possible amendment to allow the City Manager to act if the Commission refuses to do so.
  - The Commission is concerned about drones.
  - Neighborhood development is picking up with a number of new homes being built.
  - Darwin will remind the Commissioners that the State is looking to set up meetings.
- **Dept. of Labor Settlement:**
  - $19K to settle – will be on the agenda at Monday's meeting.
- **Lange, O'Brien, Unruh Mediation (07-17-15):**
  - Mediation in Grand Rapids – Darwin, Mayor, Mayor Pro-Temp, and Commissioner Muhammad to attend.
  - Outcome will be discussed at Monday's City Commission meeting.
  - Commissioner Muhammad was requested to attend in hopes he will see the need to settle.
  - Will update OFR next week.
  - Insurance – aggregate coverage for back wages up to $50K.
- **Update on Vacant Positions:**
  - Darwin is looking for head hunting firms to help the City find a finance director, assessor, and water department superintendent.
  - He should have a list of possible firms with costs the first part of next week.
- **Status of FDCVT Grants:**
  - Advertisements for water-main projects have been sent out.
  - Hydrant RFPs have been sent out.
  - City appraisal is being developed and a RFP will be sent out.
  - List of blighted structures is completed.
  - $50K for sidewalks doesn't go very far, looking into which sidewalks to do.
  - Randy stated another round of funding ($5M) will open up in August or September.

Ecorse – June 30 – W. O'Neal, R. Byrne, P. Dostine, D. Van de Grift, C. Porubsky

- **Priorities for the week:**
  - Working on five-year budget
  - FBI and AG were there yesterday, Wayne is not at liberty to discuss why they were there.
- **Fire consolidation**
  - No meeting set; Mayor was meeting with Howard Shipman after seeing Wayne last week, but has not heard from since.
- **Five-Year Budget:**
  - Would like to finish this week. Wayne promised he will have it to OFR by next week.
- **PPT/Discussion with Howard Heideman:**
  - John Pepperman contacted Mr. Heideman and was told monies for FY15-16 would be available in the beginning of FY16-17.
- **Sewer Project/Flooding Issues**
  - No calls, positive project
- **Miscellaneous Items:**
  - Loss of Packaging Specialties Inc.: The MEDC gave money to relocate to Romulus, approximately 50 jobs – company wanted to expand, but City would not entertain. Wayne stated the company backs up to DNR property and the City would not be able to sell even if they wanted to. He was not aware that they had decided to relocate.
  - Wayne and the Mayor met with Treasury last Friday, said meeting went well. Wayne stated Tidwell is the best mayor he's worked with. Stated they need to get through the election; Miller is also running, Wayne classified Miller as the "Old Guard." Thirteen people are running for Council.

Flint – July 22 – Mayor D. Walling, N. Henderson, J. Freeman, R. Byrne, P. Dostine, E. Cline, C. Porubsky

- **Priorities/Miscellaneous:**
  - KWA filter installation continues. 6/12 will be completed by next week, the remaining will start in August.
  - Moving forward with leak detection.
  - Usage from plant has decreased, will be able to shut part down soon.
  - The City is getting complaints of water discoloration.
  - No change with the U of M issue.
  - Megan Hunter, Director of Community & Economic Development, is leaving the end of August.
  - The City was giving information on the upcoming FDCVT grant money that will be available.
  - No update on OPEB lawsuit.
  - The Mayor will participate in a blight roundtable update next week with MSHDA and MEDC. He invited Treasury to attend and will forward the information.
  - According to a call from John Blanchard; on August 4, GM will announce an $800M investment.
- **Re-assessment:**
  - Received RFP from Tax Commission.
  - Moving forward, looking for funding.

- **Updates from the City Charter Commission:**
  - Commission meets every week, and has subcommittee meetings weekly as well, 3-4 meetings per week.
  - Budget request -- $59,000 allocated, asking for double. Flint cannot afford the new request. Natasha suggested Commission approach foundations, Mott Foundation may help with funding, Natasha will keep OFR updated.
  - The Commission is operating like a City Council. Natasha thinks they would benefit from a more relaxed set up, and possibly a different attorney that will provide more guidance.
- **Transportation Millage MTA:**
  - Approved; the renewal is for five years.
- **Coalition for Clean Water Lawsuit in Circuit Court:**
  - A Federal Judge dismissed request for injunctive relief, former City Attorney Young resubmitted suit (30 pages of allegations).Mayor Walling and Natasha are both named in the suit. (Nothing new to report this week).
- **Primary Election:**
  - Will be held in a couple weeks.
  - It was noted that the absentee ballot count was lower than anticipated; approximately 200-250 received.

Hamtramck – July 30 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift

- **Absentee Ballots:**
  - There is reason to believe that a portion of absentee ballots received for the upcoming election are fraudulent. Hundreds of ballots have been returned, many with similar-looking signatures. The Hamtramck Police are currently involved; Katrina may also call the FBI.
- **Sewer:**
  - Katrina and the Finance Director spoke with S&P regarding the bond ratings for the sewer project. Their response was "not positive", but another discussion is scheduled for August 11. If worse comes to worse, the City may have to pledge its general revenue sharing.
- **Police Study Update/Meeting with the Wayne County Sheriff:**
  - Katrina recently met with the Wayne County Sheriff and would like to negotiate that they take over the intake and processing of Hamtramck prisoners. Currently, higher-ranking City police are performing these tasks; Katrina would rather have them patrolling the streets.
  - As the City pays three different taxes to the County, including the jail millage; Katrina feels that the Sheriff's Office should be responsible for this or reimburse the City for their cost.
  - A meeting is scheduled with the Sheriff and Wayne County Executive to further discuss this matter. Katrina stated that the Sheriff is sympathetic to her concerns.
- **Reassessment of Parcels:**
  - The City Assessor hired a contractor to reassess the City's residential and commercial properties. The project is moving along well.
- **Meetings with Councilmembers:**
  - Katrina will schedule meetings with Randy and Eric.

Inkster – May 28 – M. Stuhldreher, R. Byrne

- Interviews for the Police Chief position are scheduled for June 11. The City has a travel and lodging line item that will pay the travel and expenses of the two out-of-town candidates.
- Wayne County has contacted Mark regarding the City's outstanding sewer debt ($4.9M).
- The FDCVT grant projects are moving forward toward completion.
- A manufacturer from Madison Heights will be purchasing a building in Inkster that will bring up to 250 jobs over the next five years.
- Mark intends to issue an order on June 1 granting additional authority to approve contract and expenditures.

Lincoln Park – July 29 – B. Coulter, P. Dostine, D. Van de Grift

- **FAC & Wayne County Future Road Projects:**
  - Brad and the DPW Director will begin attending these meetings.
- **New City Manager:**
  - Mr. Coppler will start October 1. Brad has started forwarding informational emails to begin the acclimation process.
- **Five-Year Plan/90-Day Plan:**
  - Both will be submitted soon; the five-year is nearly complete.
  - Projected fund balance this year is $100K, $500K-$700K for next year, and $400K-$500K the year after.
  - If the projected fund balances don't materialize, there are areas that can be modified to reduce expenses. The fire contract allows for modification, first responders could be eliminated, FTEs could be reduced from 18, police shifts could be shortened, and could begin charging for HazMat cleanups.
  - Healthcare costs were decreased by $600K this year.
  - If pension payments cannot be made, a judgement levy should be considered.
- **Order Concerning the New City Manager:**
  - Brad will add language to the Final Order detailing the City Manager's authority.
- **Rental & Vacant Property Ordinances:**
  - Two ordinances, will help to control/monitor the number of rental/vacant properties in the City; this will hopefully help stabilize and perhaps increase property values.
  - It is estimated that between 6-15% of properties in the City are currently vacant.
- **TJ Adams Final Invoice:**
  - The final invoice for the City Manager search will be forwarded to Treasury.
- **Gabriel, Roeder, Smith & Co:**
  - The City is considering filing for the full amount of pension underfunding, $90M.
  - Legal fees would range from $75K-$100K.
  - May or may not be a good risk to take.

Pontiac – July 31 – Mayor Waterman, J. Sobota, N. Nazarko, E. Cline, P. Dostine, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - Council is no longer on strike; meeting went quick.
  - Law Committee is working on giving early retirement to the "group of 69" – which is now up to 300 individuals.
  - OPEB Litigation – Steve Hitchcock is to meet with the opposing attorney so see where they are in their proposal.
  - The City will hold a department head retreat next Friday afternoon.
  - The Mayor has not posted for the two Community Development positions as of yet. Wishes to go back to Council.
  - The City is working on their two-year rolling budget.
  - The City is advertising on MML and their own website for the Income Tax Administrator position, but has not received any applications as of yet.
- **Deputy Mayor Position**:
  - Will be interviewing candidates for Dep. Mayor next week. Would like to bring two Community Development individuals and the Dep. Mayor candidate to Council and RTAB together.
  - The Mayor is unsure of the timing of these hires. Likely a minimum of 60-90 days to hire.
  - Would like to hire local candidate – only one individual for Dep. Mayor is local.
- **Phoenix Center**:
  - The Mayor met with John Clark yesterday to discuss what the judgment meant.
  - Manager of the Ottawa Towers purchased 8 of the vacant Pontiac schools building.
  - The center and the schools will be discussed at the next economic development meeting.
- **In-House DPW:**
  - No business plan has been started – looking to see what the RTAB thinks.
  - The City was reminded that the RTAB is reactionary not proactive.

Royal Oak Township – July 27 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week/Miscellaneous Items:**
  - Set up meetings for this week or next with potential developers.
  - Code enforcement officers currently have dealership in court over taxes – Donna thinks the best scenario would be for someone to buy both the dealership and motel next to it and demolish the motel.
  - Donna: Finish F&O Plan.
  - Robert: Spoke with Finance on Thursday, need a cash flow analysis for the remainder of the year and to create an amended budget.
  - Current on all bills with the exception of one.
  - Revenue sharing is anticipated to be the only income, but Robert thinks there is enough money to make it thru the year.
  - Randy reminded the Twp. that a monthly financial report is required.
  - General fund renewal is on the ballot August 4; Donna and Robert would like to send a flyer out. Randy cautioned them on the wording
- **Audit:**
  - Completed; Donna said that it was better than last years' and didn't highlight many problems.

- Robert stated that one of the things the audit noted was that an inventory needed to be completed.
- Donna wanted to know if the Board had to approve the audit – Randy said to ask Mr. Wilkerson.

- **Police Update**
  - Donna will know soon after August 4 (election) more regarding Hazel Park.
  - Oak Park is not interested; very short meeting where annexation was suggested.
  - Ferndale: Over $1M, have not talked to.
  - Deadline is August 31; if not completed money will need to be returned.
- **Street Lighting:**
  - Completed last Friday, grant should close this week.
  - A rebate of $9700 is anticipated.
  - Bills should start being lower in September; the entire $10K budgeted for these may not be needed.

Subject: RE: Director's Office Assignment -- Flint - need update asap

I apologize for the delay in responding more specifically to this assignment, it took some time to review our Childhood Lead Poisoning Prevention program data to see if it might contribute to the understanding of the situation in Flint with their water supply. Here is what we found:

We looked at lead testing results for May 2014-April 2015, which is the 12 month time frame just after Flint started drawing their water from the river (water source changed in April 2014).

We compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched. Per the attached charts –

- Lead testing rates remained about the same from year to year (chart on the right).
- There was a spike in elevated blood lead tests from July-September 2014 (chart on the left, gold line).

• However that pattern was not terribly different from what we saw in the previous three years, especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).
• We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspect that the summer data spike may be related to this effect.
• If the home water supply lines and/or river water were contributing to elevated blood lead tests, we expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015.

So upon review, we don't believe our data demonstrates an increase in lead poisoning rates that might be attributable to the change in water source for Flint. We recognize that lead exposure via the water is only a small piece of what may be happening for families in Flint, however, we hope the information is helpful.

Subject: RE: Updated Memo on Water Coalition Questions - July 29

I think this information is very helpful. It will not answer the main question about the quality of the water (DEQ is working on that through Brad I believe), and the color and smell of the present water, but it does get us to the answers to the less subjective issues. Frankly, the only way the issues will be totally resolved is when the KWA comes on line and the water is perceived to be cleaner and healthier.
I am somewhat surprised that the leadership in Flint has not responded better to the community questions, which don't seem unreasonable at all. Seems like Harvey has a better network into some of the neighborhoods than the city does. The KWA PR department definitely needs to do some outreach or they're headed down the same road as DWSD. Do you know if they go out on a regular basis to the community and talk about the rates, costs, etc.?

FROM: Eric Cline, Department Manager; Office of Fiscal Responsibility

SUBJECT: Questions Regarding City of Flint Water System

DATE: July 28, 2015

At a July 23, 2015 meeting, Deputy Treasurer Workman posed several questions regarding the City of Flint's water system. This memo is a response to those questions.

The annual cost to the City of Flint to reconnect to the DWSD system

In a March 3, 2015 memo to Deputy Treasurer Workman, Emergency Manager Ambrose noted that he had been informed by DWSD that such a reconnection would immediately levy a fixed cost on the City of $10.1-million per year.

Actual water purchases would be in addition to the fixed cost fee and would be dependent upon actual usage, but the annual cost was estimated to be as high as $1-million/month; making the entire total of a one year connection back to DWSD as high as $22-million. This cost would be reduced to approximately $19-million/year once the City's $3-million annual expense of operating the water system itself was offset.

These calculations were outlined in a March 2015 memo from the Emergency Manager to Deputy Treasurer Workman and update cost projections provided in a February 11, 2015 memo to Chief Deputy Treasurer Tom Saxton.

The Emergency Manager also stated his concern that for the City to be able to pay these costs that water rates charged to Flint residents would need to be increased by a minimum of 30%. Water rate increases between 2010 and 2015 are illustrated in the table attached.

In addition, DWSD was requiring that the City of Flint negotiate a 30-year contract for the provision of back-up services.

The City of Flint's degree of participation in the management of the KWA system

Mayor Dayne Walling is the City's official representative to the Karegnondi Water Authority (KWA). The participation of the Mayor as the official representative for the City of Flint is established in the KWA Articles of Incorporation. Mayor Walling is the current Chair of the Board of the KWA Board of Directors.

Continued use of Flint River water after the City is connected to the KWA system

The City Administrator has confirmed that once the City is fully connected to the KWA system they will no longer continue to use Flint River water.

The Flint River, however, will be the City's primary back-up water source in the event that a major disruption in the KWA system temporarily prevents the City from receiving water.

The process used to hire Veolia

Veolia responded on January 29, 2015, to a Request for Proposal issued by the City of Flint. Emergency Manager Ambrose made the final decision to retain Veolia.

The importance of hydrant flushing

Fire hydrant flushing is an important part of distribution system maintenance. It is useful in determining flow conditions in water mains.

According to information from the American Water Works Association (AWWA), there are two types of hydrant flushing utilized. The most comprehensive method is fire-flow testing.

Fire-flow testing requires hydrants to be opened, flushed, pressure and flow data to be collected and the potential fire flow at a particular point in a water main to be determined.

Hydrant flushing permits any debris to be cleared from a water main. They process of collecting fire flow data allows the determination of water pressure and flow capabilities for fighting fires at any location within a distribution system. It can also help determine the general condition of a system by detecting reduced water flows in a given area.

Status of the GAC carbon filter installation

Six of the twelve filters will be operational by no later than the first week of August.

Activation of the filters is expected to immediately drop the levels of TTHM within the system.

The remaining six filters are projected to be installed and operational by the end of August.

Status of the DuPont Street Water Main Replacement

After an internal review, the City made the decision to rebid this project.

There were multiple reasons for this decision, which included interference with current road projects, the determination that project bids were too high, and bidding timelines which were not favorable to secure quality bids or contractors.

This project will be rebid by the City later this fiscal year.

If you have any questions or need additional information on this topic, let me know. Thank you.

To: Dempkowski, Angela (Treasury)
Subject: Additional Memo updates

Angela:

Here are a few more updates:

Flint

The city is implementing the Veolia recommended improvements to its water system, including water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The city has installed a $1.5M granulated active-charcoal filter system to improve water quality. All of the filters were completely installed in early August.

Allen Park

On May 15, 2015, an updated five year budget projection from the city was received. The RTAB approved this item at their August 5, 2015 meeting.

A retired city employee has brought a breach of contract and age discrimination lawsuit against the city. The city's insurance policy covers only a small portion of the alleged damages. A Settlement Conference was held between all parties on July 20, 2015 but no resolution to this case has been announced by the city. Treasury continues to monitor this case.

Weekly Meeting with Suzanne—August 10, 2015

- **Staff**—_Restructuring Specialist 13, Analyst 9 interview update? The way forward.
- **Allen Park**—issues include information for the Fire Contract discussion, Tender Offer this week, in three weeks we will know the result. City Administrator interviews this week. We are looking for two additional RTAB members. The EM Order on City Hall property-a draft revised Order has been prepared by Eric. Gatos vs Allen Park $1.2M to $1.8M, Beaton vs the City.
- **Benton Harbor**-issues include lawsuit with former Public Safety Director and two former employees. Very good Annual evaluation discussion with Darwin and the Mayor. Meeting with three Council members on Tuesday. Filling of key positions and election? I will suggest AL Mooney as a possible temporary finance director.
- **Ecorse** -The five- year budget questions for city administrator. Discussion last week with River Rouge on merging fire service did not go well. We have a conference call with Wayne on Tuesday. RFP for legal services. We need at least one to two names for RTAB members.
- **Flint** – issues include meeting with Natasha on Thursday in Flint, the Community and Economic Development Director is leaving. Lawsuit on water rates may cause the city to rebate $51M and repay $15.7M, water system issues are getting resolved, and tax assessment problems.
- **Hamtramck**— issues include the status of pension consulting work, police study a new RFP needs to be sent out, meeting with City Council in August. I have two names for possible RTAB members.
- **Highland Park**— an RFP for a collection company has been sent. The amnesty program has expired. We have received another high school cost estimate for preparation of plans and specs, demolition, and project management. It is much cheaper than original estimate. State Office space in the City. Storm sewer lawsuit filed against MDOT. The second E-Loan closing is less than two months away. We are working on requirements for the loan agreement. Cathy's meeting with Bob Daddow. I have asked Cathy for a status report on all issues. Initial purchase of new water meters for $300K.
- **Lincoln Park**— Matt Coppler will start in late September, his contract was approved by the Treasurer. The 345 request will hopefully be on the November ballot and Charter amendments may have to wait. Brad has a plan for the last five months. Police Chief has retired.
- **Inkster**- issues include Chief Riley of Selma Alabama accepted the position and begins work on Monday. Richard Marsh has accepted a buyout and will now be a special advisor to the City agreement has been reached to place a judgement levy on the December tax roll to repay Wayne County for sewer charges, and Order 5 implementation. Patrick will participate in the assistance to Inkster on housing and economic development along with MSHDA and the MEDC...
- **Pontiac**— issues include interview of candidates by the City Council. Phoenix Center discussions, Exit plan is being prepared. City DPW issue.
- **River Rouge**—issues include five year budget and discussion on exit from Consent Agreement, tax base loss and assessment problems. Contracts have been approved now we need to see the savings. The Mayor believes it may reach up to 1M on health insurance.

City of Flint
Water Quality Update
Wednesday August 12th 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Work commencing

The vendor "echologics" has mobilized in the City and is prepping to begin working this week.

Next steps: Work performance.

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Six filters in use

Six of the twelve filters are completely installed and are now in use.

Internal testing has confirmed a significant drop in the TTHM level leaving the plant, levels were trending between 50 – 60 and have dropped to 20.

Installation has started on the remaining six filters.

All twelve filters will be available for use in advance of our next quarterly testing period which is next week.

Next steps: Install last six filters.

WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

Construction continues, the weather has cooperated and the work is on schedule.

Next steps: Continuation of construction work.

Water Meter Installation

What: $5,000,000 contract to purchase and install up to 18,000 water meters.

Status: In progress

The vendor has established a good routine and has completed the installation of ~300 meters each week.

Next steps: Track the progress and maintain information flow.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: August 14, 2015

TO: Rick Snyder, Governor

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: Status of Financially Distressed Local Governments

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments

- A four-month plan has been developed, listing the priorities to be accomplished for the remainder of EM Coulter's term and beyond.
- The city is contemplating a lawsuit against the pension funds' actuary.
- PA 345 pension system millage of six mills will be on the November 2015 ballot. This is the second time PA 345 is going before Lincoln Park voters.
- The city ended FY 15 with an estimated $100K General Fund operating surplus. The city has a General Fund deficit from previous years. EM Coulter will be submitting a Deficit Elimination Plan to Treasury.
- An actuarial analysis published on May 20, 2015, shows a further decline in pension funding down to 23%. More conservative actuarial assumptions were used in this report.
- EM Coulter has modified retiree collective bargaining agreements to reduce healthcare benefits. These changes were implemented in July 2015 and will reduce annual retiree healthcare costs from $4.1M to $600K.
- On August 10, 2015, the Lincoln Park Retiree Associations filed a lawsuit against the State of Michigan, Department of Treasury, and the City of Lincoln Park regarding the reduction of city retiree healthcare.
- Mathew Coppler, City Manager of Enfield, Connecticut, accepted the position of City Manager. His contract has been finalized and he will begin work October 1, 2015.

Lincoln Park (continued)

Significant Actions/Issues

- FY 15 ended with a General Fund accumulated deficit of $636K, out of a total budget of $21M. This is a significant increase from the FY 13 accumulated deficit of $89K. Increases were in Public Safety - $1.1M, Public Works - $700K, and Culture and Recreation - $600K.
- Last May voters rejected the Firefighters and Police Officers Retirement Act proposal by a 53% to 47% margin. Had it been approved, an additional $3M annually would have helped fund fire/police pension and healthcare costs. EM Coulter is pursuing an alternative plan under provisions of PA 345 of 1927 to create a Board of Trustees to manage and operate the retirement system. A request for up to six mills per year to fund public safety pensions will be placed on the November ballot.

Issues to Resolve before EM Exit

- Increase and stabilize pension funding levels.
- Permanently eliminate structural deficit for future fiscal years.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The Detroit City Council reconsidered the Detroit Water and Sewerage Department's proposed FY 16 water and sewer rate increase and approved it on July 21, 2015. This action eliminated a potential budget deficit, which was a concern raised by the State Treasurer in his July 2, 2015 letter to the city.
- The city issued its FY 14 Comprehensive Annual Financial Report (CAFR) on June 30, 2015 (following two three-month extensions granted by the State Treasurer). The city continued to have a deficit for FY 14 as that year closed prior to the bankruptcy confirmation in December 2014. The city expects to report a surplus in its FY 15 CAFR, which is currently underway and expected to be completed no later than March 2016.
- At the FRC's July 27, 2015 meeting, the city indicated it would reduce its bankruptcy exit financing debt by $30M (from $275M to $245M) prior to its scheduled syndication in mid-August. The State Treasurer and FRC Executive Director are participating in the city's rating agency and investor presentations to discuss the State's oversight role.
- On July 29 and July 30, 2015, the city received its first post-bankruptcy credit ratings from S&P and Moody's. Only S&P rated the city's exit financing, for which it received an investment-grade "A" rating, with a stable outlook. The exit financing is secured by a statutory lien on city income tax revenue. Both rating agencies provided the city with updated underlying General Obligation (GO) ratings. S&P assigned a "B" rating, with a stable outlook. Moody's upgraded the city from "B3" to "B2," with a positive outlook.

Detroit (continued)

Significant Action/Issues

- The first statutorily required biannual report on Detroit was filed by the FRC on May 28, 2015. The report detailed the FRC's activities and formal requirements since its appointment in November 2014. The FRC will file its second biannual report in December 2015.
- The city submitted its Four-Year Financial and Operating Plan (Plan) to the FRC in March. After reviewing the Plan and determining it was based on sound assumptions and met all statutory requirements, the FRC granted approval on April 20, 2015. The city's Plan encompassed the second year (FY 16) of Emergency Manager Orr's two-year budget and used this as its base year with no changes, plus three years (FY 17, FY 18, and FY 19).
- The City of Detroit Assessor's Office is currently conducting a multi-year project to reappraise all properties in Detroit, after the State Tax Commission found significant problems with property valuations. The reappraisal is scheduled to be completed in 2017.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014

RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- The City Council has approved a new, four-year collective bargaining agreement with the police bargaining unit. Treasury reviewed the tentative agreements and had a number of concerns with the terms including the identification of over $237K in increased costs in Year 1. Despite these concerns, the RTAB voted 2 to 1 to ratify the approval of these collective bargaining agreements.
- The city wishes to seek bids for retiree health insurance coverage after being informed by Blue Cross that a 23% rate increase of $644K will become effective October 1, 2015. The RTAB has approved this request and Treasury is working with the city to identify potential legal ramifications in the lawsuit with retirees if coverage is changed to a new provider.
- The city was informed by Blue Cross that a billing oversight has resulted in the city underpaying for insurance coverage for retirees in the amount of $853K.
- The city received a $1.2M Staffing for Adequate Fire and Emergency Response Grant, which will allow them to retain six firefighters over the next two years.
- On May 15, 2015, an updated five-year budget projection from the city was received. The RTAB approved this item on August 5, 2015.
- The RTAB approved the hiring of a professional search firm to assist with finding qualified City Administrator candidates. Treasury is participating in the selection process. The City Council will be interviewing the finalists for the position in August 2015.
- Completion of the bond tender process is projected for August 2015. The 2015 Refunding Bonds will be rated Single A, due to the city's pledge of distributable state aid.
- Standard & Poor's released its rating of the city on June 24, 2015, in anticipation of the bond tender release. The city's long-term rating for the existing bonds was downgraded with a negative outlook. The downgrade of these bonds is similar to the rating by Standard and Poor's on the City of Detroit's DWSD tender refinancing.

Allen Park (continued)

Recent Developments (continued)

- A retired city employee has brought a breach of contract and age discrimination lawsuit against the city. The city's insurance policy covers only a small portion of the alleged damages. A Settlement Conference was held between all parties on July 20, 2015, but no resolution was achieved. The court has ordered mediation proceedings.
- The city's current budget is balanced.

Significant Actions/Issues

- The city completed its move to a new temporary City Hall on June 8, 2015.
- The City Council adopted the FY 16 Budget on May 26, 2015, and the RTAB approved this action on June 3, 2015.
- Inquiries are being made to add one member to the RTAB.
- Litigation was filed by retirees challenging the EM's authority to reduce other post-employment benefit (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.

Benton Harbor

RTAB Appointed: March 10, 2014

RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments

- On August 3, 2015, the City Commission adopted a resolution requesting a hearing with the Department of Treasury to discuss financial assistance for decisions made during the tenure of emergency managers that resulted in legal fees and settlement costs.
- TAt-Large Commissioner Mary Donald passed away on June 12, 2015. On August 10, 2015, the City Commission appointed Edward Isom to finish her unexpired term, which ends December 31, 2015. On August 11, 2015, the RTAB approved the appointment.
- The first annual evaluation from the RTAB was conducted on July 29, 2015. It will be sent to the RTAB for review.
- The City Commission adopted the FY 16 Budget on June 15, 2015. The RTAB approved this action on June 22, 2015.

Significant Actions/Issues

- FY 14 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.
- Former Benton Harbor Public Safety Director Roger Lange brought a Whistleblower and Elliot Larson Civil Rights case against the City of Benton Harbor and former EM Tony Saunders. Mediation took place on July 17, 2015, with Jon March of Miller Johnson serving as the mediator. No settlement was reached.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- The city has completed a balanced five-year financial plan. One challenge includes the outsourcing of fire services which must be realized soon to keep the financial plan solvent. This is the first time the city has proposed a viable path out of receivership.
- The degree of State oversight may be reduced if the city can convincingly show a commitment to the cost saving measures they have promised.
- The RTAB approved the city's choice for city controller at the August meeting. Tim Sadowski will commence work later this month.
- A second annual evaluation from the RTAB will commence in the coming months.

Significant Actions/Issues
- The city continues to have difficulty attracting qualified candidates and filling higher level administrative positions.
- Municipal Employee's Retiree System pension contributions are anticipated to increase from $1.8M in FY 15 to $2.4M in FY 16 due to accelerated funding for closed plans.
- On May 12, 2015, the RTAB approved a narrowly balanced FY 16 Budget. To balance the budget, the city increased an existing PA 33 levy by approximately 15 mills.

Flint
RTAB Appointed: April 29, 2015
RTAB Members: Frederick Headen, Brian Larkin, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments
- At a special meeting held on August 11, 2015, the City Council approved the transfer of $323K from the Fire Department to the Police Department to hire five additional patrol officers. The RTAB approved this transfer on August 12, 2015.
- On August 7, 2015, Genesee County Circuit Court invalidated the city's 35 percent water and sewer rate increases which were reverted back to 2011 rates. This decision could potentially could cost the City's General Fund up to $50M. The city expects to receive a final order from the Circuit Court on August 17, 2015, and is prepared to file an emergency appeal to the Court of Appeals. The City Administrator has instituted hiring and spending freezes across all departments, and Treasury is working with the city to identify the impact from this decision.
- In addition, on August 7, 2015, Genesee County Circuit Judge Archie Hayman issued an emergency injunction that prevents the city from further charging water service fees, instituted on all water bills to recoup funds used to settle a 2007 lawsuit. The ruling requires the city to repay $15.7M from the General Fund to the Water Fund. The ruling also prohibits the city from disconnecting water service for late payment and prevents the city from placing liens on property for past due water bills. The city plans to appeal this decision.

Flint (continued)

Recent Developments (continued)

- The City Council approved an amendment to the EM adopted FY 15 Budget on June 29, 2015. The city ended FY 15 with an estimated $495K General Fund balance. The RTAB denied the budget amendment at their July 15, 2015 meeting because the City Council also approved the use of $200K of the city's $495K General Fund balance for grass and weed abatement throughout the city. The City Council reconsidered and adopted the budget amendments, which were approved by the RTAB on August 12, 2015. The City Administrator has also developed a plan to allocate additional resources toward grass and weed abatement.
- On July 15, 2015, the RTAB approved the issuance of an Obsolete Property Rehabilitation Act (OPRA) certificate for a downtown property. The City Council had initially rejected issuance of the OPRA certificate but an EM Order permits the RTAB to make the final determination on economic development projects.
- On July 15, 2015, the RTAB also approved ballot language for the renewal of the Regional Flint Mass Transportation Authority millage. The renewal is proposed for five years at the current 0.6 mills per year. This proposal will appear on the November 2015 ballot.
- U.S. District Judge Stephen J. Murphy denied a motion for a preliminary injunction on June 23, 2015, to force the city to purchase water from the City of Detroit. Another lawsuit to force the city to purchase water from the City of Detroit was filed in Genesee County Circuit Court on July 16, 2015.
- The city's Economic and Community Development Director is leaving in August 2015. Current staffing vacancies also include the City Treasurer and the Human Resources Director.
- As a result of a recent review, the State Tax Commission notified the city that it must maintain adequate assessment records in compliance with statute and State Tax Commission Rules, and must implement any corrective actions necessary. In addition, the city shall implement a full reassessment within a time frame agreed upon with the State Tax Commission. The city is preparing to issue an RFP for a reappraisal.
- The city continues to inform residents that it is in violation of the Clean Water Standards Act. Monthly testing is ongoing.
- The city is implementing Veolia recommended improvements to its water system, including water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The city installed a $1.5M granulated active-charcoal filter to improve water quality. All twelve filters are completely installed and will be in use by August 17, 2015.
- The city hired Echologics at a cost of $895,850 to perform a leak detection study. This project commenced on August 10, 2015.
- The KWA pipeline is expected to be completed in June 2016. The two pump stations are 75% complete and the intake should be completed in August 2015.

Flint (continued)

Significant Actions/Issues

- The City Administrator has issued a Corrective Action Plan to the City Clerk to correct a number of operational deficiencies that resulted in the wrong election submission dates being provided to local candidates.
- On June 12, 2015, the Michigan Court of Appeals reversed a decision by Genesee County Circuit Judge Richard Yuille, who dismissed a claim that the city violated its own ordinances when the EM raised water and sewer rates in 2011.
- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M annual expense.

Hamtramck

RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments

- The city is undertaking a $7M sewer infrastructure improvement project which is eligible for State Revolving Fund monies. The project will reduce storm water inflow into the sanitary sewers.
- The City is pursuing a third party police study which will help administrators reduce the overtime rates.
- A contractor is reassessing both residential and commercial properties.

Significant Actions/Issues

- The City Council adopted the FY 16 Budget on June 17, 2015. The RTAB approved this action on June 23, 2015. The city has also developed a long-term capital improvement plan.
- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY 15 to $4.3M by FY 19. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. The increases were included in the EM two-year budget.

Pontiac

RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- On July 18, 2015, the City Council approved the recommendation of the Local Officer Compensation Commission to increase Council's compensation from $7K to $15K. The RTAB approved this action on July 27, 2015.
- Interviews for the Deputy Mayor position are being held in August 2015.
- The city lost the Supreme Court ruling on efforts to demolish the Phoenix Center. Treasury is working with the city to move forward with the sale to a private operator which frees up $2M in demolition funds.

Pontiac (continued)

Significant Actions/Issues

- On June 18, 2015, the City Council adopted the proposed FY 16 Budget and 2015 tax rates. The RTAB held a special meeting on June 26, 2015, to approve the proposed FY 16 Budget and 2015 tax rates.
- On May 21, 2015, the Securities and Exchange Commission (SEC) issued an Order to initiate proceedings against Gray & Company, the city's pension investment advisor. The proceedings involve Gray & Company's dealings with investments made by several Georgia pension plans in the Gray & Company Alternative Fund II LP, a proprietary private equity fund. The Pension Board met with Mr. Gray to discuss the SEC proceedings, its effects on the Pontiac GERS portfolio, and how much is invested with Gray's firm. The Pension Board has withdrawn its pension assets from Gray & Company controlled funds.
- The city lost a decision at the Michigan Court of Appeals which may make it liable for a $3.5M payment to the Police and Fire VEBA. The city requested reconsideration but was denied. On May 20, 2015, the RTAB approved the city's request to appeal to the Michigan Supreme Court.
- Per the city's FY 14 audit, the general fund's accumulated fund balance is approximately $5M out of a total budget of $27M.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit (in U.S. District Court) was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former EM Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare. Mediation is taking place under the supervision of Eugene Driker.

CONSENT AGREEMENT

Inkster

Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments

- On August 3, 2015, the Inkster City Council voted to change the employment status of City Manager Richard Marsh to Special Advisor to the city. The City Council named City Treasurer Mark Stuhldreher to the position of Interim City Manager. A search firm will conduct a national search to fill the City Manager's position.
- The City Manager with the approval of the City Treasurer, hired William Riley, Police Chief of Selma, Alabama, to the position of Police Chief. Mr. Riley's start date was August 10, 2015.
- On June 29, 2015, a tentative agreement was reached with Wayne County to place a judgment levy starting with the December 2015 tax roll, for five years, to repay the county $4.9M in past due sewer charges. The city would like to postpone the levy until 2016 and are in discussions with Wayne County.
- The city is collaborating with MSHDA and MEDC to seek new housing developments and development of several vacant commercial parcels.

Inkster (continued)

Significant Actions/Issues
- The City Council approved the FY 16 Budget on May 18, 2015.
- On April 20, 2015, the city adopted a working capital reserve policy for the Water and Sewer Fund which will provide funds for emergency situations.
- On June 29, 2015, an Order was issued requiring the City Treasurer to approve all employment matters with city officials and employees, expenditure of funds, and all contracts.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (PA 72)

Significant Actions/Issues
- A fire union collective bargaining agreement was approved in March, resulting in a reduction in healthcare costs.
- The city adopted its FY 16 Budget on May 19, 2015. The budget is balanced and has a beginning fund balance of $1,967,613. The city has prepared a proposed five-year budget that shows a deficit in FY 18 to FY 20 unless additional revenues can be found.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- On August 4, 2015, voters approved a renewal of 4.5 mills for general operations.
- The township audit was completed. The auditors recommended that the township submit a Deficit Elimination Plan for 2014, select a firm to advise the Township on financial matters and perform an inventory of assets.
- A report issued by the Rehmann Group, the township's financial consultant, noted that the township must make budget adjustments of $164,275 to its FY 15 General Fund Budget to account for expenditures exceeding revenues in FY 14. The township adopted budget amendments on May 28, 2015.
- An Order was issued on June 17, 2015, granting the Consultant broad authority to approve expenditures made by the township and ensure that obligations are being paid. The Order also gives the Consultant authority to return the $620K in reimbursed retirement assets to MERS.

Significant Actions/Issues
- The Michigan State Police continues to provide police services to the township.
- Treasury learned that the Township Supervisor was regularly authorizing overtime for employees, though overtime was not included in the FY 15 Budget and the Consent Agreement requires State Treasurer approval prior to overtime expenditures. An Order was issued May 20, 2015, requiring the Consultant to approve all requests for overtime prior to authorization.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- On August 11, 2015, a report was issued by Meadowbrook Insurance on the progress of reducing the City's healthcare costs. When successfully implemented after October 1, 2015, the $1.4M annual cost of healthcare could be reduced to $630K.
- On July 6, 2015, Wade Trim began duties to operate and maintain the water and sewer systems.
- Louis Schimmel was hired on June 29, 2015, to provide consulting services regarding water and sewer issues.
- On July 31, 2015, the water and sewer amnesty program expired. City Administrator Cathy Square stated the city will work with customers to settle their past due accounts.
- The second phase of emergency loans is tentatively scheduled to take place on September 24, 2015. It would consist of approximately $4.7M to restructure the city's three outstanding emergency loans and $11.5M to refinance outstanding debt.
- The city has purchased the first quantity of water meters at a cost of $343K.
- The city issued an RFP in July to contract-out the collection of past due water and sewer bills from residential and commercial customers.

Significant Actions/Issues

- On June 29, 2015, the City Council approved a substantial increase in water and sewer rates which will allow the city to fund water and sewer operations.
- On May 18, 2015, the City Council adopted a resolution requesting MDOT to pay for storm water drainage from the highways and freeways under MDOT's jurisdiction in the city.
- On May 18, 2015, City Council approved a consultant's recommendation for an amnesty plan for residential customers to pay arrearage amounts owed to the city. The consultant has determined that if all customers take advantage of the amnesty plan, the city could collect $2.08M. The city has extended the amnesty plan until July 31, 2015. This will allow more time for customers to pay past due accounts.
- The city's liabilities total $99.9M. Some major components are: $55.3M debt, including $20.7M owed to the DWSD, and $26.1M unfunded other post-employment benefits (OPEB).

OTHER COMMUNITIES

Wayne County

Recent Developments

- On July 21, 2015, the Review Team reported to the Governor that a financial emergency existed in the County.
- On July 22, 2015, the Governor confirmed the finding of a financial emergency in Wayne County. The County did not request a hearing on the findings as provided for in Public Act 436 of 2012, the Local Financial Stability and Choice Act.
- On August 6, 2015, the County Commissioners voted to choose the option of a consent agreement to address its financial emergency.
- On August 13, 2015, the County Board approved the Consent Agreement negotiated between the County Executive and State Treasurer.

Significant Actions/Issues

- On June 10, 2015, the county reached a settlement with retirees on healthcare. The county will no longer provide health insurance but will instead provide a stipend to retirees. This will result in a savings of $20M annually.
- On June 17, 2015, the Wayne County Executive requested a preliminary review under the Local Financial Stability and Choice Act, Public Act 436 of 2012. After notification to the county, Treasury began its preliminary review of the County's finances on June 19, 2015. A final preliminary review report was issued on June 30, 2015.
- On July 1, 2015, the Local Emergency Financial Assistance Loan Board met and found that probable financial stress exists in the county.
- The county's annual structural General Fund deficit is approximately $52M prior to any of the proposed remedial actions.
- The county's proposed restructuring is approximately $53M in General Fund savings, $25M of which comes from changes to pension and healthcare benefits for active employees and healthcare benefits for retirees. The county has not yet proposed a long-term solution to its jail problems.

Weekly Conference Call Notes – August 17, 2015

Allen Park –August 14 –B. Cady, E. Cline, P. Dostine

- **Weekly Priorities/Misc:**
  - Started construction on Park Street; grant funds are being used for this.
  - Water/sewer rate study has been completed. Rates will increase 6-7% over the next 5-6 years. The fund balance is currently around $450K; an increase is necessary to build it up.
  - The City is working on closing the FY 2015 books, doing journal entries and preparing for the annual audit.
  - New gas pumps were installed at the DPW yard.
  - Making ice at the arena.
  - Council approved policy to sell approximately 35 residential and commercial lots that have been off the tax roll for years. This will be presented at the next RTAB meeting.
- **Humana/Prescription Drug Coverage/Retiree Healthcare**
  - Disruption report for drug coverage has been completed and forwarded to Humara.
  - According to Cady, there is no difference between the BCBS and Humana policies besides a cost savings to the City.
  - A bid went out for health coverage for active employees and retirees under 65. No provider wants to bid on this. If a cheaper provider cannot be identified, the City will self-insure.
  - Currently, there are 106 active members; 97 under 65 (29 single, 37 married, 35 families).
- **TPOAM Contract**
  - Simple contract. "Union didn't ask for much, AP didn't give them much."
  - 90-95% of the cost related to the 2.5% annual raise over four years.
  - $80 for boots.
  - No FAC or pension changes.
- **Fire Contract:**
  - Two issues remain unsettled: duty-disability and the desire to have a voting member on the pension board.
  - Holiday pay and shift differential issues have been settled.
  - Cady committed to sending Treasury a final draft of the fire contact before Council approves it.
- **Gaydos Lawsuit:**
  - The plaintiff was awarded $750K and the retiree healthcare plan; whatever the level coverage is when they reach 52.
  - The City will pay $600K out of their fund balance; MML will pay the remainder.
- **Bond Tender:**
  - Launch was expected August 14 at 4:30.

Benton Harbor –July 16 – D. Watson, R. Byrne, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - At the 07/15/15 Legislative Committee meeting it was discussed that the City will send a resolution to the State saying that the State owes the City for the actions of the former EM and the costs of the lawsuits.
  - Commissioners have been tabling items because they know that the City Manager and State can't force them to act on them.
    - Rob will review the Final Order for a possible amendment to allow the City Manager to act if the Commission refuses to do so.
  - The Commission is concerned about drones.
  - Neighborhood development is picking up with a number of new homes being built.
  - Darwin will remind the Commissioners that the State is looking to set up meetings.
- **Dept. of Labor Settlement:**
  - $19K to settle – will be on the agenda at Monday's meeting.
- **Lange, O'Brien, Unruh Mediation (07-17-15):**
  - Mediation in Grand Rapids – Darwin, Mayor, Mayor Pro-Temp, and Commissioner Muhammad to attend.
  - Outcome will be discussed at Monday's City Commission meeting.
  - Commissioner Muhammad was requested to attend in hopes he will see the need to settle.
  - Will update OFR next week.
  - Insurance – aggregate coverage for back wages up to $50K.
- **Update on Vacant Positions:**
  - Darwin is looking for head hunting firms to help the City find a finance director, assessor, and water department superintendent.
  - He should have a list of possible firms with costs the first part of next week.
- **Status of FDCVT Grants:**
  - Advertisements for water-main projects have been sent out.
  - Hydrant RFPs have been sent out.
  - City appraisal is being developed and a RFP will be sent out.
  - List of blighted structures is completed.
  - $50K for sidewalks doesn't go very far, looking into which sidewalks to do.
  - Randy stated another round of funding ($5M) will open up in August or September.

Ecorse – June 30 – W. O'Neal, R. Byrne, P. Dostine, D. Van de Grift, C. Porubsky

- **Priorities for the week:**
  - Working on five-year budget
  - FBI and AG were there yesterday, Wayne is not at liberty to discuss why they were there.
- **Fire consolidation**
  - No meeting set; Mayor was meeting with Howard Shipman after seeing Wayne last week, but has not heard from since.

- **Five-Year Budget:**
  - Would like to finish this week. Wayne promised he will have it to OFR by next week.
- **PPT/Discussion with Howard Heideman:**
  - John Pepperman contacted Mr. Heideman and was told monies for FY15-16 would be available in the beginning of FY16-17.
- **Sewer Project/Flooding Issues**
  - No calls, positive project
- **Miscellaneous Items:**
  - Loss of Packaging Specialties Inc.: The MEDC gave money to relocate to Romulus, approximately 50 jobs – company wanted to expand, but City would not entertain. Wayne stated the company backs up to DNR property and the City would not be able to sell even if they wanted to. He was not aware that they had decided to relocate.
  - Wayne and the Mayor met with Treasury last Friday, said meeting went well. Wayne stated Tidwell is the best mayor he's worked with. Stated they need to get through the election; Miller is also running, Wayne classified Miller as the "Old Guard." Thirteen people are running for Council.

Flint – August 12 – N. Henderson, J. Freeman, Mayor Walling, P. Dostine, E. Cline, C. Porubsky

- **Councilman Kincaid's Lawsuit:**
  - Order should be finalized Monday, financial obligation should still be the same.
  - City attorneys have already prepared an appeal.
  - $15.7M direct impact to GF – ordered to pay back to Sewer fund.
  - $12M per year, 2011-present.
  - City Attorney has reached out to the AG's office.
  - CSR are not needed as no one is paying their water bill.
  - Hiring/spending freeze has already been implemented.
- **Police:**
  - Met with MSP Col. Etue Monday morning.
  - Found money to supplement manpower, would like to present budget amendment to RTAB today. Natasha will forward document after call.
  - Eleven homicides in two weeks.
- **Water Quality:**
  - People have noticed higher chlorine level – water is cleaner.

Hamtramck – July 30 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift

- **Absentee Ballots:**
  - There is reason to believe that a portion of absentee ballots received for the upcoming election are fraudulent. Hundreds of ballots have been returned, many with similar-looking signatures. The Hamtramck Police are currently involved; Katrina may also call the FBI.
- **Sewer:**

- Katrina and the Finance Director spoke with S&P regarding the bond ratings for the sewer project. Their response was "not positive", but another discussion is scheduled for August 11. If worse comes to worse, the City may have to pledge its general revenue sharing.

- **Police Study Update/Meeting with the Wayne County Sheriff:**
  - Katrina recently met with the Wayne County Sheriff and would like to negotiate that they take over the intake and processing of Hamtramck prisoners. Currently, higher-ranking City police are performing these tasks; Katrina would rather have them patrolling the streets.
  - As the City pays three different taxes to the County, including the jail millage; Katrina feels that the Sheriff's Office should be responsible for this or reimburse the City for their cost.
  - A meeting is scheduled with the Sheriff and Wayne County Executive to further discuss this matter. Katrina stated that the Sheriff is sympathetic to her concerns.
- **Reassessment of Parcels:**
  - The City Assessor hired a contractor to reassess the City's residential and commercial properties. The project is moving along well.
- **Meetings with Councilmembers:**
  - Katrina will schedule meetings with Randy and Eric.

Inkster – August 13 – M. Stuhldreher, R. Byrne, P. Dostine, C. Porubsky

- **Priorities/Misc.:**
  - DOJ employee came in to facilitate community group (resulted from Dent situation).
  - Richard Marsh is transitioning; Mark is getting used to new position/role.
  - Meeting with MSHDA on Monday; Mark will be in attendance.
  - Discussion will take place Monday at the Council meeting regarding Mark's role as Interim City Manager.
  - Final billing for search has been processed.
  - Police training is needed, but it is hard to send as they are short-staffed. Randy suggested contacting Capt. Yes.
  - TIFA is declining; Mark will have to get money from GF. Debt was issued in 2010 and has about 20 years left. This was in the long-term forecast and is not a surprise. Initial projections were at 4-5%, actual rate of decline was 8-9%.
- **Police Chief:**
  - Started Monday. Interim Chief Thomas is completely separated from the agency now, but the two were able to spend some time together.
  - To Mark's knowledge, the Chief has not met Captain Yesh yet, but has met some MSP members, include Lt. Shaw.
  - Mark stated that the new Chief is straightforward, about business, articulate, and has good people skills. Expects that the community will embrace him.
  - Randy would like to meet the new Chief and see the building.
- **Chargebacks:**
  - Came back lower than budgeted.
  - $300K positive variance on GF, $100K negative on Sewer; everything together is $213K positive variance.

Lincoln Park – July 29 – B. Coulter, P. Dostine, D. Van de Grift

- **FAC & Wayne County Future Road Projects:**
  - Brad and the DPW Director will begin attending these meetings.
- **New City Manager:**
  - Mr. Coppler will start October 1. Brad has started forwarding informational emails to begin the acclimation process.
- **Five-Year Plan/90-Day Plan:**
  - Both will be submitted soon; the five-year is nearly complete.
  - Projected fund balance this year is $100K, $500K-$700K for next year, and $400K-$500K the year after.
  - If the projected fund balances don't materialize, there are areas that can be modified to reduce expenses. The fire contract allows for modification, first responders could be eliminated, FTEs could be reduced from 18, police shifts could be shortened, and could begin charging for HazMat cleanups.
  - Healthcare costs were decreased by $600K this year.
  - If pension payments cannot be made, a judgement levy should be considered.
- **Order Concerning the New City Manager:**
  - Brad will add language to the Final Order detailing the City Manager's authority.
- **Rental & Vacant Property Ordinances:**
  - Two ordinances, will help to control/monitor the number of rental/vacant properties in the City; this will hopefully help stabilize and perhaps increase property values.
  - It is estimated that between 6-15% of properties in the City are currently vacant.
- **TJ Adams Final Invoice:**
  - The final invoice for the City Manager search will be forwarded to Treasury.
- **Gabriel, Roeder, Smith & Co:**
  - The City is considering filing for the full amount of pension underfunding, $90M.
  - Legal fees would range from $75K-$100K.
  - May or may not be a good risk to take.

Pontiac – August 14 – Mayor Waterman, J. Sobota, E. Cline, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - Working on the blight court ordinance.
  - The Mayor is working on educational opportunities for Council and department heads.
  - At last night's Council meeting, there was concern regarding budgeted projects that will not be moving forward as planned due to issues with obtaining an engineering firm.
    - Possible DEQ violations – Sobota is meeting with the engineering firm to resolve.
- **Deputy Mayor Position:**
  - Moving ahead; setting up a date to meet with Council.
  - The Mayor does not want to move forward with this position until the Community Development positions are moving forward as well.
- **Phoenix Center:**

- The Mayor met with attorneys; an outline has been drafted as to where the City is at in the process.
- Waiting on information from the Ottawa Towers owner.

- **Community Development Positions:**
  - The Mayor wants to post these positions along with the Deputy Mayor.
  - Treasury is looking to see if the salaries for these positions was approved by the RTAB.
- **Two-Year Rolling Budget:**
  - Council is working on a budget amendment, will be sent to the RTAB in September.
  - Will address the two Community Development positions.

Royal Oak Township – July 27 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week/Miscellaneous Items:**
  - Set up meetings for this week or next with potential developers.
  - Code enforcement officers currently have dealership in court over taxes – Donna thinks the best scenario would be for someone to buy both the dealership and motel next to it and demolish the motel.
  - Donna: Finish F&O Plan.
  - Robert: Spoke with Finance on Thursday, need a cash flow analysis for the remainder of the year and to create an amended budget.
  - Current on all bills with the exception of one.
  - Revenue sharing is anticipated to be the only income, but Robert thinks there is enough money to make it thru the year.
  - Randy reminded the Twp. that a monthly financial report is required.
  - General fund renewal is on the ballot August 4; Donna and Robert would like to send a flyer out. Randy cautioned them on the wording
- **Audit:**
  - Completed; Donna said that it was better than last years' and didn't highlight many problems.
  - Robert stated that one of the things the audit noted was that an inventory needed to be completed.
  - Donna wanted to know if the Board had to approve the audit – Randy said to ask Mr. Wilkerson.
- **Police Update**
  - Donna will know soon after August 4 (election) more regarding Hazel Park.
  - Oak Park is not interested; very short meeting where annexation was suggested.
  - Ferndale: Over $1M, have not talked to.
  - Deadline is August 31; if not completed money will need to be returned.
- **Street Lighting:**
  - Completed last Friday, grant should close this week.
  - A rebate of $9700 is anticipated.
  - Bills should start being lower in September; the entire $10K budgeted for these may not be needed.

Subject: FW: Flint Lead Monitoring Letter
Attachments: City of Flint PbCu15 8_17_15.pdf

Heads up, here is a communication headed for Flint regarding lead & copper testing of their system and the need for 'optimizing' their treatment.

Good News: Based on two rounds of testing, they pass inspection for lead and copper.

Next News (there's no bad news here): They still need to provide a plan to optimize their treatment. This usually means adding phosphate to the water to minimize corrosion.

If you have questions, I'm happy to address them.
Thanks!
b

Subject: Flint Lead Monitoring Letter

Brad,

As there has been much interest regarding lead related to Flint drinking water, I have attached our latest letter which covers the most recent January – June 2015 monitoring period. The City is in compliance with the 15 part per billion action level for lead. Yet based on these results, the treatment cannot be deemed to provide fully optimized corrosion control treatment, and the City will need to recommend additional treatment to achieve this optimization under the Lead and Copper Rule requirements established under the Michigan Safe Drinking Water Act. This is all spelled out in the attached letter.

If you have any questions or would like any additional information you may contact me at the number below.

Stephen Busch, P.E.

DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING DISTRICT OFFICE

DAN WYANT
DIRECTOR

August 17, 2015

Mr. Brent Wright
City of Flint - DPW
Flint Water Plant
4500 North Dort Highway
Flint, Michigan 48505

Dear Mr. Wright:

SUBJECT: Flint, City of WSSN: 02310
Lead and Copper Monitoring of Drinking Water Taps

The Department of Environmental Quality (DEQ), Office of Drinking Water and Municipal Assistance (ODWMA), received your report for the monitoring period January 1, 2015, through June 30, 2015.

Action Levels	Results this monitoring period			
	90th Percentile	# of Samples Above Action Level	# of Samples Required	# of Samples Collected
Lead 15 parts per billion (ppb)	11 ppb	6	60	69
Copper 1.3 parts per million (ppm)	0.16 ppm	0	60	69

Ninety percent or more of the sites you tested are within action levels under the administrative rules promulgated under the Michigan Safe Drinking Water Act, 1976 PA 399, as amended (Act 399). These results must be reported on your 2015 Consumer Confidence Report (CCR) due to our office, your customers, and the local health department, by July 1, 2016. Also include the following statement in the CCR, regardless of the lead and copper levels:

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at 1-800-426-4791 or at http://www.water.epa.gov/drink/info/lead.

Recent changes to the Lead and Copper Rule (LCR) require the water supply to provide individual lead tap results to people who receive water from sites that were sampled, even if lead was not detected, within 30 days of learning of results. You must also send us a certification that you met all the delivery requirements along with a sample copy of your customer notice by three months after the end of the monitoring period. To download the *Lead and Copper Report and Consumer Notice of Lead Result Certificate* in Microsoft Word or PDF format, visit http://www.michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, and Reporting Forms under the Manuals, Forms and Brochures heading. Water supplies that fail to distribute the Consumer Notice of Lead Results must include the following statement in their CCR, "During the year, we failed to provide lead results to persons served at the sites that were tested as required by the Lead and Copper Rule."

While the City's LCR compliance monitoring has continued to meet action level requirements, the LCR also requires all large systems (those serving over 50,000 people) to optimize corrosion control regardless of their 90th percentile lead concentration. One way to demonstrate fully optimized corrosion control treatment is through two consecutive six month rounds of LCR compliance monitoring in which the difference between the 90th percentile level and the highest source water lead concentration is less than the Practical Quantitative Level for lead (0.005 milligrams per liter). Since the City did not meet these criteria in both the July – December 2014, and January – June 2015, sampling periods, the City must now recommend a treatment to fully optimize corrosion control treatment within six months in accordance with requirements under Act 399, Administrative Rule 604f (R 325.10604f). **This recommendation must be provided to our office as soon as possible, but no later than January 1, 2016.**

However, given the past use of phosphate treatment by the Detroit Water and Sewerage Department (DWSD) to fully optimize corrosion control treatment when the City was a wholesale customer of DWSD, the ODWMA recommends the City select this as its recommended treatment option, and begin implementation as soon as possible to address ongoing concerns by customers regarding lead levels within their premise plumbing systems. Under the second step of this Rule, the DEQ can specify optimal corrosion control treatment.

Our office will inform you when monitoring needs to be conducted as part of the optimization of the implemented corrosion control treatment. Customer requested samples for lead shall continue to be collected and analyzed. Please make every attempt to select the same sites used in the previous monitoring period, giving Tier 1 sites first priority. If original sites are unavailable, select replacement sites based on the Tier 1, 2, and 3 criteria.

Please contact me at 517-284-6644 or rosenthala@michigan.gov at your earliest convenience to discuss how the City will be complying with the above requirements.

Sincerely,

Adam Rosenthal, Environmental Quality Analyst
Lansing District Office
Office of Drinking Water and Municipal Assistance

cc: Mr. Michael Glasgow, City of Flint

Weekly Critical Issues —August 24, 2015

- **Allen Park**— Tender Offer was launched, in three weeks we will know the result. Discussions with leading candidate did not work out due to cost which means Mr. Kibby will be likely choice. City Council wants to appoint a CA in August or early September. We have several names for serving on the RTAB. The revised draft EM Order on the sale of City Hall property has been prepared by Eric, it includes an appraisal and a survey. Gatos vs Allen Park $600K City and $150 K from the MML Insurance Pool. City intends to pay lawsuit cost out of their fund balance. I asked Mr. Cady to advise us on the new GF balance.
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1M to settle these three cases. They are only partially insured. Commissioner Muhammad is responsible for the City Commission approving a resolution seeking a meeting with Treasury to discuss reimbursement of all costs associated the tenure of the EM's. See Eric's notes from our meeting with City Commission members. Filling of key positions is proving to be a real issue in the City. Darwin has scheduled a meeting to discuss the interim Finance Director's position with Al Mooney. I have offered financial assistance for a search for a Finance Director. The Assistant City Manager position will be reduced to part-time due to commuting distance.
- **Ecorse** – Fire fighters were at the City Council meeting last week complaining about discussions with River Rouge on fire service. They received and filed the Memo from Treasury. The City wants to hire the Pentiuk Law Firm. We have several names for filling the RTAB position.
- **Flint** – Lawsuit on water rates may cause the City to rebate $51M and repay $15.7M, water system issues are getting resolved. I have offered financial assistance to the City to assist in determining the financial impact of this court decision. The City has funding to hire five police officers and to place five candidates into the police academy.
- **Hamtramck**-We have several names for the RTAB position to replace Cathy. The pension study payment is in your in box. I am requesting that Segal move from Phase 1 into Phase 3. The City has prepared an RFP for audit services. Katrina wants to reorganize staff.
- **Highland Park**-The City has had difficulty finding a collection firm to collect the past due water and sewer bills, Cathy has one firm that is interested. Finding a collection firm is a requirement of the loan agreement. Cathy has indicated that the OPEB savings of approximately $750K will not be implemented until October 1. The E-loan closing is one month away. Drew and Valerie are working with the AG's office to draft the agreement. We have a number of loan requirements that we are discussing, I have a meeting with Wayne this morning. The City has purchased $300,000 of new water meters as part to the FDCVT grant award. DWSD and GLWA have approved a draft agreement regarding the City's debt to DWSD. Brian Lefler is preparing a financial analysis of the agreement for the City. City Council approval is likely in next two weeks.
- **Lincoln Park**-Brad is placing a PA 345 request on the November Ballot seeking approval of 6 mills to fund the City's pension system. Brad has prepared a four month plan which is being reviewed. Matt Coppler, CM of Enfield Connecticut will be the new City Manager. He will begin his duties in late September.

- **Inkster**-The new police chief, William Riley is on the job. Mark Stuhldreher was appointed as interim City Manager. Former CM Richard Marsh accepted a buyout and is now Special Advisor to the City. He will be working with Treasury, MEDC, and MSHDA on several development projects. Patrick has been assigned to assist on these projects as well. The City won its appeal on the water billing lawsuit. City will probably stop the credit to water and sewer customers. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be placed on the July tax roll.
- **Pontiac**-The Mayor has three Deputy Mayor Candidates, she is planning a one on one with each person and an interview with the City Council. We are discussing the exit plan. Jerry Ambrose will be hired as a transition advisor to the Mayor. Meeting in early September regarding the City and School District property on Woodward Avenue.
- **River Rouge**—the five year financial plan will have to be balanced in order to discuss an exit from the Consent Agreement, The City's plan for taking over fire service for the City of Ecorse is on hold for now. The Mayor believes the City may save up to $1M on health insurance changes.
- **Royal Oak Township**— police service proposal from another community has been a problem. Additional discussions with Ferndale, Oak Park, and Hazel Park are planned. The FDCVT grant for police will expire at the end of the month. We have received Robert's six month plan and are reviewing it. He has sent a letter to the accounting firm advising them that their work has been terminated. Robert says that they won't have a deficit at the end of the year. The MERS issue has resurfaced, Robert wants to have a discussion with MERS to determine if they will take the $600K back.
- **Miscellaneous Items**— Work is progressing on draft Consent Agreement template, the RTAB manual and the exit plan for Pontiac I would like to discuss the status of Lansing, Harper Woods, Bangor, and Melvindale with you. I would like to discuss staffing with you as well.

Flint – August 26, N. Henderson, F. Headen, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Flint's been highly focused on the Court Order about water/sewer.
  - Flint is hoping for an appellate stay …
  - However, the city has already prepared bills that reflect the Court Order: 35% decrease in rate will go out on next billing.
  - Flint has also suspended all CIPs. That saves approximately $7M.
  - 14 water/sewer positions have been frozen, that saves $1M.
  - Flint estimates that approximately 70 different customers per day stop paying their bills. Which amounts to $70K loss per day.
  - By the end of this week, Henderson said the city will have a better handle on the cost to the Water/Sewer fund from customers opting out to pay current bills.
  - Henderson said the city's plan is if the stay is granted, Flint would reinstate the 35% rate increase immediately. And the city would not escrow that increase because the revenue is needed to operate the department, resume the CIP plan, hiring personnel, etc.
- **Unpaid Water/Sewer Bills. Implications for cash flow, fund solvency**
  - Henderson said if customers keep refusing to pay and the new billing goes out with the 35% reduction, the Water/Sewer fund may possibly stay solvent and operate through the fiscal year.
  - $85M is the estimated cost to the city if it loses the appeal. This doesn't include the $15.7M the Order says is owed to Water/Sewer fund.
- **KWA Bond Payment**
  - In FY 16, Flint must make $6M bond payment to KWA.
- **Finance assistant to help with recent Water/Sewer Court Order**
  - Henderson calling Randy to discuss further
- **Police issue**
  - A police officer has been fired by the city after making derogatory comments on social media during working hours. Henderson said the issue has been picked up by media.
- **PR and Water/Sewer**
  - There has not been much if any support for the City in the media regarding the potentially devastating impact an unsuccessful stay or an appeal would have on the city's financial future.
- **Have any additional police been hired yet?**
  - 5 new police officers have been hired. 5 more are going to be sent to the academy. After academy, will be offered positions.
- **Watermain break night of Aug. 25**
  - "We are doing what we have to do with the staff we have." Henderson
- **Dupont Street project**
  - Henderson said the project is still a-go. The city will request an extension. But no plans to suspend the project.
- **Miscellaneous**

Pleyte, Beth (Treasury)

Subject:	HH/DM & others Re: KWA (Flint Water)
Location:	Governor's Conference Room
Start:	Wed 8/26/2015 1:30 PM
End:	Wed 8/26/2015 2:00 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Clayton, Stacie (GOV)
Required Attendees:	Hollins, Harvey (GOV); Muchmore, Dennis (GOV); Workman, Wayne (TREASURY) (WorkmanW@michigan.gov); Saxton, Thomas (Treasury); Dempkowski, Angela (Treasury); Wendy Wisniewski (WisniewskiW@michigan.gov)

Call In: [redacted]
Access: [redacted]
Harvey will host

Attendees
Dennis Muchmore
Harvey Hollins
Tom Saxton
Wayne Workman – via phone
Jeff Wright, Genesee Drain Commissioner and Chair of KWA
John O'Brien, Genesee Drain Deputy Commissioner
Dave Jansen, assistant to J. Wright

Agenda Items:
1) Financing of new water system
2) Governing of the new water system
3) Timeline for the build out of KWA

EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to in increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
    a. Broken valves causing less than ideal flow patterns
    b. Inefficient pump station pressure zones
    c. Water storage volumes in excess of that needed for today's demands
    d. Oversized water mains
    e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

	FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
2014	Softening bypass stream over 20% of plant flow												
	Ozone system not feeding optimally												
	Using full water storage capacity of WSR & CSR												
	Chlorine feed at WTP 7.0 mg/l or more												
	Ferric chloride feed rate less than 10 mg/l Fe3+												
	Raw water temp 23 degrees C or more												
	Raw water TOC levels above 8.0 mg/l												
	Raw water coliform over 5000 counts/day												
	Positive bacteria test in dist. system (boil water notice)												
	Water demand less than 15 mgd												
2015	Softening bypass stream over 20% of plant flow												
	Ozone system not feeding optimally												
	Using full water storage capacity of WSR & CSR												
	Chlorine feed at WTP 7.0 mg/l or more												
	Ferric chloride feed rate less than 10 mg/l Fe3+												
	Raw water temp 23 degrees C or more												
	Raw water TOC levels above 8.0 mg/l												
	Raw water coliform over 5000 counts/day												
	Positive bacteria test in dist. system (boil water notice)												
	Water demand less than 15 mgd

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- Hire third party water quality expert to complete independent 'water audit'
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - *Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive*
    - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed Sept-Oct, 2015.
  - Storage tank volume use
    - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

Stage 2 – Contingent Actions

- Replace filter media with granular activated carbon (GAC) media
  - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
  - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
  - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
  - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
  - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
  - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

(2 x current quarter value + previous 2 quarter values) / 4 = Operational Evaluation Value

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS

Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO3	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBPFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exeedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS

Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

Common Practice	Flow Rate	Recommended Volume by ROT	Volume In Use
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS

PS Name	Control Point	On Point	Off Point
PS No 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices
Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands
Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

1. Simulation of Existing System
Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.

2. *Identification of Water System Deficiencies*

Specific issues to look at.

- *Water age in entire system*
- *Possible recirculating water through pump stations*
- *Use of storage tanks – volumes in particular*
- *Indications of broken valves*
- *Effectiveness of booster disinfection*

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least $16,000,000/year or $1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

4. Seasonal Strategies

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1
- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2
- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age
Evaluate changes in storage tank operations to reduce water age
Valves to close/add to improve pressure zones, reduce recirculation
Optimization of pump station use – smaller pumps? Shut down?
Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN

	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
Stage 2	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18th, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

Schafer, Suzanne K. (Treasury)

From: Byrne, Randall (Treasury)
Sent: Monday, August 31, 2015 7:52 AM
To: Schafer, Suzanne K. (Treasury)
Subject: weekly meeting
Attachments: Meeting with Suzanne August 31.docx

Suzanne:

This is a list of critical issues for our weekly meeting.

Thanks,
Randy,

Randall Byrne | State Administrative Manager
Local Government Services - Office of Fiscal Responsibility
State of Michigan | 430 W. Allegan Street, 3rd Floor | Lansing, MI 48922
(517) 335-2521 | (517) 373-0633 (fax) | ByrneR1@michigan.gov

If you are not the intended recipient, please contact the sender by reply e-mail, and delete/destroy all copies of the original message and attachments.

Weekly Critical Issues —August 31, 2015

- **Allen Park**— Discussions with leading candidate are not working out due to cost which means Mr. Kibby will be likely choice. City Council wants to appoint a CA in August or early September. We have several names for serving on the RTAB. The revised draft EM Order on the sale of City Hall property has been prepared by Eric, it includes an appraisal and a survey. Gatos vs Allen Park $600K City and $150 K from the MML Insurance Pool. City intends to pay lawsuit cost out of their fund balance.
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1.7M to settle these three cases. They are only partially insured. Filling of key positions is proving to be a real issue in the City. Darwin has scheduled a meeting to discuss the interim Finance Director's position with Al Mooney. I have offered financial assistance for a search for a Finance Director. The Assistant City Manager position will be reduced to part-time due to her commuting distance. A job posting for this position will be completed soon.
- **Ecorse** – They received and filed the Memo from Treasury. The City wants to hire the Pentiuk Law Firm. We have several names for filling the RTAB position. Are we ready to approve their five year financial plan?
- **Flint** – Lawsuit on water rates may cause the City to rebate $51M and repay $15.7M, a decision will be made on Monday whether this becomes a class action lawsuit along with additional financial repercussions. I have offered financial assistance to the City to assist in determining the financial impact of this court decision but Natasha has not made a decision. A water main break under the Flint River may cost up to $500K to repair.
- **Hamtramck**-We have several names for the RTAB position to replace Cathy. The pension study payment is in your in box. I am requesting permission to move from Phase 1 into Phase 3. The City has prepared an RFP for audit services. Katrina wants to reorganize staff. Overtime last month was $60K, we are asking her to get quotes for a police study.
- **Highland Park**-The City has had difficulty finding a collection firm to collect the past due water and sewer bills, Cathy has one firm that is interested. Finding a collection firm is a requirement of the loan agreement. Cathy has indicated that the OPEB savings of approximately $750K will not be implemented until October 1. The E-loan closing is one month away. Drew and Valerie are working with the AG's office to draft the agreement. We have a number of loan requirements that will be in the draft document. The City has purchased $300,000 of new water meters as part to the FDCVT grant award. They are set to be installed beginning in early September. DWSD and GLWA have approved a draft agreement regarding the City's debt to DWSD. The City Council on Monday night conditionally approved the agreement. They are asking to extend the number of years required for payback. Brian Lefler has prepared a financial analysis of the agreement for the City. Is the city over its debt limit?
- **Lincoln Park**-Brad is placing a PA 345 request on the November Ballot seeking approval of 6 mills to fund the City's pension system. Brad has prepared a four month plan which is being reviewed. We have met with Brad to discuss the final order. Possible lawsuit against Gabriel Roeder.

- **Inkster**-The new police chief, William Riley is on the job. Mark Stuhldreher was appointed as interim City Manager. Former CM Richard Marsh accepted a buyout and is now Special Advisor to the City. He will be working with Treasury, MEDC, and MSHDA on several development projects. Patrick has been assigned to assist on these projects as well. The City won its appeal on the water billing lawsuit. Mark said the city will be discussing its options. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll.
- **Pontiac**-The Mayor has two Deputy Mayor Candidates, I will be there for the City Council interviews on September 3rd. We are discussing the exit plan. Jerry Ambrose will be hired as a transition advisor to the Mayor. I sent you a copy of the draft contract. Meeting on September 2nd regarding the City and School District property on Woodward Avenue. Pontiac RTAB exit meeting on Tuesday.
- **River Rouge**—the five year financial plan will have to be balanced in order to discuss an exit from the Consent Agreement, the City's plan for taking over fire service for the City of Ecorse is on hold for now. The Mayor has drafted a revised plan that is even more favorable to Ecorse.
- **Royal Oak Township**— police service proposal from another community has been a problem, additional discussions with Ferndale, Oak Park, and Hazel Park are planned. The FDCVT grant for police will expire at the end of the month (September). We have received Robert's six month plan and are reviewing it. He has sent a letter to the accounting firm advising them that their work has been terminated. Robert has requested an Order be drafted. The MERS issue has resurfaced, Robert wants to have a discussion with MERS to determine if they will take the $600K and invest it. We need to discuss this with Wayne. Robert's contract expires at the end of September.
- **Miscellaneous Items**—the draft of the September Governor's Memo has been sent to Angela. We need to discuss the way forward on the Analyst positions. Potential RTAB members discussion and staffing.

Weekly Conference Call Notes – August 31, 2015

Allen Park –August 28 – Mayor Matakas, B. Cady, M. Kibby, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Construction on Park Street is moving along.
  - The City's new app, Click It & Fix, is popular with the residents.
  - City to recommend vendor who will update Master Plan to Council.
  - City to recommend vendor who will produce overview/audit of City to ouncil.
  - The MML is progressing on its review of AP's personnel, job reclassifications, and salary survey.
- **Order 54**
  - Brownfield issue. Treasury's Brownfield expert reviewing paperwork. When completed, a conference call will be scheduled with AP to discuss.
- **Order 55**
  - Searching for vendor to do appraisal and survey of the property.
- **Fire Contract**
  - No change. Still two outstanding issues: duty-disability; voting member on pension from fire. Talks to resume Sept. 14.
- **SAFER Grant**
  - Update. This grant is retaining 6 firefighters, not hiring new.
- **Bond Tender**
  - $195K issued as insured. BOA is assuming this piece of the tender.
  - The tender is out until Sept. 16.
- **Prescription Drug Coverage/Healthcare for Under 65, Actives & Over 65**
  - Over 65 switched to Humana, savings of $176K
  - The change to Catamaran drug coverage saved $143K.
  - Under 65 & actives are staying with BCBS. Cady said the overall net increase for the healthcare and prescription drug for the under 65 and actives is $211K.
  - AP must now pay the arrearage fee ($505K, was reduced from $850K) to BCBS over 4 years.
  - Treasury has requested a comprehensive breakdown of this healthcare and drug coverage provider change for the over 65, under 65 and actives.
- **CM Search**
  - All candidates have been interviewed.
  - Treasury asked to be included if candidates appear before council for interviews.
- **F.O. Directive: Quarterly Litigation Report**
  - AP checking on status of reports. Should have been part of the packets. Treasury has not received.
  - A litigation report was emailed after the telephone call today.
- **Elevator**
  - Should be completed today.

Benton Harbor –August 27 – D. Watson, R. Byrne, P. Dostine, R. Widigan

- **Weekly Priorities:**
  - **FLSA Claim:** Checks have been cut for the settlement.
  - There is a new FLSA claim for $25K against the City and Darwin. The individual does not have a solid case at the moment.
  - Audit prep is going well, looking at $140K surplus.
- **Lange, O'Brien/Unruh Lawsuit:** No new information regarding O'Brien/Unruh. Offer to settle all three is $1.8M.
  - Bob Callahan said that Lange wants $595K to settle.
  - Darwin will have a conference call with the attorneys to develop a response to that settlement request.
  - The insurance company has not stated how much they would contribute to just the Lange case.
- **Update on Vacant Positions:**
  - MML proposal is complete and will be sent to Treasury for review (for the head hunting firm).
  - Marja Winters will be working with the City three days a week and will help the City find a new community and economic director/assistant city manager.
    - Posting/job description will be sent out Monday or Tuesday next week.
  - **Assessor position**: Individual is interested, however, they would like to have an assessing assistant.
    - The contract gives 6 months of severance pay when the contract is terminated. The City attorney is reviewing the contract to see if the City still needs to pay it if the assessor is the one leaving.
  - Darwin has a phone call with Al Mooney tomorrow – Al is looking to do more part time.
  - **DPW**: City is filling one position, gearing up for the winter.
- **Status of FDCVT Grant Applications:**
  - Darwin is resubmitting some of the projects from LY as well as additional projects that they are getting cost estimates to submit in new projects.
  - Should be submitted mid-September.

Ecorse – August 25 – W. O'Neal, T. Sadowski, J. Pepperman, R. Byrne, P. Dostine, C. Porubsky

Priorities:

Waiting to hear from Treasury on five-year budget, would like feedback. Randy: does the budget reflect the consolidation with River Rouge? Current fiscal year doesn't show anything, didn't budget for savings. Transferred salaries to professional services. Has some time to show savings. Has leeway in PA 33.

Spoke with RR yesterday, have to put contract on hold. Things are heating up. If the deal does not go thru, all Ecorse FF will be reduced to part-time. Would help with savings needed to balance five-year. Current salaries are around $850-900K, thinks this would cut roughly in half. Would pay RR around $400K. Would like to have shared command with the agency to cut down on overtime costs. Their Public Safety gets a bonus, Ecorse has not had a raise in twelve years.

Tim's first day was yesterday. John and Tim will work together this week. John has volunteered to be on call.

DPW Superintendent resigned last week. Will be brought to the RTAB next month. **This position was being paid salary plus overtime.** Has been here around two years, Wayne thinks he is overwhelmed administratively. Wayne is thinking of moving current employee into vacant treasury position and give an applicant that has water/sewer billing experience the position of DPW Administration Assistant. Wayne stated the bills are going out on time; has some problems to address regarding fraud, etc.

OPEB Benefit Audit is also on the radar, Wayne is going to look at. Has to look at what a couple people are paying for healthcare and ensure it is the correct amount. Pre-65 do not have healthcare anymore, only ones grandfathered in (approximately ½ dozen or more). Wayne has met with MERS multiple occasion. 7.75 rate of return, Wayne was using 8. Need to recalculate.

Prax Air: Got a call from Livese at Prax Air and stated there are things that need to be changed in the resolutions to comply with law. Getting prep work ready, conducting pre-construction meetings, etc.

Council voted to receive and file letter from Wayne Workman.

Flint – August 26 – N. Henderson, F. Headen, R. Byrne, P. Dostine, E. Cline

- **Priorities**
  - Focused on the Court Order regarding water/sewer, is hoping for an appellate stay.
  - The City has already prepared bills that reflect the Order: 35% decrease in rate will go out on next billing.
  - All CIPs have been suspended, saving approximately $7M.
  - 14 water/sewer positions have been frozen, savings of $1M.
  - It is estimated that approximately 70 different customers per day stop paying their bills. Which amounts to $70K loss per day.
  - By the end of this week, Henderson said the City will have a better handle on the cost to the water/sewer fund from customers not paying their current bills.
  - The City's plan, if the stay is granted, is to reinstate the 35% rate increase immediately. The increase would not be escrowed because the revenue is needed to operate the department, resume the CIP plan, hire personnel, etc.
- ***Unpaid Water/Sewer Bills, Implications for Cash Flow, Fund Solvency***
  - If customers continue their refusal to pay and the new billing goes out with the 35% reduction, the water/sewer fund may possibly stay solvent and operate through the fiscal year.
  - If the City loses their appeal, the estimated cost is $85M. This figure does not include the $15.7M in the Order owed to the water/sewer fund.
- **KWA Bond Payment**
  - In FY 16, Flint must make $6M bond payment to KWA.
- **Finance Assistant, Help with Water/Sewer Court Order**

- Natasha will call Randy to discuss further.

- **Police Issue**
  - A police officer has been fired by the City after making derogatory comments on social media during working hours. Henderson said the issue has been picked up by media.
- **PR and Water/Sewer**
  - There has not been much if any support for the City in the media regarding the potentially devastating impact an unsuccessful stay or an appeal would have on the City's financial future.
- **Additional Police Officers**
  - Five new police officers have been hired, another five are being sent to the academy and will be offered positions upon completion.
- **Water Main Break (8/25)**
  - According to Natasha: "We are doing what we have to do with the staff we have."
- **Dupont Street Project**
  - The project is still a go, however the City is requesting an extension. There are no plans to suspend the project.

Hamtramck – August 27 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift

- **Priorities**
  - Processing paperwork for the bond sale (closing in Sept.), and infrastructure project. Anticipated cost is $6.5M.
  - Put out to bid for vendor to perform City audit.
  - Hired an auditor for the housing discrimination fund.
  - Taking the snow removal responsibilities in-house this season, expected to save the City money. DPW began prepping for the winter season.
  - Bidding out the landscaping contract, Katrina said the current cost is too high.
  - Also bidding out contract to do sewer work and repair.
  - Meeting scheduled with Wayne County Executive and Sheriff regarding jail services.
- **Police Overtime**
  - Last month's bill was $60K. Katrina noted that revenues of $96K were generated as a result. Fireworks and a movie night at the school contributed to the $60K overtime figure.
  - Overtime language is in police contract in eight hour shifts. This will need to change in the next contract.
  - Katrina will ask court to break out traffic revenues from forfeiture revenues.
  - The Police Chief is in the process of hiring part-time officers and a dispatcher so higher paid staff will not have to dispatch.
  - Police Study: No progress. Treasury recommends looking at ICMA .
- **Library**
  - A library study is needed. Last fiscal year, the library finished with an $80K deficit. The City bailed them out. According to Katrina, the library has important role in the community and acts as community center in many ways.

- **HR Update**
  - Recently, the City Treasurer's actions resulted in an overdrawn account. The Finance Director sent a memo documenting the error.

Inkster – August 13 – M. Stuhldreher, R. Byrne, P. Dostine, C. Porubsky

- **Priorities/Misc.:**
  - DOJ employee came in to facilitate community group (resulted from Dent situation).
  - Richard Marsh is transitioning; Mark is getting used to new position/role.
  - Meeting with MSHDA on Monday; Mark will be in attendance.
  - Discussion will take place Monday at the Council meeting regarding Mark's role as Interim City Manager.
  - Final billing for search has been processed.
  - Police training is needed, but it is hard to send as they are short-staffed. Randy suggested contacting Capt. Yes.
  - TIFA is declining; Mark will have to get money from GF. Debt was issued in 2010 and has about 20 years left. This was in the long-term forecast and is not a surprise. Initial projections were at 4-5%, actual rate of decline was 8-9%.
- **Police Chief:**
  - Started Monday. Interim Chief Thomas is completely separated from the agency now, but the two were able to spend some time together.
  - To Mark's knowledge, the Chief has not met Captain Yesh yet, but has met some MSP members, include Lt. Shaw.
  - Mark stated that the new Chief is straightforward, about business, articulate, and has good people skills. Expects that the community will embrace him.
  - Randy would like to meet the new Chief and see the building.
- **Chargebacks:**
  - Came back lower than budgeted.
  - $300K positive variance on GF, $100K negative on Sewer; everything together is $213K positive variance.

Lincoln Park – July 29 – B. Coulter, P. Dostine, D. Van de Grift

- **FAC & Wayne County Future Road Projects:**
  - Brad and the DPW Director will begin attending these meetings.
- **New City Manager:**
  - Mr. Coppler will start October 1. Brad has started forwarding informational emails to begin the acclimation process.
- **Five-Year Plan/90-Day Plan:**
  - Both will be submitted soon; the five-year is nearly complete.
  - Projected fund balance this year is $100K, $500K-$700K for next year, and $400K-$500K the year after.
  - If the projected fund balances don't materialize, there are areas that can be modified to reduce expenses. The fire contract allows for modification, first responders could be eliminated, FTEs

could be reduced from 18, police shifts could be shortened, and could begin charging for HazMat cleanups.
  - Healthcare costs were decreased by $600K this year.
  - If pension payments cannot be made, a judgement levy should be considered.
- **Order Concerning the New City Manager:**
  - Brad will add language to the Final Order detailing the City Manager's authority.
- **Rental & Vacant Property Ordinances:**
  - Two ordinances, will help to control/monitor the number of rental/vacant properties in the City; this will hopefully help stabilize and perhaps increase property values.
  - It is estimated that between 6-15% of properties in the City are currently vacant.
- **TJ Adams Final Invoice:**
  - The final invoice for the City Manager search will be forwarded to Treasury.
- **Gabriel, Roeder, Smith & Co:**
  - The City is considering filing for the full amount of pension underfunding, $90M.
  - Legal fees would range from $75K-$100K.
  - May or may not be a good risk to take.

Pontiac – August 28 – Mayor Waterman, J. Sobota, , N. Nazarko, R. Byrne, P. Dostine, R. Widigan

Weekly Priorities:

- GERS Board passed a policy addressing future overpayments of COLA.
- J. Sobota is working on his report to the RTAB.

Deputy Mayor Position: TJ Adams firm sent out letters to council-members to attend a forum to meet the two Dept. Mayor finalist.

- The names will be kept confidential.
- Informal meeting with council on Thursday at 10AM, there will be no vote or evaluation to fill out. Council meeting to follow at 12.
- Randy will attend the sessions on Thursday.

Community Development Positions: Salary approved, positions were posted on August 20. 30 days ends on September 25.

- Met with Oakland Co. to discuss working together on community development once the positions are filled.

Phoenix Center: The City's attorneys have talked with one of the other condemnation attorney's. They are working on setting up a meeting between the owner of the Ottawa Towers owners and the City.

- The Mayor/City is working on a strategic plan for the property/area.

Two-year Rolling Budget: Budget amendment for the 15/16 budget is pending before the finance committee. Once that is complete then the City will prepare and finalize the two-year.

Retiree Lawsuit: The City had a pre-meeting with opposing council. A new list of possible eligible individuals. Once all the information is gathered it will be finalized and sent to the mediator. Next pre-meeting is set for September 21.

- A letter of understanding is being developed and shared with the mediator.

FDCVT Grant Applications: Randy reminded the City.

Royal Oak Township – July 27 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week/Miscellaneous Items:**
  - Set up meetings for this week or next with potential developers.
  - Code enforcement officers currently have dealership in court over taxes – Donna thinks the best scenario would be for someone to buy both the dealership and motel next to it and demolish the motel.
  - Donna: Finish F&O Plan.
  - Robert: Spoke with Finance on Thursday, need a cash flow analysis for the remainder of the year and to create an amended budget.
  - Current on all bills with the exception of one.
  - Revenue sharing is anticipated to be the only income, but Robert thinks there is enough money to make it thru the year.
  - Randy reminded the Twp. that a monthly financial report is required.
  - General fund renewal is on the ballot August 4; Donna and Robert would like to send a flyer out. Randy cautioned them on the wording
- **Audit:**
  - Completed; Donna said that it was better than last years' and didn't highlight many problems.
  - Robert stated that one of the things the audit noted was that an inventory needed to be completed.
  - Donna wanted to know if the Board had to approve the audit – Randy said to ask Mr. Wilkerson.
- **Police Update**
  - Donna will know soon after August 4 (election) more regarding Hazel Park.
  - Oak Park is not interested; very short meeting where annexation was suggested.
  - Ferndale: Over $1M, have not talked to.
  - Deadline is August 31; if not completed money will need to be returned.
- **Street Lighting:**
  - Completed last Friday, grant should close this week.
  - A rebate of $9700 is anticipated.
  - Bills should start being lower in September; the entire $10K budgeted for these may not be needed.

For Immediate Release

Mayor Karen Weaver Unveils 100 Day Plan

Flint, Michigan – December 1, 2015 – Mayor Karen Weaver today laid out the plan for her next 100 days in office at a morning press briefing held in the lobby of Flint City Hall. The Mayor's plan for the next 100 days will focus mainly on addressing issues related to water and lead, but will also include building a vigorous community engagement program, implementation of the City's Master Plan and increased attention to youth initiatives. The plan also lists restoring "Home Rule" to City government as a key objective.

"During the course of my campaign for this esteemed office, I made several pledges to the citizens of this community," said Mayor Weaver. "First and foremost I pledged that I would work tirelessly to resolve the City's water problems. I also made a pledge to work diligently to restore democracy and home rule, in addition to giving voice, truth and transparency to our residents." While there are other items the Mayor is interested in addressing, the next 100 days will focused on those areas.

In dealing with the water issues in Flint, Mayor Weaver is working toward having the City declared a Federal Disaster Area as her first item. "We are faced with the largest public health and public service threat in the history of the City," said the Mayor. "It will require resources far beyond our capabilities to remediate our water infrastructure problems." Mayor Weaver has already begun meeting with representatives and senators at both the State and Federal levels. In addition to the Federal Declaration, the Mayor is also seeking to restructure the City's Water Advisory Committee to include mayoral appointments,

–CONTINUE–

implementing a lead poisoning mitigation program in conjunction with local medical centers and expanding the Keep the Water Flowing program to include additional aid agencies.

Community engagement and the reestablishment of trust in local government will be vigorously sought by Mayor Weaver, as laid out in the 100 day plan. Beginning this month, the Mayor will conduct monthly Town Hall Meetings in each of the City's nine wards. In addition, the Mayor plans to attend block club and neighborhood association meetings frequently, continue the Mayor's "Open Office" time on Wednesday mornings to hear from constituents and create a "Mobile City Hall" to provide direct access to the Mayor.

Another key to the Mayor's outreach strategy will be to meet frequently with various community stakeholders to gather input and reach out to educational institutions in an effort to gain insight into the problems facing Flint. Through relationships with local colleges and universities, the Mayor hopes to develop surveys for such issues as specific as determining the scope of problems with the City's street lights and more general such as identifying citizen needs. Work is also being done through a university partnership to digitize old paper records of underground pipe materials to better track the location of lead-based service lines throughout the City.

Youth engagement is another part of the outreach strategy of the 100 day plan. Mayor Weaver is seeking to establish *Operation HYRE* (Helping Youth Reach Employment) in which she will call upon local businesses and vendors to provide summer employment opportunities for 500 City youth in 2016. The hope is to expand that year to year. In addition, the Mayor is seeking to form a Youth Advisory Council to provide opportunities for engagement in local government with students.

–CONTINUE–

Dr. Karen Weaver
Mayor

Natasha L. Henderson
City Administrator

Mayor Weaver acknowledged that the ambitious scope of her plan will be rely on a spirit of cooperation within the community. "I am working every day to improve our quality of life," the Mayor stated. "Flint's stability depends on our collective effort to provide economic opportunity, promote healthy lifestyles, and ensure community prosperity. With our legendary Flintstone spirit we will prevail."

Subject: Flint Litigation Summaries, 12-2-15

The following information is per your request:

Mays, et al v *Governor, et al*. This complaint was filed in United States District Court (Eastern District) as a class action and seeks equitable remedial relief and monetary (compensatory and punitive) damages. The claim is that named State officials, City of Flint officials, and former Emergency Managers violated the rights of plaintiffs afforded by the Due Process Clause of the Fourteenth Amendment by deciding to utilize the Flint River as the water source for City residents, thereby exposing them to lead and other toxins.

Status: Filed on November 13, 2015.

Natural Resources Defense Council, et al v *Governor, State Treasurer, Flint RTAB, et al*. The claim of this Notice of Intent to Sue in United States District Court is that named State and City officials are in continuing violation of federal Safe Drinking Water Act requirements (lead and copper rules) for having failed to monitor and control lead levels in the City's drinking water and for having failed to assist certain Michigan schools with testing and remediation.

Status: Not yet filed. Notice of Intent to Sue served to putative defendants on November 16, 2015.

Subject: RE: PA 436

Good Morning Suzanne,

I doubt very much that Treasury is involved in these bills. I note that among the Democratic sponsors of both bills is Phil Phelps, who has historically been very critical of PA 436, and who recently filed a lawsuit against the state related to the Flint water matter. The bills are summarized below:

HB- 5089 This amendment to Section 21 of the Act would permit city councils to reverse EM Orders immediately following an EM's exit. Such an amendment would have troubling consequences for RTAB administration (final orders could be reversed), collective bargaining agreement negotiations, and for existing 12(1)(k) retiree healthcare modifications.

HB- 5100 This amendment to Section 23 of the Act would discourage appointment of former EMs to RTAB boards because they would not be able to vote. Because Joyce Parker, and Lou Schimmel have resigned from their respective RTABs, and because we are not seeking to appoint EM Coulter to the LP RTAB, this amendment would have zero effect on our Bureau's operations. The school districts might be a different story though.

Let me know if I can help further.

Kindly,
Drew

++++Weekly Critical Issues —December 3, 2015

- **Allen Park**—Status of bond tender.
- **Benton Harbor** We need to schedule a meeting with the Mayor elect and Darwin. What is the status of the RTAB evaluation for Benton Harbor?
- **Ecorse** – Wayne suggested that the City could increase the amount of the judgement levy to pay MERS. Their five year financial plan does not take into account the potential loss of 10% of their residential tax base.
- **Flint** – Meeting in Flint with Mayor Weaver and Natasha next week to discuss searches. City still has not added additional phosphate at water plant, hopefully by next week. City has again requested assistance on lawsuits. Good initial telephone conference with the Mayor and Council President yesterday. Flint lawsuits may affect the upcoming KWA bond sale.
- **Hamtramck**- No update, telephone call later today.
- **Highland Park**-The City has purchased new water meters and is installing them. The FDCVT grant application is being prepared. Cathy is installing heat and will be having the roof repaired on the pump house. Cathy is reluctant to move forward on the water fixes until the new mayor takes office. We still do not have cost estimates for water issues.
- **Lincoln Park**-His exit will be December 18th. I met with Brad and Matt Coppler yesterday. Issues remaining for transition include the 2 and 5 year budgets, EM final order and the appointment of the RTAB members. I have the police collective bargaining agreement letter and memo for your review.
- **Inkster**- Mark and the Mayor came to Treasury yesterday. They drove in separate vehicles.
- **Pontiac**- I visited Pontiac to meet with the Mayor, Joe, and Jane. There is a lack of communication amongst the top administrative officials. We need to prepare a road map for the transition.
- **River Rouge**—exit from Consent Agreement soon.
- **Royal Oak Township**- MERS funds are still an issue. The Township attorney needs to provide guidance on the continued collection of police millage.
- **Miscellaneous Items**— City of Lansing Memo, Holiday ANLV, no new Governor Memo this month, changes in the CDBG program in Wayne County may impact distressed local units revenues.

Agenda Summary

Dempkowski, Angela (Treasury)

From: Cline, Richard (Treasury)
Sent: Friday, December 04, 2015 10:02 AM
To: Dempkowski, Angela (Treasury)
Subject: Flint RTAB Meeting Summary

Importance: High

Angela,

Please provide the following to the Flint RTAB Board members:

Board Members,

At the next Flint RTAB meeting approaches, I wanted to provide a short memo to draw your attention to a few items in the packet.

Please note the following items:

October 12 Meeting:

- **Resolution 828.1** – For the purposes of clarification, this action establishes an OPRA district at Lapeer Road and Averill Ave.
  - The district will be established for a 12-year period.
  - The City has stated that this is the final approval necessary for this project.

- **Resolution 864** – For the purposes of clarification, this agreement is between the City and Genesee County.
  - Under the agreement the Sheriff will be operating the City's holding facility.

- **Resolution 865** – This action implements a series of budget amendments in the General Fund (Police, Fire, Planning), the Drug Enforcement Fund, and the Public Improvement Fund.
  - In the Police Fund, off-setting increases in both Revenue and Expenditures total $145,803. There is no net change to the budget.
  - In the Fire Fund, Expenditures for Supplies are decreased by $27,756, but Personnel Services are increased by the same amount. There is no net change to the budget.
  - In the Planning Fund, off-setting increases in both Revenue and Expenditures total $20,000. There is no net change to the budget.
  - In the Drug Enforcement Fund, $42,273 of Fund Balance is being utilized for Personnel Services.
  - In the Public Improvement Fund, Revenues is being decreased by $300K and Expenditures is being decreased by $800K.

- **Resolution 866** – The Chair has asked that this item be separated for additional discussion.
  - This action implements budget amendments in the Sewer Fund and the Water Fund.
  - In the Sewer Fund, Revenues are being decreased by $6.74M and $2.88M of Fund Balance is being utilized. The net change is an Appropriation decrease of $3.858M.

- In the Water Fund, Revenues are being decreased by $8.56M and $7.287M of Fund Balance is being utilized. The net change is an Appropriation decrease of $207K.

- **Resolutions 872 & 875** – For the purposes of clarification, these items were addressed at the October RTAB meeting.

October 26 Meeting:

- **Resolution 890** – For the purposes of clarification, this project was budgeted in FY 14-15 but not completed.
  - The City wishes to draw $189K from Fund Balance to complete the project this year.
  - The project is a contract between the City and MDOT for bridge repair work.
  - The City has indicated that the project was delayed last fiscal year at the initiation of MDOT.

- **Resolution 887** – This is a Change Order to an existing contract.
  - The project involves repair work at the City's Water Plant.
  - Funds were pre-encumbered and the City has indicated that they will come from the project's Contingency line item.

November 9 Meeting:

- Only 4 items were addressed at this meeting. Two were presentations, one was the approval of Council minutes and the final item was the approval of street closure permits (for events that have already occurred).

November 18 Special Meeting:

- **Resolution 926** – This item is a budget amendment to transfer $102K of non-allocated CDBG funds to the Demolition line item.
  - Sufficient funds are available for this activity.

- **Resolution 927** – This is a joint effort between the City, the Crim Foundation and the MI Department of Health and Human Services for AmeriCorps funding.
  - This is a grant funded project in the amount of $288K.
  - The Crim Foundation acts as the project fiduciary and the City is responsible for making all payments associated with the project.

- **Resolution 931** – This action extends the service contract for one additional year.
  - Funds are budgeted and $604K is available for this activity.

- **Resolutions 933 and 934** – These resolutions are two parts to the same action.
  - The project is a joint activity by which MDOT will be reconstructing portions of Saginaw Street.
  - The City's local share of the project increased due to an overall cost increase to the project.
  - Resolution 934 authorizes $67K from DPW Fund Balance be transferred to Professional Services.
  - Resolution 933 increases the City's local match to this contract by the $67K.

November 23 Meeting:

- **Resolution 929** – This resolution was postponed from the November 18 Special Meeting
  - A Change Order is being executed to retain the firm that was used to design the charcoal filter installation to assist the City in developing recommendations for the lead issue.

- The Change Order is for $907K.
- The City has $1.9M budgeted for services, so sufficient funds are available.

- **Resolution 936** – This resolution executes a Change Order to the City's Towing Contract to add vehicle storage thought the end of the current fiscal year.
  - The added cost is $125K for this fiscal year.
  - The City has $185K budgeted, so sufficient funds are available.

- **Resolution 937** – This resolution addresses the MDOT work on DuPont Street.
  - This resolution extends the project deadline until December 31, 2017.

City Administrator Items:

- No items were received from the City Administrator for consideration at this meeting.

Please review this information. If there are any questions, please contact me.

Thank you.

Sincerely,

2. Budget to Actual – October 2015 (attachment #9)

IV. PUBLIC COMMENT

V. ADJOURNMENT

Weekly Conference Call Notes – Dec. 7, 2015

Allen Park –Nov. 20 –Mayor Matakas, M. Kibby, B. Cady E. Cline, P Dostine

Bond update

- The cost of issuance, closing costs, is now at $1,109,907.48. The city stated that everything is completed with the exception of paying for the services of the providers.
- Cady and Kibby have requested a telephone conference call with Treasury officials regarding the cost of issuance and the possibility of only breaking even 270 days from now when it's time to sell bonds. They want to map out some different strategies. Cady stated if the city cannot get a favorable rating, this whole bond tender effort will be a wash 270 days from now.

MML Training

- Kibby said he put on a 3 hour workshop with the new council. He said is was long but very productive. Some of the new members will be attending the MML events in Southfield and Ann Arbor. Others have expressed interest in the annual MML conference in Frankenmuth.

Priorities

- City requesting 5 items from the Nov. 24 council meeting be pulled forward. Treasury requested that the packet be sent as soon as possible (it arrived Friday before COB) so it can receive a proper review.
    - The purchase of a new Zamboni. Old one is beyond its useful life. New one is in the 5-year budget and 6-year CIP. City budgeted $40K annually for three years. New Zamboni is approximately $112K.
    - Re-bid solid waste contract. With the roll-back, the rubbish fund not generating enough revenue to cover costs. City said re-bidding contract could save $100K annually.
    - Water / Sewer rates.
    - Budget amendments.
    - City investment policy.

Benton Harbor –Dec. 3 – D. Watson, R. Widigan, D. Hudson

- **Weekly Priorities:**
    - CVTRS has been submitted to Treasury
    - Audit: finishing up the comment portion, will present to Commission on the 14 of December, if everything is finalized.
        - If it is finished in time it will be presented to the RTAB in December.
    - Two individuals have graduated from the police academy and have started working.

- HUD wants the city to work on doing more home repair, city doesn't have the funding in that allocation.

- **City Manager Evaluation Discussion**: No word.

- **Commissioner Muhammad**: will have to resign his seat when he takes the Mayor's seat.
  - He has set up a meeting with Darwin the week of Christmas.

Ecorse – Dec. 1 – W. O'Neal, T. Sadowski, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann, D. Hudson

Priorities

- Town Hall meeting is scheduled. Will be held in council chambers. Wayne will brief council on state of the city.
- Ecorse re-paving the boat ramp, and repairing light poles that were damaged by a trailer.
- Ecorse is looking for a location for the food pantry.
- Ecorse still looking to hire a DPW director. Have 3 applications for the position. Leaning toward a S1-certified, non-PE candidate who currently works for Ecorse's contracted engineering firm. Wayne states the candidate's S1 certification will save Ecorse $15K per year.
- Ecorse in process of bidding out a Water Meter Change-Out Program. Very much needed, Wayne said. City loses between $845K and $1M annually in water. The meters will cost approximately $225 per meter.
- Ecorse is going to bring back McKenna on a contractual basis.
- Wayne is also focusing on old bills / invoices from Great Lakes, looking for fraud.
- Wayne is looking to request quotes from insurance companies. Ecorse striving for a regular insurance carrier and coverage. Currently paying way too much in insurance costs.
- Wayne fired police lieutenant Blade and demoted (took his stripes) a fire sergeant.
- Wayne has directed the city to issue tickets for violating Certificate of Occupancy requirements.
- Wayne heard that Ecorse assessments will decrease another 25 percent next year. That will cost the city $275K.
- Preliminary audit of FY '15 shows a -$34K. Wayne said the city had to book some expenditures which took the operating balance from a positive $500K to a -$34K.

CDBG

- Ecorse is unaware that the county's CDBG program is changing from a formula program to a competitive one.
- Ecorse receives approximately $200K annually. Money is used for: $50K annual payment on fire truck purchase; code enforcement officer, demolition. Wayne said a change in the program would be a big hit to the city.

- City has hired an additional three public safety officers, close to full staffing levels in FD and PD
- Union Park improvements should be completed this spring

- **Lawsuits**: O'Brien, Unruh, and Lange
  - Insurance carrier is looking for a commitment from the City of $300K – settlement was last discussed at $1.7M.
  - Looking to settle with Lange, he is looking for $595K, attorney's think it's only worth $300-$400K.
  - Worst case scenario is it goes to court, policy coverage limits will kick in.
  - Will likely have another

- **Federal Building**:
  - The deed to the building was transferred to the City in 2000, but the deed wasn't recorded.
  - Tony's final order states that the city shall *Take any steps necessary, subject to Board approval, to support and facilitate*
  - *the disposal of the Benton Harbor Federal Building property [Tax Parcel Numbers 11-54-0340-0060-00-3 11-54-0340-0059-00-5, 155 Sixth Street and 109 Park Street, Benton Harbor, MI].*
    - Order 14-27, signed by Tony Saunders, issued an *agreement for sale of real estate* with Prairie Real Estate.
    - Does Darwin have to go back to the Commission to approve a sale that was already approved by EM Saunders.

- **Update on Vacant Positions:**
  - **Finance Director:** MML search was approved, needs RTAB approval.

  - **Water Department Superintendent:** Still being advertised on the AWWA, MI Rule Water, and City's website.

  - **Assistant City Manager/Community Development Director:** Darwin is currently filling this roll.
    - The City will likely use MML for this search.
    - Darwin has talked with Cornerstone Alliance and the Chamber of Commerce.

  - **Assessor** is on board, has been at city hall every day of the week, even though he's just part time (two days a week).
    - City will likely not pass the AMAR (Audit of Minimum Assessing Requirements) – will have to identify way to fix the situation.

- **HUD pay back for an ineligible costs:** Potential pay back of $60K.
  - HUD will reduce future money to pack back $60K, likely over 5 years.

Annual ARC payment

- If Ecorse does not get the $2M FDCVT grant it has requested, Wayne maintains that he can add any increases from MERS to an existing judgement levy.
- Wayne maintains that the annual ARC is in the 5-year budget.
- MERS Ecorse account is funded at 47 percent. City losing 3 percent annually in assets.
- Ecorse is short $29M with MERS.

Flint – Dec. 2 – Mayor Weaver, N. Henderson, Nelson, F. Headen, W. Lamphiery, E. Cline, P. Dostine, D. Hudson, A. Heimann

Greetings from Mayor Karen Weaver

- 18 Minutes late
- Just released her 100 day plan

Greetings from Flint City Council President Nelson

- Is encouraged by the Mayor's focus on engaging youth

DPW position vacancy

- Have several competent people heading Department's in the DPW
- Had first major snow event, went very well
- N. Henderson is looking for someone to fill in as Interim DPW Director, preferably someone with no aspirations to hold the job permanently
- Former Director is transitioning himself out, and getting paid hourly to do so

Updates on grants

- Policing Grant
  - $1.1 Million for program, might also include an additional $200k for additional officers
- Suspension/Expulsion
  - Program to help teens who have been expelled from school complete their High School Degree
  - Unclear whether or not this is a new initiative, or if it is part of another grant that has been mentioned in past phone call

Water updates

- Meeting with DEQ weekly
- Received all of the parts to introduce "Ortho Phosphates" into the water system, but are going to have to test it first. This process is on track, and should be done within the next few weeks.

Charter Commission

- Application submitted for a grant from the MOTT Foundation for $250,000 was denied, the Foundation did not want to appear to steer this document
- N. Henderson does not want to ask for this money from the State, though she acknowledges that this is important, she does not feel that it should take priority over other asks from the State of Michigan

Public Safety

- Both Police and Fire Chiefs are on task to accomplish their longer term goals established for them by the City Administrator
- Fires continue to decrease from previous years (from 400 last year down to 299 this year). This has the potential to jeopardize some of the funding that they receive to help with the Fire Department

Hamtramck – Dec. 3 – K. Powell, P. Dostine, D. Van de Grift, A. Heimann, D. Hudson

Council

- Katrina still very positive about the two new members on council.
- One member will be meeting with Bhama to understand the budget.
- Next week MML training in Southfield; new members attending.
- Katrina heard while she was away last week on vacation, "Anam" on council tried to bring forth a resolution to evaluate her.

Human Resources

- BS&A. Katrina is pursuing BS&A (payroll administration) training for her administrative assistant and accounts payable person.
- Currently, Katrina said the city payroll is calculated by hand. Unacceptable. Every pay period a mistake or two is made.
- BS& A has a payroll module which Hamtramck personnel just need to know how to use it.
- No work being done on the HR side at all currently because the current vacancy.
- Meanwhile Katrina has listed the HR director vacancy on MML. Has received 5 applicants. Katrina wants to hire a consultant to organize and standardize the HR department which has been largely allowed to fall into disarray. After which she wants to fill the vacancy.

CPI

- The city sent letter to CPI arguing that CPI needs to comply with the contract and complete / clean-up 8 separate jobs. CPI filed a breach-of-contract lawsuit against Hamtramck Nov.23. Hamtramck wants out of the contract. Hennessey Engineering has been documenting CPI's poor work quality, helping the city's case to release CPI. Bottom line: Katrina said CPI overcharges for their work, and does poor quality work.

Audit

- Audit has started. Still too preliminary for any numbers
- Audit discovered Detroit owes $500K to Hamtramck. Hamtramck wants to book as a revenue this year. Drew to call Bhama, inform city that Treasury can help. Called a "deferred revenue".

Election fraud

- No update.
- Katrina spoke with Judge Paruk. The judge listened to the allegations. Said he would take them up to the deputy-county prosecutor.

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.

- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.

- New water bills with the new water and sewer rates have been sent out to the customers.

- Wade-Trim has opened its customer service center on Woodward Avenue.

- BSA software installation has been completed.

- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.

- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Nov. 19 – M. Stuhldreher, R. Byrne, A. Heimann, D. Hudson, P. Dostine

Election results commentary

- Mayor. Mark said he's new to politics, the attorney that represented the residents in the water rates lawsuit which prevailed in the lower court but was overturned in the Circuit Court.
- Council and Mayor. Mark reported that the new members want to return to a strong mayor form of government. They would do this by changing the city charter. There has also been some talk, Mark reported, that they want the mayor to also assume city manager responsibilities. Or, they want to hire a city manager and not do a national search.
- The three incumbents whom are no longer on council (which includes Mayor Hampton) take with them 50 years of combined experience.
- Mark reported that the new council and mayor are less inclined to support the consent agreement. Treasury should not be surprised if it receives a letter from the new mayor requesting that the consent agreement come to an end.
- Perhaps Mark and the new mayor will come up to Lansing to meet with Treasury officials.
- Mark has planned an orientation for the new members on council. Five of the seven have already been scheduled for a MML training class. The two that are not going are incumbents. Mark requested grant dollars to cover the expense for sending council to the forthcoming February MML conference in Frankenmuth to get both Level One and Two training.

Parks and Recreation millage commentary

- This was a renewal millage (raises $400K annually for 10 years) that voters approved. It basically means that the status quo is maintained; the millage keeps the doors open. Parks and Rec is still stressed. Mark noted that 25% of the millage goes for heat and electricity bills.

Senior Services millage commentary

- Millage will raise $200K annually for 10 years. This is a new millage.

RRC (Redevelopment Ready Certification) designation

- The city is in the process of updating its Master Plan. In the process, those working on the plan are mindful to incorporate MEDC requirements and criteria necessary to be awarded RRC certification.

Lincoln Park – Nov. 25 – B Coulter, M. Coppler R Byrne, D. Van de Grift, E. Cline, A. Heimann, D. Hudson, P Dostine

- **Audit/ Impact on budget/ 2-year and 5-year budgets**
    - City surprised by final audit numbers. Came in a lot better than anticipated. Why? 1) The chargebacks from Wayne County were lower than expected. Therefore

property tax revenue was higher. 2) The court generated $800K for Lincoln Park. The city had only budgeted $500K. 3) The sale of the cell tower.
    - Next year the city is already anticipating two positive outcomes: 1) Another check from the cell tower sale, and 2) 230K rebate from BCBS.
    - With a better-than-expected audit, Lincoln Park wants to hire more police, build-in to the new contract a 3 percent pay raise for police so as to keep them from leaving the department.
    - Brad said as soon as next week, he will have a draft of the 2-year budget to Treasury because the audit is completed now. The 5-year is close to completion as well.

- **Patrol and Command contracts**
    - Patrol union voted on and passed its contract. There is a 3% raise built in. Command contract to be voted on in the next couple of weeks. There is a salary increase in the Command contract we well. Both will be forwarded to Treasury upon adoption of the Command contract.
- **MERS**
    - Brad said the city makes monthly payments to MERS, therefore the city is already behind in making the additional $800K that MERS wants.
    - Brad and Matt both agreed that the cushion Lincoln Park has right at the moment would be wiped out if the city made the $800K payment to MERS. They do not want to put the city in that position. "Just because our head is above water doesn't mean we have extra money," Brad said. Both agreed that managing Lincoln Park financially in the short term will better position it to address longer term issues like the underfunded pensions.
    - A judgement levy is a possibility.

- **Final Order**
    - A couple of tweaks were made to the Final Order, Brad said. Otherwise it looked good. The Headlee over-ride was pushed back to 2018 so as to not create millage fatigue. The city will ask for a 3-year renewal on the 3.45 millage prior to the Headlee over-ride.
    - Also in the Final Order, Brad capped contributions to pensions at not-to-exceed $8.75M in any one year. The Board can vote a higher contribution.

- **CDBG Consolidated Plan**
    - The new plan is "underway" according to Matt. Treasury has agreed to help the city strategize about the plan in the development process, align future block grant activities, for example, with the city's revitalization plans.

- **RTAB**
    - Names have been forwarded in Treasury for further vetting.

Pontiac – Dec. 4 - R. Byrne, R. Widigan, Mayor Waterman, Deputy Mayor Jane Bais-DiSessa, J. Sobota, N. Narzarko

- **Weekly Priorities:**
  - City received a grant from MSU to work on Rails to Trails.
    - City will be going after more grants in the future.
  - Council wants the DPW Director to come before council to discuss the repairs to the bridge by the Silverdome.
  - Jane and Joseph have been meeting to work on projects.
    - Jane is currently working on two projects.
  - The Council adopted three charter amendments that will need RTAB approval by December 15, one day before the RTAB meeting. City would like to have a special RTAB meeting next week.
  - Nevrus is no pleased with the City's auditor (Rehmann), lack of timeliness, the auditor waited until the last minute (last week) to send the City question.
    - Rehmann is using people who do not have any governmental accounting experience.
    - The City will be talking with the partner (Mark Tschirhart) overseeing the project.

- **$6M with Gray Financial Group:** Waiting on an assessment from the legal department.
  - No changes as of yet, still searching for a new financial advisor.
  - Likely no change, since they are locked into a 10 year contract.
  - Nevrus feels that there is risk involved.
  - Litigation is on-going, for violation to SEC laws.

- **OPEB Mediation:** City is now in contact with Fred Headen.
  - New chair of the GERS Board, he is the former CFO at the Doctors Hospital.

- **Phoenix Center:** It's rumored that the owner would like to get an appraisal of the Center.
  - Contracts to do a structural assessment, they have been signed and are due back January 15.

- **Budget process:** Working on the budget, would like to submit to the budget to Treasury next week.
    - Once received from Treasury – it will be sent in whole to the Council.
  - Will offer to set up study dates for the budget with council.
  - City received additional ACT 51 money for the roads – it has been factored into the budget.

Royal Oak Township – Nov. 16 – R. Burgess, N. Fedewa, . Byrne, P. Dostine, A. Heimann, D. Hudson

- **'15 Cash Flow**
  - Was completed Friday, Nov. 13. ROT is awaiting township Treasurer to weigh-in. Will then forward to Treasury. Revenues over expenditures expected to be $25K.
  - Treasury can expect budget amendments to be submitted by the township sometime early December.

- **MERS**

  - Township is not certain if it will now disperse the $600K back to MERS or Oakland County Govt. or keep it for now. The money was originally booked as a revenue in 2014, put into general fund. The township accountant maintains that the money is not in the '15 Cash Flow projection or the '16 Budget; the $600K has its own fund line. If the funds are invested, a budget amendment would be required.

- **MSHDA – ROT meeting scheduled for Nov. 17.**
  - Treasury will be at the 8:30 AM meeting.

- **FY '16 budget**
  - The '16 budget was advertised in the Saturday, local paper. Runs for 7 days through Nov.21. Board is meeting Nov. 23. At 6:45 PM, public comment period will take place. At 7:30 PM, the Board will vote to pass the budget. It's unclear if the Board will be adopting the appropriation ordinance at the same time.
  - ROT said they will forward Treasury a line-item version of the '16 Budget. A few weeks back, Treasury was sent a "budgetary center" budget.
  - Fund balance for '14 budget is approximately $212K. Township is expecting something similar for '15 Budget.

- **Police Update**
  - Robert has not heard from Oak Park regarding the draft Police Service Agreement. Township has till Dec. 30th to formalize some kind of agreement with a local unit of government to provide police services or risk losing the $217K.
  - Supervisor Squalls has been meeting with Hazel Park, post-election, to discuss a potential police service agreement. No deal yet. Robert is going to reach out to Hazel Park as well.
  - Robert reached out to Ferndale one more time, recently. He said Ferndale is not interested in providing contractual police service to the township.

Subject: Flint DWRF Loans
Attachments: Flint Loans 12.4.15_DEQ.XLSX

Tom,

Below is the link to the Detroit News article from yesterday regarding Rep. Kildee push to forgive the DWRF loans. I have also attached is the information sent to EPA (Steve Marquardt Region 5) DEQ on Friday showing the outstanding balances of the Flint DWRF loans.

http://www.detroitnews.com/story/news/politics/2015/12/06/loan-forgiveness-sought-flint-replace-lead-pipes/76845170/

As we discussed, the fund simply cannot forgive the loans as they are pledged to bond issues. Further, any loan not collected will have an impact on future capacity.

Thanks
John

May need new Reliability Study for DWRF Loans ← Asst State to PAY

Flint –Weekly Call
12/09/15

Present:
Mayor Weaver
N. Henderson
Council President Nelson
W. Lamphiery
R. Byrne
E. Cline
P. Dostine
D. Hudson
A. Heimann

Not Present:
F. Headen

Water Issue:

1. EPA- Corrosion control updates are happening daily
2. "Spill containment" is final step before corrosion control
3. Will start corrosion control "today or tomorrow", but to date, they have not yet introduced the anti-corrosion Ortho phosphates.

Public Safety:

1. Homicides are up in Flint. N. Henderson is confident that the new initiatives and partnerships will help reduce the number of violent crimes in the City, but these initiatives have not started yet.
2. Fires are down in the City significantly.
    - Concerns that this drop will affect their ability to receive federal grants
    - Looking for funding to receive an "Areal Truck" which will help them reach the tallest building in the City. Right now, any fire in that area requires assistance from partnerships with other communities. This type of ladder truck will cost and estimated $1M at least.
3. Dispatch arrangement is "working well":
    - N Henderson told a story about meeting with a patrolmen who told her that he liked that they check in every hour.
    - Mayor sits on the council as the representative from the City

Legal issues:

1. Lost current head of counsel (did not catch the name)
    - Will be filled with an interim, Tony Chubb. Chubb is currently the interim head of Human Resources
    - Vacancy as interim in HR will be filled by Charlie Mclendon, who is the City's Labor Dispute counsel

2. Water litigation
   - Current lawsuit to stop the city from collecting water bills had been adjourned on December 8th, will be back in court on the 18th
   - Unclear whether or not this issue will be decided before Christmas
   - **Have submitted a letter of request to the Treasury to help them pay for legal fees in this case**

Financial issues:

1. Still have a spending freeze in the City
   - Delinquent water bills are still not getting paid

2. State revenues, loan sources
   - City and Representative Kildee are looking for loan forgiveness from the State
   - Have had meetings with the DEQ to discuss Revolving Loan Fund – "Green Projects"
     - Fund requires that the city have a "reliability study" done, and though the City already has a standard reliability study conducted, they are required to do a special one. This may result in them asking for some money from the Treasury.
   - Audit has been completed, should have a small positive general fund fund balance.

Public Relations

1. Jason Lorenz "no longer works with the City"

2. Townhall meeting
   - **Both the Mayor and N. Henderson attended, as well as over 200 participants**
   - Topics/presentation included: Water, Public Safety, Economic Development (Though there wasn't much time to talk about ED)

CITY OF FLINT

RECEIVERSHIP TRANSITION ADVISORY BOARD MEETING

DECEMBER 9, 2015

2:00 p.m.

Meeting before the RTAB Board at 1101 S. Saginaw, Flint, Michigan, on Wednesday, December 9, 2015.

BOARD MEMBERS PRESENT:

Frederick Headen - The Chairperson
Robert McMahan
David McGhee
Beverly Walker-Griffea

FROM THE CITY:

Mayor Karen Weaver

Kerry Nelson, City Council President

Vicki VanBuren, City Council Member

Eric Mays, City Council Member

Natasha Henderson, Administrator

Jody Lundquist, CFO

OTHERS PRESENT:

R. Eric Cline
R. L. Mitchell
Brian Larkin

REPORTED BY: Mona Storm, CSR# 4460

Flint, Michigan

Wednesday, December 9, 2015

2:02 p.m.

THE CHAIRPERSON: The meeting will please be in order. The time is 2:03.

First item of business roll call, please. Let the record reflect that all four members of the RTAB are present.

Item B, the Approval of the Agenda. I wish to note two amendments to the Agenda:

One is under New Business, Item C 1, Resolutions of the City Council meeting of October 12th, 2015, Resolutions 872 and 875 were already approved by the RTAB at its October meeting, so please remove those two resolutions.

And then, secondly, with regards to -- still under New Business, Resolutions from the Regular City Council meeting of November 9th, there are four resolutions listed there. But, upon further review, there were no actions taken by the City Council at that meeting that requires any approval by the RTAB so we'll strike Item Number 3 in its entirety.

Are there other additions or changes to the agenda, for this afternoon's meeting?

If not, is there a motion that the motion --

that the agenda, as amended, be approved?

MR. McMAHAN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: Without objection, the amended agenda is approved.

Item C, the approval of the October 14, 2015 RTAB meeting minutes. There's Attachment 1. Are there any corrections or additions to those minutes?

If not, is there a motion that the minutes of October 14 be approved at written?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Without objection, minutes of October 14 are approved.

Item 2, Unfinished Business, there is none.

Item 3, New Business, we have a standing agenda item for the Mayor and City Council President. We wish to welcome the new mayor who's here with us this afternoon.

Madam Mayor, we're glad to have you here. If you have any comments you'd like to make to this Board, please feel free. We're not going to hold you to the regular two minutes under Public Comment.

MAYOR WEAVER: Well, thank you. And I am

glad to be here. And I'm glad to have had the opportunity to now have met everybody on the RTAB. Some of you I knew and now I've met everybody so I just wanted to say I'm glad that that's happened now.

What I did was to go through the last set of minutes to see what had been reported out on so I did want to give an update about the last report. And, if you look at that, it was, of course, talking about water.

So I do want to let you know that water is still our top priority here in the City of Flint. And, while we have made the move to go back to Detroit water, we still have issues with lead exposure. And so one of the things we have to be mindful of is that the community is still taking the necessary precautions, we don't want them to get comfortable and relaxed and think, okay, we've made this switch and everything is okay. So we want to keep that up in people's mind.

But I have met with the State and what they have said is that they've agreed to continue to support the filter program. And, in fact, when we had our Town Hall meeting last night, we gave some out. And what we're doing differently is we're giving the replacements out along with the filters. But they have agreed to continue to support the filter program, so

we're pleased about that. We've got to continue to monitor the Detroit water and utilize the best technical expertise that we have available.

One of my concerns is that we know that, when the phosphate gets added, what we've been told is that there's going to be a visual impact and, while that's okay, I think it's going to be alarming to the community because they're going to say that, "You can't tell me cloudy water is good."

And so one of the things we know we have to do is we're going to do an increase with our PSAs because we do want to let them know ahead of time what to expect and -- but -- but that's the concern is -- is the trust factor.

So we're trying to work on that trust factor and let people know what's going on. And we've been doing -- I think -- I believe we've been doing a really good job with notifying the public and letting them know what the issues are and what we've been doing and the necessary steps that we've been taking. But I know that's going to raise red flags for them, even though we know that's what's to be expected.

And what I was told was that that would last anywhere from two to four months before we get to that maintenance dose. So we just need to let the public be

aware and we can continue.

And when I spoke with Lynn Meyers and Julie Wells, they're going to continue that lead education program. But, because of everything that's going on, we do know that we still need State and Federal funding to help deal with this problem. So we're going to be working diligently towards that accomplishment. Flint needs help and we know that we don't have the funds necessary to be able to make all of the changes and to provide the supports that are needed.

So that's just my update from the last report that was given. So I did want to have the opportunity to share that with you and let you know what our concerns are and what we're doing.

Thank you.

THE CHAIRPERSON: Okay. Thank you.

MR. McGHEE: Thank you.

THE CHAIRPERSON: Thank you, Madam Mayor.

Council President Nelson?

MR. NELSON: Good afternoon.

THE CHAIRPERSON: Good afternoon.

MR. NELSON: I think most of you know me. But, since we had met last, I've took over the responsibility of -- I've worked with our new

Madam Mayor, the City Administrator, we've come here and we've talked and meet.

And briefly, you know, water is our top priority; the Mayor stressed that from day one in her Town Hall meeting, she stressed it, again, to bring that trust back in this community and I think that's what we want across the board.

I will be at these meetings. I will not take this mic unless there is a difference in opinion. But, other than that, I will be here. I'm at your disposal, if you need us. Council Member VanBuren is here and Council Member Mays is always here. So you do have Council here present at all times.

Thank you.

THE CHAIRPERSON: Thank you.

Item B is the proposed 2016 Meeting Schedule for the RTAB, which we have an Attachment 2. Any questions or comments about that?

MR. McMAHAN: Not at this time.

THE CHAIRPERSON: Is there a -- a motion, then, that the proposed meeting schedule of 2016 for the RTAB be approved?

MS. WALKER-GRIFFEA: So moved.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

Item C, under New Business, we have Resolutions from several City Council meetings to approve. We'll begin with those resolutions from the Regular City Council meeting of October 12, 2015, Resolutions 828.1, 863, 864, 865 and 876. Were there any questions or comments with respect to any of those Resolutions?

MR. McMAHAN: No.

THE CHAIRPERSON: If not, is there a motion that those Resolutions be approved?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MS. WALKER-GRIFFEA: Support.

THE CHAIRPERSON: Those in favor, will you please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

From that particular meeting, we did pull Resolution 866, which was a budget amendment to the

Water and Sewer fund for fiscal year 2016. I thought we would use that as a vehicle to have discussion or at least a status report from either the City Administrator or the Finance Director regarding the Financial condition of those two funds.

MS. LUNDQUIST: Good afternoon. The budget amendment that is before you, the first quarter, recognizes the City's anticipation of adding an increase in the uncollectible accounts that the City anticipates as a result of the Preliminary Injunction Order.

It also includes or it is offset partially by a decrease in the capital improvement projects that were immediately identified to be eliminated with the anticipation of not only the loss of revenue from uncollectible accounts but with the specifics in the Preliminary Injunction Order that required us to reduce our rates. So, at this time, it's over $600,000 per month that the City is not billing as a result of the Preliminary Injunction Order.

Obviously, that has had a significant impact. We tried to anticipate those things with the first quarter budget amendment in carrying out the Preliminary Injunction Order and moving forward with issuing shut-off notices. It was identified that our

initial estimates of uncollectible accounts was most likely low. We're still waiting for final judgment from Judge Hayman on -- on the case.

But while we continue to act in compliance with the Preliminary Injunction Order, the amount that was set aside for us to be able to identify those accounts that had fallen delinquent since we issued bills with the reduced rate structure was -- we had outstanding 11.6 million. So we had identified 8.6 million for the initial first quarter budget amendment but it was, in fact, $11.6 million that we had outstanding as of August 17th.

And especially at September 1st when we reduced the rate structure to move forward with processing shut-off notices, that we anticipated not being able to collect because we cannot enforce collection with the shutoffs, for those.

We have seen a drastic uptick in receipts since our shut-off notices were issued last month and began to be due on December 1st. And if you'll bear with me one second.

For instance, without the ability to enforce payments through issuing and -- issue shut-off notices and then proceeding with those shutoffs, we have seen a drastic decrease in the number of payments we were

receiving per day. At the end of October, we had been down $4 million. I monitor this on a weekly basis so they're actual cash receipts.

So, from the period August 7th, when the Judge said that we could no longer issue shutoffs for delinquent accounts, through the end of October, comparing 2015 to 2014, we collected $4 million less in payments. That averaged at 1. -- at about 135 people less per day paying their bills.

I looked just briefly before this meeting, anticipating there might be a question. So, just for the month of November, we have an average of 335 people paying on their bills per day compared to 439 people the year before.

But, with, then, the public awareness that we had tried to raise when shut-off notices were mailed, we saw an increase just in the first week of December when those shut-off notices then became due, of 681 payments per day. So we did have people that did recognize that they had not been making payments and they came in and they started paying on those shut-off notices.

And that's about on par, exactly what we had the prior year. So I think that reflects greatly the City's need to be able to enforce payments and the fact

that it is an effective tool. So we hope that that trend now continues.

THE CHAIRPERSON: Is -- the $600,000 per month item that you mentioned, is that Water and Sewer combined or is it --

MS. LUNDQUIST: Correct. So the City reduced, per the Preliminary Injunction Order. And I can grab that language if you'd like me to read it specifically.

The Preliminary Injunction Order stated that the City was enjoined from charging and collecting Water and Sewer rates that include the September 16th, 2011, 35 percent rate increase. So the City took this language to mean that we were then required to remove that 2011 rate increase from our current per-unit rates and we did so for both water and sewer.

It was our preliminary charges; that's not that we took our current rates and reduced them by 35 percent, we took the dollar amount of that increase back from 2011 and removed them from our current rates because the City doesn't increase rates, we set rates.

So we don't say, okay, we're going to raise rates 35 percent this year on top of what they were last year, we don't raise them 12 percent the next year based on what they were. We say, No, we had this rate

and now we're setting this new rate. And then, in communicating that change to the public, we refer to it as an increase because people want to know where they're going to be hit in their pocketbooks, they want to know, "What does this rate increase mean to me?"

So -- if that answers your question.

THE CHAIRPERSON: And do you anticipate that the Water and Sewer funds will have sufficient cash to operate through the remainder of the current fiscal year?

MS. LUNDQUIST: We have through the remainder of this current fiscal year.

THE CHAIRPERSON: Do you expect that it will?

MS. LUNDQUIST: Yes.

THE CHAIRPERSON: Okay.

Yes?

MS. WALKER-GRIFFEA: I -- I have two questions for you.

MS. LUNDQUIST: Okay.

MS. WALKER-GRIFFEA: When I looked at this, I was wondering, where is the budget amendment for the reduction to the expenditures?

MS. LUNDQUIST: That -- let me turn to the page.

That's rolled into the appropriations line

item. So, if you'll look to underneath the Sewer fund appropriations, that's where the vast majority of those reductions occurred. Because we do have to keep in mind that it is our top priority to be ready and prepared to accept KWA water when it comes online and there is a significant amount of capital improvements.

So you do not see a drastic reduction in the water fund but in the sewer fund and sewer reductions appropriations of $3.8 million, that's in the second column, under First Quarter, Proposed Amounts, and those are the changes. So it goes from -- the appropriation went from 32 million to 28,5.

MS. WALKER-GRIFFEA: So, then, that is my second question: How did you figure the analyze -- the analyzed budget is that much when you're not taking in that much in that first quarter?

Because, if you did that times three, it would be much lower with what the expectation would be at the end.

MS. LUNDQUIST: I don't understand your question.

MS. WALKER-GRIFFEA: So I thought that you figured out, from the first quarter, what you're predicting it would be at the end, what you will take in, which seems to be a considerable amount depending

on what you took in the first quarter. Because, usually, you would look at that first quarter and then if you're doing a budget amendment, you would kind of base your prediction from that, which was very low, like 2.4 million, I think --

MS. LUNDQUIST: Right.

MS. WALKER-GRIFFEA: -- was the first quarter.

MS. LUNDQUIST: So are you talking about our projected revenue or are you talking about our -- the capital improvements that we eliminated?

MS. WALKER-GRIFFEA: The projected revenue.

MS. LUNDQUIST: I'm sorry, I misunderstood your question.

The projected revenue is shown as a decrease in charges for services on both the Water and Sewer fund, you could see "Charges for Services"; that's the second line item under Revenues for the Sewer fund. If you go over, that's a decrease of 5.9 million there. And then, under "Water fund, Charges for Services", a decrease of 8.6.

MS. WALKER-GRIFFEA: So you think that you're going to get more, eventually, coming in?

MS. LUNDQUIST: No. We hope that we stabilize our collection rate. I mean, at this point,

with the Preliminary Injunction Orders, we will not be able to do anything regarding rates. We can just only hope that we start collecting at a higher level than we have been, once we have the ability to enforce payment through shutoffs but we do not. And the -- I anticipate what I had said was enrolled into the charges for services. So those negative numbers would appear, the negative 5.9 and the negative 8.5. That takes into account two things: It takes into account, one, the fact at that we believe that we will have no ability to collect the outstanding accounts at the time of the Preliminary Injunction Order, and also the reduced revenue that we won't be able to bill.

So the -- at the time, our projection was we had $8.6 million that we will not be able to collect as well as we've had to reduce what we had originally estimated our total billed revenue would be by over $600,000 a month. So these line items include those two items, the uncollectibles as well as the reduced billed rates.

Oh, okay. So the City Administrator just asked me to note that part of the reason we see this, the zeros at the bottom of the Net Revenues in Appropriations is because the budget amendment reflects that, in order to balance the budget, this did call for

drawings from fund balance.

MR. McMAHAN: So you're fully offsetting that decrease in revenues with withdrawals from the fund balance and then decreasing it in Appropriations?

MS. LUNDQUIST: Exactly. So the fund balance is ultimately what is absorbing that loss.

MR. McMAHAN: Okay.

MS. WALKER-GRIFFEA: Okay. That makes sense.

MR. McMAHAN: So if I'm reading this correctly, you have a net reduction in revenue of approximately $14 and a half million of which, approximately, 10 -- 10 million is being offset with withdrawals off the fund balance?

MS. LUNDQUIST: Correct.

MR. McMAHAN: And the remaining four is being offset with decrease in Appropriations?

MS. LUNDQUIST: Exactly.

MR. McMAHAN: What are the implications of this in intermediate and long-term stability of the funds?

MS. LUNDQUIST: Devastating. I mean, it should not be under-estimated, the impact that this Preliminary Injunction Order has had on the City's finances. I mean, the fact of the matter is, when I took this position six months ago, we were on the

course for financial stability, we had a balanced budget. It definitely had its challenges in the coming years as we anticipate revenues either to, you know, have either a zero percent increase or a slight reduction and while expenditures continued to increase.

So we definitely knew that there were challenges ahead but we felt that we were on the path. And now with this Preliminary Injunction Order for the Water and Sewer funds, it has completely handicapped our ability to plan ahead, to be able to be proactive with our repairs and maintenance, to be able to address our lines. Even the meter replacement program, which is crucial to be able to accurately bill our customers, we had to place on hold. That was something I know that the residents were excited about, our City staff was proud of and we had to completely place on hold.

MR. McMAHAN: Is it also true, referring to the Budget and Expenditure Report, that that draw on the Sewer fund represents -- from the Sewer fund represents roughly 10 percent of the available fund balance and then the -- on the Water fund, specifically you have a $7 million draw to the fund balance. So that's essentially the fund balance; is that correct?

MS. LUNDQUIST: Yes. So I don't know if -- I mean, Mr. Headen actually smiled when he asked me, you

know, would we be okay through this fiscal year. And I believe we could get by and on track through this fiscal year perhaps but we very quickly would have to address what would happen when the Water and Sewer funds are out of money.

MR. McMAHAN: Is it fair to say that we are -- we are borrowing from the next fiscal year at some level to the health of next fiscal year to maintain a balanced budget this year?

MS. LUNDQUIST: Well, absolutely. I mean, the entire reason why the City has the financial stability ordinances, why the fast-track is naturally for governments to have fund balance reserve, is so that, when there is an event such as a Preliminary Injunction Order, when there are other events such as public health concerns with lead service lines, that the City has some funds set aside that they can respond to those.

We were fortunate enough to have fund balances in both our Water and Sewer funds at the time the Preliminary Injunction Order was issued in order to absorb this tremendous impact on our revenue and selections. But it has then tied our hands to how we would have otherwise been able to respond to the emergent lead issue, let alone anything else that may

come. So --

MS. WALKER-GRIFFEA: I have a question.

THE CHAIRPERSON: Yes?

MS. WALKER-GRIFFEA: If we don't approve this today, what does that do to anything that you're doing with the budget?

MS. LUNDQUIST: Well, so the budget amendments that are in front of you actually reduce expenditures and anticipate the -- let me back up.

So the General Appropriations Act mandates that the -- or that a municipality must adopt a budget amendment when revenue protections fall short of what had been anticipated when originally adopted. So this is the City's attempt, when an event occurs, to immediately take financial responsibilities and prudent planning to do so. We're still operating within the adopted Appropriations Act of the City. We're still acting within the adopted budget but this simply recognizes the events that have occurred.

MS. WALKER-GRIFFEA: Okay. Thank you.

MS. LUNDQUIST: Are there any other questions?

THE CHAIRPERSON: Any questions?

MR. McMAHAN: I have a lot of questions.

THE CHAIRPERSON: Please.

MS. WALKER-GRIFFEA: And I do, too. And I'm wondering, Mr. Chair, if there would be any way that we will be able to table this until we get more questions answered because I'm not ready to vote.

THE CHAIRPERSON: Sure. Is there a motion for that?

MS. WALKER-GRIFFEA: I move that we table --

MR. McMAHAN: Support. I support.

THE CHAIRPERSON: Motion's been made and seconded.

Assuming no discussion, those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Resolution 866 from the City Council meeting October 1, 2015 has been placed on the table.

Next item would be Item 2, Resolutions from the Regular City Council meeting of October 26. We have the resolutions there noted. Any questions about any of those resolutions at Attachment 4?

MR. McMAHAN: No.

THE CHAIRPERSON: If not, is there a motion that the Resolution listed in the October 26 meeting -- Regular City Council meeting be approved?

MR. McGHEE: So moved.

THE CHAIRPERSON: Support?
MR. McMAHAN: Support.
THE CHAIRPERSON: Motion's been made and seconded.
All those in favor, please say "aye".
BOARD MEMBERS: Aye.
THE CHAIRPERSON: Opposed?
Motion is adopted.
Next item, the Resolutions from the Special City Council meeting of November 18, Resolutions were listed at Attachment 6.
Are there any questions regarding those resolutions?
MR. McMAHAN: I don't have any questions.
THE CHAIRPERSON: If not, is there a motion that those resolutions be approved?
MR. McGHEE: So moved.
THE CHAIRPERSON: Is there support?
MR. McGHEE: Support.
THE CHAIRPERSON: A motion's been made and seconded. Those in favor, please say "aye".
BOARD MEMBERS: Aye.
THE CHAIRPERSON: Opposed?
Motion is adopted.
Resolutions from the Special City Council

meeting November 18th have been approved.

Next item on the agenda would be Item D, City Administrator Items. We have two items: Budget-to-Actual for September, under Attachment 8, and October, Attachment 9.

Ms. Henderson is going to speak now.

MS. HENDERSON: I am not going to let Ms. Lundquist address those report specifics. However, I do think that this amendment that was tabled does go hand-in-hand with this, with our financial reporting, in the sense that I would like to clarify that, in tabling this item, it basically -- we have to come forward with the first quarter with all quarterly amendments and this is inclusive of the City taking all of the capital improvement projects off the table and moving those.

So I just wanted to make that clear, that all capital improvement projects, that's what you see, that's what's been affected when you look at the -- the $8 million and then, also -- let me get to 866 and the 5 -- I think 5.9 and then we also we accounted for not filling any of the vacant positions unless they were definitely needed, that would be a position such as -- a position that requires the certification. So I know it's been tabled but I would like for you all to -- I'm

respectfully asking for you all to -- to look at that so we will be in compliance with what has been set forth, that we bring quarterly amendments to the Council every month and they -- I mean, quarterly. And they have approved this amendment because they understand that -- that we had to take the capital improvement plans off the table.

And so, to just prolong that is to say that, at some point, we are going to realize that money and we will be able to do the capital improvement projects but I would like to account for the fact that we -- that's a loss and that's money that we will not recoup and we will definitely not be able to -- if it were recouped, it wouldn't be in this fiscal year.

So we're coming again with a quarterly amendment very soon. We didn't have a meeting last month and this was, I guess, brought to you -- it would have been in October?

So I just don't want us to get in a habit of, like, delaying these things. So I'm respectfully asking that you all will take that off the table and approve it in the sense that the City Council is showing that they are willing to be fiscally accountable and they have even approved that and recognized the decline in revenue and the fact that we

had to take all of the capital improvements that we had planned and move those back and we're also inserting that into the master plan as well.

And so I think it would be good for the RTAB to recognize that the Council is taking responsibility and accountability and actually looking at the fact that the finances don't support that and they've done that and I would just hate to see that the RTAB did not support that. So I just felt compelled to come --

THE CHAIRPERSON: Are the items of which you speak of such a crucial nature that they cannot wait until our meeting on the 13th of next month?

MS. HENDERSON: Yes, I believe so. And this is why: Because we are going to come forward with another quarterly amendment and we need the quarterly amendment that we've brought forth to you now so that we can do another quarterly amendment. Because we're going to -- going to have to continue to do quarterly amendments and we would like those quarterly amendments done in a timely manner, and that's why I would like for this one to be done because this is a first quarter amendment and then we have to do a second quarter amendment, a third quarter amendment and then we have a fourth quarter amendment.

And, just seeing where we are right now, like

close to the end of the second quarter and we don't have a first quarter amendment approved and the Mayor -- I mean, well, the Council had approved an amendment and they understand that we cannot afford the capital improvements and they have agreed that we will not go forward with those improvements.

And they have actually reflected that being fiscally responsible by reflecting that, okay, we're not -- we're taking the capital improvements off of the table, we're not doing any layoffs at this time but we're being responsible and we're saying we're planning ahead and we see what loss we have -- we've had at this time and we are, like, going to go ahead and amend the budget accordingly.

And so I just think that -- that that helps with the Council, with bringing things forward, that actually supports fiscal sustainability and responsibility and accountability.

MR. McMAHAN: Mr. Chairman?

THE CHAIRPERSON: Certainly.

MR. McMAHAN: I think you misread -- I think you misread -- for one thing, you misread our hesitation here. I mean, what that report actually -- and I won't speak for my colleague. Maybe she may have a different take on this.

But what this report and this budget -- for one thing, this is -- these budget amendments are annualized numbers so I'm -- one question I would have is, these will come back with another amendment. Am I to infer from that that you are going to come back for additional amendments to the Water and Sewer funds so -- with, again, annualized totals?

I mean, when a budget amendment is made, it's made for the year's budget for the annual budget, correct, these are annualized numbers?

MS. HENDERSON: To keep in line that that's why we have an ordinance that stated that we must do quarterly amendments, and that is to support --

MR. McMAHAN: Okay, I understand.

MS. HENDERSON: And that's what we're -- we actually have to abide by that if we see that --

MR. McMAHAN: I understand. I understand.

MS. HENDERSON: Okay.

MR. McMAHAN: The question then becomes, the -- the Finance Director for the City has -- has said that these amendments and their implications on the long-term -- on the budget are -- what was the quote, "devastating"?

MS. HENDERSON: Yeah, "devastating". Any bad word that you can use to say that but it doesn't

change.

MR. McMAHAN: But what this Board -- and that this is her inflection in her answer is, "We're okay, This year was not lost on us." We're -- so we take that to understand we're not okay next year. Because these funds, if this trend continues, these funds do not exist in order to do fund balances, exist to support. So I guess, from my perspective, and --

And you may have a very different take on this.

MS. WALKER-GRIFFEA: Not at all.

MR. McMAHAN: -- is that when bringing forth an amendment like this, I would like to understand a little bit better the -- well, since one of the things that this Board is charged with is oversight and -- of the long-term financial health on the City in the transition process, hopefully, to step out of the process.

But, in the interim, one thing I would like to understand better is, how does this, you know -- where does this put us in June?

What is the thinking and what is the advanced planning that's occurring for next year as we go forward?

Is that -- is that --

MS. WALKER-GRIFFEA: Yes. And I think that was what I was trying to ask the Finance Director initially, when I -- when I did ask, did it need to be -- was there anything that would hinder us to -- to table it for another month and she said there was some losses that were set aside but, in the end, there really wasn't, which is why I shared that I wasn't ready, at this point, to do that.

But the other thing is, it sounds like that there may be other amendments coming for the next year and, as we were talking about that annualized number at the end and how it came up.

So, if you're saying that this is still coming, then I'm then now questioning the number we have right now. Are -- is -- are we assured that this is where it's going to be as it was brought to us earlier or do we think that it's not, which then means I really need to understand what's going on.

MS. HENDERSON: And that is -- and that is exactly what -- I understand what both of you all are saying. However, that is why we quarterly amend the budget; because it's no secret that we have pending litigation. That has everything to do with how things could be just, say, in the third or fourth quarter.

MR. McGHEE: I understand.

MS. HENDERSON: So in the first quarter, this is what was projected and this is -- this was a significant impact. And, to get to where we were now, we had not realized the -- all of the loss that we know we would lose in the sense that, as far as our charging, we knew that we would be charging less. So, therefore, that went into, "Okay, we need to take these capital improvement projects out" and then also, "Oh, we have these positions that are vacant, we don't need to fill these -- these positions."

So this is planning ahead, in the sense that we have already accounted for income that we already know we will not receive.

MR. McMAHAN: We understand.

MS. HENDERSON: So it is -- like I just did want to explain that this is planning out and this is what we're trying to, like, ensure that we continue to do. This is -- this is clearly like planning for until the end of the year and even into the next year.

MR. McMAHAN: Let me change the nature of the question. Let's assume that this budget -- we approve this budget amendment and you bring in no further budget amendments forward to us or you bring them forward and they have zeros in the columns, right, so that this is the status at the end of the year. What

is your thinking going into the next fiscal year; how is this --

I guess, is that a fair way --

MS. WALKER-GRIFFEA: Uh-huh.

MR. McMAHAN: How do you see this -- kind of in the longer term, how do you see this playing out?

Because what we don't want -- I speak only for myself. What we don't want to do is get to June of next year and then have this crisis of understanding what's happening to the structure. We would like some -- some visibility into the -- to the trajectory from here. Because you know this is the reality, we know this is the reality. This is ultimately -- I applaud the Council for having -- for codifying it this way. I don't have any problem and -- with what you are saying. I just --

MS. WALKER-GRIFFEA: Right. But I'd like to jump in. I know, when you listen to the City Council, that, when this came up, I want to say that Councilperson Mays talked about what happened in another meeting and how things were explained to them so that they could come to the agreement of this.

We have not had that opportunity.

MR. McMAHAN: I'm with you on that.

MS. WALKER-GRIFFEA: And so I think that, if

we had the opportunity to ask those questions to understand what's being done, then it may be that we could go ahead and approve this without any issues. But right now we have not.

MS. HENDERSON: I guess -- I mean, from -- from where I stand, it's -- it's clear that we are -- under our judgment, we know that our revenues are decreased and so we know to continue with a budget that -- because this is to say that we're going to continue as though the budget that we have is correct, that's in place, that those are our projections and that's where we're going. That is false. And that's why I believe that we should be supporting the amendment of this budget.

Also, it helps us -- we're in budget training now. We have to -- we're due a two-year budget. But -- and to not accept or realize that, hey, our revenues are significantly dropping; two, those capital improvement projects, we have set those aside.

So, even going into the next year, we don't know if we're going to be able to include any of those projects but it helps us for planning for us to be able to adjust based upon projections when we're doing two-year budgets. And so I guess, myself personally, I can't understand because this is looking well into the

future. We didn't look like -- this is not for just one month, this is for what we see as the rest of the year.

However, we cannot predict what is going to happen with, like right now, we -- we have pending litigation about the rates that we're charging now or whether we can do shutoffs. We cannot control that. However, what we can do is project and we are projecting off of what we definitely know we are charging now, which is less. So we can project that.

And then, also, we can look at, like, how many people are paying this time, this year, and then looking back at last year as to how they were paying. So there are a lot of projections in it. And that's what -- with governmental budgeting, with all of your revenue sources, being property taxes and income taxes, those are your main sources. And even with these enterprise funds, you have to project these are business-type funds. And for us to continue with a budget that says, That seems as though we're going to be exactly like we were when we -- when that budget was put in place, with the two-year budget, I just don't understand how we would go forward with this without having to amend this and then we go into budget planning for the next budget. I just -- and I just

wanted to say that, thinking it doesn't have to happen. But I just felt, as the City Administrator, that I should say something because this did take -- this is not planning for one quarter, this is planning for the rest of this year.

THE CHAIRPERSON: Let me just ask you, are there specific questions that we can reduce to writing and submit those and get answers to those questions?

MS. WALKER-GRIFFEA: That's what I thought we would -- I mean, that's how we did it before.

THE CHAIRPERSON: Why don't -- why don't we do this:

Are you agreeable to passing the Resolution with written conditions, one of which would be receiving adequate responses to any further questions that we submit?

MS. WALKER-GRIFFEA: I could do that.

MR. McGHEE: Yeah.

MR. McMAHAN: Does that satisfy you?

MS. WALKER-GRIFFEA: That would.

MR. McMAHAN: I mean, I'm right there with you. I know exactly --

THE CHAIRPERSON: We are -- we are in a procedural cul-de-sac and we're going to back away out of it.

First, is there a motion to remove from the table, the previous Resolution 866 that was tabled a moment ago?

MS. WALKER-GRIFFEA: I move to remove the motion, the tabled motion.

THE CHAIRPERSON: Is there support?

MR. McGHEE: Support.

THE CHAIRPERSON: Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

That motion is adopted. So the result of that motion is Resolution 866 is now before us again.

And so now, as I understand, we're going to entertain a motion to adopt Resolution 866 with the condition that any RTAB member that wishes to do so can submit written questions to, let's say, the City Administrator or Mr. Cline and receive answers back by, let's say, no later than our January 13, 2016 meeting.

Have I adequately stated just what we're looking for?

MS. WALKER-GRIFFEA: Before the January 13th meeting, so we can already have it reviewed.

THE CHAIRPERSON: Okay.

MS. WALKER-GRIFFEA: So I'd say a week

before, if that's fine.

THE CHAIRPERSON: Okay. So roughly by January 6th?

MS. WALKER-GRIFFEA: Uh-huh.

THE CHAIRPERSON: So that would be the motion. Is there a support for that motion?

MR. McGHEE: I'll support.

THE CHAIRPERSON: Any discussion?

If there's no discussion upon the motion, those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

MS. HENDERSON: If I may, sir.

THE CHAIRPERSON: Yes?

MS. HENDERSON: I thank you for offering that consideration, I really do appreciate that consideration. And we will have those to you before the end of December because we have all the information that accompanies this so we will get that to you.

And thanks again.

THE CHAIRPERSON: Please.

MS. LUNDQUIST: I just would like to reiterate her thanks. It helps us procedurally as we do prepare for the second quarter budget amendment

that's proposed in January. So it helps us with our timeline to be able to anticipate and really gauge, you know, where we are and where we're going.

And then I would also like to note that we had an internal staff training for our Directors. It was put on by Dr. Eric Scorsone on Monday afternoon and then Council graciously attended and the hope-found beneficial, my training that -- even so, that was just that past Monday, December 7th, as we prepare to go into our first budget cycle now that the City Council and Mayor are charged with developing a budget.

So that's an exciting time that we're looking forward to and happy to provide you with a timeline that is out laid for the 2016 -- for 2016 for the development of our fiscal year '17/'18 budgets with a three-year projection, that that, as I said, is a process that is now just starting and we kicked it off with training by Dr. Scorsone.

THE CHAIRPERSON: Okay. While we have you here, I think I do have two questions with regard to the budget to actual. We can look at the one for October -- or excuse me -- under the October memo for September, as an example, I wasn't sure that I understood the columns.

And I'm looking roughly at the -- under

revenues of the general fund, the last four columns that are the amended 2015/'16 budget. Now take, for example, income tax as an example, where the amended budget has roughly $13.5 million and then the next column over to the right, Year-to-Date Balance, 2.3 million. Is that the amount that has been collected so far --

MS. LUNDQUIST: Correct.

THE CHAIRPERSON: The amount that's budgeted?

MS. LUNDQUIST: Yes.

THE CHAIRPERSON: And then the next column to the right is available balance, which I really take to mean is the amount that's been budgeted hasn't been collected.

MS. LUNDQUIST: Correct.

THE CHAIRPERSON: Because I assume, with regards to the income tax, the bulk would come in between now and next April 30. So is it -- it's really not the available balance. In other words, it hasn't all been collected and that's the amount that could be spent, it's really the uncollected part of what hasn't -- of what's been budgeted?

MS. LUNDQUIST: Correct. But there aren't -- so, just as a matter of formatting, there isn't a separate column heading when it switches from revenues

to expenditures so available balance is simply showing the amount either not collected or unexpended.

THE CHAIRPERSON: Okay. Okay. Thank you. And then the other item has to do with revenues and expenditures. As I compare fiscal years '15 to '16, the amended budgets, the amount of revenue looks as if it was -- has declined about 6 million -- $6 and a half million, from 57.8 million to 51.3 million. But on the expenditure side, the expenditures year-to-year are projected to go up about 3 million -- 48.3 million to 51.3 million. And I'm wondering what the impact of that is to have a year-to-year projection of your General fund expenditures going up at the same time that the revenues are -- are going down.

MS. LUNDQUIST: Right. So, as I had alluded to earlier, the general reality not only for the City of Flint but for municipalities across the country are that revenues are remaining rather stagnant but expenditures are continuing to increase as we continue to have energy costs, as we continue to have said increases with our union contracts, et cetera.

The large difference that you see that's noted between fiscal year '14/'15 and fiscal year '15/'16 is that we do not anticipate State Treasury to authorize another emergency loan. So there was a

$7 million emergency loan last fiscal year, that's the last line under revenues that we did not budget for it again in fiscal years '15/'16.

So, taking that out of our revenues, you will see that we were rather conservative with our estimates with very little to no increase in our revenue line items but we do take into account those increase for expenditures.

THE CHAIRPERSON: And then I gather from your point that, on the expenditure side, most of these increases are, in one way or another, baked in with your collective bargaining agreements and so forth that you have no control over; is that the point?

MS. LUNDQUIST: Correct. Or our annual payments for our pension systems. So those are known things for which the City does not have control but it's obligated to pay. Or even our emergency loan payments that we did not have last year but we did have to budget for in this current fiscal year.

THE CHAIRPERSON: Okay. Thank you.

Any other questions regarding the items of Budget-to-Actual Reports?

Without objection, then the September and October Budget-to-Actual Reports will be received.

Item 4, Public Comment.

Mr. Cline, anyone that has signed up for Public Comment?

MR. CLINE: Yes, we do have two individuals that signed up for Public Comment. But, before I get to that, just a moment of -- I received a question from the audience and I just wanted to double check because, perhaps, I missed it. And, if I did, I apologize. But did the Board address the resolutions from the November 23rd meeting?

THE CHAIRPERSON: November --

MR. MAYS: That would be Item Number 5 under New Business on the second page of the agenda.

It would be Resolutions 929, 932, 936 and 937.

THE CHAIRPERSON: It appears we did not.

MS. WALKER-GRIFFEA: Yeah, I think Natasha got up and we changed over.

MR. McMAHAN: I thought -- Mr. Chairman, I thought that we had removed those at the beginning.

THE CHAIRPERSON: We had removed Item 3 which would have been --

MR. McMAHAN: Oh, okay. My fault.

THE CHAIRPERSON: But not November 23rd.

Under Attachment 7, Resolutions 929, 932, 936 and 937, any questions regarding those resolutions?

If not, is there a motion that those resolutions from November 23rd be approved?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Motion's been made and seconded. All those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion's adopted.

Now Public Comment.

MR. CLINE: All right. I'm glad I asked. So, all right, we had two individuals that signed up for Public Comment. So I'll just announce them now.

First one will be R.L. Mitchell and then followed by Eric Mays.

THE CHAIRPERSON: Please bear in mind the previously adopted motion of two minutes per individual remains in effect.

Mr. Mitchell, good afternoon.

MR. MITCHELL: Yeah. All I want to say is Merry Christmas and happy New Year and I hope you consider Ms. Henderson's -- and don't table the situation that Ms. Henderson the Financial Management offer you for 2016. Work with her in the new year to

come, as a citizen of Flint.

THE CHAIRPERSON: Thank you.

Councilman Mays?

MR. MAYS: All right. Good afternoon. You know I kind of got excited and, you know, I got a couple notes, so in two minutes I'm going to be flying. Reprimand me to sit down, whatever. But I kind of got excited when I seen you all table that because those are the type of questions that I asked in the Council meetings. If I looked at the expenditures that related to the emergency, I told them, when you bring me a budget amendment to spend 2 million for Detroit water, I want to know if I'm spending 10 or 12 million and then I'm waiting on the State or my foundation to reimburse me or make it plant.

My colleagues, just as you guys did -- I'm going to kind of chastise you a little bit -- they counseled the Finance Committee meeting this past month. And I didn't see the reasons. I know where they was at and what they was doing. I take my job very seriously. I didn't like for you all to cancel the November meeting. If the RTAB is going to be involved in our business, then the RTAB need to have some joint sessions with Council.

They take you all way more seriously than

they take me. I'll try to find out what's happening as it relates to details but, remember, I told you, when they say "the Council", we vote differently. I don't always vote with the majority of the five because I'm like you, if I don't know the details, I'm not ready to rubber stamp it.

So you was on the right track but don't get laxed. If you don't take this responsibility to steer the ship, I don't want to look down the road six months, a year from now and then everybody done fumbled the ball. We got revenues generating opportunities. I told them we could have taken a million out the Water and Sewer fund, distributed bottled water and generate revenue because you're selling bad water now, you can distribute good water and get another million or two.

So I want you all to continue to take it seriously. I got excited, I said, "They're going to table" and then guess what? You did just like some of my colleagues. So we'll see if you get your written answers. I'm sure you will. But I want to see you really get into this finance, just as I'm trying to do. You all seem to have a little more power. You know, I don't believe in RTABs. So let's see what you do.

God bless you.

THE CHAIRPERSON: Thank you, Councilman. I

would just --

MR. MAYS: And that's under the two-minute rule. All of that need to go away.

THE CHAIRPERSON: I appreciate that.

MR. MAYS: Maybe one day we'll really talk.

THE CHAIRPERSON: I just want to correct one thing, which is it's not our responsibility to steer the ship. We're not a legislative body. We're not City Council. That responsibility for day-to-day operations and decision-making for the City rests where it should, with the Mayor, City Council and the City Administrator.

We may be along for the ride, to use your ship analogy, but we don't have responsibility for steering the ship, we basically react to actions that are brought to us by the City Administrator or by the Council.

You won't see us initiating management policy because it's not our responsibility. Contrary to what you may think, our responsibility is really quite limited. Our job is to assist you as Council members, the Mayor and the City Administrator.

But you're not typically going to see us micromanaging and trying to substitute our judgment with your judgment. But we do have certain

responsibilities and, as you witnessed this afternoon, we have to get order to charge those responsibilities, to exercise due diligence of our own. But the primary responsibility for steering the ship resides with the elected officials and with the City Administrator.

At least that's my point of view. But other of my colleagues may have a different point of view and they're welcome to express that.

MR. McMAHAN: No, I absolutely am in concurrence. You know, it's distressing for me to see often in the media and other -- other forms an expression of the RTAB as a legislative body. We are not a legislative body. We do not initiate policy. We do not initiate, we react to. And we have oversight function, as I -- as I understand our responsibility, it's not legislative.

MS. WALKER-GRIFFEA: And I'd just like to say, I think that we are a support and we're here support what the Mayor and what the City Manager's trying to accomplish. And so, for me, when I saw what happened, is that we need -- or at least I'm going to speak for me.

I need more information so that I can be a better support system to move the process on and I guess more timely information as well so I can digest

it and understand what's being brought forward. So I'm running with you, Mr. Chair, that we will be here to ride.

THE CHAIRPERSON: I guess that's probably the four of us are probably more interested in seeing our jobs made irrelevant than anyone in the City of Flint.

MS. WALKER-GRIFFEA: Exactly.

MR. McMAHAN: But that, having taken on that job, we take it, that oversight obligation, seriously. And, to you, we'd like to have that information so that we can discharge our responsibilities as partners and as collaborators --

MS. WALKER-GRIFFEA: Exactly.

MR. McMAHAN: -- appropriately.

MS. WALKER-GRIFFEA: Exactly.

MR. McGHEE: Yeah. And essentially, as a matter of due diligence, if we have some of that information here, it's to that point to make sure that we offer the proper diligence. And even though we don't initiate policy and are responsible for the delegation of resources, it is our charge as well because due diligence in how we conduct our -- just thinking back, since we were initiated, I truly believe that most things that the Council and the Mayor and our City Administrator agreed upon, we never had a problem

with.

I know we tabled an open decision but it wasn't because there was a disagreement I had but it was just to -- actually, to create the space for Council to have conversations with the -- the body requesting those. Because they didn't take that opportunity in first.

So our goal is definitely not to operate in a braided way but, more so, in a lended way until we --

THE CHAIRPERSON: I do want to acknowledge Mr. Larkin who's in the audience who's occupying a chair at this meeting. I want to thank him for his service on the RTAB over these many months and wish him the best in his new position with the City.

MR. LARKIN: Thank you.

MR. MAYS: How did you recognize him with a haircut?

THE CHAIRPERSON: Yes.

MR. McGHEE: Just lastly, I would just like to, once again, welcome in our new mayor.

MAYOR WEAVER: Thank you.

THE CHAIRPERSON: Is there any further business before this Board?

If not, is there a motion that we adjourn?

MR. McMAHAN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: Without objection, we are adjourning.

(Meeting was concluded at 3:08 p.m.)

Tom,

Just checked with Bill Wreising at PC. He is my contact there and knows nothing about it. He is going to ask around there to see where that might have come from, meanwhile...

Keep bugging the AG!

Subject: Flint Cost Assistance Request
Attachments: Assistance Request from Mich Treasury.PDF

To Whom It May Concern:

Please find attached a letter from Mayor Karen Weaver to Michigan Treasurer Nick A. Khouri requesting financial assistance form the State of Michigan with the cost of defending the lawsuit *Larry Shears v. City of Flint*. The financial effects of this lawsuit are devastating for the City while it simultaneously confronts a public health crisis.

We ask that the State of Michigan and our elected officials to please consider the City's request for assistance in order to avoid further harm to the stability of the City government and the people of Flint.

Regards,

--

Treasurer Nick A. Khouri,
Michigan Department of Treasury
Lansing, Michigan 48922

Re: ***Larry Shears v. City of Flint***

Dear Treasurer Khouri:

We are writing to respectfully request financial assistance from the State of Michigan with the cost of defending the above-reference lawsuit. This is a class action that challenges water/sewer rates set by the City. The rates were established, in part, by Emergency Manager Michael K. Brown in 2011. The plaintiffs seek a 35% reduction in rates, as well as repayment of charges that were allegedly illegal. If successful, the financial impact would be catastrophic.

Due to the gravity of the situation, and at the urging of Treasury officials, the City retained the law firm of Miller Canfield to handle its defense. Miller Canfield has an outstanding reputation and is well-suited to litigate this matter. However, a firm of this caliber is well beyond the financial means of the City of Flint. We are at a crossroads that requires careful consideration. We cannot afford to continue paying Miller Canfield, but equally cannot risk failure in this lawsuit.

The lawsuit has already caused devastating financial harm to the City due to rulings by the court. In August, the court issued a preliminary injunction order that is striking in its breadth. Among other things, it compelled the City to reduce water rates by 35% pending the outcome of litigation, and prevented readiness to serve charges.

Under the injunction, the City has been unable to collect past due water bills, leaving $11.6 million dollars of uncollected revenue. The City is losing over $600,000.00 per month, with many customers taking a wait-and-see approach to paying their bills.

In a Hobbesian choice, the City was forced to abandon desperately needed capital improvements. This will further escalate costs and exacerbate infrastructure needs.

In addition, Genesee County Circuit Court Judge Archie Hayman sue sponte ordered the City to repay $15.7 million dollars from its general fund to the water and sewer fund, on the perception that the money was wrongfully transferred. The court's ruling have consistently been pro-plaintiff. Much of the legal work is focused on appellate review.

These financial pressures are rapidly impacting the City. Despite a hiring/spending freeze, the City will soon confront the difficult question of whether to use the general fund to pay for the water/sewer system. This would necessarily compel cuts in its already short-staffed police force.

It is imperative the claims asserted in this case are confronted and reversed. The City needs a strong legal defense in this matter, as the consequences of not prevailing will be drastic.

In August of 2015, the City retained Miller Canfield at the urging of State officials. At that time, it was suggested the State would provide financial support. Unfortunately, that support has been discussed for months, but not yet provided. Legal fees from Miller Canfield, to date, total more than $80,000. The cost of defending this matter is rapidly exhausting the City's litigation reserves. We need help, or will not be able to continue with this level of defense.

Under Public Act 436, the State does not assume liability for the actions of an emergency manager. However, we believe there are practical considerations that call for financial assistance. By ensuring the City has needed litigation resources, the State can guard against a return to emergency financial crisis in Flint. Without those resources, the risk of a catastrophic judgment substantially increases. Thus, helping Flint now is a prudent investment to avoid a more costly enterprise.

Moreover, a substantial portion of this lawsuit relates to actions taken by an emergency manager under the careful watch of the State of Michigan. The City of Flint should not be left on its own to defend those choices.

Over the past four years, the City has made enormous strides in attempting to rectify its financial crisis. Pain was broadly spread to current employees, retirees and residents. The City was forced to do more with substantially less. Our residents received reduced municipal services, but increased their volunteerism. Contrary to the perception of some, the City and its residents have met the challenge of regaining financial solvency issued by each of the four emergency managers appointed by Governor Snyder. We proudly closed fiscal year 2015 with a balanced budget.

We have come far, but now confront a lawsuit that seriously threatens to undermine the enormous work, hardship and sacrifice of the past four years. We need financial assistance to avert that disaster, and we need it now.

Respectfully submitted,

Dr. Karen Weaver
Mayor

CITY OF FLINT
OFFICE OF THE MAYOR

Dort Karen Weaver
Mayor

Sean Kammer
810-237-2025
skammer@cityofflint.com

For Immediate Release

Mayor Karen Weaver Declares State of Emergency

Flint, MI – December 14, 2015 – Mayor Karen Weaver has declared a State of Emergency in response to a man-made disaster caused by the City switching to the Flint River as a water source. This switch has resulted in elevated lead levels in drinking water which prompted both the City and the County Health department to issue a health advisory earlier this year.

Mayor Weaver states that this was one of the things she had promised to do while campaigning for mayor.

Declaring an emergency intends to help raise awareness of the issue that the water is still not safe to drink and activates the City's Emergency Support Plan in order to respond to the crisis.

On October 16 of this year, the City switched back to the Detroit Water and Sewerage Department as the source of water, however lead levels remain well above the federal action level of 15 parts per billion in many homes. Residents are advised to continue using water filters while long term solutions are being developed.

The Mayor will hold a press conference about the State of Emergency on Tuesday, December 15 at 2pm at City Hall.

On Dec 14, 2015, at 3:39 PM, "Tony Minghine" <aminghine@mml.org> wrote:

> Suzanne, Wayne and I spoke briefly about this today and he asked that I include you in this email as you would like be asked to help answer this question. I am assisting the City of Flint as an expert witness in their rate case. I have not yet testified but I did observe a full day of testimony and one of the key areas that the judge appears stuck is what is operations and maintenance costs under the revenue bond act. As I explained to Wayne, one of the key issues is the payment from the sewer fund to their internal service insurance fund. They had a major sewer back up claim and as a result charged the sewer fund 15.7 million dollars to pay the claim. The City is self-insured, so the liability will be borne by the city one way or the other. It is the city's position, and I concur with it, that this was an appropriate charge to the sewer fund and while large, was still part of O&M. If the city wasn't self-insured, they would most certainly be paying premiums and deductibles from the sewer fund. When they made the decision, forced or otherwise to self-insure, the sewer fund assumed that risk as did every other city fund for claims that may arise related to their normal activities.
> My question is whether or not Treasury could offer some guidance or affidavit that would help the court understand that in Treasury's view, this was accounted for and handled appropriately? We are back in court on Friday, so Wayne and I discussed possibly chatting tomorrow. I will be in Lansing and at your disposal if that works for the two of you.

Dear Paul,

Thanks for your time yesterday. Meanwhile today we received notice of a lawsuit recently filed in regards to the City of Flint water system. As you will note, Darnell Earley is a named defendant.

We have notified the carrier and will follow up with the carrier. Meanwhile, we want to circle back on the State of Michigan defending emergency managers particularly when they are no longer the EM at the public entity. If the SOM agrees to defend a former EM's actions, then the professional liability coverage for a current EM will be more attractive to the markets and cost less. In this case Mr Earley is named in a lawsuit for his actions while at the City of Flint and there is a policy in place. We are working on the renewal for his professional liability coverage while the EM at DPS.

Does the SOM want each EM to purchase individual professional liability and charge the premium to the public entity? What public entity and how would we allocate this premium?

Sorry to bring this up, just looking for clarification.

Please call me to discuss any questions.

Good Monday to you,

The carrier has reviewed the complaint from Melisa Mays et. al against the coverage and has prepared this written response. The claim is being denied, Pursuant to the Policy, any Claim alleging, based upon, arising out of, or attributable to the actual, alleged or threatened discharge or release of Pollutants is excluded from coverage. Professional Liability coverage generally does not provide coverage for bodily injury or pollution. Those coverage's are usually provided through the general liability policy of the entity. This denial letter needs to be provided to the City of Flint for notification to the general liability carrier and/or any pollution liability carrier. How do we get this request to the correct person at the City of Flint?

John Clark has been notified of the carrier response. Darnell is not happy about the denial.

As you know, we are working on the renewal for this Friday.

Please let us know who to contact at Flint.

Re:	Insured:	Darnell Early
	ACE Policy No.:	G27158766 002
	Claimant:	Melisa Mays *et. al*
	Claim No.:	JY15J0640574

Dear Mr. Clark:

This letter is to acknowledge receipt of recent correspondence, whereby ACE North American Claims (hereinafter "ACE") on behalf of Westchester Fire Insurance Company (hereinafter "Company"), was advised of the November 13, 2015 purported class action complaint ("Complaint") filed by Melisa Mays; Michael Mays individually and on behalf of three minor; Michael Mays; Jacqueline Pemberton; Keith John Pemberton; Elnora Carthan; and Rhonda Kelso; ("Plaintiffs") seeking damages against Darnell Early ("Insured").

A claim file has been established under the Policy, with the assigned claim number of JY15J0640574 (hereinafter "Claim"). Please refer to this claim number on all future correspondence regarding this matter.

The purpose of this letter is to advise you that based upon a review of the materials provided to ACE, we have determined that the Policy does not provide coverage for this Claim, and thus, the Company has no obligation to either defend or indemnify the Insured. If you have not done so already, we strongly urge you to immediately notify any other insurance carrier of this Claim that may provide the Insured with coverage in this matter.

SUMMARY OF THE CLAIM

Please understand that ACE, on behalf of the Company, has not made any determination as to the validity of the above-referenced matter, nor do we assert that any liability exists. We reference the allegations herein only to describe the matter submitted for coverage.

Based upon the information received to date, it is ACE's understanding that Melissa Mays and her family; the Pemberton Family; Elnora Carthan; and the Kelso family lived in Flint Michigan, and allegedly were unaware of the toxic nature of the tap water supplied by Flint between April 18, 2014 and fall of 2014. Each family and Ms. Carthan allege having sustained high levels of lead and copper in their bloodstreams, brains, bones and other organs; skin lesions and hair loss; chemical induced hypertension; autoimmune disorder; neurological disorders such as "brain fog" and memory loss; and depression, anxiety and post-traumatic stress disorder. Each family and Ms. Carthan also allege property damage as a result of the toxic water supply.

It is alleged by Plaintiffs that the City of Flint decided to use water from the Flint River, which the City was allegedly aware required anti-corrosive treatment to prevent lead, copper and other heavy metals from leaching from lead, copper and iron based water lines. It is also alleged that Flint officials and the Michigan Department of Environmental Quality ("MDEQ") were aware of the presence of elevated levels of Trihalomethanes in the water and above the legal limit.

It is further alleged that Flint City Council members demanded the Insured, Emergency Manager for the City of Flint, to reconnect with Detroit water, but that the Insured refused to do so, and continued to mislead Flint residents to believe that the water was safe. The Insured's tenure as Emergency Manager ended in January of 2015. The Plaintiffs have filed a purposes Class Action Complaint against various Flint City Officials and MDEQ officials, as well as the Insured, for violation of 42 USC Section 1983 of substantive due process for state created danger and bodily integrity.

THE POLICY

ACE issued ACE Miscellaneous Professional Liability Policy No. G27158766-002 to the Insured for the period December 18, 2014 to December 18, 2015 ("Policy"). The Policy has a limit of liability of $1 million per Claim, subject to an Aggregate Limit of $1 million with a per claim retention of $2,500. The Policy provides a Retroactive Date of December 18, 2013 with respect to the limits of liability up to $1 million each Claim and in the aggregate. The Policy requires that ACE defend covered actions. Claims Expenses (including defense costs) are a part of, and not in addition to, the limit of liability.

With respect to this matter, we note the following pertinent policy provisions. Any terms that appear in Bold Face Type have special meaning. Please refer to Section III of the Policy (Definitions) for any terms herein that appear in Bold Face Type and are not defined below.

I. INSURING AGREEMENT AND DEFENSE

a. Insuring Agreement

The **Company** will pay on behalf of the Insured all sums in excess of the Retention that the **Insured** shall become legally obligated to pay as **Damages** and **Claims Expenses** because of a **Claim** first made against the **Insured** and reported to the **Company** during the **Policy Period** or if elected, the **Extended Reporting Period,**

by reason of a **Wrongful Act** committed on or subsequent to the **Retroactive Date** and before the end of the **Policy Period.**

I. DEFINITIONS

A. **Claim** means:

i. A written demand against any **Insured** for monetary or non-monetary damages;

ii. A civil proceeding against any **Insured** for monetary damages, non-monetary damages or injunctive relief, commenced by the service of a complaint or similar pleading;

iii. An arbitration proceeding against any **Insured** for monetary damages, non-monetary damages or injunctive relief;

iv. A civil, administrative or regulatory investigation against any **Insured** commenced by the filing of a notice of charges, investigative order or similar document;

v. A **Disciplinary Proceeding;** including any appeal therefrom

B. **Bodily Injury** means

i. any physical injury to the body, physical pain, sickness, disease, and death. **Bodily Injury** also means mental injury, mental anguish, mental tension, emotional distress, pain and suffering, or shock, whether or not resulting from injury to the body, sickness, disease or death of any person.

C. Pollutants means:

i. Any substance exhibiting any hazardous characteristics as defined by, or identified on a list of hazardous substances issued by the United States Environmental Protection Agency or any federal, state, county or municipal or local counterpart thereof or any foreign equivalent. Such substances shall include, without limitation, solids, liquids, gaseous or thermal irritants, contaminants, vapor, soot, fumes, acids, alkalis, chemicals or waste materials. Pollutants shall also mean any other air emission, odor, waste water, oil or oil products, infectious or medical waste, asbestos or asbestos products, silica or noise.

D. **Property Damage** means:

i. Physical injury to, or loss or destruction of, tangible property, including the loss of use thereof; and

ii. Loss of use of tangible property which has not been physically injured, lost, damaged or destroyed

II. EXCLUSIONS

The **Insurer** shall not be liable for **Damages** or **Claims Expenses** on account of any **Claim**

i. For **Bodily Injury** or **Property Damage** *Section III.B. Contingent Bodily Injury, Property Damage ("For" Preamble) with Sub-limit of Liability*

1. Solely with respect to that portion of any **Claim** attributable to **Bodily Injury** or **Property Damage** which is not excluded under Exclusion B (as amended herein) and is otherwise covered under the

Policy, the maximum limit of liability for all such **Claims** in the aggregate shall be $100,000. This limit is a sublimit which shall be part of and not in addition to the otherwise applicable aggregate limit of liability stated in Item 3 of the Declarations, and will in no way serve to increase the Insurer's maximum liability under the **Policy**. *Section V. Contingent Bodily Injury, Property Damage ("For" Preamble) with Sub-limit of Liability*

ii. alleging, based upon, arising out of, or attributable to:
    1. the actual, alleged or threatened discharge, dispersal, release, escape, seepage, migration or disposal of **Pollutants;** or
    2. any direction or request that any Insured test for, monitor, clean up, remove, contain, treat, detoxify or neutralize **Pollutants**, or any voluntary decision to do so.

COVERAGE POSITION

Based upon a review of the claim material received to date in light of the terms, conditions, provisions and exclusions of the above-referenced Policy, and subject to further investigation of all relevant facts and circumstances, **ACE advises that there is no coverage for this Claim.**

Plaintiffs allege that the water supply in the City of Flint is toxic and dangerous to the health and property of the Flint residents. If further alleges that the water includes lead, copper and other heavy metals in it. Pursuant to the Policy, any Claim alleging, based upon, arising out of, or attributable to the actual, alleged or threatened discharge or release of Pollutants is excluded from coverage. *Section III.M.* The Policy defines a Pollutant as any substance exhibiting any hazardous characteristics as defined by, or identified on a list of hazardous substances issued by the United States Environmental Protection Agency or any federal, state, county or municipal or local counterpart thereof or any foreign equivalent. Such substances shall include, without limitation, solids, liquids, gaseous or thermal irritants, contaminants, acids, alkalis, chemicals or waste materials. *Section II.O* Therefore, this Claim is denied in its entirety pursuant to this exclusion of the Policy, and there is no coverage.

Additionally, the Plaintiffs allege that they have sustained Bodily Injury as a result of drinking the water from the Flint River; and Property Damage as a result of using the water for cleaning. Pursuant to the Policy, any Claim for Bodily Injury or Property Damage is excluded from coverage. *Section III.B.* Assuming arguendo coverage was not precluded for this Claim, with respect to that portion of any Claim attributable to Bodily Injury and Property Damage and not excluded, the maximum limit of liability for all such Claims would be $100,000 in the aggregate. *Section III.B. Contingent Bodily Injury, Property Damage ("For" Preamble) with Sub-limit of Liability.*

It does not appear to be necessary to identify additional bases for denial of coverage for this matter. Nonetheless, the Company reserve the right to deny coverage based upon grounds other than those expressly set forth in this letter and to supplement and/or amend this letter to address additional coverage issues as they may arise, based upon all of the provisions, terms, conditions, exclusions,

endorsements and definitions found in the Policy and additional facts that may come to the Company's attention.

If you or any Insured believe that any of the information set forth in this letter or the coverage issues identified herein are incorrect, please forward any additional information or documentation which you believe ACE should consider, and it will be reviewed as soon as possible. The Company will take into consideration any additional information that you provide subject to a full reservation of rights. Nothing stated herein and no further action taken by the Company or on its behalf should be construed as a waiver of any of its rights under the Policy. On the contrary, by providing this or any prior correspondence to the Insured, engaging in any prior or future discussion with the Insured, or paying or agreeing to pay any amount on behalf of the Insured, the Company does not waive any rights that it has under the Policy. Please do not hesitate to contact me directly at 201-479-6363 should you have any additional questions or concerns regarding the foregoing.

Respectfully,

Brian Lovell

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 7, 2014
Exit: December 22, 2015

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $186,901. In FY14 the unassigned general fund balance was a negative $1.0M.
- The police and fire pension millage failed 53% to 47%. The millage would have raised an additional $3M annually.
- MERS recently notified the city that its pension ARC is increasing from last year's amount of $2.2M to a current amount due of $3.9M. EM Coulter believes the city can only pay $3.16M. Treasury and the city are working with MERS to reach a resolution regarding annual contributions to the pension plan.

- The City Council hired a law firm to prepare a complaint against the pension funds' actuary. The city believes that the actuary did not properly advise the city regarding long-term financial sustainability of the pension system. The May 2015 actuarial analysis showed pension funding at 23% for Police and Fire and 20% for MERS. The city paid the required ARC each year, yet the funding levels were reduced to critical levels.

- A collective bargaining agreement with the Technical and Professional Office Workers Association of Michigan was approved by the Treasurer and became effective on November 1, 2015. The city eliminated retiree healthcare and reduced employee paid time off.

Significant Actions/Issues

- On August 10, 2015, the Lincoln Park Retiree Association filed suit against the state. Treasury, and the City of Lincoln Park regarding the reduction of city retiree healthcare.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The city expects to record a larger than expected surplus for FY15. For FY16, the city currently projects a $35M budget surplus.
- The FRC filed its second statutorily required biannual report on Detroit on November 24, 2015. The report detailed the FRC's activities to date and significant developments in the city's finances.
- The city's three police officers' unions have ratified amendments to their existing labor contracts to implement additional pay increases and other work rule changes. The additional cost is projected to be $41M over 4 years (FY16 - FY19) and will be paid for with savings from lower Exit Financing debt service, reallocating budgeted police capital expenses to old bond proceeds, and the elimination of vacant police assistant positions no longer deemed needed.
- The city's EM Orders are subject to revision or rescission by the City Council beginning on December 10, 2015. The city has informed the FRC that the City Council has decided not to modify these EM Orders at this time.
- On December 3, 2015, the DWSD and the GLWA achieved bondholder consent to transfer DWSD debt to GLWA.
- Moody's issued a report on December 7, 2015 indicating Detroit's economic and fiscal health are stronger a year after bankruptcy. Moody's noted the city's ongoing recovery is necessary to meet the challenge in funding its pension obligations from the General Fund starting in FY24. Moody's current rating on Detroit is "B2".

Significant Action/Issues

- The city has started developing its FY17 - FY20 financial plan. This will be the first budget since the EM's departure that Mayor and City Council will develop.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Fredrick Frank, Karen Barann, Mark Wollenweber, Scott Lites

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $5.8M. In FY14 the unassigned general fund balance was $2.6M.
- Incumbent Mayor William Matakas defeated challenger Councilman Dennis Hays 62% to 38%.
- The road repair millage passed 52% to 48%. The millage will raise $1.4M in the first year.
- The city closed the bond tender refinancing related to the prior movie studio transaction on November 19, 2015. S&P rated the bonds "BBB."

Significant Actions/Issues

- On September 22, 2015, the Michigan Court of Claims granted the state's motion to dismiss the lawsuit brought by retirees of the City of Allen Park who challenged changes made to their healthcare by the former EM. The retirees may appeal this decision.

Benton Harbor

RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $3.1M. In FY14 the unassigned general fund balance was $2.2M.
- Mayoral challenger Marcus Muhammad defeated incumbent Mayor James Hightower 60% to 40%.
- Treasury has begun planning to reduce the RTAB's role.

Significant Actions/Issues

- The former Public Safety Director brought a lawsuit against the city and the former EM for wrongful termination.
- On August 3, 2015, the City Commission requested financial assistance from the Department of Treasury for legal fees and settlement costs associated with decisions made during the tenure of the EM.

Ecorse

RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joan Brophy

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $2.7M. In FY14 the unassigned general fund balance was $2.1M.
- Incumbent Mayor Lamar Tidwell defeated challenger John Miller Jr. 59% to 41%.
- On November 25, 2015, the City Administrator submitted a revised 5-year financial plan. Treasury is in the process of reviewing.

Significant Actions/Issues

- MERS pension contributions are anticipated to increase from $1.8M in FY15 to $2.4M in FY16 due to accelerated funding for closed plans.

Flint

RTAB Appointed: April 29, 2015

RTAB Members: Frederick Headen, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- Mayoral challenger Karen Weaver defeated incumbent Mayor Dayne Walling 56% to 44%.
- The Regional Flint Mass Transportation Authority millage passed 72% to 28%.
- The City Attorney has resigned effective December 31, 2015. A new City Attorney, when appointed, will need to be confirmed by the RTAB.
- On November 13, 2015, a complaint was filed in the U.S. District Court against State officials, City of Flint officials, and the former EM for the decision to utilize the Flint River as a water source for residents.
- On November 16, 2015, a Notice of Intent to Sue was filed in the U.S. District Court against state and City of Flint officials for violating the federal Safe Drinking Water Act requirements.
- On August 7, 2015, a Genesee County Circuit Court lawsuit, Shears vs. Flint, invalidated a previous 35% increase in water and sewer rates, reverting back to 2011 rates. This injunction also requires the city to repay $15.7M from the General Fund to the Water Fund, prevents the city from collecting certain past due water bills, and from disconnecting water service for nonpayment. The city's appellate efforts to date have not been successful. The city has requested financial assistance related to the litigation regarding water issues.
- Kincaid vs. City of Flint litigation was held that the EM had no statutory authority to later ratify water and sewer rate increases from May of 2012. The city filed an appeal to the Michigan Supreme Court, but the Court did not address the appeal because the city missed the filing deadline by one day. The case has been remanded back to Genesee County Circuit Court to resolve outstanding matters.
- As a result of current review, the State Tax Commission notified the city it must maintain adequate assessment records. The city will be issuing an RFP for the reassessment of properties.

Significant Actions/Issues

- On September 11, 2015, Genesee County Circuit Court dismissed the Coalition for Clean Water vs. the City of Flint case to force the city to purchase water from the City of Detroit.
- The KWA pipeline is expected to be completed in June 2016. The pipeline is 80% complete, the two pump houses are 90% complete and the intake is completed.
- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M projected annual expense.

Hamtramck
RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Karen Young, Albert Bogdan, Peter McInerney

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $3.3M. In FY14 the unassigned general fund balance was $2.6M.
- The city has developed a long-term capital improvements plan.

Significant Actions/Issues
- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY15 to $4.3M by FY19. This increase is a result of closing certain pension plans and the MERS policy of accelerating the required contribution for closed plans. The increases were included in the EM's two-year budget.

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Keith Sawdon, Robert Burgess, (one appointment pending)

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $9.9M. In FY15 the unassigned general fund balance was $4.3M.
- The city's former pension advisor Roy Dixon was sentenced to federal prison for bribery involving Pontiac pension board members.
- The Oakland County Circuit Court dismissed the lawsuit filed by the city against Ottawa Towers LLC/ Phoenix Center. Treasury is working with the city to move forward to resolve the litigation and assist with the sale to a private operator, which could free up $2M in demolition funds.
- Treasury is working with the city on a plan to significantly reduce the role of the RTAB by spring of 2016.

Significant Actions/Issues
- A proposed mediation settlement between the city and the Pontiac Retired Employees Association, if approved, could fund pension and OPEB benefits for the GERS and the Police and Fire VEBA members, and resolve the lawsuit filed by the Association.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- In FY15 the audited unassigned general fund balance was $1.38M. In FY14 the general fund balance was a negative $837,194.
- Byron Nolen was elected Mayor by defeating Walter Stargill Jr. 87% to 13%.
- The Parks and Recreation millage passed 72% to 28%. It will raise $400K annually.

- The Senior Services millage passed 73% to 27%. It will raise $200K annually.
- The Inkster Public Schools non-homestead millage passed 64% to 34%. It will raise $750K the first year.
- On October 5, 2015, City Council approved an agreement with Wayne County regarding repayment of the $4.9M sewer charges owed to the county through a millage levy and other resources.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (PA 72)
Date Released: December 7, 2015

Recent Developments
- The city ended FY 15 with an operating surplus of $1.77M.
- Standard and Poor's ratings services assigned an investment grade "A" rating for a recent $5M refunding bond issue that the city undertook.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $267,405. In FY14 the unassigned general fund balance was $154,092. The fiscal year ends December 31, 2015.
- The Township Board voted to extend the Consent Agreement Consultant's contract through March 31, 2016. A replacement will need to be identified.
- The township is exploring options for police services with neighboring jurisdictions, however the proposed costs are greater than what the township's police millage generates. The Michigan State Police have and continue to provide police services to the township.

Wayne County
Effective Date: August 21, 2015
Consent Agreement Consultant: Warren Evans

Recent Developments
- On November 15, 2015, the county submitted a revised cash flow forecast. The cash flow, excluding the Trust and Agency cash, projects a September 2016 balance of $179M, which is $36M less than the October 2015 projection.
- The quarterly financial report submitted by the county on October 15, 2015 projects an operating surplus of $107M.
- The county indicated it has reached/imposed agreements with all collective bargaining units with the exception of the Circuit Court. The Circuit Court contracts do not expire until September 2016 and includes 77 members.
- Two lawsuits are currently pending a motion to dismiss: 1) AFSCME 3317 (sergeants and lieutenants) is a state case; and 2) AFSCME 25 (hearing and vision techs) is a federal case. Neither case prevents the county from carrying out its requirements under the Consent Agreement.

- On May 29, 2015, the Wayne County Circuit Court rendered a decision in favor of the Retirement System resulting in a $49M judgement levy. The county paid $10M of the judgment from available funds and placed $39M on the tax roll. As of November 9, 2015, the county has collected $29M of the amount levied.

Significant Actions/Issues

- The annual structural General Fund deficit is approximately $53.4M prior to any of the proposed remedial actions. Those remedial actions include $36.2M in changes to retiree healthcare, $5.2M in changes to active employee healthcare, and $12M in a combination of revenue increases and potential expenditure reductions.
- The county submitted documentation regarding the long-term solution for its jail. Reviews and discussion are ongoing with the county.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- Mayoral challenger (and former Mayor) Hubert Yopp defeated incumbent Mayor DeAndre Windom 63% to 37%.
- The Highland Park Schools non-homestead millage passed 54% to 46%. It will raise $1.5M the first year.
- A class action lawsuit dated November 6, 2015 has been filed against the city claiming Headlee Amendment violations for alleged overcharging for water and sewer services.
- The City Administrator reported that annual retiree OPEB costs were reduced from $1.5M to $250K, effective October 1, 2015.
- Hearings are being held in U.S. Federal Court regarding the judgement in favor of DWSD over the city's unpaid water bill.
- The city's water system is experiencing low water pressure. City officials are working with Wade Trim, Treasury, DEQ, and GLWA/DWSD to develop a plan to implement immediate repairs which are anticipated to increase water pressure. Treasury expects funding the project through continued grants and loans.

Subject: RE: PRESS RELEASE- STATE OF EMERGENCY DECLARED

With the declaration apparently the Mayor is appealing for Fed help to Cong. Kildee. That seems reasonable.

Wayne and Suzanne:

Mayor Weaver declared a State of Emergency in Flint last night. I have attached a copy for your review. Natasha tried to discourage her from proceeding on this. FYI, I am going to call the Mayor on the search. It doesn't sound like she wants to use Tom for the search.

Randy,

Mayor Karen Weaver Declares State of Emergency

Flint, MI – December 14, 2015 – Mayor Karen Weaver has declared a State of Emergency in response to a man-made disaster caused by the City switching to the Flint River as a water source. This switch has resulted in elevated lead levels in drinking water which prompted both the City and the County Health department to issue a health advisory earlier this year.

Mayor Weaver states that this was one of the things she had promised to do while campaigning for mayor.

Declaring an emergency intends to help raise awareness of the issue that the water is still not safe to drink and activates the City's Emergency Support Plan in order to respond to the crisis.

On October 16 of this year, the City switched back to the Detroit Water and Sewerage Department as the source of water, however lead levels remain well above the federal action level of 15 parts per billion in many homes. Residents are advised to continue using water filters while long term solutions are being developed.

The Mayor will hold a press conference about the State of Emergency on Tuesday, December 15 at 2pm at City Hall.

END

> Has anyone responded to Dave and Steve with the information as to who they should contact at the City of Flint regarding this claim denial by the insurance carrier? I just got off the phone with them and they have not heard back from anyone yet. Both Dave and Steve want to be sure that the city is notified and pursues other insurance coverage, if available. Also, they said if we or John Clark can come up with a good reason to go back to the carrier that denied this claim with a solid argument as to why the claim should not be denied, they are more than willing to have this conversation with the carrier. They reiterated that they represent the policyholder not the carrier and would be more than happy to have that conversation. Although, coming up with an argument to use might be a bit difficult as professional liability coverage normally does not cover pollutants, but I know attorneys can be creative.

On another note, they did inform me that they are expecting a carrier to provide them with a quote for extending Darnell's professional liability coverage. They are hoping to have that number by tomorrow and will relay that to us as soon as they receive it.

ONGOING ISSUES RELATED TO WATER

Water from KWA Testing

- DEQ/EPA requiring Flint to test water from KWA by installing a temporary pipeline for "one or two months"
- Temporary pipeline will run above the ground, cost about $3-4 Million and will be approximately 3 miles long
- Thinks that they can get KWA to pay for it, because they suggested that this is "their tie to the plant, just because it is not the permanent tie should make no difference in how KWA should approach funding this project".
- N. Henderson also suggested that there is a chance that the County would end up paying for it, but she hasn't explored that option fully yet.

Water Billing

- City residents still aren't paying their water bills
- The city expects that the judge will have a decision rendered by December 18th
- An unfavorable ruling would be, not only financially disastrous, but an "administrative nightmare" for the City to change the systems and re submit bills

Corrosion Control

- City has begun adding corrosion control treatment into the City's water supply, the amounts of the corrosion control will increase over time
- So far, there have been no complaints about foul tastes or water discoloration

State of Emergency Declaration

- Flint declared a state of emergency in Flint for issues related to the lead in the water on Dec 14th
- The city sent a certified declaration of emergency to the county, who will address this declaration at their meeting on Jan 4th, 2016.
- The City hopes that this will "move this issue up" to the Federal level so that they are able to receive some resources to help deal with their ongoing water issues in the City.

OTHER ISSUES

Public Safety

- City has had more shootings, but N. Henderson and others are confident that the grants that they are receiving from the Mott Foundation positively affect this over time. Mott Foundation grant was discussed in several recent calls, but funds community policing and other initiatives.
- Mayor Weaver expressed that the community is "very excited about the Mott Foundation Grant" and had expressed that this was a good thing, because the City was going to "need their help to make sure this works".

Letter submitted to the Treasury for assistance with Legal costs

- The City had submitted a letter to the Treasury asking for assistance with costs associated with various lawsuits they have against them. This is an issue that has been discussed many times in the past
- The Treasury will be sending the City a certified letter as a response to their request within a week.

Subject: Request for Guidance - City of Flint

Fred:

Thank you for your assistance in this matter. Pursuant to our recent conversation, attached is the City of Flint's request for guidance regarding operating and maintenance expenses related to operation of the City's water and sewer systems.

If you need any additional information, please let me know. As I mentioned on the phone, the hearing is scheduled for September 18 at 10:00 a.m. so we would appreciate receiving a response before that time.

Thanks again,

Chris

Local Audit and Finance Division
State of Michigan Department of Treasury
P.O. Box 30716
Lansing, MI 48909

Dear Ms. Schafer:

The City of Flint (the "City") requests guidance from the State of Michigan Department of Treasury, Local Audit Division as to confirm the appropriateness of charging legal fees and settlements as an operating and maintenance expense to the Water and Sewer Funds of the City where the fees and settlements are related to the operation of the water and sewer system.

Pursuant to GASB Statement 10, the City operates a self-insurance fund for administration of all claims and settlements. It is the City's practice to charge other funds based on historical activity and actual costs in compliance with GASB Statement 10 Paragraph 66. In doing so, the City reported in its Fiscal Year 2007 Audited Comprehensive Annual Financial Report (CAFR) a $15.7 million charge to the Sewer Fund to recognize anticipated settlement claims resulting from litigation directly related to sewer backups. For your reference in responding to our request for administrative guidance. we refer you to the facts and circumstance giving rise to the settlement and judgments arising from the operation of the Flint Sewer System as stated by the Michigan Court of Appeals in *Stevens v City of Flint*, 2005 WL 1683786 (Mich App July 19, 2005), attached to this letter. Specifically the Michigan Court of Appeals found that:

> Defendant owns the water main pipes, storm pipes and sanitary pipes. Every homeowner is mandated by defendant to be connected to its sanitary system, which carries wastewater from each resident's home to defendant's wastewater treatment plant. Defendant approves the "hook-up," controls the sanitary system process, and is solely responsible for maintaining the integrity of the sewer system. Thus, defendant controlled the property from which the nuisance arose.

The Court of Appeals in *Stevens* also ruled "that defendant caused the sewage backups." *Id.* As a

result of this and related rulings, the City was liable for judgments and reached settlements in the other related lawsuits. The judgments and settlements were subsequently paid via the self-insurance fund following City Council approval in fiscal years 2008-2010.

During several hearings held in a lawsuit against the City, *Shears et al v. City of Flint et al*, Case No. 14-103476-CZ, Judge Archie Hayman has stated that he believes the $15.7 million charge does not comply with state law. Judge Hayman believes that the charge (sometimes referred to as a "transfer") from the Sewer Fund to the City's Claims and Settlements Fund was, in fact, a general liability NOT an operating and maintenance expense or other direct or indirect cost of operating and maintaining the system. The Court's position is that the City has violated the Revenue Bond Act and must repay $15.7 million from its General Fund to the Sewer Fund. Should the Court make a final ruling to this effect, it will not only have a devastating financial impact on the City of Flint, but will surely impact the practice of charging Water and Sewer Funds for settlement and claims expenses for all municipalities in Michigan. Judge Hayman has requested that the City provide additional testimony and evidence supporting its position that the charge to the Sewer Fund is permissible under the Revenue Bond Act and the Uniform Budgeting and Accounting Act. The next hearing is scheduled for **December 18, 2015** and we, therefore, request guidance on an expedited basis so that we may provide your response to the Court on December 18.

Thank you for your time and attention to this matter. Please feel free to contact me should additional information be necessary to respond to this inquiry.

Sincerely,

Jody N. Lundquist
Chief Financial Officer

Fred:

Thank you for your assistance in this matter. Pursuant to our recent conversation, attached is the City of Flint's request for guidance regarding operating and maintenance expenses related to operation of the City's water and sewer systems.

If you need any additional information, please let me know. As I mentioned on the phone, the hearing is scheduled for September 18 at 10:00 a.m. so we would appreciate receiving a response before that time.

Thanks again,

Chris

ONGOING ISSUES RELATED TO WATER

Water from KWA Testing

- DEQ/EPA requiring Flint to test water from KWA by installing a temporary pipeline for "one or two months"
- Temporary pipeline will run above the ground, cost about $3-4 Million and will be approximately 3 miles long
- Thinks that they can get KWA to pay for it, because they suggested that this is "their tie to the plant, just because it is not the permanent tie should make no difference in how KWA should approach funding this project".
- N. Henderson also suggested that there is a chance that the County would end up paying for it, but she hasn't explored that option fully yet.

Water Billing

- City residents still aren't paying their water bills
- The city expects that the judge will have a decision rendered by December 18th
- An unfavorable ruling would be, not only financially disastrous, but an "administrative nightmare" for the City to change the systems and re submit bills

Corrosion Control

- City has begun adding corrosion control treatment into the City's water supply, the amounts of the corrosion control will increase over time
- So far, there have been no complaints about foul tastes or water discoloration

State of Emergency Declaration

- Flint declared a state of emergency in Flint for issues related to the lead in the water on Dec 14th
- The city sent a certified declaration of emergency to the county, who will address this declaration at their meeting on Jan 4th, 2016.
- The City hopes that this will "move this issue up" to the Federal level so that they are able to receive some resources to help deal with their ongoing water issues in the City.

OTHER ISSUES

Public Safety

- City has had more shootings, but N. Henderson and others are confident that the grants that they are receiving from the Mott Foundation positively affect this over time. Mott Foundation grant was discussed in several recent calls, but funds community policing and other initiatives.
- Mayor Weaver expressed that the community is "very excited about the Mott Foundation Grant" and had expressed that this was a good thing, because the City was going to "need their help to make sure this works".

Letter submitted to the Treasury for assistance with Legal costs

- The City had submitted a letter to the Treasury asking for assistance with costs associated with various lawsuits they have against them. This is an issue that has been discussed many times in the past
- The Treasury will be sending the City a certified letter as a response to their request within a week.

NICK A. KHOURI
STATE TREASURER

December 17, 2015

Jody N. Lundquist, Chief Financial Officer
City of Flint
1101 S. Saginaw Street
Flint, MI 48502

Dear Ms. Lundquist:

Thank you for your letter of December 16, 2015, requesting guidance on charging legal fees and settlements as an operating and maintenance expense to the Water and Sewer Funds of the City. Due to the necessity of our immediate reply and the Department of Treasury's retention schedule of local government documents, I have based my response solely on the information obtained from the City of Flint's audit for fiscal year ending 2007 and the information contained in your letter.

Your first question is regarding the appropriateness of how the charge or transfer from the Sewer Fund to the City's Claims and Settlement Fund is accounted for. Public Act 2 of 1968, the Uniform Budgeting and Accounting Act, specifically Section 8, states in part, "...financial statements in such reports have been prepared in accordance with generally accepted accounting principles and with applicable rules and regulations of any state department or agency." Based upon the Department of Treasury's interpretation of PA 2 and generally accepted accounting principles, it is our position that the City's treatment of the charge or transfer was acceptable and did not violate PA 2.

Your second concern is regarding a violation of Public Act 94 of 1933, the Revenue Bond Act of 1933. My staff's review of the audit report for fiscal year 2007, indicates there is no issuance of revenue bonds or an outstanding balance. Therefore, we are not willing to presume that PA 94 applies. However, were it to be concluded that Act 94 applies, there are three sections, Section 16, Section 21, and Section 22 which we believe would be relevant to the charge or transfer in question. Section 16 limits the use of revenue bond proceeds to the payment of projects and limits the use of excess bond proceeds. As stated, our review shows no reporting of bond proceeds during the fiscal year.

Section 21 governs the establishment of rates for services before the issuance of revenue bonds and dictates that the rates shall be sufficient to provide for the expenses of administration, operation, and maintenance of the public improvement. As there was no apparent bond issuance, this section does not apply.

Finally, Section 22 dictates the priority of the use of revenue and disposition of surplus. It is our interpretation of this Section that a local unit of government is afforded some flexibility of the use funds after it has satisfied current administration, operation, and maintenance expenses as well as principal and interest payable on the bonds. Furthermore, the Sewer Fund is an enterprise fund in that it is operated as a business entity. Lawsuits and settlements are the cost of doing business. Therefore, we do not consider it inappropriate to characterize a settlement payment as an expense of administration or operation of the Sewer Fund.

I trust the above provides you with the answers you seek. If you have additional questions, please do not hesitate to contact me.

Sincerely,

Suzanne Schafer, Administrator
Local Government Financial Services Division

++++**Weekly Critical Issues —December 17, 2015**

- **Allen Park**—Status of the brownfield issue.
- **Benton Harbor** We need to schedule a meeting with the Mayor- elect and Darwin. What is the status of the RTAB evaluation for Benton Harbor?
- **Ecorse** –Five year financial plan meeting today. I will schedule a meeting with Ecorse officials to discuss the five year plan. The judgement levy issue looms large. They are looking for a new DPW Director.
- **Flint** – I am getting Wayne's approval to perform a Public Works Director Search for $31,500. City has added additional phosphate at water plant and will gradually increase the amount over the next several weeks. City has again requested assistance on lawsuits and will be receiving a letter from Treasury addressing financial support. Issue with testing the KWA raw water and the need for a temporary line to the water plant. We need long term strategy on Flint and a review of their water and sewer funds for sustainability through crisis.
- **Hamtramck-** Pension plan study is underway.
- **Highland Park-**The City has purchased new water meters and will have them installed by April. The FDCVT grant application is being revised. Cathy is installing heat and will be having the roof repaired on the pump house. Cathy is reluctant to move forward on the water fixes until the new mayor takes office. I will have Angela schedule a meeting with the new Mayor and Chief of Staff in Lansing in early January. We need to schedule a meeting to discuss loan issues. School demolition and water-sewer bills. Agreement between the School District and City will be on the City Council agenda on Monday. Johnston Controls Tax Appeal.
- **Lincoln Park-**EM exit will be December 22nd. We have two Treasurer Approval items to be completed. Issues remaining for transition include the review of two and five year budgets.
- **Inkster-** the City Council is likely to move forward on a Charter revision process. An exit from the Consent Agreement in early July?
- **Pontiac-** I will revisit the PEG channel project with the City. We are preparing a road map for the transition.
- **River Rouge**-we will be scheduling quarterly meetings with the City.
- **Royal Oak Township**- Issue with the Clerk's duties. The Township attorney needs to provide guidance on the continued collection of police millage.
- **Miscellaneous Items**— City of Lansing funding request, holiday issues, discussion on the Governor Memo, changes in the CDBG program in Wayne County may impact distressed local unit's revenues.

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 7, 2014
Exit: December 22, 2015

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $186,901. In FY14 the unassigned general fund balance was a negative $1.0M.
- The police and fire pension millage failed 53% to 47%. The millage would have raised an additional $3M annually.
- MERS recently notified the city that its pension ARC is increasing from last year's amount of $2.2M to a current amount due of $3.9M. EM Coulter believes the city can only pay $3.16M. Treasury and the city are working with MERS to reach a resolution regarding annual contributions to the pension plan.

- The City Council hired a law firm to prepare a complaint against the pension funds' actuary. The city believes that the actuary did not properly advise the city regarding long-term financial sustainability of the pension system. The May 2015 actuarial analysis showed pension funding at 23% for Police and Fire and 20% for MERS. The city paid the required ARC each year, yet the funding levels were reduced to critical levels.

- A collective bargaining agreement with the Technical and Professional Office Workers Association of Michigan was approved by the Treasurer and became effective on November 1, 2015. The city eliminated retiree healthcare and reduced employee paid time off.

Significant Actions/Issues

- On August 10, 2015, the Lincoln Park Retiree Association filed suit against the state, Treasury, and the City of Lincoln Park regarding the reduction of city retiree healthcare.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The city expects to record a larger than expected surplus for FY15. For FY16, the city currently projects a $35M budget surplus.
- The FRC filed its second statutorily required biannual report on Detroit on November 24, 2015. The report detailed the FRC's activities to date and significant developments in the city's finances.
- The city's three police officers' unions have ratified amendments to their existing labor contracts to implement additional pay increases and other work rule changes. The additional cost is projected to be $41M over 4 years (FY16 - FY19) and will be paid for with savings from lower Exit Financing debt service, reallocating budgeted police capital expenses to old bond proceeds, and the elimination of vacant police assistant positions no longer deemed needed.
- The city's EM Orders are subject to revision or rescission by the City Council beginning on December 10, 2015. The city has informed the FRC that the City Council has decided not to modify these EM Orders at this time.
- On December 3, 2015, the DWSD and the GLWA achieved bondholder consent to transfer DWSD debt to GLWA.
- Moody's issued a report on December 7, 2015 indicating Detroit's economic and fiscal health are stronger a year after bankruptcy. Moody's noted the city's ongoing recovery is necessary to meet the challenge in funding its pension obligations from the General Fund starting in FY24. Moody's current rating on Detroit is "B2".

Significant Action/Issues

- The city has started developing its FY17 - FY20 financial plan. This will be the first budget since the EM's departure that Mayor and City Council will develop.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park
RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Fredrick Frank, Karen Barann, Mark Wollenweber, Scott Lites

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $5.8M. In FY14 the unassigned general fund balance was $2.6M.
- Incumbent Mayor William Matakas defeated challenger Councilman Dennis Hays 62% to 38%.
- The road repair millage passed 52% to 48%. The millage will raise $1.4M in the first year.
- The city closed the bond tender refinancing related to the prior movie studio transaction on November 19, 2015. S&P rated the bonds "BBB."

Significant Actions/Issues
- On September 22, 2015, the Michigan Court of Claims granted the state's motion to dismiss the lawsuit brought by retirees of the City of Allen Park who challenged changes made to their healthcare by the former EM. The retirees may appeal this decision.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $3.1M. In FY14 the unassigned general fund balance was $2.2M.
- Mayoral challenger Marcus Muhammad defeated incumbent Mayor James Hightower 60% to 40%.
- Treasury has begun planning to reduce the RTAB's role.

Significant Actions/Issues
- The former Public Safety Director brought a lawsuit against the city and the former EM for wrongful termination.
- On August 3, 2015, the City Commission requested financial assistance from the Department of Treasury for legal fees and settlement costs associated with decisions made during the tenure of the EM.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joan Brophy

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $2.7M. In FY14 the unassigned general fund balance was $2.1M.
- Incumbent Mayor Lamar Tidwell defeated challenger John Miller Jr. 59% to 41%.
- On November 25, 2015, the City Administrator submitted a revised 5-year financial plan. Treasury is in the process of reviewing.

Significant Actions/Issues

- MERS pension contributions are anticipated to increase from $1.8M in FY15 to $2.4M in FY16 due to accelerated funding for closed plans.

Flint

RTAB Appointed: April 29, 2015

RTAB Members: Frederick Headen, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- Mayoral challenger Karen Weaver defeated incumbent Mayor Dayne Walling 56% to 44%.
- The Regional Flint Mass Transportation Authority millage passed 72% to 28%.
- The City Attorney has resigned effective December 31, 2015. A new City Attorney, when appointed, will need to be confirmed by the RTAB.
- On November 13, 2015, a complaint was filed in the U.S. District Court against State officials, City of Flint officials, and the former EM for the decision to utilize the Flint River as a water source for residents.
- On November 16, 2015, a Notice of Intent to Sue was filed in the U.S. District Court against state and City of Flint officials for violating the federal Safe Drinking Water Act requirements.
- Mayor Weaver declared State of Emergency on December 14, 2015.
- On August 7, 2015, a Genesee County Circuit Court lawsuit, Shears vs. Flint, invalidated a previous 35% increase in water and sewer rates, reverting back to 2011 rates. This injunction also requires the city to repay $15.7M from the General Fund to the Water Fund, prevents the city from collecting certain past due water bills, and from disconnecting water service for nonpayment. The city's appellate efforts to date have not been successful. The city has requested financial assistance related to the litigation regarding water issues.
- Kincaid vs. City of Flint litigation was held that the EM had no statutory authority to later ratify water and sewer rate increases from May of 2012. The city filed an appeal to the Michigan Supreme Court, but the Court did not address the appeal because the city missed the filing deadline by one day. The case has been remanded back to Genesee County Circuit Court to resolve outstanding matters.
- As a result of current review, the State Tax Commission notified the city it must maintain adequate assessment records. The city will be issuing an RFP for the reassessment of properties.

Significant Actions/Issues

- On September 11, 2015, Genesee County Circuit Court dismissed the Coalition for Clean Water vs. the City of Flint case to force the city to purchase water from the City of Detroit.
- The KWA pipeline is expected to be completed in June 2016. The pipeline is 80% complete, the two pump houses are 90% complete and the intake is completed.
- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M projected annual expense.

Hamtramck
RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Karen Young, Albert Bogdan, Peter McInerney

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $3.3M. In FY14 the unassigned general fund balance was $2.6M.
- The city has developed a long-term capital improvements plan.

Significant Actions/Issues
- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY15 to $4.3M by FY19. This increase is a result of closing certain pension plans and the MERS policy of accelerating the required contribution for closed plans. The increases were included in the EM's two-year budget.

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Keith Sawdon, Robert Burgess, (one appointment pending)

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $9.9M. In FY15 the unassigned general fund balance was $4.3M.
- The city's former pension advisor Roy Dixon was sentenced to federal prison for bribery involving Pontiac pension board members.
- The Oakland County Circuit Court dismissed the lawsuit filed by the city against Ottawa Towers LLC/ Phoenix Center. Treasury is working with the city to move forward to resolve the litigation and assist with the sale to a private operator, which could free up $2M in demolition funds.
- Treasury is working with the city on a plan to significantly reduce the role of the RTAB by spring of 2016.

Significant Actions/Issues
- A proposed mediation settlement between the city and the Pontiac Retired Employees Association, if approved, could fund pension and OPEB benefits for the GERS and the Police and Fire VEBA members, and resolve the lawsuit filed by the Association.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- In FY15 the audited unassigned general fund balance was $1.38M. In FY14 the general fund balance was a negative $837,194.
- Byron Nolen was elected Mayor by defeating Walter Stargill Jr. 87% to 13%.
- The Parks and Recreation millage passed 72% to 28%. It will raise $400K annually.

- The Senior Services millage passed 73% to 27%. It will raise $200K annually.
- The Inkster Public Schools non-homestead millage passed 64% to 34%. It will raise $750K the first year.
- On October 5, 2015, City Council approved an agreement with Wayne County regarding repayment of the $4.9M sewer charges owed to the county through a millage levy and other resources.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (PA 72)
Date Released: December 7, 2015

Recent Developments
- The city ended FY 15 with an operating surplus of $1.77M.
- Standard and Poor's ratings services assigned an investment grade "A" rating for a recent $5M refunding bond issue that the city undertook.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $267,405. In FY14 the unassigned general fund balance was $154,092. The fiscal year ends December 31, 2015.
- The Township Board voted to extend the Consent Agreement Consultant's contract through March 31, 2016. A replacement will need to be identified.
- The township is exploring options for police services with neighboring jurisdictions, however the proposed costs are greater than what the township's police millage generates. The Michigan State Police have and continue to provide police services to the township.

Wayne County
Effective Date: August 21, 2015
Consent Agreement Consultant: Warren Evans

Recent Developments
- On November 15, 2015, the county submitted a revised cash flow forecast. The cash flow, excluding the Trust and Agency cash, projects a September 2016 balance of $179M, which is $36M less than the October 2015 projection.
- The quarterly financial report submitted by the county on October 15, 2015 projects an operating surplus of $107M.
- The county indicated it has reached/imposed agreements with all collective bargaining units with the exception of the Circuit Court. The Circuit Court contracts do not expire until September 2016 and includes 77 members.
- Two lawsuits are currently pending a motion to dismiss: 1) AFSCME 3317 (sergeants and lieutenants) is a state case; and 2) AFSCME 25 (hearing and vision techs) is a federal case. Neither case prevents the county from carrying out its requirements under the Consent Agreement.

- On May 29, 2015, the Wayne County Circuit Court rendered a decision in favor of the Retirement System resulting in a $49M judgement levy. The county paid $10M of the judgment from available funds and placed $39M on the tax roll. As of November 9, 2015, the county has collected $29M of the amount levied.

Significant Actions/Issues

- The annual structural General Fund deficit is approximately $53.4M prior to any of the proposed remedial actions. Those remedial actions include $36.2M in changes to retiree healthcare, $5.2M in changes to active employee healthcare, and $12M in a combination of revenue increases and potential expenditure reductions.
- The county submitted documentation regarding the long-term solution for its jail. Reviews and discussion are ongoing with the county.

NEUTRAL EVALUATION

Highland Park
Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- Mayoral challenger (and former Mayor) Hubert Yopp defeated incumbent Mayor DeAndre Windom 63% to 37%.
- The Highland Park Schools non-homestead millage passed 54% to 46%. It will raise $1.5M the first year.
- A class action lawsuit dated November 6, 2015 has been filed against the city claiming Headlee Amendment violations for alleged overcharging for water and sewer services.
- The City Administrator reported that annual retiree OPEB costs were reduced from $1.5M to $250K, effective October 1, 2015.
- Hearings are being held in U.S. Federal Court regarding the judgement in favor of DWSD over the city's unpaid water bill.
- The city's water system is experiencing low water pressure. City officials are working with Wade Trim, Treasury, DEQ, and GLWA/DWSD to develop a plan to implement immediate repairs which are anticipated to increase water pressure. Treasury expects funding the project through continued grants and loans.

Subject: RTAB Questions from RTAB Meeting

On August 7, 2015 Genesee County District Court Judge Archie Hayman issued a Preliminary Injunction Order (the "Order") against the City. As a result of the Order, the City anticipated an immediate and devastating impact on the financial stability of the Water and Sewer Funds if a stay was not quickly granted by the Michigan Supreme Court Appellate Court. Indeed, the City's request was denied and the financial impact of the Court order has been reviewed through the fiscal year ending June 30, 2016.

Upon issuance of the Order, the City was immediately enjoined from charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases and disconnecting water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date of the Order. This immediately resulted in a decrease in cash collections on outstanding and current water bills and a decrease in total billed revenue.

The following budget amendments reflect a decrease in revenue projections as a result of monthly billing activity for the period September 2015-June 2016. September billing reflected the reduced rates as ordered by the Preliminary Injunction and confirmed preliminary estimates with $670,000 less in billed usage from the

same period in 2014. The City has assumed and average decrease of $616,148 in monthly billed revenue, or $6,777,624 by fiscal year end (for 11 months of billing).

The City had total accounts receivable due of $13,738,190 for all active and inactive accounts at August 7, 2015. It is highly probable that a large percentage of that balance will have to be written off as uncollectible without the ability to enforce payment. The proposed amendments reflect an estimated uncollectible balance at this time of $8,340,823.

The City is working diligently to review the FY2016 operating budgets for additional sources of savings. Upon issuance of the Order, a spending and hiring freeze for all non-critical items was immediately implemented. The City has worked diligently to redevelop its capital improvement plan and has now canceled or postponed many planned projects and purchases until financial stability can be regained.

Changes to appropriations reflect the carry forward of projects in progress but not completed at June 30, 2015 for the Sewer and Water Funds of $41,796 and $1,456,922, respectively. This carry forward is largely offset by decreases to the City's capital improvement plan.

The City's emphasis at this time continues to be on providing safe, clean water to the City's residents and moving forward with preparations for the KWA pipeline to come online. As a result of this re-prioritization, the budget amendments reflect a reduction to budget capital improvements of $5,564,804.

Sewer Fund

The Sewer Fund budget (590) reflects a decrease in projected revenue of $6,741,475 and increase in Use of Fund balance of $2,883,373. The Sewer Fund was paid in full by the 101 fund at the end of FY2015, therefore the budgeted payment of $800,000 from the Public Improvement Fund must be removed. As noted previously, the decrease in Charges for Services of $5,941,475 is a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $41,796 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $3,899,898.

Water Fund

The Water Fund budget (591) reflects a decrease in projected revenue of $8,560,824 and increase in Use of Fund balance of $7,287,125. Again, as noted previously, the decrease in Charges for Services are a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $1,456,922 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $1,664,906. The City had just begun its much need meter replacement program at the end of FY2015. A significant portion of the roll forward reflects outstanding purchase orders and invoices related to this project prior to the spending freeze. The reduction in FY2016 budgeted improvements reflects the reprioritization of the KWA project and postponement of other significant projects such as the Dupont Street Pipeline Project and Hamilton Dam Sheet Piling.

Thanks,

Natasha L. Henderson, City Administrator

To: Headen, Frederick (Treasury)
Subject: Fwd: RTAB Questions from Earlier today

Below are my questions for the City Manager. Thank you. Beverly

1. The City Administrator in her email proposes using $7,287,125 of Fund Balance in the water fund to offset the balance projected decrease in the revenue. The latest "budget to actual" report provided shows the Fund Balance in the water fund to be $4,937,210. Will there be an amendment showing where the remaining $2,349,915 will be taken from?

2. The last budget to actual report provided to RTAB (Month Ended October 31, 2015) the 590 Sewer Fund shows a "YTD Balance" at 10/31/15 of $2,480,146 in the "Charges for Services" line item. If I annualize this, the total would be $7,440,438. The budget amendment of a $5,941,475 reduction in that budget line item adjusts the total budgeted amount to be $24,493,240. In what months from November 2015 through June 2015 will there be an acceleration of service for fee revenue that will allow us to achieve the amended budget?

3. The same concern for the Water Fund as well.

Sounds like Darnell having trouble getting coverage going forward due to Flint water

> **Subject: RE: Professional Liability claim**
>
> Darnell;
>
> Attached is the policy that was requested. With respects to the renewal here is where we stand.
>
> The current carrier ACE has non-renewed the first layer of coverage (initial $1M) and the market is turning with respects to covering any prior acts before the renewal. The excess carrier Ironshore is also unwilling to renew the second layer ($2M). Both have stated the Flint water situation is making them uncomfortable to continue offering coverage at any price. (You will have the option to purchase extended reporting which I will describe later in a paragraph below)
>
> With the City of Flint making National headlines the marketplace is tightening up and unwilling to offer coverage with any prior acts. This means we cannot purchase a policy at this point that will cover any potential claim (act) that will provide coverage prior to 12/18/2015. We are searching the marketplace for a carrier that will consider writing a new policy going forward only. That will be the most cost effective way to go, albeit you will have potential exposure for a prior act. But remember it is our understanding that PA 436 (attached) affords protection for you if you are unable to procure a policy.
>
> Our marketing was also delayed in this endeavor as during these efforts it came to our attention the current DPS broker, who we believe is AON, was searching for coverage thus blocking certain markets for us to approach. That further delays the process when two brokers are going to the same carriers. We do not know what the outcomes from that research yielded but it is preventing us from accessing those declinations or proposals. On top of this we do not know the parameters discussed with the carriers by the AON? Were they looking for prior acts or a policy just going forward? This could make a significant difference in what carriers will think or be willing to offer.
>
> We would respectfully ask you to consider one broker to obtain the coverage for you as the insurance industry becomes muddled and slow with more than one broker going to the same carrier(s). Only one broker is going to get a proposal or declination and the other will have to ask for a release from you to

obtain access to the carrier(s). We are comfortable with any decision you make as the ultimate goal is to get coverage for you.

With respects to the expiring policies they do provide for an extended reporting period of 12 months from the expiration date of 12/18/2015. The cost for the extended period is $1,118 for the first layer ($1 M) and $4,100 for the second layer ($2M). We would advise taking advantage of this option as it will give you another 12 months to present claims incurred prior to 12/18/2015, which would include time spent in Flint and DPS. We have 30 days to decide whether to accept the offer for the extension. Just let us know.

We know this is last minute, but the delay in getting the renewal information, the complexity of the Flint issue and the current DPS broker blocking the markets hindered our ability to have quotes presented on a timely basis. Please let us know how you would like us to proceed as we are blocked at our other markets.

Regards,

Steve

Thanks for the information Steve. I had asked for an electronic copy of the policy and current status given the recent email traffic regarding not only this issue but the renewal status as well. I continue to await that information. Thank you for your assistance with those matters as expeditiously as possible.

> Dear Darnell;
>
> We have reviewed the policy for Professional Liability and the denial on the claim for Melisa Mays et al. The suit involved a number of families who are alleging that due to the toxic nature of the City of Flint water system they have suffered bodily injuries (i.e. high levels of copper and lead causing among other things, neurological and autoimmune disorders). Professional Liability policies are written to protect the insured from decisions that cause financial harm and not bodily injury or pollution arising from the decision. Bodily injury and pollution coverage are generally afforded under separate General Liability policies and/or a Pollution Liability policy.
>
> The coverage under your professional policy has specific exclusions for decisions that cause alleged bodily injury or pollution. There is no alleged monetary loss due to the decision of converting the water system (increased monetary costs to the plaintiff's by switching the systems) from Detroit to Flint only that families have suffered alleged bodily injury or property damage due to pollutants in the system. We have calls into the City of Flint notifying them that they need to have their General Liability or Pollution policies respond to the allegations.

Your professional policy has responded to other claims that have been submitted with respects to decisions that have caused alleged financial harm.

We are available for further conversations on this matter

Regards,
Steve

LOCAL FINANCIAL STABILITY AND CHOICE ACT (EXCERPT)
Act 436 of 2012

141.1560 Emergency manager; immunity from liability; responsibilities of attorney general; costs; insurance; litigation expenses after conclusion of date of service; failure of municipal government or school district to honor and remit legal expenses.

Sec. 20. (1) An emergency manager is immune from liability as provided in section 7(5) of 1964 PA 170, MCL 691.1407. A person employed by an emergency manager is immune from liability as provided in section 7(2) of 1964 PA 170, MCL 691.1407.

(2) The attorney general shall defend any civil claim, demand, or lawsuit which challenges any of the following:

(a) The validity of this act.

(b) The authority of a state official or officer acting under this act.

(c) The authority of an emergency manager if the emergency manager is or was acting within the scope of authority for an emergency manager under this act.

(3) With respect to any aspect of a receivership under this act, the costs incurred by the attorney general in carrying out the responsibilities of subsection (2) for attorneys, experts, court filing fees, and other reasonable and necessary expenses shall be at the expense of the local government that is subject to that receivership and shall be reimbursed to the attorney general by the local government. The failure of a municipal government that is or was in receivership to remit to the attorney general the costs incurred by the attorney general within 30 days after written notice to the municipal government from the attorney general of the costs is a debt owed to this state and shall be recovered by the state treasurer as provided in section 17a(5) of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.917a. The failure of a school district that is or was in receivership to remit to the attorney general the costs incurred by the attorney general within 30 days after written notice to the school district from the attorney general of the costs is a debt owed to this state and shall be recovered by the state treasurer as provided in the state school aid act of 1979, 1979 PA 94, MCL 388.1601 to 388.1896.

(4) An emergency manager may procure and maintain, at the expense of the local government for which the emergency manager is appointed, worker's compensation, general liability, professional liability, and motor vehicle insurance for the emergency manager and any employee, agent, appointee, or contractor of the emergency manager as may be provided to elected officials, appointed officials, or employees of the local government. The insurance procured and maintained by an emergency manager may extend to any claim, demand, or lawsuit asserted or costs recovered against the emergency manager and any employee, agent, appointee, or contractor of the emergency manager from the date of appointment of the emergency manager to the expiration of the applicable statute of limitation if the claim, demand, or lawsuit asserted or costs recovered against the emergency manager or any employee, agent, appointee, or contractor of the emergency manager resulted from conduct of the emergency manager or any employee, agent, appointee, or contractor of the emergency manager taken in accordance with this act during the emergency manager's term of service.

(5) If, after the date that the service of an emergency manager is concluded, the emergency manager or any employee, agent, appointee, or contractor of the emergency manager is subject to a claim, demand, or lawsuit arising from an action taken during the service of that emergency manager, and not covered by a procured worker's compensation, general liability, professional liability, or motor vehicle insurance, litigation expenses of the emergency manager or any employee, agent, appointee, or contractor of the emergency manager, including attorney fees for civil and criminal proceedings and preparation for reasonably anticipated proceedings, and payments made in settlement of civil proceedings both filed and anticipated, shall be paid out of the funds of the local government that is or was subject to the receivership administered by that emergency manager, provided that the litigation expenses are approved by the state treasurer and that the state treasurer determines that the conduct resulting in actual or threatened legal proceedings that is the basis for the payment is based upon both of the following:

(a) The scope of authority of the person or entity seeking the payment.

(b) The conduct occurred on behalf of a local government while it was in receivership under this act.

(6) The failure of a municipal government to honor and remit the legal expenses of a former emergency manager or any employee, agent, appointee, or contractor of the emergency manager as required by this section is a debt owed to this state and shall be recovered by the state treasurer as provided in section 17a(5) of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.917a. The failure of a school district to honor and remit the legal expenses of a former emergency manager or any employee, agent, appointee, or contractor of the emergency manager as required by this section is a debt owed to this state and shall be recovered by the state treasurer as provided in the state school aid act of 1979, 1979 PA 94, MCL

2 any other **Wrongful Act** whenever occurring which, together with a **Wrongful Act** which has been the subject of such notice, would constitute **Interrelated Wrongful Acts**,

M alleging, based upon, arising out of, or attributable to:
1. the actual, alleged or threatened discharge, dispersal, release, escape, seepage, migration or disposal of **Pollutants**, or
2 any direction or request that any **Insured** test for, monitor, clean up, remove, contain, treat, detoxify or neutralize **Pollutants**, or any voluntary decision to do so;

N alleging, based upon, arising out of, or attributable to any validity, invalidity, infringement, violation or misappropriation of any patent, copyright, service mark, trademark, trade name, trade secret or any other intellectual property right;

IV. EXTENDED REPORTING PERIOD

If the **Company** terminates or does not renew this **Policy** (other than for failure to pay a premium when due), or if the **Named Insured** terminates or does not renew this **Policy** and does not obtain replacement coverage as of the effective date of such termination or nonrenewal, the **Named Insured** shall have the right, upon payment of the additional premium described below, to a continuation of the coverage granted by this **Policy** for at least one **Extended Reporting Period** as follows:

A. Automatic **Extended Reporting Period**

The **Named Insured** shall have continued coverage granted by this **Policy** for a period of 60 days following the effective date of such termination or nonrenewal, but only for **Claims** first made during such 60 days and arising from **Wrongful Acts** taking place prior to the effective date of such termination or nonrenewal. This Automatic **Extended Reporting Period** shall immediately expire upon the purchase of replacement coverage by the **Named Insured**

B. Optional **Extended Reporting Period**

1. The **Named Insured** shall have the right, upon payment of the additional premium set forth in Item 9 of the Declarations, to an Optional **Extended Reporting Period**, for the period set forth in Item 9 of the Declarations following the effective date of such termination or nonrenewal, but only for **Claims** first made during such Optional **Extended Reporting Period** and arising from **Wrongful Acts** taking place prior to the effective date of such termination or nonrenewal.

2. This right to continue coverage shall lapse unless written notice of such election is given by the **Named Insured** to the **Company**, and the **Company** receives payment of the additional premium, within 60 days following the effective date of termination or nonrenewal

3. The 60 days of the Optional **Extended Reporting Period**, if it becomes effective, shall run concurrently with the Automatic **Extended Reporting Period**

C. The **Company** shall give the **Named Insured** notice of the premium due for the Optional **Extended Reporting Period** as soon as practicable following the date the **Named Insured** gives such notice of such election, and such premium shall be paid by the **Named Insured** to the **Company** within 10 days following the date of such notice by the **Company** of the premium due. The Optional **Extended Reporting Period** is not cancelable and the entire premium for the Optional **Extended Reporting Period** shall be deemed fully earned and non-refundable upon payment.

D The Automatic and Optional **Extended Reporting Periods** shall be part of and not in addition to the Limit of Liability for the immediately preceding **Policy Period** The Automatic and Optional **Extended Reporting Periods** shall not increase or reinstate the Limit of Liability, which shall be the maximum liability of the **Company** for the **Policy Period** and the Automatic and Optional **Extended Reporting Period**, combined.

E. A change in **Policy** terms, conditions, exclusions and/or premiums shall not be considered a nonrenewal for purposes of triggering the rights to the Automatic or Optional **Extended Reporting Period**

Weekly Conference Call Notes – Dec. 21, 2015

Allen Park –Dec. 18 –Mayor Matakas, M. Kibby, B. Cady, E. Cline, A. Heimann

- **Position & Classification Study** – Study is progressing. Development of comparable data is underway. Draft presentation is targeted for February 2016.

- **City Hall Flooding Insurance Issue** – Discussion with Time Equities has not gone well. The City noted that they are not easy to deal with and that Mr. Recny threatened to sue the City unless another payment of $200K was made. MML is to respond on this issue.

- **Weekly Calls** – Calls on December 25 and January 1 will be cancelled.

- **January RTAB** – Discussion of a possible movement of the RTAB meeting to the week of January 11. M. Kibby stated that the City has a conflicting Pension Board meeting on the 13th at 1 p.m.

- **Other Issues** – 1) Audit is nearing finalization. City Council approval is pending. 2) Mediation on the health care issue for the Gaydos case has been resolved. 3) Annual Disclosure Training for staff has been completed. 4) 5 of 7 City Council members have been enrolled for MML training.

    - City wishes to get guidance on Order 55-a regarding the sale of City Hall.
        - The City has not sent out proposals, as required by the EM Order but they have received an unsolicited offer for the front 2.5 acres. The offer is for $800K.
        - The City's appraisal was $250K for this piece of the property.
        - The City wishes to know if they have authority to Counter Offer or must they strictly follow the EM Order. The City wants to counter that the buyer must remove the old City Hall.
        - Eric indicated that he would follow-up on this issue.

    - The Mayor inquired if there were any specific Orders that prohibited him from delivering a State of the City Address.
        - He stated that Joyce prohibited him from doing so.
        - Eric stated that he was not aware of any Order on-point but that the City should consider how it wished to proceed.
        - Eric also stated that if he became aware of any orders on this issue, he would inform the City.

Benton Harbor –Dec. 3 – D. Watson, R. Widigan, D. Hudson

- **Weekly Priorities:**
  - CVTRS has been submitted to Treasury
  - Audit: finishing up the comment portion, will present to Commission on the 14 of December, if everything is finalized.
    - If it is finished in time it will be presented to the RTAB in December.
  - Two individuals have graduated from the police academy and have started working.
  - City has hired an additional three public safety officers, close to full staffing levels in FD and PD
  - Union Park improvements should be completed this spring

- **Lawsuits**: O'Brien, Unruh, and Lange
  - Insurance carrier is looking for a commitment from the City of $300K – settlement was last discussed at $1.7M.
  - Looking to settle with Lange, he is looking for $595K, attorney's think it's only worth $300-$400K.
  - Worst case scenario is it goes to court, policy coverage limits will kick in.
  - Will likely have another

- **Federal Building**:
  - The deed to the building was transferred to the City in 2000, but the deed wasn't recorded.
  - Tony's final order states that the city shall *Take any steps necessary, subject to Board approval, to support and facilitate*
  - *the disposal of the Benton Harbor Federal Building property [Tax Parcel Numbers 11-54-0340-0060-00-3 11-54-0340-0059-00-5, 155 Sixth Street and 109 Park Street, Benton Harbor, MI].*
    - Order 14-27, signed by Tony Saunders, issued an *agreement for sale of real estate* with Prairie Real Estate.
    - Does Darwin have to go back to the Commission to approve a sale that was already approved by EM Saunders.

- **Update on Vacant Positions:**
  - **Finance Director:** MML search was approved, needs RTAB approval.
  - **Water Department Superintendent:** Still being advertised on the AWWA, MI Rule Water, and City's website.
  - **Assistant City Manager/Community Development Director:** Darwin is currently filling this roll.
    - The City will likely use MML for this search.

        - Darwin has talked with Cornerstone Alliance and the Chamber of Commerce.

    - **Assessor** is on board, has been at city hall every day of the week, even though he's just part time (two days a week).
        - City will likely not pass the AMAR (Audit of Minimum Assessing Requirements) – will have to identify way to fix the situation.

- **HUD pay back for an ineligible costs:** Potential pay back of $60K.
    - HUD will reduce future money to pack back $60K, likely over 5 years.
    - HUD wants the city to work on doing more home repair, city doesn't have the funding in that allocation.

- **City Manager Evaluation Discussion**: No word.

- **Commissioner Muhammad**: will have to resign his seat when he takes the Mayor's seat.
    - He has set up a meeting with Darwin the week of Christmas.

Ecorse – Dec. 1 – W. O'Neal, T. Sadowski, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann, D. Hudson

Priorities

- Town Hall meeting is scheduled. Will be held in council chambers. Wayne will brief council on state of the city.
- Ecorse re-paving the boat ramp, and repairing light poles that were damaged by a trailer.
- Ecorse is looking for a location for the food pantry.
- Ecorse still looking to hire a DPW director. Have 3 applications for the position. Leaning toward a S1-certified, non-PE candidate who currently works for Ecorse's contracted engineering firm. Wayne states the candidate's S1 certification will save Ecorse $15K per year.
- Ecorse in process of bidding out a Water Meter Change-Out Program. Very much needed, Wayne said. City loses between $845K and $1M annually in water. The meters will cost approximately $225 per meter.
- Ecorse is going to bring back McKenna on a contractual basis.
- Wayne is also focusing on old bills / invoices from Great Lakes, looking for fraud.
- Wayne is looking to request quotes from insurance companies. Ecorse striving for a regular insurance carrier and coverage. Currently paying way too much in insurance costs.
- Wayne fired police lieutenant Blade and demoted (took his stripes) a fire sergeant.
- Wayne has directed the city to issue tickets for violating Certificate of Occupancy requirements.
- Wayne heard that Ecorse assessments will decrease another 25 percent next year. That will cost the city $275K.

- Preliminary audit of FY '15 shows a -$34K. Wayne said the city had to book some expenditures which took the operating balance from a positive $500K to a -$34K.

CDBG

- Ecorse is unaware that the county's CDBG program is changing from a formula program to a competitive one.
- Ecorse receives approximately $200K annually. Money is used for: $50K annual payment on fire truck purchase; code enforcement officer, demolition. Wayne said a change in the program would be a big hit to the city.

Annual ARC payment

- If Ecorse does not get the $2M FDCVT grant it has requested, Wayne maintains that he can add any increases from MERS to an existing judgement levy.
- Wayne maintains that the annual ARC is in the 5-year budget.
- MERS Ecorse account is funded at 47 percent. City losing 3 percent annually in assets.
- Ecorse is short $29M with MERS.

Flint – Dec. 16 – Mayor Weaver, N. Henderson, Nelson, W. Lamphiery, F. Headen, P. Dostine, A. Heimann

Water from KWA Testing

- DEQ/EPA requiring Flint to test water from KWA by installing a temporary pipeline for "one or two months"
- Temporary pipeline will run above the ground, cost about $3-4 Million and will be approximately 3 miles long
- Thinks that they can get KWA to pay for it, because they suggested that this is "their tie to the plant, just because it is not the permanent tie should make no difference in how KWA should approach funding this project".
- N. Henderson also suggested that there is a chance that the County would end up paying for it, but she hasn't explored that option fully yet.

Water Billing

- City residents still aren't paying their water bills
- The city expects that the judge will have a decision rendered by December 18th
- An unfavorable ruling would be, not only financially disastrous, but an "administrative nightmare" for the City to change the systems and re submit bills

Corrosion Control

- City has begun adding corrosion control treatment into the City's water supply, the amounts of the corrosion control will increase over time
- So far, there have been no complaints about foul tastes or water discoloration

State of Emergency Declaration

- Flint declared a state of emergency in Flint for issues related to the lead in the water on Dec 14th
- The city sent a certified declaration of emergency to the county, who will address this declaration at their meeting on Jan 4th, 2016.
- The City hopes that this will "move this issue up" to the Federal level so that they are able to receive some resources to help deal with their ongoing water issues in the City.

OTHER ISSUES

Public Safety

- City has had more shootings, but N. Henderson and others are confident that the grants that they are receiving from the Mott Foundation positively affect this over time. Mott Foundation grant was discussed in several recent calls, but funds community policing and other initiatives.
- Mayor Weaver expressed that the community is "very excited about the Mott Foundation Grant" and had expressed that this was a good thing, because the City was going to "need their help to make sure this works".

Letter submitted to the Treasury for assistance with Legal costs

- The City had submitted a letter to the Treasury asking for assistance with costs associated with various lawsuits they have against them. This is an issue that has been discussed many times in the past
- The Treasury will be sending the City a certified letter as a response to their request within a week.

Hamtramck – Dec. 17 – K. Powell, P. Dostine, D. Hudson

Miscellaneous

- Evaluation of Katrina. Council went into closed session Dec. 15 to discussed Katrina's evaluation. She received high scores from the Mayor, Karpinski and Ian gave Katrina high scores. Hassan, Miah, Musa and Zwolak gave low scores. The Mayor is compiling the scores and will present the outcome to Katrina and the council in the near future. Katrina said the closed session turned into a shouting match.

Human Resources

- BS&A. A company came in for $2,100 to clean up files and train staff in BS&A. Finance dept person – "Gia" -- received BS&A training to start doing payroll electronically rather than paper and pencil. Katrina said first payroll under new system went out without a "glitch".
- Katrina still looking for HR director.

CPI

- Hamtramck is cancelling CPI's contract. It will be on the Dec. 22 RTAB. The city wants a list of temporary vendors approved while an RFP is put together to replace CPI.

'15 Budget

- Audit discovered Detroit owes $500K to Hamtramck. Hamtramck must book Detroit's payment in FY '16, therefore Hamtramck's FY '15 GF fund balance will drop from $1M to $500K.
- Katrina expects the audit to be completed 2nd week in January.

Police overtime

- This month police overtime is up $7K over last month. Katrina sent all the officers, at one time. to get recertified on the gun range. Which hiked overtime.

Election fraud

- No update.

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.

- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.

- New water bills with the new water and sewer rates have been sent out to the customers.

- Wade-Trim has opened its customer service center on Woodward Avenue.
- BSA software installation has been completed.
- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.
- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Nov. 19 – M. Stuhldreher, R. Byrne, A. Heimann, D. Hudson, P. Dostine

Election results commentary

- Mayor. Mark said he's new to politics, the attorney that represented the residents in the water rates lawsuit which prevailed in the lower court but was overturned in the Circuit Court.
- Council and Mayor. Mark reported that the new members want to return to a strong mayor form of government. They would do this by changing the city charter. There has also been some talk, Mark reported, that they want the mayor to also assume city manager responsibilities. Or, they want to hire a city manager and not do a national search.
- The three incumbents whom are no longer on council (which includes Mayor Hampton) take with them 50 years of combined experience.
- Mark reported that the new council and mayor are less inclined to support the consent agreement. Treasury should not be surprised if it receives a letter from the new mayor requesting that the consent agreement come to an end.
- Perhaps Mark and the new mayor will come up to Lansing to meet with Treasury officials.
- Mark has planned an orientation for the new members on council. Five of the seven have already been scheduled for a MML training class. The two that are not going are incumbents. Mark requested grant dollars to cover the expense for sending council to the forthcoming February MML conference in Frankenmuth to get both Level One and Two training.

Parks and Recreation millage commentary

- This was a renewal millage (raises $400K annually for 10 years) that voters approved. It basically means that the status quo is maintained; the millage keeps the doors open. Parks and Rec is still stressed. Mark noted that 25% of the millage goes for heat and electricity bills.

Senior Services millage commentary

- Millage will raise $200K annually for 10 years. This is a new millage.

RRC (Redevelopment Ready Certification) designation

- The city is in the process of updating its Master Plan. In the process, those working on the plan are mindful to incorporate MEDC requirements and criteria necessary to be awarded RRC certification.

Lincoln Park – Dec. 16 – B Coulter, M. Coppler R Byrne, D. Van de Grift, E. Cline, A. Heimann, P Dostine

- **Priorities / updates**
  - Fire contract is close to be extended through 2017, set to expire June 2016.
  - Police dept. The city will be hiring 3 officers. Will be applying next year for a COPS grant which pays 75 percent of the salaries and benefits for 2 offices.

- **MSHDA**
  - A meeting is planned with MSHDA in January. The city has reached out to Talmer Bank and Fifth-Third Bank regarding homeownership programs.
  - Matt said the city is going to reach out to Jim Tischler from MSHDA next.
  - Treasury will be scheduling a meeting in early January, the latest, to talk about Lincoln Park's Consolidated Plan and Action Plan.
- **MERS**
  - No updates to report.

- **Final Order**
  - Brad was informed about the AG's comments on the Final Order: AG did not want Matt Coppler's job description included.
  - Treasury informed Brad to be very careful when to release info to the council about the Final Order. All agreed it will morning of Dec. 22.

- **2-year and 5-year**
  - 2-year budget arrived in Treasury this morning.
  - Treasury told Brad that the 2-year budget should contain as many of the "little" funds as possible, be as complete as possible. This prevents any future "tampering" by electeds when Brad exits.

Pontiac – Dec. 18 - R. Widigan, Mayor Waterman, Deputy Mayor Jane Bais-DiSessa, J. Sobota, N. Narzarko, R Byrne, R. Widigan

- **Weekly priorities:**

- HB 4462 passed the Senate by two votes, House went on holiday recess before it was taken up.
  - Joe and the Mayor stated this bill will have a strong negative financial impact on Pontiac and other cities. Senate fiscal analysis of HB 4462 is attached.

- **Hardest Hit Funds:** $753K possible loss, will have to be returned to Treasury Department.
  - Half of the homes in the city's historic district (20) are owned by the county and could be condemned.
    - They will need historic districts approval prior to demo.

- **PEG:** City will be meeting with the school district on January 20 to go over the project.
  - The project is $100K over what originally planned, after the city meets with the school district they will begin the project.
  - The City will be handling the funds and RFPs.

- **$6M with Gray Financial Group:** No update on the assessment from the legal department.

- **OPEB mediation:** City is working with the attorney to finalize a counterproposal

- **Phoenix Center:** Attorneys are working on the legal side
  - Working with council to get their input

- **Budget process:**
  - Audit was released and posted to the website, sent to council, etc..
    - Best audit the city has seen in years.

- **Council training:** Last week the city stated they were working on internal training – this week they said they weren't.
  - Dept. Mayor will discuss attending MML training.

Royal Oak Township – Dec. 14 – Supervisor Squall, R. Burgess, P. Dostine, D. Hudson

- **Priorities**

- Burgess and Fedewa are working to complete reports that are owed to Treasury per the Consent Agreement and F & O plan.
- Burgess said with police service agreement still uncertain the township has only produced a '16 budget. Can't project without the police agreement in place. The 5-year is on hold.
- Burgess put two Capital Improvement Projects into the '16 budget. He is not currently working on the 6-year CIP.
    - The two projects are 1) Widening of Wyoming Road, and 2) Updating of the accounting system.
- Burgess said for years the township has paid $20K annually for use of Grant School.

- **MERS**

- Burgess did not want to discuss this issue. He said he would like to bring it up during the next call. (Note: Because the supervisor was on the line I think Burgess was reluctant to talk about the MERS money.)

- **Police Update**

- The Supervisor said she had recently talked to the city of Southfield. The city told her it was interested in providing police services, but currently was under-staffed. Southfield said it was a year away from being at full capacity. Until then, it couldn't talk agreements with the township.
- Supervisor said Treasury told the township it could continue to collect the special assessment while it looked for an agreement with a local unit.
- Supervisor pledged to continue to work hard at finding a solution to the issue of no police service.

- **Clerk**
    - Supervisor expressed great frustration at the Clerk's unwillingness to perform her statutory responsibilities.
    - Supervisor said this happens every year around Christmas time.
    - Supervisor will be sending a letter to Treasury requesting advice on handling the situation.

Cline, Richard (Treasury)

RE: Budget to Actual Revenue and Expenditure Report

Please find attached the Budget to Actual Revenue and Expenditure Report and Cash and Investment Summary for the period ending November 30, 2015 for your review and submission to the RTAB per Emergency Manager Order 20.

The City's Fiscal Year 2014-2015 audit has been completed. As required by Public Act 2: Uniform Budget and Accounting Act and City Ordinance #3855, audited financial statements for the fiscal year ending June 30, 2015 will be filed with the state and provided to Council no later than December 31, 2015. The column "YTD Balance 06/30/2015" reflects audited activity and ending fund balances. Fiscal Year 2015-16 Amended Budget amounts reflect all amendments adopted by City Council and confirmed by the RTAB as of December 9, 2015.

Please let me know if any additional information is necessary or if you have any questions.

Doug A. Ringler, CPA, CIA
Auditor General

December 23, 2015

The Honorable Jim Ananich
Senate Minority Leader
State Capitol, Room S-105
Lansing, Michigan

Dear Senator Ananich:

Enclosed are answers to the questions you posed in your October 20, 2015 letter to our office regarding the audit we are conducting of the Office of Drinking Water and Municipal Assistance (ODWMA), Department of Environmental Quality (DEQ), specific to lead contamination in the City of Flint's drinking water. Also enclosed are additional questions we developed that are relevant to these issues, along with five exhibits:

- A map showing Flint water samples by zip code.
- A map showing lead counts of 5 parts per billion or higher.
- Two charts showing the number of samples by time period and zip code.
- A time line of the Flint water review.

We appreciate the opportunity to assist you in answering questions regarding this topic. If you have further questions or a request for other services, please do not hesitate to contact our office.

Sincerely,

Doug Ringler

Doug Ringler
Auditor General

Enclosures

Q1: How does ODWMA ensure the data it receives is accurate?

A: With regard to the United States Environmental Protection Agency (EPA) Lead and Copper Rule (LCR) monitoring requirements, DEQ relies on the following key controls to ensure the accuracy of test results:

- State-owned laboratories test water samples.
- State-owned laboratories send test results directly to DEQ.
- The City of Flint Water Treatment Plant (Flint WTP) certifies whether sample sites are classified as tier 1*.

The current Flint WTP LCR sampling process includes:

1. DEQ informs the Flint WTP of the required water lead and copper sample size.
2. The Flint WTP determines the pool of tier 1 sites for sampling.
3. The Flint WTP selects the sample.
4. The Flint WTP sends out sample kits and instructions to residents for collecting water samples.
5. Residents leave samples and signed sampling forms outside their front doors.
6. The Flint WTP employee picks up samples and forms from residents.
7. The Flint WTP employee reviews sample forms for completeness.
8. The Flint WTP employee sends samples to the State-owned laboratories.
9. State-owned laboratories test samples and provide results directly to DEQ.
10. DEQ receives water lead and copper sample results, which include the following information: date collected, date received, address where collected, type of residence (e.g., single family or apartment), and sample point (e.g., kitchen sink or bathroom sink).
11. DEQ tracks, and follows up if necessary, the number of samples collected by the Flint WTP to help ensure that the required minimum number of samples are collected by the monitoring period deadline.

* Single-family or multiple-family residence with lead service line, lead solder copper piping constructed after 1982, or lead plumbing.

12. The Flint WTP submits lead and copper report to DEQ that certifies whether sample sites meet tier 1 criteria.

13. DEQ prepares the LCR 90th percentile calculation report.

During our review, we noted two potential improvements for the Flint WTP sampling process (see Question 5 of the additional questions answered by the OAG regarding tier 1 sample validity):

- DEQ could verify that the sampling pool was limited to only tier 1 sample sites to ensure that the Flint WTP is in compliance with the LCR (Title 40, Part 141, section 86(a)(3) of the *Code of Federal Regulations* [*CFR*]).

- DEQ could independently verify the validity of sample site certifications.

Q2: What accountability measures are in place for ODWMA staff who fail to follow data verification protocols?

A: DEQ does not provide any direct oversight over the Flint WTP and, therefore, does not have any accountability measures over the Flint WTP's LCR data verification protocols. DEQ's data verification protocol for lead and copper water sampling is limited to verification that the WTP certifies samples submitted to the State-owned laboratories for analysis (see steps 7 and 12 in the Flint WTP LCR sampling process noted in Question 1 above). We did not identify any instances in which ODWMA staff failed to verify that submitted samples were certified by the Flint WTP.

Q3: What accountability measures are in place for ODWMA staff who lie or misrepresent information to the EPA?

A: As with all classified employees, ODWMA staff must adhere to the rules and regulations established by the Michigan Civil Service Commission. If any ODWMA staff were determined to misrepresent information to the EPA, they would be subject to Civil Service Rule 2-6, Discipline, which allows an appointing authority to discipline an employee for just cause up to and including dismissal. We are not aware of any DEQ-established measures that are in addition to the Civil Service Rules.

We gained access to the e-mail accounts of key DEQ management (DEQ Director, Deputy Director, ODWMA Chief, and other key ODWMA staff) extending back to January 1, 2013. We did so to identify the key decision points and conversations that occurred leading up to and through the situation in Flint. Our review was also intended to determine whether State, Flint, or other officials attempted to conceal key test results or other information.

We noted one e-mail exchange between DEQ and the EPA that appears to be a significant contributor to the concern that DEQ misrepresented information to the EPA. The EPA requested clarification on February 26, 2015 regarding the type of optimized corrosion control **treatment** the Flint WTP was using. DEQ responded on February 27, 2015 that the city had an optimized corrosion control **program** in place, but DEQ did not provide any program details. DEQ informed us that the Flint WTP corrosion control **program** included performing

lead and copper monitoring for two consecutive six-month periods to determine whether corrosion control **treatment** would be necessary in the future. However, it appears the EPA interpreted corrosion control **program** to mean that corrosion control **treatment** was being performed.

On April 23, 2015, the EPA again inquired as to what the Flint WTP was doing for corrosion control **treatment**. DEQ responded on April 24, 2015 that the Flint WTP was not practicing corrosion control **treatment**.

Based on our review of this and other e-mails, we have no specific reason to believe that DEQ willfully misrepresented the information to the EPA.

Q4: What policies do DEQ and ODWMA have in place to escalate major infractions up the chain of command?

A: We did not note any instances of major infractions (i.e., intentional disregard of policies, laws, regulations or specific directions) committed by DEQ staff during the course of our review. DEQ does not have a formal policy or procedure in place to escalate major infractions performed by ODWMA employees; however, our review of DEQ correspondence confirmed the escalation of key issues up the chain of command related to the Flint situation. DEQ stated that its informal policy is for staff to notify the proper level of management of infractions to determine necessary action.

Application of the LCR

Q1: How did the Flint WTP become the primary water supplier for the City of Flint?

A: Upon notification of the City of Flint's plans to switch to the Karegnondi Water Authority (KWA) in April 2013, the Detroit Water and Sewerage Department (DWSD) submitted a letter to the City of Flint stating that it would terminate its agreement to provide water services on April 17, 2014.

According to DEQ management, the Flint WTP attempted to negotiate with the DWSD to maintain it as the City of Flint water supplier; however, after negotiations were unsuccessful, the City of Flint notified DEQ through a permit request of its intent to operate the Flint WTP full time using the Flint River. Although the Flint City Council voted in March 2013 in support of moving to the KWA pipeline, the vote was silent on the use of the Flint River as a temporary drinking water source.

DEQ informed us that in the 1990s, the City of Flint upgraded the Flint WTP to serve as a backup source of water for emergencies. In 2006, the Flint WTP began quarterly testing of the treated Flint River water at the Flint WTP to ensure water quality standards were met; however, the Flint WTP did not test the water's effect on the distribution system at consumer tap locations.

Q2. Did DEQ consult with the EPA prior to determining how to apply the LCR?

A: DEQ did not consult with the EPA on how to apply the LCR prior to implementing two consecutive six-month monitoring periods of the Flint WTP beginning July 1, 2014. Based on past experiences applying the LCR monitoring requirements, DEQ believed that it had appropriately applied the LCR requirements of a large water system.

Q3: When Flint switched to the Flint River water source, should corrosion control treatment have been maintained?

A: We believe that corrosion control treatment should have been maintained.

According to the LCR, a water system can achieve optimized corrosion control if it submits results of tap water monitoring for two consecutive six-month monitoring periods with acceptable lead levels. However, a water system that has optimized corrosion control, and which has treatment in place, should continue to operate and maintain optimal corrosion control treatment.

DEQ staff explained that they did not treat the switch to Flint River water as a new system, but as a new source. DEQ further stated that because the Flint River was a new water source and there was a change in chemicals needed to treat the new source, a corrosion control study was needed to determine the impact on the water distribution system. Therefore, it was DEQ's interpretation that two rounds of six-month monitoring were still needed to evaluate the water quality and determine optimal corrosion control treatment.

The Flint water system had optimal corrosion control treatment when the DWSD WTP was the water supplier. Based on our review of notes from a July 21, 2015 EPA and DEQ conference call on DEQ's implementation of the LCR regarding whether the Flint WTP should have continued to maintain corrosion control treatment, it appeared that the EPA did not agree with DEQ's interpretation of the LCR. Region 5 EPA staff explained that they would talk to the EPA headquarters about the interpretation of regulations and believes that systems that have been deemed optimized need to "maintain" corrosion control. The Region agreed to provide supporting regulatory citations for the language about maintaining corrosion control.

On November 3, 2015, the EPA issued a memorandum stating that the LCR had differing possible interpretations; however, the EPA concluded that it is important for large water systems to take the steps necessary to ensure that appropriate corrosion control treatment is maintained at all times, thus ensuring that public health is protected. Based on this clarification, it appears that corrosion control treatment should have been maintained.

Q4: Should DEQ have required the Flint WTP to start pursuing optimized corrosion control treatment after the first round of six-month sampling results were above the lead action level of 5 parts per billion (ppb)?

A: Yes. According to DEQ's application of the LCR, within six months after the end of the monitoring period in which the water sample results exceeded the acceptable lead level, DEQ should have required the Flint WTP to start pursuing optimized corrosion control treatment.

The LCR states that the lead action level is exceeded if the lead level, as determined by the 90th percentile calculation, is greater than 15 ppb. If the lead action level is exceeded, water systems are required to take additional actions including educating the public about lead in drinking water as well as commencing lead service line replacement if the water system has already installed corrosion control and/or source water treatment. However, for water systems that have not yet implemented corrosion control treatment, they can be deemed to have optimized corrosion control without installing treatment if they can demonstrate lead levels below 5 ppb for two consecutive six-month periods.

The first round of six-month sampling results was received in late March 2015. Because the results were 1 ppb over the lead action level of 5 ppb, DEQ would not be able to achieve two consecutive six-month periods below 5 ppb. Therefore, DEQ should have notified the Flint WTP to start pursuing optimized corrosion control treatment. However, DEQ waited until the second round of sampling was completed (June 30, 2015) to assess whether water sample results improved.

Water Samples

Q5: Did DEQ verify that only tier 1 sample sites were selected by the Flint WTP in the two rounds of six-month samples?

A: DEQ did not verify that only tier 1 sample sites were selected. DEQ relies on the Flint WTP's certification of sample sites and does not perform any independent verification of those certifications.

In a November 19, 2015 *Flint Journal* article, the Flint WTP indicated that it did not have the ability to ensure that all sites were tier 1. In fact, water samples came from the random distribution of 175 testing bottles without regard for whether the homes were at risk for high lead levels. DEQ issued a formal memorandum on November 9, 2015 requesting that the Flint WTP verify the classification of all prior sample items. The results are due back from the Flint WTP on December 30, 2015.

Q6: DEQ dropped two water sampling sites from its second six-month sample (January 1, 2015 through June 30, 2015). Was this appropriate?

A: Yes, it was appropriate for DEQ to drop these two water sampling sites. Federal regulation 40 *CFR* 141.86(a) states:

> ". . . each water system shall complete a materials evaluation of its distribution system in order to identify a pool of targeted sampling sites that meets the requirements of this section . . . All sites from which first draw samples are collected shall be selected from this pool . . . Sampling sites may not include faucets that have point-of-use or point-of-entry treatment devices designed to remove inorganic contaminants."

This regulation also requires that a water system's targeted sampling pool consist of only tier 1 sampling sites if an adequate number is available to meet monitoring requirements.

According to federal regulation 40 *CFR* 141.86(f), the State may invalidate a water sample if it determines that the sample was taken from a site that did not meet the site selection criteria. A sample invalidated per this regulation does not count toward determining lead or copper 90th percentile levels or toward meeting the minimum monitoring requirements.

DEQ dropped one water sample site from its 90th percentile calculations because the site was from a business that does not meet the tier 1 requirements of being a single-family or multiple-family residence. The second sample site was dropped because the home had a point-of-entry treatment device to filter contaminants. Based on the criteria specified above, it appears that DEQ's rationale for dropping the samples from these two sites appropriately met the requirements for invalidating samples per federal regulation 40 *CFR* 141.86.

Q7: Was flushing of the taps the night before drawing a sample an appropriate sample methodology?

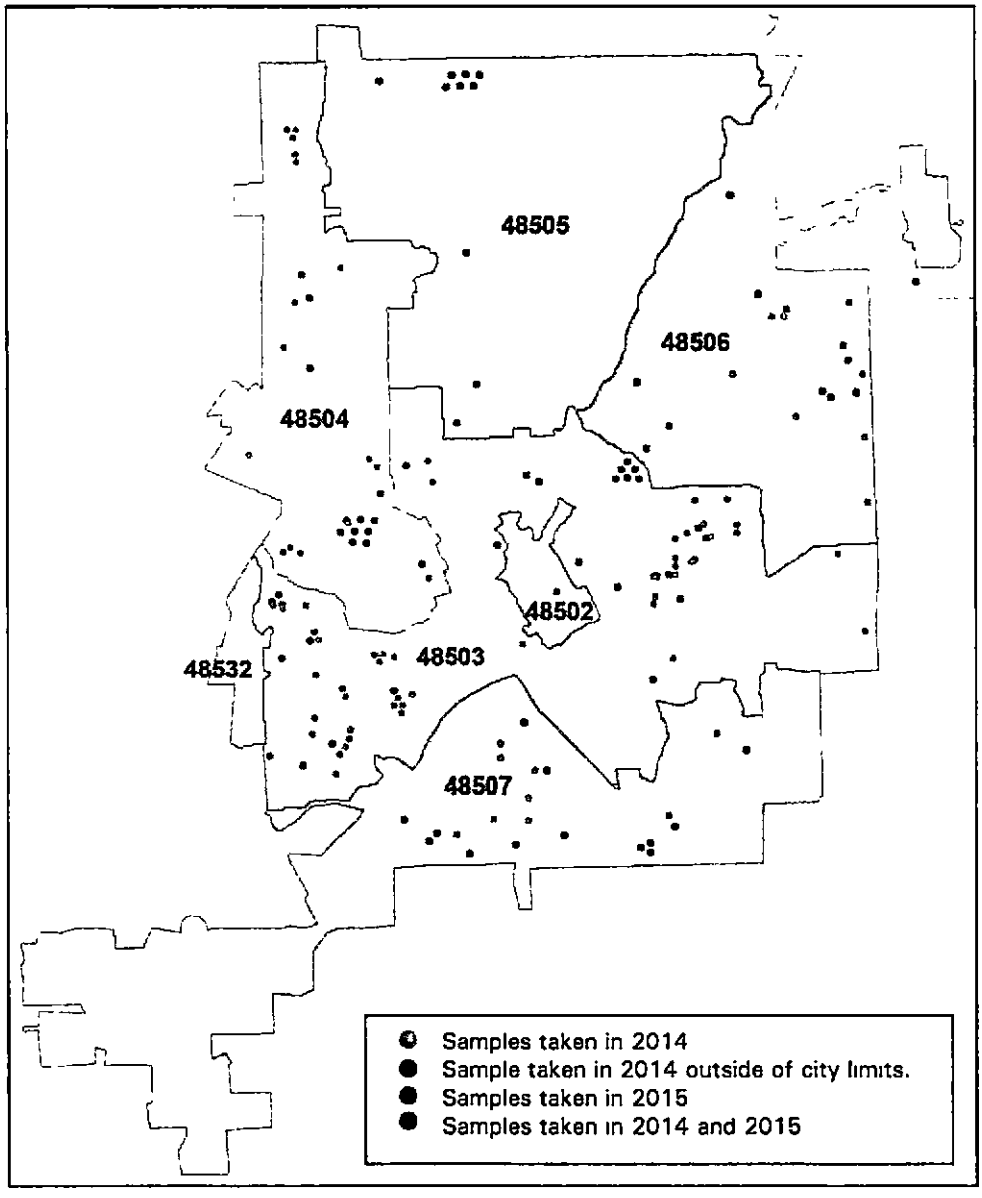
A: Yes. The LCR requires that samples be a first draw of water after six hours of stagnation. The LCR does not indicate whether or not the water line should be flushed prior to collecting the sample. In the sample instructions, DEQ required preflushing to ensure that sampled faucets were not stagnant for an excessive period of time beyond the targeted six hours (e.g., rarely used faucets or when a homeowner has been gone for an extended period of time.)

The LCR requires six hours of stagnation; however, it does not preclude DEQ from instructing residents to flush prior to stagnation.

Flint WTP 2014 and 2015 Sample Locations (Exhibit #1)

In calendar year 1992, the Flint WTP established a tier 1 sample site pool for LCR monitoring. With the change to the Flint River water, the Flint WTP needed to increase the pool of sample locations because of additional sampling requirements. The following exhibit documents the 2014 and 2015 sample locations for LCR monitoring. Based on the data obtained during our review, we could not determine how the locations were selected or whether they were properly classified as tier 1 sample sites.

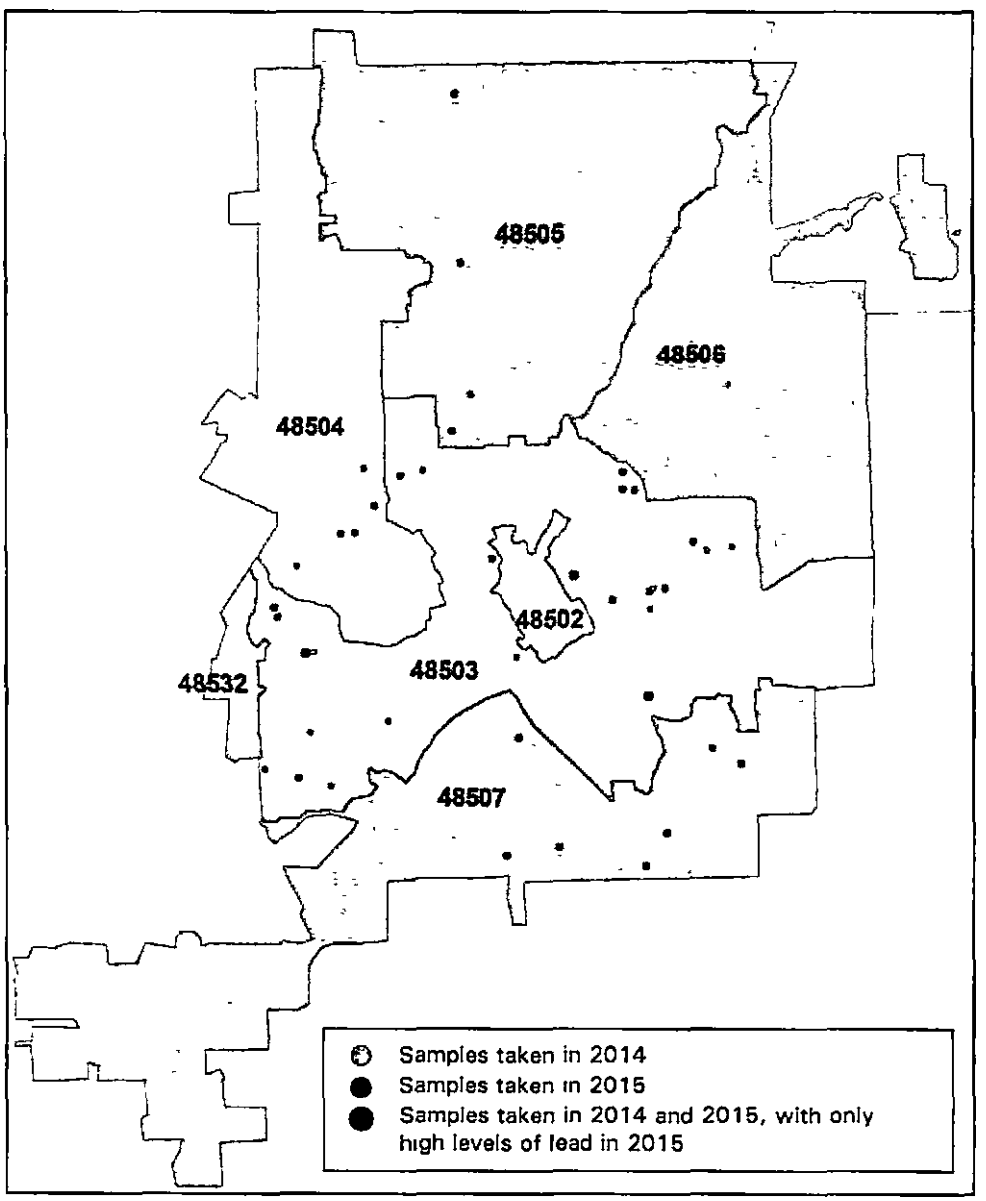
As noted in Question 5 of the additional questions answered by the OAG, DEQ has requested the Flint WTP to verify the tier 1 classification of all prior sample items.



Source: The OAG prepared this map using data obtained from DEQ and ©OpenStreetMap contributors (opendatacommons.org). The sample locations are approximate.

Flint WTP 2014 and 2015 Sample Locations With Lead Counts of 5 Parts Per Billion or Higher (Exhibit #2)

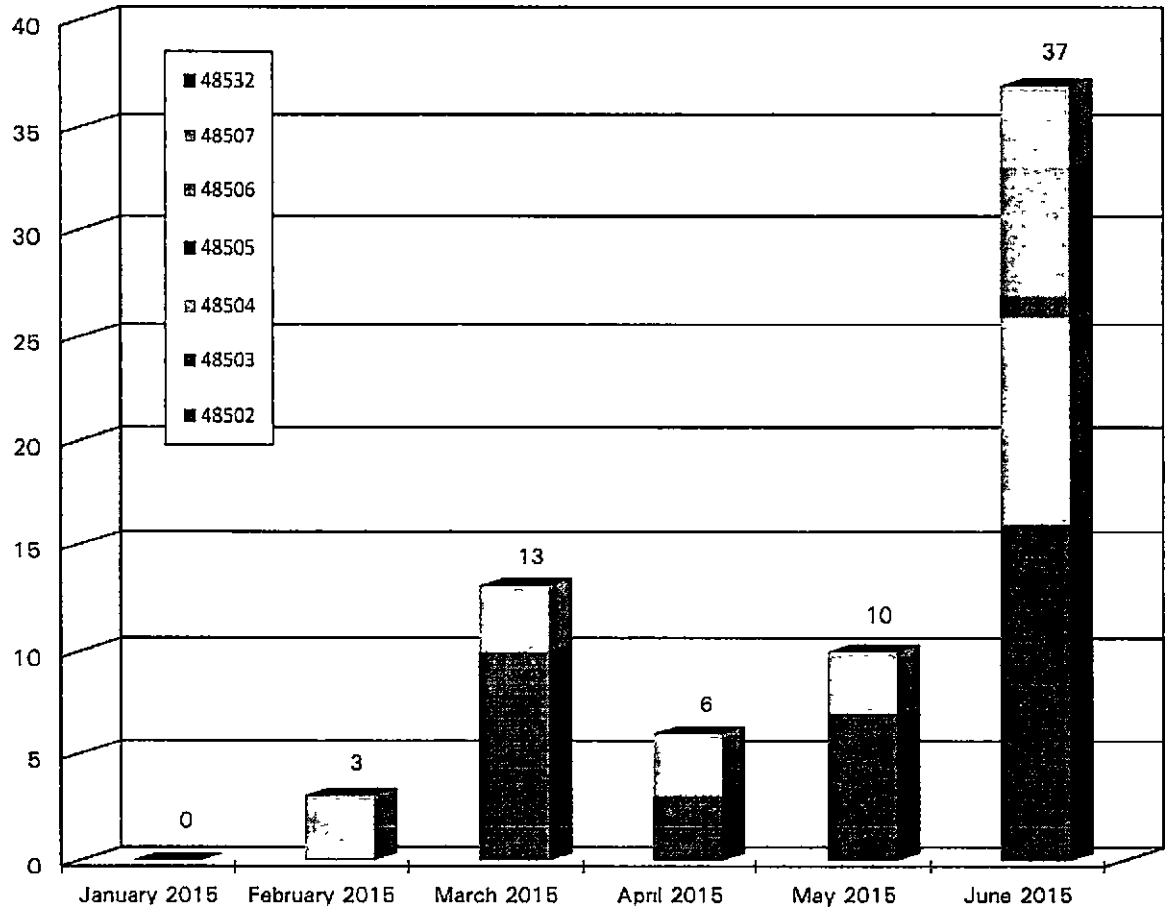
This exhibit documents the 2014 and 2015 sample locations with lead counts of 5 ppb or higher. This information is used in aggregate by DEQ to determine if the city has optimized lead levels.



Source: The OAG prepared this map using data obtained from DEQ and ©OpenStreetMap contributors (opendatacommons.org). The sample locations are approximate

Flint WTP 2015 Number of Samples by Time Period and Zip Code (Exhibit #3)

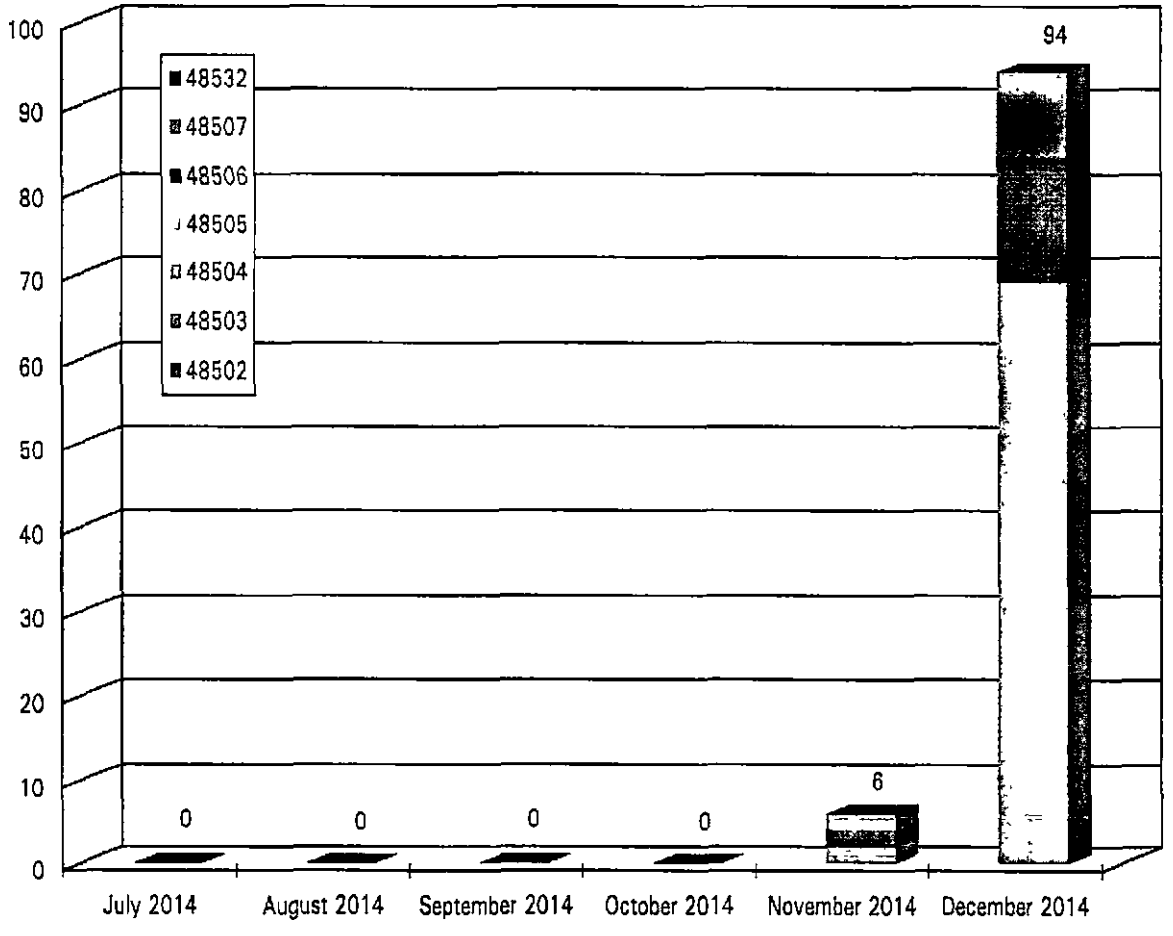
This chart expands on Exhibit #1 to show a summary by zip code and time of selection within the sampling period. Based on the data obtained during our review, we could not determine if the lateness of selection within the monitoring period affected the appropriateness of the sample items.



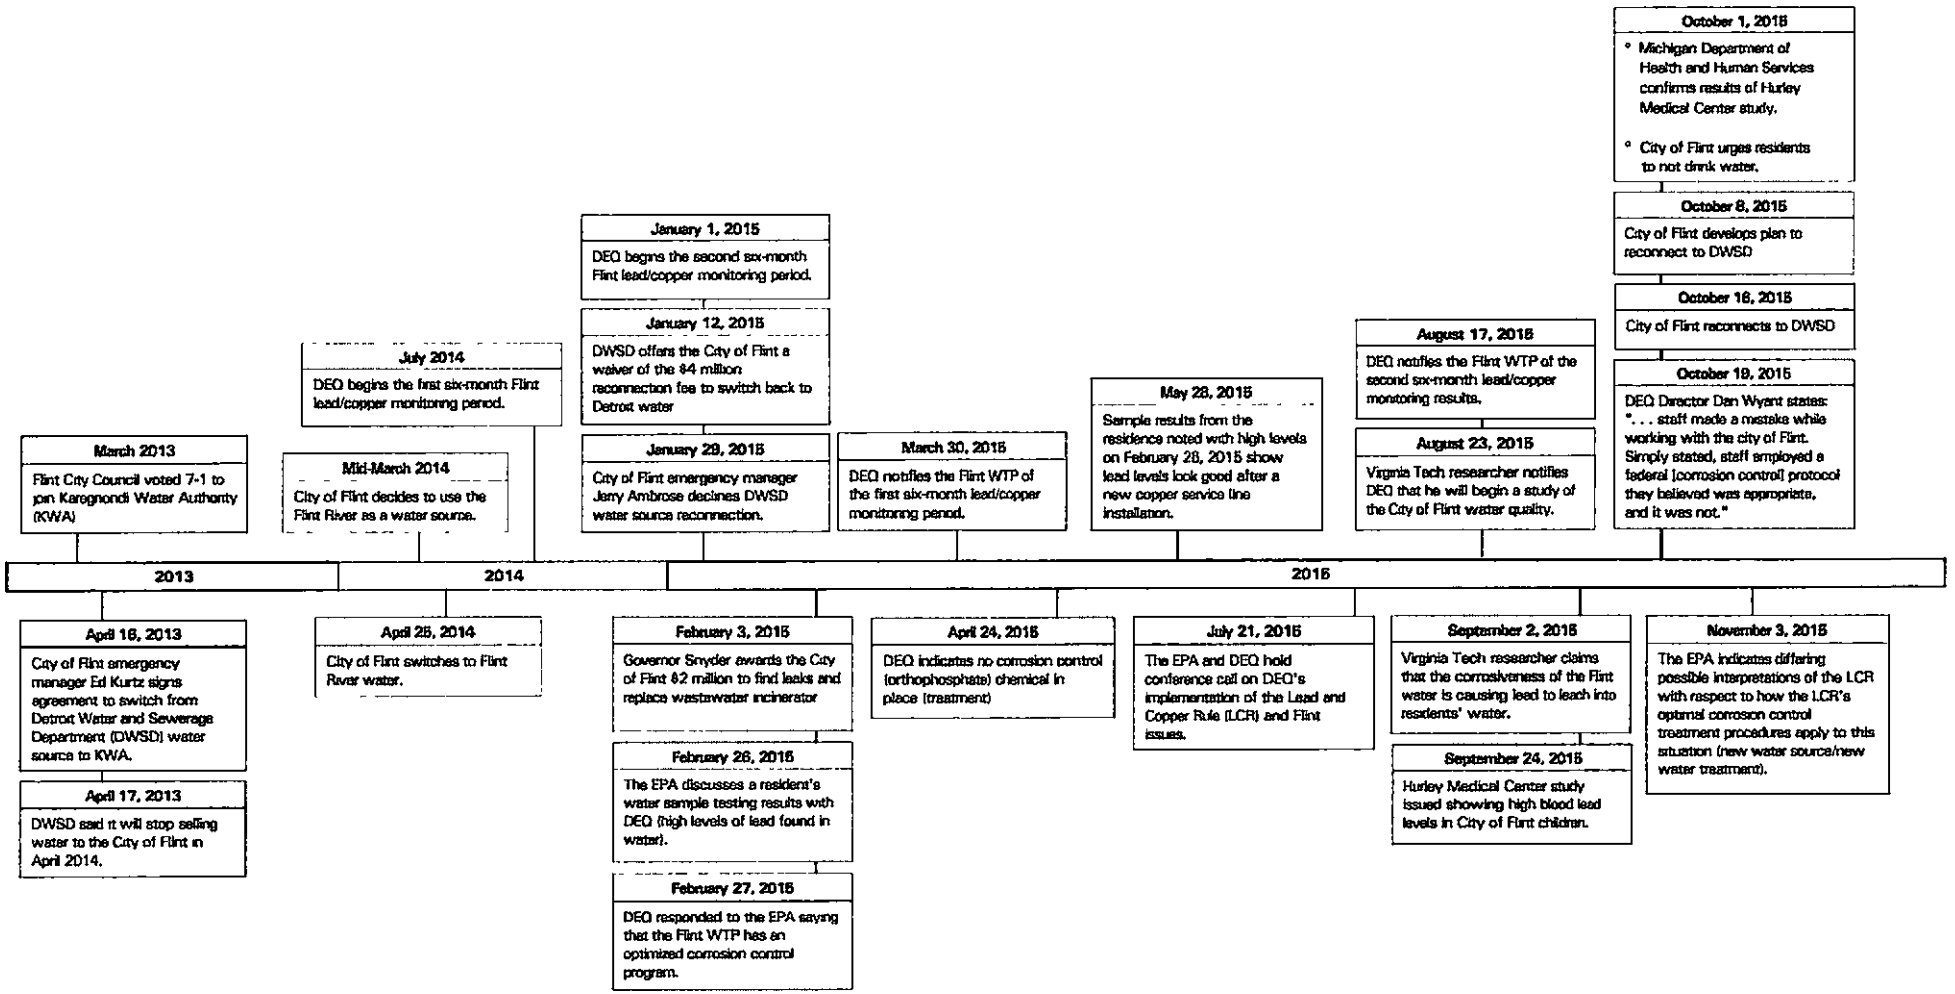
Source: The OAG prepared this chart using data obtained from DEQ

Flint WTP 2014 Number of Samples by Time Period and Zip Code (Exhibit #4)

This chart expands on Exhibit #1 to show a summary by zip code and time of selection within the sampling period. Based on the data obtained during our review, we could not determine if the lateness of selection within the monitoring period affected the appropriateness of the sample items.



Source: The OAG prepared this chart using data obtained from DEQ.



Source The OAG prepared this time line using data (e-mails, meeting notes, and letters) obtained from DEQ, newspaper and press release articles, the Flintwaterstudy.org, and the Hurley Medical Center survey results.

Dostine, Patrick (TREASURY)

From: Heimann, Alexandr (TREASURY)

Subject: Flint Call Notes - 12-23-15

Hello all,

Here are the call notes from this week's conversation with Flint.

Flint Weekly Call
12/23/15

Present:
E. Cline
P. Dostine
A. Heimann
R. Byrne
Mayor Weaver
Councilor Nelson

Not present:
F. Headen
W. Lamphier
N. Henderson

Water Update:
- Mayor Weaver had a meeting with the EPA who suggested that "everything was going well" in regards to treating the water.
- Mayor has not received any calls from citizens complaining about cloudy/foul tasting water to date
- People are bringing their water in to be tested for lead per the EPA's request

Water billing injunction:
- City received a favorable ruling on newest injunction, will allow the City to start shutting off water to residents for non-payment starting in January.
- Mayor Weaver suggested that there is significant confusion from residents and that many people think that the courts ruled that they did not have to pay their bills at all. She suggested that the City needs to do a significant public awareness campaign to notify people that they have to start paying their bills.
- Mayor needs to develop a strategy for public outreach, some conversation was had about press releases, postings on the City's website and Public Service messages on the radio/Local Television.

DPW Executive Search
- No significant updates about the Executive Search. Weaver has not had a chance to call Tom Adams, and may get in touch with Joyce Parker from the MML in the meantime as well

There will be no call next week on 12/30

Weekly Conference Call Notes – Dec. 28, 2015

Allen Park –Dec. 18 –Mayor Matakas, M. Kibby, B. Cady, E. Cline, P Dostine

- **Position & Classification Study** – Study is progressing. Development of comparable data is underway. Draft presentation is targeted for February 2016.

- **City Hall Flooding Insurance Issue** – Discussion with Time Equities has not gone well. The City noted that they are not easy to deal with and that Mr. Recny threatened to sue the City unless another payment of $200K was made. MML is to respond on this issue.

- **Weekly Calls** – Calls on December 25 and January 1 will be cancelled.

- **January RTAB** – Discussion of a possible movement of the RTAB meeting to the week of January 11. M. Kibby stated that the City has a conflicting Pension Board meeting on the 13th at 1 p.m.

- **Other Issues** – 1) Audit is nearing finalization. City Council approval is pending. 2) Mediation on the health care issue for the Gaydos case has been resolved. 3) Annual Disclosure Training for staff has been completed. 4) 5 of 7 City Council members have been enrolled for MML training.

    - City wishes to get guidance on Order 55-a regarding the sale of City Hall.
        - The City has not sent out proposals, as required by the EM Order but they have received an unsolicited offer for the front 2.5 acres. The offer is for $800K.
        - The City's appraisal was $250K for this piece of the property.
        - The City wishes to know if they have authority to Counter Offer or must they strictly follow the EM Order. The City wants to counter that the buyer must remove the old City Hall.
        - Eric indicated that he would follow-up on this issue.

    - The Mayor inquired if there were any specific Orders that prohibited him from delivering a State of the City Address.
        - He stated that Joyce prohibited him from doing so.
        - Eric stated that he was not aware of any Order on-point but that the City should consider how it wished to proceed.
        - Eric also stated that if he became aware of any orders on this issue, he would inform the City.

Benton Harbor –Dec. 3 – D. Watson, R. Widigan, D. Hudson

- **Weekly Priorities:**
  - CVTRS has been submitted to Treasury
  - Audit: finishing up the comment portion, will present to Commission on the 14 of December, if everything is finalized.
    - If it is finished in time it will be presented to the RTAB in December.
  - Two individuals have graduated from the police academy and have started working.
  - City has hired an additional three public safety officers, close to full staffing levels in FD and PD
  - Union Park improvements should be completed this spring

- **Lawsuits**: O'Brien, Unruh, and Lange
  - Insurance carrier is looking for a commitment from the City of $300K – settlement was last discussed at $1.7M.
  - Looking to settle with Lange, he is looking for $595K, attorney's think it's only worth $300-$400K.
  - Worst case scenario is it goes to court, policy coverage limits will kick in.
  - Will likely have another

- **Federal Building**:
  - The deed to the building was transferred to the City in 2000, but the deed wasn't recorded.
  - Tony's final order states that the city shall *Take any steps necessary, subject to Board approval, to support and facilitate*
  - *the disposal of the Benton Harbor Federal Building property [Tax Parcel Numbers 11-54-0340-0060-00-3 11-54-0340-0059-00-5, 155 Sixth Street and 109 Park Street, Benton Harbor, MI].*
    - Order 14-27, signed by Tony Saunders, issued an *agreement for sale of real estate* with Prairie Real Estate.
    - Does Darwin have to go back to the Commission to approve a sale that was already approved by EM Saunders.

- **Update on Vacant Positions:**
  - **Finance Director:** MML search was approved, needs RTAB approval.
  - **Water Department Superintendent:** Still being advertised on the AWWA, MI Rule Water, and City's website.
  - **Assistant City Manager/Community Development Director:** Darwin is currently filling this roll.
    - The City will likely use MML for this search.

        - Darwin has talked with Cornerstone Alliance and the Chamber of Commerce.

    - **Assessor** is on board, has been at city hall every day of the week, even though he's just part time (two days a week).
        - City will likely not pass the AMAR (Audit of Minimum Assessing Requirements) – will have to identify way to fix the situation.

- **HUD pay back for an ineligible costs:** Potential pay back of $60K.
    - HUD will reduce future money to pack back $60K, likely over 5 years.
    - HUD wants the city to work on doing more home repair, city doesn't have the funding in that allocation.

- **City Manager Evaluation Discussion**: No word.

- **Commissioner Muhammad**: will have to resign his seat when he takes the Mayor's seat.
    - He has set up a meeting with Darwin the week of Christmas.

Ecorse – Dec. 22 – W. O'Neal, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann, R. Widigan

- **Priorities:**
    - Council will receive and file the audit tonight – shows a decrease in fund balance, had to "book liabilities for lawsuits and pensions"
        - Ended with an overall debt of $34K
    - Council will be approving a $1.9M payment on the E-Loan
        - City would like a DEP schedule
    - 47% cash fund balance – the restriction on the U.S. Steel payment has ended.
        - However, this will drop after the $1.9M payment for debt service
    - 5-year budget is being reviewed by treasury
        - Wayne said to fund police and fire it is coming from PA 33 assessment
        - Wayne said if the arc payment goes up, the city has a judgment levy (Order) against it, the city can then levy it.
            - Drew said that the city attorney needs to review the Order before the next RTAB meeting.
            - Wayne said he will read it and talk to the attorney about it
    - City will do training every two months with employees – will have an employee book everyone will sign.
    - Wayne will be meeting with city council on an individual basis to discuss where he would like to head in regards to city attorney and DPW.
        - Wayne thinks he can bring a full time attorney on board for current cost or less.

- **SEV. Assessments:**
    - Decrease of 10% on residential tax base
        - Roughly $250K

- **Miscellaneous:** Wayne stated the City is headed in the right direction, needs to do various capital improvement projects, etc…

Flint – Dec. 23 – Mayor Weaver, Council President Nelson, R. Byrne, P. Dostine, E. Cline, A. Heimann

Water Update:

- Mayor Weaver had a meeting with the EPA who suggested that "everything was going well" in regards to treating the water.
- Mayor has not received any calls from citizens complaining about cloudy/foul tasting water to date
- People are bringing their water in to be tested for lead per the EPA's request

Water billing injunction:

- City received a favorable ruling on newest injunction, will allow the City to start shutting off water to residents for non-payment starting in January.
- Mayor Weaver suggested that there is significant confusion from residents and that many people think that the courts ruled that they did not have to pay their bills at all. She suggested that the City needs to do a significant public awareness campaign to notify people that they have to start paying their bills.
- Mayor needs to develop a strategy for public outreach, some conversation was had about press releases, postings on the City's website and Public Service messages on the radio/Local Television.

DPW Executive Search

- No significant updates about the Executive Search. Weaver has not had a chance to call Tom Adams, and may get in touch with Joyce Parker from the MML in the meantime as well

There will be no call next week on 12/30

Hamtramck – Dec. 17 – K. Powell, P. Dostine, D. Hudson

Miscellaneous

- Evaluation of Katrina. Council went into closed session Dec. 15 to discussed Katrina's evaluation. She received high scores from the Mayor, Karpinski and Ian gave Katrina high scores. Hassan, Miah, Musa and Zwolak gave low scores. The Mayor is compiling the scores and will present the outcome to Katrina and the council in the near future. Katrina said the closed session turned into a shouting match.

Human Resources

- BS&A. A company came in for $2,100 to clean up files and train staff in BS&A. Finance dept person – "Gia" -- received BS&A training to start doing payroll electronically rather than paper and pencil. Katrina said first payroll under new system went out without a "glitch".
- Katrina still looking for HR director.

CPI

- Hamtramck is cancelling CPI's contract. It will be on the Dec. 22 RTAB. The city wants a list of temporary vendors approved while an RFP is put together to replace CPI.

'15 Budget

- Audit discovered Detroit owes $500K to Hamtramck. Hamtramck must book Detroit's payment in FY '16, therefore Hamtramck's FY '15 GF fund balance will drop from $1M to $500K.
- Katrina expects the audit to be completed 2nd week in January.

Police overtime

- This month police overtime is up $7K over last month. Katrina sent all the officers, at one time, to get recertified on the gun range. Which hiked overtime.

Election fraud

- No update.

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.

- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.

- New water bills with the new water and sewer rates have been sent out to the customers.

- Wade-Trim has opened its customer service center on Woodward Avenue.

- BSA software installation has been completed.

- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.

- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Nov. 19 – M. Stuhldreher, R. Byrne, A. Heimann, D. Hudson, P. Dostine

Election results commentary

- Mayor. Mark said he's new to politics, the attorney that represented the residents in the water rates lawsuit which prevailed in the lower court but was overturned in the Circuit Court.
- Council and Mayor. Mark reported that the new members want to return to a strong mayor form of government. They would do this by changing the city charter. There has also been some talk, Mark reported, that they want the mayor to also assume city manager responsibilities. Or, they want to hire a city manager and not do a national search.
- The three incumbents whom are no longer on council (which includes Mayor Hampton) take with them 50 years of combined experience.
- Mark reported that the new council and mayor are less inclined to support the consent agreement. Treasury should not be surprised if it receives a letter from the new mayor requesting that the consent agreement come to an end.
- Perhaps Mark and the new mayor will come up to Lansing to meet with Treasury officials.
- Mark has planned an orientation for the new members on council. Five of the seven have already been scheduled for a MML training class. The two that are not going are incumbents. Mark requested grant dollars to cover the expense for sending council to the forthcoming February MML conference in Frankenmuth to get both Level One and Two training.

Parks and Recreation millage commentary

- This was a renewal millage (raises $400K annually for 10 years) that voters approved. It basically means that the status quo is maintained; the millage keeps the doors open. Parks and Rec is still stressed. Mark noted that 25% of the millage goes for heat and electricity bills.

Senior Services millage commentary

- Millage will raise $200K annually for 10 years. This is a new millage.

RRC (Redevelopment Ready Certification) designation

- The city is in the process of updating its Master Plan. In the process, those working on the plan are mindful to incorporate MEDC requirements and criteria necessary to be awarded RRC certification.

Lincoln Park – Dec. 16 – B Coulter, M. Coppler R Byrne, D. Van de Grift, E. Cline, A. Heimann, P Dostine

- **Priorities / updates**
  - Fire contract is close to be extended through 2017, set to expire June 2016.
  - Police dept. The city will be hiring 3 officers. Will be applying next year for a COPS grant which pays 75 percent of the salaries and benefits for 2 offices.

- **MSHDA**
  - A meeting is planned with MSHDA in January. The city has reached out to Talmer Bank and Fifth-Third Bank regarding homeownership programs.
  - Matt said the city is going to reach out to Jim Tischler from MSHDA next.
  - Treasury will be scheduling a meeting in early January, the latest, to talk about Lincoln Park's Consolidated Plan and Action Plan.
- **MERS**
  - No updates to report.

- **Final Order**
  - Brad was informed about the AG's comments on the Final Order: AG did not want Matt Coppler's job description included.
  - Treasury informed Brad to be very careful when to release info to the council about the Final Order. All agreed it will morning of Dec. 22.

- **2-year and 5-year**
  - 2-year budget arrived in Treasury this morning.

- Treasury told Brad that the 2-year budget should contain as many of the "little" funds as possible, be as complete as possible. This prevents any future "tampering" by electeds when Brad exits.

Pontiac – Dec. 11 - R. Widigan, Mayor Waterman, Deputy Mayor Jane Bais-DiSessa, J. Sobota, N. Narzarko,

- **Weekly priorities:**
  - HB 4462 passed the Senate by two votes, House went on holiday recess before it was taken up.
    - Joe and the Mayor stated this bill will have a strong negative financial impact on Pontiac and other cities. Senate fiscal analysis of HB 4462 is attached.

- **Hardest Hit Funds:** $753K possible loss, will have to be returned to Treasury Department.
  - Half of the homes in the city's historic district (20) are owned by the county and could be condemned.
    - They will need historic districts approval prior to demo.

- **PEG:** City will be meeting with the school district on January 20 to go over the project.
  - The project is $100K over what originally planned, after the city meets with the school district they will begin the project.
  - The City will be handling the funds and RFPs.

- ***$6M with Gray Financial Group:*** *No update on the assessment from the legal department.*

- **OPEB mediation:** City is working with the attorney to finalize a counterproposal

- **Phoenix Center:** Attorneys are working on the legal side
  - Working with council to get their input

- **Budget process:**
  - Audit was released and posted to the website, sent to council, etc..
    - Best audit the city has seen in years.

- **Council training:** Last week the city stated they were working on internal training – this week they said they weren't.
    - Dept. Mayor will discuss attending MML training.

Royal Oak Township – Dec. 14 – Supervisor Squall, R. Burgess, P. Dostine, D. Hudson

- **Priorities**

- Burgess and Fedewa are working to complete reports that are owed to Treasury per the Consent Agreement and F & O plan.
- Burgess said with police service agreement still uncertain the township has only produced a '16 budget. Can't project without the police agreement in place. The 5-year is on hold.
- Burgess put two Capital Improvement Projects into the '16 budget. He is not currently working on the 6-year CIP.
    - The two projects are 1) Widening of Wyoming Road, and 2) Updating of the accounting system.
- Burgess said for years the township has paid $20K annually for use of Grant School.

- **MERS**

- Burgess did not want to discuss this issue. He said he would like to bring it up during the next call. (Note: Because the supervisor was on the line I think Burgess was reluctant to talk about the MERS money.)

- **Police Update**

- The Supervisor said she had recently talked to the city of Southfield. The city told her it was interested in providing police services, but currently was under-staffed. Southfield said it was a year away from being at full capacity. Until then, it couldn't talk agreements with the township.
- Supervisor said Treasury told the township it could continue to collect the special assessment while it looked for an agreement with a local unit.
- Supervisor pledged to continue to work hard at finding a solution to the issue of no police service.

- **Clerk**
    - Supervisor expressed great frustration at the Clerk's unwillingness to perform her statutory responsibilities.
    - Supervisor said this happens every year around Christmas time.
    - Supervisor will be sending a letter to Treasury requesting advice on handling the situation.

December 29, 2015

Dear Governor Snyder:

The Flint Water Advisory Task Force, which you appointed on October 21, 2015, has devoted considerable effort and countless hours to our review of the contamination of the Flint water supply: what happened, why it occurred, and what is needed to prevent a recurrence in Flint or elsewhere in the state. We have also been assessing ongoing mitigation efforts to help assure that short- and long-term public health issues and water management concerns will be properly addressed to safeguard the health and well being of the Flint community.

Shortly after we began our work, we recognized the immediate need for better coordination of the state's response to the ongoing public health issues in Flint, and for assignment of a single person to provide this coordination. We addressed these concerns in a letter to you on December 7, 2015, and you responded with immediate adoption of these recommendations. We thank you for the commitment your response demonstrates.

In our continuing efforts, we have now interviewed numerous individuals at state and local levels; reviewed many documents, articles, and emails; and deliberated repeatedly as a group. Both individually and as a group, we have visited Flint several times during the past several weeks to meet with citizens, public health officials and healthcare providers, individuals who have water management responsibilities at the city and county levels, and other public officials.

It is clear to us, particularly as we listen to the people of Flint, that it is both critical and urgent to establish responsibility for what happened in their community and to ensure accountability. This is a first step in a long process to re-establish the trust they no longer have in their government and the agencies whose responsibility it is to protect their health. It is urgent because this deep distrust of government continues to compromise the effective delivery of protective services designed to address ongoing public health issues. It is for these reasons that we are sending this letter at this time.

We believe the primary responsibility for what happened in Flint rests with the Michigan Department of Environmental Quality (MDEQ). Although many individuals and entities at state and local levels contributed to creating and prolonging the problem, MDEQ is the government agency that has responsibility to ensure safe drinking water in Michigan. It failed in that responsibility and must be held accountable for that failure.

The Safe Drinking Water Act (SDWA) places responsibility for compliance with its requirements on the public water system. In this instance, the City of Flint had the responsibility to operate its water system within SDWA requirements, under the jurisdiction of the MDEQ. The role of the MDEQ is to **ensure** compliance with the SDWA through its regulatory oversight as the primary agency having enforcement responsibility for the Flint water system.

The MDEQ failed in three fundamental ways.

Regulatory Failure

We believe that in the Office of Drinking Water and Municipal Assistance (ODWMA) at MDEQ, a culture exists in which "technical compliance" is considered sufficient to ensure safe drinking water in Michigan.

This minimalist approach to regulatory and oversight responsibility is unacceptable and simply insufficient to the task of public protection. It led to MDEQ's failure to recognize a number of indications that switching the water source in Flint would—and did—compromise both water safety and water quality. The MDEQ made a number of decisions that were, and continue to be, justified on the basis that federal rules "allowed" those decisions to be made. ODWMA must adopt a posture that is driven not by this minimalist technical compliance approach, but rather by one that is founded on *what needs to be done to assure drinking water safety.*

A culture change must occur within ODWMA. It must be driven by a mission that is aspirational regarding the role of the MDEQ in ensuring the safety and the quality of Michigan's drinking water. We believe, and have expressed to MDEQ Director Dan Wyant, that as a Great Lakes State, Michigan should aspire to have the safest drinking water in the nation, rather than merely aiming for technical compliance with regulatory requirements.

Failure in Substance and Tone of MDEQ Response to the Public

Throughout 2015, as the public raised concerns and as independent studies and testing were conducted and brought to the attention of MDEQ, the agency's response was often one of aggressive dismissal, belittlement, and attempts to discredit these efforts and the individuals involved. We find both the tone and substance of many MDEQ public statements to be completely unacceptable. In a real way, the MDEQ represents the public, including the very individuals it treated dismissively and disrespectfully in public statements. We recognize that the agency might disagree with the opinions of others on a variety of issues, including testing protocol, interpretation of testing results, the requirements of federal law and rules, and other matters. What is disturbing about MDEQ's responses, however, is their persistent tone of scorn and derision. In fact, the MDEQ seems to have been more determined to discredit the work of others—who ultimately proved to be right—than to pursue its own oversight responsibility.

Failure in MDEQ Interpretation of the Lead and Copper Rule

The federal Lead and Copper Rule (LCR) is central to what happened in Flint, because that rule, at least theoretically, is designed to prevent lead and copper contamination of drinking water. The federal LCR calls for "optimized corrosion control treatment," which the MDEQ did not require in the switch to the Flint River. Prior to the switch, MDEQ staff instructed City of Flint water treatment staff that corrosion control treatment (CCT) was not necessary until two six-month monitoring periods had been conducted. The need for CCT would be evaluated after the results from those two monitoring periods were reviewed. The decision not to require CCT, made at the direction of the MDEQ, led directly to the contamination of the Flint water system.

The MDEQ seems to have taken different positions on whether it faithfully followed the LCR in the Flint situation. It first maintained that it followed the LCR, then stated that it did not follow the rule properly, and most recently claimed that a federal memorandum issued by the US EPA in early November 2015 suggests that the original MDEQ interpretation was possibly correct.

We are not convinced. Even the MDEQ's latest interpretation of the US EPA's November memorandum is overly legalistic and misunderstands the intent of the LCR, which is to minimize risks of lead and copper exposure for human health.

We believe ODWMA's single-minded legalistic focus is the heart of the problem, and it is part of the "technical compliance" culture described above. ODWMA should not be basing its actions solely on a

legally possible interpretation of the LCR. It should be focusing on how to protect Michigan's citizens from lead in drinking water.

We met with MDEQ Director Wyant on December 16, 2015, to discuss these issues, as well as many others. We note his substantial agreement with many of our conclusions, particularly as it relates to the regulatory failure and the abysmal public response of his agency. It is our understanding that he has drawn similar conclusions in his own evaluation of the MDEQ's role in the Flint water crisis. At the same time, it was disappointing to hear his weak defense of the CCT decision based on the EPA's November 2015 memorandum.

We are not finished with our work. Other individuals and entities made poor decisions, contributing to and prolonging the contamination of the drinking water supply in Flint. As an example, we are particularly concerned by recent revelations of MDHHS's apparent early knowledge of, yet silence about, elevated blood lead levels detected among Flint's children. We also feel it important to further review local government decision processes under emergency management Our final report will highlight and discuss those concerns, among many others, to provide some context to a comprehensive series of recommendations. **As stated earlier in this letter, however, we believe that establishing responsibility is a critical and urgent need, and one that should not wait for our final report in 2016. Individuals and agencies responsible must be held accountable in a timely fashion.**

It is our hope that the heightened awareness of the dangers of lead poisoning can be an opportunity to make Michigan safer, particularly for its children. Drinking water must be recognized as a potential source of health risk exposure when water lines and fixtures containing lead are disturbed or compromised. Proper testing, not only in high-risk areas but also in facilities serving children (e.g., schools), must be considered. Facilitating long-term financing of a model public health program, and also replacement of lead-containing water service lines and fixtures, would enable Michigan to realize a positive lasting legacy from the tragedy of the Flint water crisis. Our final report will address some of these issues

The City of Flint's water customers—fellow Michigan citizens—were needlessly and tragically exposed to toxic levels of lead through their drinking water supply. They deserve a commitment to properly assess responsibility and ensure accountability. They also deserve a commitment to needed mitigation in both the short and long term. The Flint water crisis never should have happened. Having failed to prevent it, state government should coordinate a sustained, public-health-focused response to remedy, to the fullest extent possible, the impacts on the Flint community.

Respectfully yours,

Flint Water Advisory Task Force:

Matt Davis
Chris Kolb
Larry Reynolds
Eric Rothstein
Ken Sikkema

Robert, Carla M. (Treasury)

Dan,
Thanks for putting this draft together. I agree with Rich's edits, and the attached document has my recommendations. Also, I suggest we add the following departments to comment on this document as the issue in Flint now goes beyond water quality: Treasury, MSP and Dept. of Education. I've taken the liberty to solicit comments from the added directors through this reply.

Best,
Harvey

Subject: Comments on SoS

Dan:

I added Jarrod and Meegan since we were engaged with Harvey and with Governor Thursday morning last week. I may be advocating a higher degree of "aggression" than others deem proper and I will defer to Jarrod after having had my say.

My key points on the attached (with suggested language and which have been highlighted) are:

1). Apologize. It happened on our watch and it shouldn't have happened, no matter what the law says.

2). Invite those who were the biggest burrs under the saddle to come work with us. In fact, we should be articulating how they have already been invited to our labs to collaborate on the findings and conclusions.

3). Start framing the infrastructure problem. We have huge problems throughout the state with aged piping and plumbing. Ignoring it will be at the peril of future generations. We should put a number out there on what it is going to take to fix it or conclude it is safe for generations to come.

Thanks for taking the lead.

Regards,

Rich

I have put Comments/Questions/Suggestions in [ ]...

Draft –Not for Distribution 12/28/15

TAKING ACTION ON FLINT WATER

[I would start off with an apology..."Among the things our citizens have a right to expect from their government is clean, safe water. In Flint's case, government failed them on many levels. As the Chief Executive of the state, I apologize for these failures and am absolutely committed to making things right. I would ask that all of our leaders at the local, state and federal level, work with me to solve the immediate problems and put in place long term measures to monitor and address the consequences from exposure. I also want to thank Dr. Mona Attisha Hannah and Dr. Marc Edwards for their diligence in making sure I understood the severity of the problem before us.]

• ~~Flint~~ Every municipality in Michigan deserves safe drinking water.

• ~~The issues around Flint's drinking water represent the challenges of aging infrastructure~~

• As Governor, I am committed to addressing the issue.

• Lead exposure is a serious issue.

• I appreciate those who have brought attention to this issue.

• We are committed to safe drinking water and to working in partnership with the city of Flint, Genesee County, and the U.S. EPA.

• We must learn from what happened in Flint.

• In October, I announced a ten point action plan to address lead exposure in Flint.

• Today, I am outlining additional actions to make sure the public health is protected in Flint and elsewhere in the State of Michigan.

• I am asking for changes in order to see that the Michigan Drinking Water Program becomes a national leader in public health protection.

On October 2, 2015 the Flint Water Action Plan was announced. With the help of the Michigan Legislature and the Mott Foundation, we have taken significant action to address the issue. Actions include:

• Switching back to the Great Lakes Water Authority/DWSD water supply (October 16, 2015)

Commented [HH1]: The issue in Flint is the failure of Government to ensure safe drinking water. The aging infrastructure exacerbated that failure, and serves as the canary in the coal mine re the need for the legislature to address water and sewage infrastructure statewide.

Commented [HH2]: It is important to note that this switch is temporary until KWA is online.

• Provided water filters to residents of Flint. (DHHS to provide update) [Distribution has been a problem--are we addressing it?]

• Testing all Flint schools, preschools and day cares. Summary of results to date.(George to provide)

• Expanded health exposure testing of individual residences. Summary of results to date. (Nick to provide)

• Offer water testing at no cost to Flint residents to assure safe water. Summary of results to date. (George to provide)

• Expedite optimizing corrosion control in the Flint drinking water system. Summary of date completed. (George to summarize)

• Utilize the "Safe Drinking Water Technical Advisory Committee." To ensure the best technology, practices and science are being utilized; national experts have been assembled to provide technical advice. [Will you include Dr. Mona? Larry Reynolds? Mark Edwards?]

• Accelerate water system improvement to address replacement of lead service lines. We are working with the city of Flint and our Congressional delegation on a lead service line replacement plan.

• Working to expedite the completion of the Karegnondi Water Authority. And to provide the expertise to upgrade the water treatment facility in Flint to ensure that the drinking water from KWA is at least the same quality as the water from GLWA/DWSD

• Expand a lead education program.
(DHHS to provide update)

• Dr. Eden Wells was named as the Flint Drinking Water Public Health Advisor to ensure safe drinking water.

[Flint's Head of Mott Children's Hospital, Dr. Larry Reynolds was named to the Flint After Action Task Force].

In addition to the announced Flint Action plan, I am calling for additional actions to be taken.

• Recently appointed Harvey Hollins to serve as my administration's point person to coordinate ongoing activities and partner with the city of Flint. [Harvey will be supported by senior members of my executive team to remove impediments and ensure efficient coordination at all levels.]

• Asking the DEQ to develop a statewide drinking water school testing program.

• Asking for changes in the Michigan Drinking Water Program in order for it to be recognized as a national leader in public health including:
o New administrative leadership.
o Creation of corrosion control expertise.
o Expanded statewide testing.
o Improved testing protocols.

• The creation of a health fund for children affected by lead exposure.

• Calling on the Legislature to work with my administration and stakeholders to develop a Strategic Water Fund to address Michigan's long term safe water and water quality infrastructure needs. [This can't get lost. Need more to educate people that our infrastructure is old, that the average city of 50,000 or more likely requires $$$ in remediation. At some point the anti corrosive treatment is not likely to be sufficient.]

• I will look to implement additional recommendations of the Flint Water Advisory Task Force, and I appreciate their leadership on this issue. [I would say more here—the TF was bi-partisan, independent, and staffed by incredible talent. It has done an incredible job].

• Ensure transparency for the public regarding actions taken in Flint to resolve this crisis

Re: Consideration for Appointment to the Hurley Medical Center Board of Managers

Date: November 30, 2015

Our community faces challenges that cross all social backgrounds, social strata, and community demographics. Hurley Medical Center has been a stalwart in the ongoing battle to save lives and help people. As we move through these challenges in our quest for quality care, it would be an honor to be affiliated with an organization that makes a positive impact in the lives of so many people.

Although my background has focused on creativity and education, having served as a member of the Citizen's Banking Corporate Board of Directors, as well as a member of various community boards and organizations, and on a lighter, but very significant note, being the only lawyer in my household without a law license, I am well prepared to be a valued member of the Hurley Medical Center Board of Managers.

RESOLUTION APPROVING THE REAPPOINTMENT OF MATTHEW SCHLINKER TO THE FLINT DISTRICT LIBRARY BOARD

BY THE MAYOR:

Matthew Schlinker's term on the Flint District Library Board expired September 30, 2015; and

Mr. Schlinker, 919 Kensington Avenue, Flint, Michigan, 48503, has expressed a sincere interest in continuing to serve on the Flint District Library Board; and

Mayor Weaver recommends and supports the reappointment of Matthew Schlinker to the Flint District Library Board.

IT IS RESOLVED that the Flint City Council approves the reappointment of Matthew Schlinker (919 Kensington Avenue, Flint, Michigan, 48503) to serve an additional three-year term on the Flint District Library Board, commencing October 1, 2015, and expiring September 30, 2018.

RESOLUTION TO OFFICE DEPOT FOR OFFICE SUPPLIES

BY THE CITY ADMINISTRATOR

RESOLUTION

On August 13, 2015 the Receivership Transition Advisory Board (RTAB) authorized the Finance Department, Purchasing and Supplies Division, to issue purchase orders to Office Depot, 2200 Old Germantown Rd., Delray Beach, FL for office supplies in an amount not to exceed $99,925.00 as requested by various departments, and

The Development Department has submitted a request to procure said supplies in an amount not to exceed $4,000.00 as a result of receiving additional funding from a grant. The funding for this purchase will come from the following account: 296-691.400-726.000 FHUD14CHOICE; and

IT IS RESOLVED, that the Finance Department is authorized to issue a purchase order to Office Depot for office supplies in an amount not to exceed $4,000.00 which results in an aggregate spend amount of $103,925.00 to said vendor. (Other Grants Fund)

BE IT FURTHER RESOLVED, that the Finance Department has the discretion for the remainder of the FY16 fiscal year to spend an additional amount of not more than 5% of the aforementioned aggregate spend amount to Office Depot for unanticipated requests that may be submitted.

PRESENTED TO CITY COUNCIL: 12/14/2015
ADOPTED BY CITY COUNCIL: 12/14/2015

RESOLUTION STAFF REVIEW FORM

DATE: December 10, 2015

Agenda Item Title: RESOLUTION TO ISSUE A PURCHASE ORDER TO OFFICE DEPOT FOR MISCELLANEOUS OFFICE SUPPLIES FOR FOR THE CHOICE NEIGHBORHOODS PLANNING GRANT.

Prepared By: Mary Jarvis, Senior Accountant

Background/Summary of Proposed Action:

In accordance with the Master Plan, the City applied for a Choice Neighborhoods Planning Grant, from the U.S. Department of Housing and Urban Development, along with a co-applicant, the Flint Housing Commission (FHC). The resolution accepting the grant was not adopted until April 20, 2015. The budget was not entered until July 24, 2015, therefore the request for an Office Depot purchase order was not entered at the same time as other annual requests. This resolution authorizes the City issue a purchase order to Office Depot in the amount of $4,000 to provide office supplies as authorized by the Choice Neighborhoods Planning Grant.

Financial Implications:
$4,000 to be encumbered by a purchase order issued to Office Depot to provide office supplies for the Choice Neighborhoods Planning Grant.

Budgeted Expenditure: Yes __X__ No ___ **Please explain, if no:** _____

Account Number: 296-691.400-726.000 **Grant Code:** FHUD14CHOICE ✓

Pre-encumbered: Yes __X__ No ___ **Requisition # 150000987**

Staff Recommendation:
The Director of Department of Planning and Development/Chief Planning Officer recommends approval of this resolution.

Staff Person: _____
Brian Larkin, Director of Planning and Development

ADOPTED: _____

RESOLUTION TO MCNAUGHTON MCKAY ELECTRIC FOR ELECTRICAL SUPPLIES

BY THE CITY ADMINISTRATOR

RESOLUTION

On September 9, 2015 the Receivership Transition Advisory Board (RTAB) adopted resolution #CA0672015 in the amount of $97,000.00 with McNaughton McKay Electric, 1011 E. Fifth Ave., Flint, MI 48501 for approval of the second year of a three year renewable pricing proposal for electrical supplies for the FY15, FY16, and FY17 fiscal years as requested by various departments, and

The DPW Utilities Water Treatment Plant has submitted a change order request for an additional $20,000.00 needed for electrical supplies due to multiple upgrades and repairs underway in preparation for the KWA raw water connection. The funding for this purchase will come from the following account: 591-545.201-726.000 and

IT IS RESOLVED, that the Finance Department is authorized to issue a change order for the second year of a three year renewable pricing proposal for electrical supplies for the FY15, FY16, and FY17 fiscal years as requested by the DPW Utilities Water Treatment Plant in an amount of $20,000.00 (Water Fund) which results in an aggregate spend amount of $229,500.00 over the first and second years of the three year pricing proposal.

BE IT FURTHER RESOLVED, that the Finance Department has the discretion for the remainder of the term of this three year renewable pricing proposal to spend an additional amount of not more than 5% of the annual requested spend amount to McNaughton McKay Electric for unanticipated requests that may be submitted during the remainder of the agreement.

RESOLUTION STAFF REVIEW

December 7, 2015

Agenda Item Title: Water Plant – Electrical Supplies and Parts

Background/Summary of Proposed Action:
The Flint Water Plant is requesting a change order to P.O. 15-000703 with McNaughton McKay in the amount of $20,000.00. The change order is needed due to the multiple upgrades and repairs currently in progress so the plant is ready when the KWA raw water arrives.

Financial Implications:
Please approve the change order to P.O. 15-000703 with McNaughton McKay for the Water Plant in the FY 2016 amended budget amount of $20,000.00 using account 591-545.201-726.000.

RESOLUTION APPROVING A BUDGET AMENDMENT FOR IMAGINE FLINT NEIGHBORHOOD PLANNING GRANT FROM RUTH MOTT FOUNDATION

BY THE CITY ADMINISTRATOR:

The City was awarded grant funding from the Ruth Mott Foundation in the amount of $320,000.00; and

This grant is for the implementation of the *Imagine Flint* Neighborhood Planning Initiative; and

This program is an effort, led by the City of Flint Planning Division, to work with residents of Flint to develop neighborhood specific plans and strategies over the next two years.

IT IS RESOLVED that appropriate City officials are authorized to process a budget amendment recognizing grant revenue and corresponding appropriation of funds under grant code LRM-16-NPLAN in the amount of $320,000.00.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

FOR THE CITY OF FLINT:

BUDGET AMENDMENT STAFF REVIEW FORM

DATE: **December 10, 2016**

Agenda Item Title: **RESOLUTION APPROVING A BUDGET AMENDMENT FOR IMAGINE FLINT NEIGHBORHOOD PLANNING GRANT FROM RUTH MOTT FOUNDATION**

Prepared By: Kevin Schronce, Planner III

Background/Summary of Proposed Action:

In November 2016, the City received grant funding from the Ruth Mott Foundation (RMF) for a two-year, neighborhood planning initiative. The program will be led by the Planning Division and afford the City the ability to work with residents of Flint to develop neighborhood specific plans and strategies across the City.

The grant is for two years and will allow the Division to hire a Neighborhood Planner and solicit professional services from consultants for plan development. The grant will also enable groups to implement strategies identified in their plan, through funding directly tied to plan execution.

The neighborhood planning initiative will allow the City to further implement its master plan, through the "creation of at least two neighborhood plans annually".

Financial Implications:

This grant leverages existing funds throughout the community, and delivers no impact to the City's General Fund accounts.

Budgeted Expenditure: Yes _X_ No _____ **Please explain, if no:**

Pre-encumbered: Yes __ No _X__

Account No.: To be appropriated by Finance under grant code LRM-16-NPLAN.

Reviewed and approved by M. Jarvis Mary Jarvis

Ms. Natasha Henderson
City Administrator
City of Flint
City Hall
1101 South Saginaw Street
Flint, MI 48502

Dear Ms. Henderson:

I am pleased to inform you the Ruth Mott Foundation has granted $320,000 to the City of Flint for the period 12/1/2015 through 11/30/2017.

Use of Grant
This grant is to be expended solely for the *Imagine Flint* - Neighborhood Planning Initiative (Grant ID: 2060) as outlined in your proposal dated 8/7/2015. Upon receipt of your acceptance, the grant will be paid to City of Flint.

The City of Flint confirms it will act as the fiscal sponsor for this project and this project will be under its complete control. The City of Flint further confirms it will exercise control over the process of selecting any secondary grantee or consultant, that the decision made or that will be made on any such selection is completely independent of the Ruth Mott Foundation, and there does not exist an agreement, written or oral, under which the Ruth Mott Foundation has created or may cause the selection of a secondary grantee or consultant.

The Foundation rarely commits significant grant funds for extended periods of time, and receiving a grant now does not guarantee renewal in the future. Unless this grant is for a one-time activity, grantees should cultivate other sources of support to ensure the sustainability of their program beyond the life of this grant.

We want to alert you to the fact that the Ruth Mott Foundation board is currently engaged in a strategic planning process and the Foundation's grantmaking priorities may change.

Grant Contingencies
The grant is contingent upon the following:

1) Payment in the amount of $144,750 for Year 1:
   - Receipt of signed commitment letter.
2) Payment in the amount of $175,250 for Year 2:
   - Receipt and approval of the Year 1 interim report due 12/29/2016.

Grant Accounting

- You may charge this grant only for services performed or equipment and material received during the grant period specified in this letter.
- You may charge this grant only for line item expenditures that were included in the approved budget in this letter.
- You are required to maintain financial records and receipts for expenditures relating to this project.

Plaza One Financial Center
111 E. Court St., Suite 3C • Flint, MI 48502-1649 • Phone: (810) 233-0170 • Fax: (810) 233-7022
E-Mail: rmf@ruthmott.org • www.ruthmott.org

- You are required to retain all records and supporting documentation relating to this grant for five years after the grant's termination date. You are also required to permit the Ruth Mott Foundation to have reasonable access to your files, records and personnel during the term of this grant and for five years thereafter for the purpose of making financial audits, verifications, or program evaluations.
- You will notify the Foundation immediately in writing of any significant changes in the organization, program or activity supported by the grant including, but not limited to, its budget, expenditures, objectives, key personnel, schedule, or other circumstances that could affect its purpose or intended outcomes.
    1. The Ruth Mott Foundation must approve variances that exceed both $1,000 and 20% over the budget line item amount 30 days in advance of the expenditure.
    2. The Ruth Mott Foundation must approve any variance that changes the grant period or reporting dates, 30 days in advance of the grant end date.
    3. Expenses related to any variances not approved will be the responsibility of the grantee.

Ruth Mott Foundation Contact Person
Foundation program staff may contact you from time to time to arrange for visits to project sites. The purpose of such calls is to review developments, discuss any problems which may have arisen and assess progress. Please direct all correspondence or questions relating to this grant to-Raquel Thueme, Program Director.

Public Information
The Foundation encourages grantees to make announcements of grants upon return of the signed commitment letter and to make mention of the Ruth Mott Foundation. However, we require the opportunity to read and approve in advance all publications, press releases, on-line communications, or other public announcements that make mention of the Ruth Mott Foundation and/or this grant award.

Reports
To assist us in monitoring this grant, we ask you submit reports to the Foundation. Although we do not have a standard reporting format, we do have a few guidelines. We would prefer to receive a concise and precise document (four to five pages). The report, which can take the form of a letter, should provide the Foundation with a candid assessment of the progress of the project including any challenges or difficulties, and what has been learned so far. The report should list the results achieved to date and state what is planned for the next period. In addition to the narrative report, we require a signed financial statement detailing how the Foundation's grant funds have been spent.

The Foundation requires the following report(s):
(To expedite the review process, the cover page of your report should include the grant ID number, project name, grant dates, and the name of the report.)

Grant Dates: **12/1/2016 to 11/30/2017**

Interim Report Due Date: **12/29/2016**

Final Report Due Date: **12/29/2017**

Please report on the following:

1. A narrative summary of the *Imagine Flint* - Neighborhood Planning Initiative to include the following:
    a. Description of planning and implementation activities including number of neighborhood plans developed in year 1 and year 2 (e.g. BNCP project area, Wards 1 and 3 in year 1).
    b. Description of the staffing model in place, including any new positions that have been created, and the effect on the City of Flint's ability to implement neighborhood strategies outlined in the Master Plan.
    c. Results from technical assistance provided to north Flint residents, block clubs and neighborhood groups and a description of the evaluation methods used to assess progress.
    d. Description of attraction efforts for other private and public funding to re-build and reinvest in Flint's hardest hit neighborhoods by leveraging RMF, Community Foundation of Greater Flint and CDBG grants and CDBG neighborhood enhancement funds.
    e. Results from cross-partner resident meetings for Choice Neighborhood and north Flint planning participants.
    f. Provide a copy of the neighborhood planning tool kit and completed neighborhood plans developed by north Flint residents and the City of Flint, and approved by the Flint Planning Commission.

2. Provide photographs (digital) of your project, including parental waivers for all minors featured in photographs.

3. Evaluation or lessons learned which might result in changes in the future.

4. Financial report summarizing the grant expenses and/or balances remaining at the end of the grant reporting period. Once the project is completed, the Foundation requires a final accounting of grant expenditures for the grant total, **$320,000.**
    a. Accounting: Budget vs. Actual:
    Report should include the actual expenditures against the approved budget by line item for the reporting period.
    b. Approved variance explanations: Summary of all approved variances that occurred during the course of the grant.
    c. All Funding Sources: Summary of funding sources (listing by source, amount and grant period) received for this program during the reporting period including cash and in-kind services.
    d. Unspent Funds: Please explain the variance between the total funding received and the total approved budget.
    e. Signature of the appropriate financial officer of your organization.

We would be happy to assist you or answer any questions you may have regarding this reporting requirement.

<u>Undisbursed Funds</u>
You are required to return any undisbursed funds to the Ruth Mott Foundation within three months after the end of this grant or at the time you are unable to fulfill this grant agreement. Any refund of less than $100 will be waived.

Compliance with Laws
You may not use any portion of the grant funds to undertake any activity for any purpose other than one specified in section 170(c)(2)(B) of the Internal Revenue Code for charitable purposes. Further, the Ruth Mott Foundation reserves the right to discontinue, modify, or withhold any payments that might otherwise be due under this grant or to require a refund of any unexpended grant funds if, in the Ruth Mott Foundation's judgment, such action is necessary to comply with the requirements of any law or regulation.

Acceptance
This letter contains the entire agreement between your organization and the Ruth Mott Foundation, and there are no conditions or stipulations, oral or written, governing the use of the grant funds other than those contained in this letter.

If you agree to the grant conditions as stated, please return **one complete copy of this grant agreement in its entirety, with all the original signatures including the president and the board chair** in the space provided. This grant may be withdrawn if the Ruth Mott Foundation has not received your acceptance within one month from the date of this letter. By countersigning this grant letter, your organization also confirms that there has been no change in its qualification as an organization exempt from income taxation under Section 501 (c)(3) of the Internal Revenue Code. Should any change occur, please notify the Ruth Mott Foundation immediately.

It has been a pleasure to work with you in developing this grant commitment, and we are confident that this project will have a positive impact on the community.

Very truly yours,

Handy L. Lindsey, Jr.
President

We acknowledge that appropriate personnel have read and understand this letter, that its terms and conditions are acceptable to us and that we will comply with those terms and conditions. The two signers below are authorized by the organization to enter into this agreement

RESOLUTION AUTHORIZING AMENDMENT OF THE 2016 BUDGET FOR A POLICE DEPARTMENT GRANT FROM THE DOJ FOR $1,166,409.00

BY THE CITY ADMINISTRATOR:

The City of Flint has applied for and accepted a US Department of Justice (DOJ) grant under the FY15 National Sexual Assault Kit Initiative (SAKI) in the amount of $1,166,409.00.

This funding was created to address the issue of unsubmitted sexual assault kits (SAKs) at law enforcement agencies. This program is also meant to further the Department of Justice's mission by improving state and local jurisdictions' response to violent crime and improving the functioning of the criminal justice system.

The funds will be used over a three year period from October 2015 through September 2018 and must be utilized in compliance with the grant agreement and approved grant budget.

The proposed amendment has been reviewed and approved by the Mayor and City Administrator.

IT IS RESOLVED that the appropriate City officials are authorized to do all things necessary to appropriate revenue and expenditure amounts in fund-dept #296-301.732 under grant code #FDOJ-15-SAKI in compliance with US Department of Justice Grant Award #2015-AK-BX-K016 for the amount of $1,166,409.00.

RESOLUTION STAFF REVIEW FORM

DATE: December 3, 2015

Agenda Item Title: Resolution authorizing City of Flint Officials to do all things necessary to approve a budget amendment that adds revenue and expenditure appropriations for a grant from the US Dept Of Justice to process sexual assault kits.

Prepared By: Tamar Lewis, Budget and Grants Administrator

Background/Summary of Proposed Action: This funding was created to address the issue of unsubmitted sexual assault kits (SAKs) at law enforcement agencies. This program is also meant to further the Department of Justice's mission by improving state and local jurisdictions' response to violent crime and improving the functioning of the criminal justice system. The grant is for a three year period and totals $1,166,409.00

It will be used in conjunction with a grant from the New York County District Attorneys Office in the amount of $163,590.00.

The Grant code in the BS&A system is FDOJ-15-SAKI.

Financial Implications: There is no required match, however any ineligible expenditures would need to be paid from the City's General Fund.

Budgeted Expenditure: Yes ____ No__X___ **Please explain, if no:**

Account #: 296 – 301.732

Re: Grant Acceptance

Ms. Henderson,

The City of Flint Police Department has received the three grant awards listed below:

- Department of Justice FY15 Sexual Assault Kit Initiative (SAKI) grant - $1,166,409.00. No required match. This grant is to investigate sexual assault cases, prosecute Offenders and give assistance to the victims. The grant period is from 10/01/15 to 09/30/18.

- 2015 Sexual Assault Kit Background Elimination Grant from the District Attorney, County of New York, also known as the "DANY" grant. Grant amount is $163,590.00. No required match. This grant works alongside the "SAKI" grant. It collects and sends sexual assault kits out to be tested. This grant period is from 10/10/15 to 09/30/17.

- Auto Theft Prevention Authority (ATPA) Grant, refer to as G.A.I.N. - $56,313.00 with a $56,313.00 match, already budgeted in the Police Operating Budget. This grant period is from 10/01/15 to 09/30/16.

The City of Flint Police Department is requesting the City of Flint accept these grant awards.

- Department of Justice "SAKI" Grant ✓ Accept ____ Deny
- District Attorney, New York "DANY" Grant ✓ Accept ____ Deny
- Auto Theft Grant "G.A.I.N." ✓ Accept ____ Deny

Additional grant information has been attached.

September 10, 2015

Chief James W. Talbert
City of Flint Police Department
210 E. Fifth Street
Flint, MI 48502-1636

Dear Chief Talbert:

Congratulations on your recent award. In establishing financial assistance programs, Congress linked the receipt of federal funding to compliance with federal civil rights laws. The Office for Civil Rights (OCR), Office of Justice Programs (OJP), U.S. Department of Justice (DOJ) is responsible for ensuring that recipients of financial assistance from the OJP, the Office of Community Oriented Policing Services (COPS), and the Office on Violence Against Women (OVW) comply with the applicable federal civil rights laws. We at the OCR are available to help you and your organization meet the civil rights requirements that come with DOJ funding.

Ensuring Access to Federally Assisted Programs

Federal laws that apply to recipients of financial assistance from the DOJ prohibit discrimination on the basis of race, color, national origin, religion, sex, or disability in federally assisted programs or activities, not only in employment but also in the delivery of services or benefits. A federal law also prohibits recipients from discriminating on the basis of age in the delivery of services or benefits.

In March of 2013, President Obama signed the Violence Against Women Reauthorization Act of 2013. The statute amends the Violence Against Women Act of 1994 (VAWA) by including a nondiscrimination grant condition that prohibits discrimination based on actual or perceived race, color, national origin, religion, sex, disability, sexual orientation, or gender identity. The new nondiscrimination grant condition applies to covered programs funded after October 1, 2013. The OCR and the OVW have developed answers to some frequently asked questions about this provision to assist recipients of VAWA funds to understand their obligations. The Frequently Asked Questions are available at http://ojp.gov/about/ocr/vawnondiscrim.htm.

Enforcing Civil Rights Laws

All recipients of federal financial assistance, regardless of the particular funding source, the amount of the grant award, or the number of employees in the workforce, are subject to prohibitions against unlawful discrimination. Accordingly, the OCR investigates recipients that are the subject of discrimination complaints from both individuals and groups. In addition, based on regulatory criteria, the OCR selects a number of recipients each year for compliance reviews, audits that require recipients to submit data showing that they are providing services equitably to all segments of their service population and that their employment practices meet equal opportunity standards.

Providing Services to Limited English Proficiency (LEP) Individuals.

In accordance with DOJ guidance pertaining to Title VI of the Civil Rights Act of 1964, 42 U.S.C. § 2000d, recipients of federal financial assistance must take reasonable steps to provide meaningful access to their programs and activities for persons with limited English proficiency (LEP). See U.S. Department of Justice, Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons, 67 Fed. Reg. 41,455 (2002). For more information on this civil rights responsibilities that recipients have in providing language services to LEP individuals, please see the website http://www.lep.gov.

Ensuring Equal Treatment for Faith-Based Organizations

The DOJ regulation, Equal Treatment for Faith-Based Organizations, 28 C.F.R. pt. 38, requires State Administering Agencies (SAAs) to treat faith-based organizations the same as any other applicant or recipient. The regulation prohibits SAAs from making award or grant administration decisions on the basis of an organization's religious character or affiliation, religious name, or the religious composition of its board of directors.

The regulation also prohibits faith-based organizations from using financial assistance from the DOJ to fund inherently (or explicitly) religious activities. While faith-based organizations can engage in non-funded inherently religious activities, they must hold them separately from the program funded by the DOJ, and recipients cannot compel beneficiaries to participate in them. The Equal Treatment Regulation also makes clear that organizations participating in programs funded by the DOJ are not permitted to discriminate in the provision of services on the basis of a beneficiary's religion. For more information on the regulation, please see the OCR's website at http://www.ojp.usdoj.gov/about/ocr/equal_fbo.htm.

SAAs and faith-based organizations should also note that the Omnibus Crime Control and Safe Streets Act (Safe Streets Act) of 1968, as amended, 42 U.S.C. § 3789d(c); the Victims of Crime Act of 1984, as amended, 42 U.S.C. § 10604(e); the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, 42 U.S.C. § 5672(b); and VAWA, Pub. L. No. 113-4, sec. 3(b)(4), 127 Stat. 54, 61-62 (to be codified at 42 U.S.C. § 13925(b)(13)) contain prohibitions against discrimination on the basis of religion in employment. Despite these antidiscrimination provisions, the DOJ has concluded that it may construe the Religious Freedom Restoration Act (RFRA) on a case-by-case basis to permit some faith-based organizations to receive DOJ funds while taking into account religion when hiring staff, even if the statute that authorizes the funding program generally forbids recipients from considering religion in employment decisions. Please consult with the OCR if you have any questions about the regulation or the application of RFRA to the statutes that prohibit discrimination in employment.

Using Arrest and Conviction Records in Making Employment Decisions.

The OCR issued an advisory document for recipients on the proper use of arrest and conviction records in making hiring decisions. See Advisory for Recipients of Financial Assistance from the U.S. Department of Justice on the U.S. Equal Employment Opportunity Commission's Enforcement Guidance: Consideration of Arrest and Conviction Records in Employment Decisions Under Title VII of the Civil Rights Act of 1964 (June 2013), available at http://www.ojp.usdoj.gov/about/ocr/pdfs/EEOC_Compliance_Advisory.pdf. Recipients should be mindful that the misuse of arrest or conviction records to screen either applicants for employment or employees for retention or promotion may have a disparate impact based on race or national origin, resulting in unlawful employment discrimination. In light of the Advisory, recipients should consult legal counsel in reviewing their employment practices. If warranted, recipients should also incorporate an analysis of the use of arrest and conviction records in their Equal Employment Opportunity Plans (EEOPs) (see below).

Complying with the Safe Streets Act

An organization that is a recipient of financial assistance subject to the nondiscrimination provisions of the Safe Streets Act, must meet two obligations: (1) complying with the federal regulation pertaining to the development of an EEOP (see 28 C.F.R. pt. 42, subpt. E) and (2) submitting to the OCR findings of discrimination (see 28 C.F.R. §§ 42.204(c), .205(c)(5)).

Meeting the EEOP Requirement

If your organization has less than fifty employees or receives an award of less than $25,000 or is a nonprofit organization, a medical institution, an educational institution, or an Indian tribe, then it is exempt from the EEOP requirement. To claim the exemption, your organization must complete and submit Section A of the Certification Form, which is available online at: http://www.ojp.usdoj.gov/about/ocr/pdfs/cert.pdf.

If your organization is a government agency or private business and receives an award of $25,000 or more, but less than $500,000, and has fifty or more employees (counting both full- and part-time employees but excluding political appointees), then it has to prepare a Utilization Report (formerly called an EEOP Short Form), but it does not have to submit the report to the OCR for review. Instead, your organization has to maintain the Utilization Report on file and make it available for review on request. In addition, your organization has to complete Section B of the Certification Form and return it to the OCR. The Certification Form is available at http://www.ojp.usdoj.gov/about/ocr/pdfs/cert.pdf.

If your organization is a government agency or private business and has received an award for $500,000 or more and has fifty or more employees (counting both full- and part-time employees but excluding political appointees), then it has to prepare a Utilization Report (formerly called an EEOP Short Form) and submit it to the OCR for review within sixty days from the date of this letter. For assistance in developing a Utilization Report, please consult the OCR's website at http://www.ojp.usdoj.gov/about/ocr/eeop.htm. In addition, your organization has to complete Section C of the Certification Form and return it to the OCR. The Certification Form is available at http://www.ojp.usdoj.gov/about/ocr/pdfs/cert.pdf.

To comply with the EEOP requirements, you may receive technical assistance from an EEOP specialist at the OCR by telephone at (202) 307-0690, by TTY at (202) 307-2027, or by e-mail at EEOsubmissions@usdoj.gov.

Meeting the Requirement to Submit Findings of Discrimination

If in the three years prior to the date of the grant award, your organization has received an adverse finding of discrimination based on race, color, national origin, religion, or sex, after a due-process hearing, from a state or federal court or from a state or federal administrative agency, your organization must send a copy of the finding to the OCR.

Ensuring the Compliance of Subrecipients

SAAs must have standard assurances to notify subrecipients of their civil rights obligations, written procedures to address discrimination complaints filed against subrecipients, methods to monitor subrecipients' compliance with civil rights requirements, and a program to train subrecipients on applicable civil rights laws. In addition, SAAs must submit to the OCR every three years written Methods of Administration (MOA) that summarize the policies and procedures that they have implemented to ensure the civil rights compliance of subrecipients. For more information on this MOA requirement, see http://www.ojp.usdoj.gov/funding/other_requirements.htm.

If the OCR can assist you in any way in fulfilling your organization's civil rights responsibilities as a recipient of federal financial assistance, please contact us.

Sincerely,

Michael L. Alston
Director

PROJECT NUMBER 2015-ADBX-K010 AWARD DATE 09/10/2015

SPECIAL CONDITIONS

1. Applicability of Part 200 Uniform Requirements

The Uniform Administrative Requirements, Cost Principles, and Audit Requirements in 2 C.F.R. Part 200, as adopted and supplemented by the Department of Justice (DOJ) in 2 C.F.R. Part 2800 (the "Part 200 Uniform Requirements") apply to this 2015 award from the Office of Justice Programs (OJP). For this 2015 award, the Part 200 Uniform Requirements, which were first adopted by DOJ on December 26, 2014, supersede, among other things, the provisions of 28 C.F.R. Parts 66 and 70, as well as those of 2 C.F.R. Parts 215, 220, 225, and 230.

If this 2015 award supplements funds previously awarded by OJP under the same award number, the Part 200 Uniform Requirements apply with respect to all award funds (whether derived from the initial award or a supplemental award) that are obligated on or after the acceptance date of this 2015 award.

Potential availability of grace period for procurement standards: Under the Part 200 Uniform Requirements, a time-limited grace period may be available under certain circumstances to allow for transition from policies and procedures that complied with previous standards for procurements under federal awards to policies and procedures that comply with the new standards (that is, to those at 2 C.F.R. 200.317 through 200.326).

For more information on the Part 200 Uniform Requirements, including information regarding the potentially-available grace period described above, see the Office of Justice Programs (OJP) website at http://ojp.gov/funding/Part200UniformRequirements.htm.

In the event that an award-related question arises from documents or other materials furnished or distributed by OJP that may appear to conflict with, or differ in some way from, the provisions of the Part 200 Uniform Requirements, the recipient is to contact OJP promptly for clarification.

2. The recipient agrees to comply with the Department of Justice Grants Financial Guide as posted on the OJP website (currently, the "2015 DOJ Grants Financial Guide").

3. The recipient acknowledges that failure to submit an acceptable Equal Employment Opportunity Plan (if recipient is required to submit one pursuant to 28 C.F.R. Section 42.302) that is approved by the Office for Civil Rights, is a violation of the Standard Assurances executed by the recipient, and may result in suspension of funding until such time as the recipient is in compliance, or termination of the award.

4. The recipient understands and agrees that OJP may withhold award funds, or may impose other related requirements, if the recipient does not satisfactorily and promptly address outstanding issues from audits required by the Part 200 Uniform Requirements (or by the terms of this award), or other outstanding issues that arise in connection with audits, investigations, or reviews of DOJ awards.

5. Recipient understands and agrees that it cannot use any federal funds, either directly or indirectly, in support of the enactment, repeal, modification or adoption of any law, regulation or policy, at any level of government, without the express prior written approval of OJP.

6. The recipient and any subrecipient(s) must promptly refer to the DOJ OIG any credible evidence that a principal, employee, agent, subrecipient, contractor, subcontractor, or other person has -- (1) submitted a claim for award funds that violates the False Claims Act; or (2) committed a criminal or civil violation of laws pertaining to fraud, conflict of interest, bribery, gratuity, or similar misconduct involving award funds. Potential fraud, waste, abuse, or misconduct should be reported to the OIG by - mail: Office of the Inspector General, U.S. Department of Justice Investigations Division, 950 Pennsylvania Avenue, N.W. Room 4706, Washington, DC 20530; e-mail: oig.hotline@usdoj.gov hotline (contact information in English and Spanish): (800) 869-4499; or hotline fax: (202) 616-9881. Additional information is available from the DOJ OIG website at www.usdoj.gov/oig.

SPECIAL CONDITIONS

7. Restrictions and certifications regarding non-disclosure agreements and related matters

No recipient or subrecipient under this award, or entity that receives a contract or subcontract with any funds under this award, may require any employee or contractor to sign an internal confidentiality agreement or statement that prohibits or otherwise restricts, or purports to prohibit or restrict, the reporting (in accordance with law) of waste, fraud, or abuse to an investigative or law enforcement representative of a federal department or agency authorized to receive such information.

The foregoing is not intended, and shall not be understood by the agency making this award, to contravene requirements applicable to Standard Form 312 (which relates to classified information), Form 4414 (which relates to sensitive compartmented information), or any other form issued by a federal department or agency governing the nondisclosure of classified information.

1. In accepting this award, the recipient --

a. represents that it neither requires nor has required internal confidentiality agreements or statements from employees or contractors that currently prohibit or otherwise currently restrict (or purport to prohibit or restrict) employees or contractors from reporting waste, fraud, or abuse as described above; and

b. certifies that, if it learns or is notified that it is or has been requiring its employees or contractors to execute agreements or statements that prohibit or otherwise restrict (or purport to prohibit or restrict), reporting of waste, fraud, or abuse as described above, it will immediately stop any further obligations of award funds, will provide prompt written notification to the agency making this award, and will resume (or permit resumption of) such obligations only if expressly authorized to do so by that agency.

2. If the recipient does or is authorized to make subawards or contracts under this award --

a. it represents that --

(1) it has determined that no other entity that the recipient's application proposes may or will receive award funds (whether through a subaward, contract, or subcontract) either requires or has required internal confidentiality agreements or statements from employees or contractors that currently prohibit or otherwise currently restrict (or purport to prohibit or restrict) employees or contractors from reporting waste, fraud, or abuse as described above; and

(2) it has made appropriate inquiry, or otherwise has an adequate factual basis, to support this representation; and

b. it certifies that, if it learns or is notified that any subrecipient, contractor, or subcontractor entity that receives funds under this award is or has been requiring its employees or contractors to execute agreements or statements that prohibit or otherwise restrict (or purport to prohibit or restrict), reporting of waste, fraud, or abuse as described above, it will immediately stop any further obligations of award funds to or by that entity, will provide prompt written notification to the agency making this award, and will resume (or permit resumption of) such obligations only if expressly authorized to do so by that agency.

8. Recipient understands and agrees that it cannot use any federal funds, either directly or indirectly, in support of any contract or agreement to either the Association of Community Organizations for Reform Now (ACORN) or its subsidiaries, without the express prior written approval of OJP.

9. The recipient agrees to comply with any additional requirements that may be imposed during the grant performance period if the agency determines that the recipient is a high-risk grantee. CFR 28 C.F.R. parts 66, 70.

SPECIAL CONDITIONS

10. The recipient agrees to comply with applicable requirements regarding registration with the System for Award Management (SAM) (or with a successor government-wide system officially designated by OMB and OJP). The recipient also agrees to comply with applicable restrictions on subawards to first-tier subrecipients that do not acquire and provide a Data Universal Numbering System (DUNS) number. The details of recipient obligations are posted on the Office of Justice Programs web site at http://www.ojp.gov/funding/sam.htm (Award condition: Registering with the System for Award Management and Universal Identifier Requirements), and are incorporated by reference here. This special condition does not apply to an award to an individual who received the award as a natural person (i.e., unrelated to any business or non-profit organization that he or she may own or operate in his or her name).

11. Pursuant to Executive Order 13513, "Federal Leadership on Reducing Text Messaging While Driving," 74 Fed. Reg. 51225 (October 1, 2009), the Department encourages recipients and subrecipients to adopt and enforce policies banning employees from text messaging while driving any vehicle during the course of performing work funded by this grant, and to establish workplace safety policies and conduct education, awareness, and other outreach to decrease crashes caused by distracted drivers.

12. The recipient agrees to comply with all applicable laws, regulations, policies, and guidance (including specific cost limits, prior approval and reporting requirements, where applicable) governing the use of federal funds for expenses related to conferences, meetings, trainings, and other events, including the provision of food and/or beverages at such events, and costs of attendance at such events. Information on rules applicable to this award appears in the DOJ Grants Financial Guide (currently, as section 3.10 of "Postaward Requirements" in the "2015 DOJ Grants Financial Guide").

13. The recipient understands and agrees that any training or training materials developed or delivered with funding provided under this award must adhere to the OJP Training Guiding Principles for Grantees and Subgrantees, available at http://www.ojp.usdoj.gov/funding/ojptrainingguidingprinciples.htm.

14. The recipient agrees that if it currently has an open award of federal funds or if it receives an award of federal funds other than this OJP award, and those award funds have been, are being, or are to be used, in whole or in part, for one or more of the identical cost items for which funds are being provided under this OJP award, the recipient will promptly notify, in writing, the grant manager for this OJP award, and, if so requested by OJP, seek a budget-modification or change-of-project-scope grant adjustment notice (GAN) to eliminate any inappropriate duplication of funding.

15. The recipient understands and agrees that award funds may not be used to discriminate against or denigrate the religious or moral beliefs of students who participate in programs for which financial assistance is provided from those funds, or of the parents or legal guardians of such students.

16. The recipient understands and agrees that: (a) No award funds may be used to maintain or establish a computer network unless such network blocks the viewing, downloading, and exchanging of pornography, and (b) Nothing in subsection (a) limits the use of funds necessary for any Federal, State, tribal, or local law enforcement agency or any other entity carrying out criminal investigations, prosecution, or adjudication activities.

17. A recipient that is eligible under the Part 200 Uniform Requirements to use the "de minimis" indirect cost rate described in 2 CFR 200.414(f), and that elects to use the "de minimis" indirect cost rate, must advise OJP in writing of both its eligibility and its election, and must comply with all associated requirements in the Part 200 Uniform Requirements. The "de minimis" rate may be applied only to modified total direct cost (MTDC).

18. The recipient must collect, maintain, and provide to OJP, data that measure the performance and effectiveness of activities under this award, in the manner, and within the timeframes, specified in the program solicitation, or as otherwise specified by OJP. Data collection supports compliance with the Government Performance and Results Act (GPRA) and the GPRA Modernization Act, and other applicable laws.

PROJECT NUMBER 2015-AC-BX-K016 AWARD DATE 09/30/2015

SPECIAL CONDITIONS

19. The award recipient agrees to participate in a data collection process measuring program outputs and outcomes. The data elements for this process will be outlined by the Office of Justice Programs.

20. Grantee agrees to comply with the requirements of 28 C.F.R. Part 46 and all Office of Justice Programs policies and procedures regarding the protection of human research subjects, including obtainment of Institutional Review Board approval, if appropriate, and subject informed consent.

21. Grantee agrees to comply with all confidentiality requirements of 42 U.S.C. section 3789g and 28 C.F.R. Part 22 that are applicable to collection, use, and revelation of data or information. Grantee further agrees, as a condition of grant approval, to submit a Privacy Certificate that is in accord with requirements of 28 C.F.R. Part 22 and, in particular, section 22.23.

22. Grantee agrees that assistance funds awarded under this grant will not be used to support any inherently religious activities, such as worship, religious instruction, or proselytization. If the grantee refers participants to, or provides, a non-Federally funded program or service that incorporates such religious activities, (1) any such activities must be voluntary for program participants; and (2) program participants may not be excluded from participation in a program or otherwise penalized or disadvantaged for any failure to accept a referral or services. If participation in a non-Federally-funded program or service that incorporates inherently religious activities is deemed a critical treatment or support service for program participants, the grantee agrees to identify and refer participants who object to the inherently religious activities of such program or service to, or provide a comparable secular alternative program or service.

23. The recipient agrees to cooperate with any assessments, national evaluation efforts, or information or data collection requests, including, but not limited to, the provision of any information required for the assessment or evaluation of any activities within this project.

24. Recipient agrees that funds provided under this award may not be used to operate a "pay-to-stay" program in any local jail. Recipient further agrees not to subaward funds to local jails which operate "pay-to-stay" programs.

25. The recipient agrees to comply with applicable requirements to report first-tier subawards of $25,000 or more and, in certain circumstances, to report the names and total compensation of the five most highly compensated executives of the recipient and first-tier subrecipients of award funds. Such data will be submitted to the FFATA Subaward Reporting System (FSRS). The details of recipient obligations, which derive from the Federal Funding Accountability and Transparency Act of 2006 (FFATA), are posted on the Office of Justice Programs web site at http://ojp.gov/funding/Explore/FFATA.htm (Award condition: Reporting Subawards and Executive Compensation), and are incorporated by reference here. This condition, and its reporting requirement, does not apply to grant awards made to an individual who received the award as a natural person (i.e., unrelated to any business or non-profit organization that he or she may own or operate in his or her name).

26. Award recipients must verify Point of Contact (POC), Principal Point of Contact (PPOC), and Authorized Representative contact information in GMS, including telephone number and e-mail address. If any information is incorrect or has changed, a Grant Adjustment Notice (GAN) must be submitted, via the Grants Management System (GMS) to document changes.

PROJECT NUMBER 2015-AK-BX-K016 AWARD DATE 09/10/2015

SPECIAL CONDITIONS

27. The recipient acknowledges that the Office of Justice Programs (OJP) reserves a royalty-free, non-exclusive, and irrevocable license to reproduce, publish, or otherwise use, and authorize others to use (in whole or in part, including in connection with derivative works), for Federal purposes: (1) any work subject to copyright developed under an award or subaward; and (2) any rights of copyright to which a recipient or subrecipient purchases ownership with Federal support.

The recipient acknowledges that OJP has the right to: (1) obtain, reproduce, publish, or otherwise use the data first produced under an award or subaward; and (2) authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes. "Data" includes data as defined in Federal Acquisition Regulation (FAR) provision 52.227-14 (Rights in Data - General).

It is the responsibility of the recipient (and of each subrecipient, if applicable) to ensure that this condition is included in any subaward under this award.

The recipient has the responsibility to obtain from subrecipients, contractors, and subcontractors (if any) all rights and data necessary to fulfill the recipient's obligations to the Government under this award. If a proposed subrecipient, contractor, or subcontractor refuses to accept terms affording the Government such rights, the recipient shall promptly bring such refusal to the attention of the OJP program manager for the award and not proceed with the agreement in question without further authorization from the OJP program office.

28. Any Web site that is funded in whole or in part under this award must include the following statement on the home page, on all major entry pages (i.e., pages (exclusive of documents) whose primary purpose is to navigate the user to interior content), and on any pages from which a visitor may access or use a Web-based service, including any pages that provide results or outputs from the service: "This Web site is funded in whole or in part through a grant from the Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice. Neither the U.S. Department of Justice nor any of its components operate, control, are responsible for, or necessarily endorse, this Web site (including, without limitation, its content, technical infrastructure, and policies, and any services or tools provided)." The full text of the foregoing statement must be clearly visible on the home page. On other pages the statement may be included through a link, entitled "Notice of Federal Funding and Federal Disclaimer," to the full text of the statement.

29. The recipient agrees to submit to BJA for review and approval any curricula, training materials, proposed publications, reports, or any other written materials that will be published, including web-based materials and web site content, through funds from this grant at least thirty (30) working days prior to the targeted dissemination date. Any written, visual, or audio publications, with the exception of press releases, whether published at the grantee's/subgrantee's government's expense, shall contain the following statement: "This project was supported by Grant No. 2015-AK-BX-K016 awarded by the Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. Points of view or opinions in this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice." The current edition of the OJP Financial Guide provides guidance on allowable printing and publication activities.

30. All program authority and responsibility inherent in the Federal stewardship role shall remain with the Bureau of Justice Assistance (BJA). BJA will work in conjunction with the recipient to routinely review and refine the work plan so that the program's goals and objectives can be effectively accomplished. BJA will monitor the project on a continual basis by maintaining ongoing contact with the recipient and will provide input to the program's direction in consultation with the recipient, as needed.

Department of Justice
Office of Justice Programs
Bureau of Justice Assistance

AWARD CONTINUATION SHEET

Cooperative Agreement

PROJECT NUMBER: 2015-AK-BX-K018 AWARD DATE: 9/16/2015

SPECIAL CONDITIONS

31. Within 45 calendar days after the end of any conference, meeting, retreat, seminar, symposium, training activity, or similar event funded under this award, and the total cost of which exceeds $20,000 in award funds, the recipient must provide the program manager with the following information and itemized costs:

1) name of event;

2) event dates;

3) location of event;

4) number of federal attendees;

5) number of non-federal attendees;

6) costs of event space, including rooms for break-out sessions;

7) costs of audio visual services;

8) other equipment costs (e.g., computer fees, telephone fees);

9) costs of printing and distribution;

10) costs of meals provided during the event;

11) costs of refreshments provided during the event;

12) costs of event planners;

13) costs of event facilitators; and

14) any other costs associated with the event.

The recipient must also identify and report any of the following attendee (including participants, presenters, speakers) costs that are paid or reimbursed with cooperative agreement funds:

1) travel and incidental expenses (M&IE portion of per diem);

2) lodging;

3) transportation to/from event location (e.g., common carrier; Privately Owned Vehicle (POV)); and;

4) local transportation (e.g., rental car; POV) at event location.

Note that if any item is paid for with registration fees, or any other non-award funding, then that portion of the expense does not need to be reported.

Further instructions regarding the submission of this data, and how to determine costs, are available in the OJP Financial Guide, Conference Cost Chapter.

SPECIAL CONDITIONS

32. With respect to this award, federal funds may not be used to pay cash compensation (salary plus bonuses) to any employee of the award recipient at a rate that exceeds 110% of the maximum annual salary payable to a member of the federal government's Senior Executive Service (SES) at an agency with a Certified SES Performance Appraisal System for that year. (An award recipient may compensate an employee at a higher rate, provided the amount in excess of this compensation limitation is paid with non-federal funds.)

This limitation on compensation rates allowable under this award may be waived on an individual basis at the discretion of the OJP official indicated in the program announcement under which this award is made.

33. The recipient agrees to participate in BJA-sponsored training events, technical assistance events, or conferences held by BJA or its designees upon BJA's request.

34. The recipient agrees to comply with OJP grant monitoring guidelines, protocols, and procedures, and to cooperate with OJP (including the grant manager for this award and the Office of Chief Financial Officer (OCFO)) on all grant monitoring requests, including requests related to desk reviews, enhanced programmatic desk reviews, and/or site visits. The recipient agrees to provide to OJP all documentation necessary to complete monitoring tasks, including documentation related to any subawards made under this award. Further, the recipient agrees to abide by reasonable deadlines set by OJP for providing the requested documents. Failure to cooperate with OJP's grant monitoring activities may result in sanctions affecting the recipient's DOJ awards, including, but not limited to: withholdings and/or other restrictions on the recipient's access to grant funds; referral to the Office of the Inspector General for audit review; designation of the recipient as a DOJ High Risk grantee; or termination of an award(s).

35. Approval of this award does not authorize approval of any consultant rate in excess of $650 per day. A detailed justification must be submitted to and approved by the Office of Justice Programs (OJP) program office prior to obligation or expenditure of such funds.

36. All procurement (contract) transactions under this award must be conducted in a manner that is consistent with applicable Federal and State law, and with Federal procurement standards specified in regulations governing Federal awards to non-Federal entities. Procurement (contract) transactions should be competitively awarded unless circumstances preclude competition. Non-competitive (e.g., sole source) procurement by the award recipient in excess of the Simplified Acquisition Threshold (currently $150,000) set out in the Federal Acquisition Regulation must receive prior approval from the awarding agency, and must otherwise comply with rules governing such procurements found in the current edition of the OJP Financial Guide.

37. The recipient agrees not to obligate, expend, or draw down any funds until the program office has verified that the recipient has submitted all necessary documentation required to comply with the Department of Justice Procedures for Implementing the National Environmental Policy Act (found at 28 C.F.R. Part 61) and a Grant Adjustment Notice has been issued removing this condition.

38. The recipient may not obligate, expend or draw-down more than 25% of the total eligible award amount until a completed inventory and/or certification of a completed inventory has been provided to BJA. BJA will review the inventory documentation to ensure that it contains a detailed and descriptive list of Sexual Assault Kits (SAKs), containing information such as, but not limited to: kit(s) identifiers; quantity, and location of the item. Once BJA has reviewed and approved the grant recipient's certification or certificate thereof, a Grant Adjustment Notice (GAN) will be issued removing this special condition.

39. Recipient may not obligate, expend, or drawdown funds until the Bureau of Justice Assistance, Office of Justice Programs has reviewed and approved the Budget Narrative portion of the application and has issued a Grant Adjustment Notice (GAN) informing the recipient of this approval.

PROJECT NUMBER 2015-AK-BX-K016 AWARD DATE 09/10/2015

SPECIAL CONDITIONS

40. Recipient may not obligate, expend or drawdown funds until the Bureau of Justice Assistance, Office of Justice Programs has reviewed and approved the Program Narrative portion of the application and has issued a Grant Adjustment Notice (GAN) to formally the recipient of the approval.

41. The recipient may not obligate, expend or draw down funds until the Office of the Chief Financial Officer (OCFO) has approved the budget and budget narrative and a Grant Adjustment Notice (GAN) has been issued to remove this special condition.

15. SUMMARY DESCRIPTION OF PROJECT (See instruction on reverse)

The National Sexual Assault Kit Initiative (SAKI) provides funding to state, local, and tribal law enforcement agencies, and prosecutor's offices to support multidisciplinary community responses to sexual assault cases involving testing forensic evidence found to previously unsubmitted sexual assault kits (SAKs). Unsubmitted SAKs that have never been submitted to a crime laboratory.

The goal of the SAKI is the creation of a coordinated community response that ensures key responders to these cases will answer possible through a victim-centered approach, as well as to build jurisdictions' capacity to prevent the development of conditions that lead to high numbers of unsubmitted SAKs in the future. The initial program provides jurisdictions with resources to address their unsubmitted SAK issues, including support to inventory, track, and track SAKs' events and post-performance meeting process necessary training to increase effectiveness in addressing the complex issues associated with these cases and engage in multidisciplinary policy development, implementation, and coordination and improve practices related to investigation, prosecution, and victim engagement and

support to coordination with evidence and cases resulting from the testing project.

The City of Flint Police Department will use the 2015 SAKI funds to provide a holistic approach to solving the problem of backlogged untested SAKs and to ensure that backlogs don't occur in the future. The SAKI funds will be used to: employ untested SAKs; fund two police investigators to locally file criminal investigations for each kit based on SAKI analysis; a dedicated prosecutor for the Genesee County Prosecutor's Office to prosecute sexual assault cases; hire a victim/victim advocate through YWCA of Flint to serve victims of sexual assault; and fund property clerk to work with investigators and prosecutor on the inventory of SAKs; fund travel and training expenses; fund contracts associated with expert witnesses, polygraphs, supplies, and fund other expenses necessary for project implementation.

PRESENTED: 12-11-15

ADOPTED: _____

RESOLUTION AUTHORIZING AMENDMENT OF THE 2016 BUDGET FOR A POLICE DEPARTMENT GRANT FROM THE DISTRICT ATTORNEYS OFFICE OF NEW YORK (DANY) FOR $163,590.00

BY THE CITY ADMINISTRATOR:

The City of Flint has applied for and accepted a District Attorney of New York grant funded by the DANY Sexual Assault Kit Backlog Elimination Program in the amount of $163,590.00.

This funding was created to address the issue of un-submitted sexual assault kits (SAKs) at law enforcement agencies. The City has also accepted funds from the US Department of Justice (DOJ) for processing sexual assault kits, however DANY and DOJ will share information and coordinate to ensure that there is no duplication of funding awarded to jurisdictions. Jurisdictions may apply to both programs as long as they meet the grant requirements from each program. The funds will be used for a one year period in compliance with the grant agreement and approved grant budget.

The proposed amendment has been reviewed and approved by the Mayor and City Administrator.

IT IS RESOLVED that the appropriate City officials are authorized to do all things necessary to appropriate revenue and expenditure amounts in fund-dept #296-301.733 under grant code #ODANY-15-SAK in compliance with the New York County District Attorney's Office Sexual Assault Kit Backlog Elimination Grant Program guidelines for the amount of $163,590.00.

CITY COUNCIL:

Kerry Nelson, Council President

RECEIVERSHIP TRANSITION ADVISORY BOARD:

PRESENTED TO CITY COUNCIL: 12/14/2015
ADOPTED BY CITY COUNCIL: 12/14/2015

RESOLUTION STAFF REVIEW FORM

DATE: December 3, 2015

Agenda Item Title: Resolution authorizing City of Flint Officials to do all things necessary to approve a budget amendment that adds revenue and expenditure appropriations for a grant from the US Dept Of Justice to process sexual assault kits.

Prepared By: Tamar Lewis, Budget and Grants Administrator

Background/Summary of Proposed Action: This funding was created to address the issue of unsubmitted sexual assault kits (SAKs) at law enforcement agencies. This program is also meant to further the Department of Justice's mission by improving state and local jurisdictions' response to violent crime and improving the functioning of the criminal justice system. The grant is for a three year period and totals $1,166,409.00

It will be used in conjunction with a grant from the New York County District Attorneys Office in the amount of $163,590.00.

The Grant code in the BS&A system is FDOJ-15-SAKI.

Financial Implications: There is no required match, however any ineligible expenditures would need to be paid from the City's General Fund.

Budgeted Expenditure: Yes ____ No__X___ **Please explain, if no:**

Account #: **296 – 301.732**
296 = Other Grants Fund
301.732 = DOJ Grant

Pre-encumbered: Yes_____ No__X___ **Requisition #**_____

Other Implications (i.e., collective bargaining:

Staff Recommendation: The Police Department recommends approval of this resolution, and recommend that multi-year projects funded with restricted funds not be accounted for like regular governmental funding items.

Approval: _____

Re: Grant Acceptance

Ms. Henderson,

The City of Flint Police Department has received the three grant awards listed below:

- Department of Justice FY15 Sexual Assault Kit Initiative (SAKI) grant - $1,166,409.00. No required match. This grant is to investigate sexual assault cases, prosecute Offenders and give assistance to the victims. The grant period is from 10/01/15 to 09/30/18.

- 2015 Sexual Assault Kit Background Elimination Grant from the District Attorney, County of New York, also known as the "DANY" grant. Grant amount is $163,590.00. No required match. This grant works alongside the "SAKI" grant. It collects and sends sexual assault kits out to be tested. This grant period is from 10/10/15 to 09/30/17.

- Auto Theft Prevention Authority (ATPA) Grant, refer to as G.A.I.N. - $56,313.00 with a $56,313.00 match, already budgeted in the Police Operating Budget. This grant period is from 10/01/15 to 09/30/16.

The City of Flint Police Department is requesting the City of Flint accept these grant awards.

- Department of Justice "SAKI" Grant ✓ Accept ____ Deny
- District Attorney, New York "DANY" Grant ✓ Accept ____ Deny
- Auto Theft Grant "G.A.I.N." ✓ Accept ____ Deny

Additional grant information has been attached.

DISTRICT ATTORNEY

September 10, 2015

Patrick Brady
The City of Flint Police Department
210 E. 5th Street
Flint, MI 48502

Dear Mr. Brady:

Congratulations!

The New York County District Attorney's Office (DANY) is pleased to inform you that The City of Flint Police Department has been selected as an awardee of the 2015 Sexual Assault Kit Backlog Elimination Grant Program to begin on October 1, 2015. Your agency will receive $163,590 over two years to test previously untested sexual assault kits, which will be distributed to your agency on a reimbursement basis. Please note that if the amount of your award is different from the budget you submitted with your proposal, your budget may have included expenditures that were outside the scope of the grant program. You will receive all pertinent grant program information and a formal contract for your review later this week.

We have provided you with a sample press release attached to this email, which you may adapt and disseminate to local media outlets. However, please note that DANY, in collaboration with the Bureau of Justice Assistance, will officially announce awards during a news conference at 11:30 a.m. ET on September 10, 2015. All information about the award, including the information contained in this letter, and the enclosed press release, must be kept strictly embargoed until then.

Thank you for your commitment to addressing the sexual assault kit backlog. We look forward to working together over the next two years to bring justice to victims and make all of our communities safer.

Sincerely,

Cyrus Vance

Cyrus R. Vance, Jr.

New York County District Attorney's Office Sexual Assault Kit Backlog Elimination Grant Program

Frequently Asked Questions

April 24, 2015

PROGRAM OVERVIEW AND ELIGIBILITY

1. **How much funding is available to support the New York County District Attorney's (DANY) Sexual Assault Kit Backlog Elimination Grant Program?**

   Up to $35 million is available for this grant program. Each applicant may request up to $2,000,000 for a two-year period. As resources allow, additional funding may be available through subsequent solicitations to support additional sexual assault kit (SAK) testing efforts. DANY also recognizes that applicants with smaller backlogs will require significantly lesser amounts of funding. All jurisdictions with backlogged kits that meet the minimum requirements of this solicitation, regardless of the size of their backlog, are encouraged to apply.

2. **Who is eligible to apply for the New York County District Attorney's Office grant program?**

   States (including territories), units of local governments (including federally-recognized Indian Tribal governments as determined by the Secretary of the Interior), law enforcement agencies, and public forensic labs. Multi-jurisdictional entities such as states and counties may also apply.

3. **What is the application process?**

   All applications must be submitted through DANY's online grant administration portal https://app.wizehive.com/appform/login/whnycda by June 1, 2015 at 5:00 p.m. EST. Applications may not be submitted in any other way, and no late applications will be accepted. In the event of technical difficulties with the application process, please contact dnabacklog@dany.nyc.gov.

4. **How does this solicitation define "backlogged or untested kit?"**

   A "backlogged" or "untested kit" is one that has not been analyzed by a forensic lab within 365 days of being booked into evidence. Kits from cases in which identity of the offender is not an issue, the statute of limitations has expired, or the offender was convicted without DNA evidence would still fall under this category and should not be excluded.

5. **When will grant funds become available?**

   Applications are due on June 1, 2015 and grantees will be selected by late summer 2015. The contract period will commence by September 1, 2015.

6. **Will DANY award partial funding for a proposal?**

   Yes, DANY may decide to grant a jurisdiction a portion of the total funds requested in its proposal.

New York County District Attorney's Office
1 Hogan Place, New York, NY 10013
www.manhattanda.org

PERMISSIBLE USES OF FUNDS

7. Can my jurisdiction use this funding to address backlogged SAKs currently awaiting testing in my jurisdiction's crime laboratory?

Yes. Sexual assault kits that have remained untested for at least 365 days and are currently located in police storage, crime labs or other facilities are eligible for testing under this grant program.

8. What can we use the funding for?

Funding must be used only for testing of untested or backlogged SAKs. This includes costs associated with transporting kits to a lab, DNA testing, consumables and supplies associated with kit testing, technical review and uploading profiles into CODIS. You may pay overtime costs for existing lab staff or to contract temporary staff in order to enhance capacity for the period of this grant. Please see the Budget Narrative and Worksheet instructions available at: https://app.wizehive.com/appform/login/whnycda for additional information about allowable Personnel and OTPS costs.

9. Can we use these funds to hire and train new staff, including DNA analysts, data analysts, or an administrator for the project?

No. DANY will not provide funding for training or for hiring new permanent staff. You may use funds to pay for lab staff overtime or to hire contracted lab staff for the duration of this project.

10. Will DANY provide funding for to support the data collection and reporting required under this grant program?

No. DANY will not provide additional funding to support data collection and reporting. However, DANY and its partners will provide assistance to jurisdictions with reporting on an as-need basis.

11. Can I use this funding to start a new public DNA lab in my jurisdiction or add DNA capabilities to an existing public lab?

No.

12. Can I use funding to test SAKs that have undergone other types of testing but not DNA testing?

Yes, any kit that has *not* undergone DNA testing is considered untested under this grant program.

PROGRAM REQUIREMENTS

13. Do we need to know the exact extent of our backlog in order to apply?

No. DANY recognizes that many jurisdictions may not fully know the scope of their backlog at this time. Qualified jurisdictions are encouraged to apply even if they have not completed a full inventory or audit.

14. What kind of reporting will be required under this grant?

All grantees will be expected to report to DANY on a quarterly basis. Grantees must agree to provide follow-up information to DANY for two years after the grant period ends.

15. Does my jurisdiction need to form a multidisciplinary team?

New York County District Attorney's Office
1 Hogan Place, New York, NY 10013
www.manhattanda.org

While your jurisdiction does not need to create a formal team, this grant program requires that your jurisdiction employ a *multi-disciplinary strategy*. A multi-disciplinary strategy incorporates all critical stakeholders, including law enforcement, prosecutors, system and community-based victim advocates, forensic medical personnel and laboratories, and formalizes the process for coordinating local SAK testing efforts. In some jurisdictions, a working group or task force may be established. Others may consider a less formalized approach.

16. Who should write letters of commitment and what should they include?

Your application should include a letter of commitment from each key stakeholder within your multidisciplinary strategy. These letters should describe, using specifics, how that agency or organization will participate in the initiative, should the jurisdiction receive funding. Letters should also include a commitment from key stakeholders to share relevant data with the lead applicant for reporting purposes.

If you are a multi-jurisdictional entity, such as a state or a county, you are not required to submit a letter of commitment from every stakeholder agency included in your proposal. In such cases, please submit letters of commitment from the key statewide agencies within your jurisdiction, such as the state police department, the state prosecutor's office and the state forensic lab.

17. What is the "forklift" approach, and is my jurisdiction required to adhere to that model?

The "forklift" approach requires testing all SAKs in the backlog regardless of the status or facts of the case. SAKs should not be excluded from the sample of kits to be tested for reasons including, but not limited to: expired statute of limitations, perceived weaknesses in the case, the nature of the victim/defendant relationship, victim cooperation at the time the crime was reported, previous adjudication of the case, including post-conviction cases, or prior partial forensic testing.

All jurisdictions that receive funding through DANY's grant program must adhere to the forklift approach. Successful backlog elimination efforts in New York City, Houston, Detroit, Cleveland and others have proven the value of testing every kit.

18. Will DANY make my jurisdiction's reported data public?

Data collected from jurisdictions through this grant may also be used for evaluation purposes and DANY will only report aggregate, anonymized outcomes. In the case that DANY wishes to report jurisdiction-specific information, prior approval will be sought from the grantee.

19. Is there a maximum age for SAKs that can be tested under this program?

No.

20. Does DANY require applicants to propose testing a minimum number of kits in order to qualify for this grant?

No, there is no minimum number of SAKS required to participate in DANY's grant program. All jurisdictions that meet the grant requirements of this solicitation are encouraged to apply.

21. If I represent a multi-jurisdictional entity such as a state or county, does DANY require a minimum number of law enforcement agencies within my jurisdiction to participate?

No. If a multi-jurisdictional entity applies as the lead applicant to this grant program, there is no limit or minimum number of sub-jurisdictions that the multi-jurisdictional applicant may include in the proposal. However, the lead applicant must explain the scope of the funding request and describe the multi-disciplinary strategy that includes the participating agencies within the jurisdiction. For example, if a state bureau of investigation is the lead applicant on behalf of six participating counties statewide, the application should

New York County District Attorney's Office
1 Hogan Place, New York, NY 10013
www.manhattanda.org

include a description of the six counties, and the bureau's strategy for collecting kits and information from each.

22. Does this grant program require that jurisdictions test kits that involve non-reporting or anonymous victims?

No. If a victim chooses not to report a crime, the DNA profile is no longer eligible for upload into the FBI's CODIS database, and therefore not required for testing under this grant program Jurisdictions should not test kits related to non-reported cases, sometimes called "anonymous," "unreported," or "Jane Doe" kits unless a victim has changed his/her mind and decided to make a police report at a later time.

23. Will we be able to outsource the kits to private labs?

Yes. Applicants may use any accredited lab of their choice for testing under this grant program, whether that lab is public or private. Applicants may also divide their kits between more than one accredited lab for testing.

Please be advised that DANY has established agreements with two private forensic labs: Bode Cellmark Forensics and Sorenson Forensics. Jurisdictions are under no obligation to use these services and must follow any applicable procurement rules when contracting with any private lab if selected for funding under the SAK Program. Through these established agreements, grantees of the SAK Program will be eligible to receive a competitive rate of $550-650 per kit for initial DNA testing.[1]

24. If my jurisdiction contracts with a private lab, does DANY require a letter of commitment from that lab?

No. You only need to provide a letter of commitment from the public lab(s) that will upload your eligible DNA profiles to CODIS.

25. If my jurisdiction receives DANY funding, how many representatives can we send to U.S. Department of Justice's Bureau of Justice Assistance conference in Washington D.C.?

Applicants should budget for delegations of approximately 2-3 representatives to attend the BJA conference.

26. Can my jurisdiction apply to both the Bureau of Justice Assistance and DANY for funding?

Yes. DANY and BJA will share information and coordinate to ensure that there is no duplication of funding awarded to jurisdictions. Jurisdictions may apply to both programs as long as they meet the grant requirements from each program.

For more information, contact: dnabacklog@dany.nyc.gov or visit: http://manhattanda.org/ending-rape-kit-backlog-nationwide

RESOLUTION APPROVING A BUDGET AMENDMENT FOR CITY OF FLINT PARKS PROFESSIONAL SERVICES: MOWING & MAINTENANCE

BY THE CITY ADMINISTRATOR:

The City was awarded grant funding from the Ruth Mott Foundation in the amount of $68,400; and

This grant is for professional services in City of Flint parks, specifically mowing and maintenance.

This grant will ensure that parks are mowed in accordance with the City of Flint Strategic plan between November 2015 and October 2016.

IT IS RESOLVED that appropriate City officials are authorized to process a budget amendment recognizing grant revenue and corresponding appropriation of funds under grant code LRM-16-PKMOW.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

ADOPTED BY CITY COUNCIL: 12/14/2015

BUDGET AMENDMENT STAFF REVIEW FORM

DATE: December 10, 2015

Agenda Item Title: RESOLUTION APPROVING A BUDGET AMENDMENT FOR CITY OF FLINT PARK MOWING & MAINTENANCE

Prepared By: Adam Moore, Planner I

Background/Summary of Proposed Action:

In November 2015, the City received grant funding from the Ruth Mott Foundation (RMF) for professional services in City of Flint parks, specifically mowing and maintenance in the City parks.

The grant is for one year and will allow the Division to continue to mow and maintain City parks in accordance with the City's Strategic plan between November 2015 and October 2016.

This grant was necessary after construction overages at Riverbank Park, which were paid for out the parks professional services budget using parks millage funds, jeopardized regular mowing in parks in the last season of the parks millage.

Financial Implications:

This grant leverages existing funds throughout the community, and delivers no impact to the City's General Fund accounts.

Budgeted Expenditure: Yes _X_ No _____ **Please explain, if no:**

Pre-encumbered: Yes __ No _X__

Account No.: To be appropriated by Finance under grant code LRM-16-PKMOW

Ruth Mott Foundation

November 3, 2015

Ms. Natasha Henderson
City Administrator
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Dear Ms. Henderson:

I am pleased to inform you the Ruth Mott Foundation has granted $68,400 to the City of Flint for the period 11/1/2015 through 10/31/2016.

Use of Grant
This grant is to be expended solely for **City of Flint Park Mowing and Maintenance (Grant ID: 1551.01)**. Upon receipt of your acceptance, the grant will be paid to the City of Flint.

The City of Flint confirms it will act as the fiscal sponsor for this project and this project will be under its complete control. The City of Flint further confirms it will exercise control over the process of selecting any secondary grantee or consultant, that the decision made or that will be made on any such selection is completely independent of the Ruth Mott Foundation, and there does not exist an agreement, written or oral, under which the Ruth Mott Foundation has created or may cause the selection of a secondary grantee or consultant.

The Foundation rarely commits significant grant funds for extended periods of time, and receiving a grant now does not guarantee renewal in the future. Unless this grant is for a one-time activity, grantees should cultivate other sources of support to ensure the sustainability of their program beyond the life of this grant.

We want to alert you to the fact that the Ruth Mott Foundation board is currently engaged in a strategic planning process and the Foundation's grantmaking priorities may change.

Grant Contingencies
There are no contingencies.

Grant Accounting
- You may charge this grant only for services performed or equipment and material received during the grant period specified in this letter.
- You may charge this grant only for line item expenditures that were included in the approved budget in this letter.
- You are required to maintain financial records and receipts for expenditures relating to this project.
- You are required to retain all records and supporting documentation relating to this grant for five years after the grant's termination date. You are also required to permit the Ruth Mott Foundation to have reasonable access to your files, records and personnel during the term of this grant and for five years thereafter for the purpose of making financial audits, verifications, or program evaluations.

Plaza One Financial Center
111 E. Court St., Suite 3C • Flint, MI 48502-1649 • Phone: (810) 233-0170 • Fax (810) 233-7022
E-Mail: mf@ruthmott.org ⊕ www.ruthmott.org

- You will notify the Foundation immediately in writing of any significant changes in the organization, program or activity supported by the grant including, but not limited to, its budget, expenditures, objectives, key personnel, schedule, or other circumstances that could affect its purpose or intended outcomes.
    1. The Ruth Mott Foundation must approve variances that exceed both $1,000 and 20% over the budget line item amount 30 days in advance of the expenditure.
    2. The Ruth Mott Foundation must approve any variance that changes the grant period or reporting dates, 30 days in advance of the grant end date.
    3. Expenses related to any variances not approved will be the responsibility of the grantee.

Ruth Mott Foundation Contact Person
Foundation program staff may contact you from time to time to arrange for visits to project sites. The purpose of such calls is to review developments, discuss any problems which may have arisen and assess progress. Please direct all correspondence or questions relating to this grant to Elizabeth Jordan, Program Officer.

Public Information
The Foundation encourages grantees to make announcements of grants upon return of the signed commitment letter and to make mention of the Ruth Mott Foundation. However, we require the opportunity to read and approve in advance all publications, press releases, on-line communications, or other public announcements that make mention of the Ruth Mott Foundation and/or this grant award.

Reports
To assist us in monitoring this grant, we ask you submit reports to the Foundation. Although we do not have a standard reporting format, we do have a few guidelines. We would prefer to receive a concise and precise document (four to five pages). The report, which can take the form of a letter, should provide the Foundation with a candid assessment of the progress of the project including any challenges or difficulties, and what has been learned so far. The report should list the results achieved to date and state what is planned for the next period. In addition to the narrative report, we require a signed financial statement detailing how the Foundation's grant funds have been spent.

The Foundation requires the following report(s):
(To expedite the review process, the cover page of your report should include the grant ID number, project name, grant dates, and the name of the report.)

Grant Dates: 11/1/2015 to 10/31/2016

Final Report Due Date: 11/30/2016

Please report on the following:

1. A narrative summary of City of Flint Park Mowing and Maintenance to include the following:
    a. Summary of the approach to providing mowing and basic maintenance of City of Flint parks, including the use of mowing contracts and the frequency of mowing during the growing season.
    b. Discussion of the effect of this grant on the city's parks and recreation millage funds and resources available for park mowing and maintenance in 2015-16.

c. Description of efforts to educate the public about the importance of the City of Flint Parks and Recreation millage renewal and a discussion of how park mowing and maintenance may affect the result of the millage ballot.

2. Provide photographs (digital) of your project, including parental waivers for all minors featured in photographs.

3. Evaluation or lessons learned which might result in changes in the future.

4. Financial report summarizing the grant expenses and/or balances remaining at the end of the grant reporting period. Once the project is completed, the Foundation requires a final accounting of grant expenditures for the grant total, $68,400.
   a. Accounting: Budget vs. Actual:
   Report should include the actual expenditures against the approved budget by line item for the reporting period.
   b. Approved variance explanations: Summary of all approved variances that occurred during the course of the grant.
   c. All Funding Sources: Summary of funding sources (listing by source, amount and grant period) received for this program during the reporting period including cash and in-kind services.
   d. Unspent Funds: Please explain the variance between the total funding received and the total approved budget.
   e. Signature of the appropriate financial officer of your organization.

We would be happy to assist you or answer any questions you may have regarding this reporting requirement.

Undisbursed Funds
You are required to return any undisbursed funds to the Ruth Mott Foundation within three months after the end of this grant or at the time you are unable to fulfill this grant agreement. Any refund of less than $100 will be waived.

Compliance with Laws
You may not use any portion of the grant funds to undertake any activity for any purpose other than one specified in section 170(c)(2)(B) of the Internal Revenue Code for charitable purposes. Further, the Ruth Mott Foundation reserves the right to discontinue, modify, or withhold any payments that might otherwise be due under this grant or to require a refund of any unexpended grant funds if, in the Ruth Mott Foundation's judgment, such action is necessary to comply with the requirements of any law or regulation.

Acceptance
This letter contains the entire agreement between your organization and the Ruth Mott Foundation, and there are no conditions or stipulations, oral or written, governing the use of the grant funds other than those contained in this letter.

If you agree to the grant conditions as stated, please return **one complete copy of this grant agreement in its entirety, with all the original signatures including the president and the board chair** in the space provided. This grant may be withdrawn if the Ruth Mott Foundation has not received your acceptance within one month from the date of this letter. By

countersigning this grant letter, your organization also confirms that there has been no change in its qualification as an organization exempt from income taxation under Section 501 (c)(3) of the Internal Revenue Code. Should any change occur, please notify the Ruth Mott Foundation immediately.

It has been a pleasure to work with you in developing this grant commitment, and we are confident that this project will have a positive impact on the community.

Very truly yours,

Handy L. Lindsey, Jr.
President

We acknowledge that appropriate personnel have read and understand this letter, that its terms and conditions are acceptable to us and that we will comply with those terms and conditions. The two signers below are authorized by the organization to enter into this agreement

RESOLUTION TO AUTHORIZE 5th DIVISION BUDGET AMENDMENT

BY THE CITY ADMINISTRATOR:

On April 28, 2015, the Emergency Manager approved consolidation of the Sixty-Seventh and Sixty-Eighth Districts of Michigan's District Court (resolution EMA2422015); and

The Genesee County Board of Commissioners approved the amended 5th Division budget request at the meeting of its Finance Committee on November 23, 2015;

IT IS RESOLVED that the amended 5th Division budget amendment for the consolidation of the Sixty-Seventh and Sixty-Eighth District Courts, authorized by the Genesee County Board of Commissioners, is hereby authorized.

Peter M. Bade, Chief Legal Officer

Jody N. Lundquist, Chief Financial Officer

Natasha L. Henderson, City Administrator

CITY COUNCIL:

Kerry Nelson, Council President

RECEIVERSHIP TRANSITION ADVISORY BOARD:

PRESENTED TO CITY COUNCIL: 12/14/2015
ADOPTED BY CITY COUNCIL: 12/14/2015

RESOLUTION STAFF REVIEW

DATE: December 11, 2015

Agenda Item Title: Resolution to Authorize 5th Division Budget Amendment

Prepared By: V. Foster

Background/Summary of Proposed Action:

On 4/28/15, the Emergency Manager approved consolidation of the 67th and 68th District Courts (see attached resolution #EMA2422015).

On November 16, 2015, the Genesee County Board of Commissioners gave final approval to the amended 5th Division budget (see attached). The 67th and 68th District Court judges leading the consolidation worked together to identify reorganization of a few positions, which resulted in cost savings. This savings is proposed to offset additional costs necessary to complete the transition such that the City's financial obligation and the bottom line of the budget remains the same.

Financial Implications
None

Budgeted Expenditure? x Yes No Please explain if no:

Account No.:

Pre-encumbered? n/a

Other Implications (i.e., collective bargaining):

Staff Recommendation:
Recommended.

TO THE HONORABLE CHAIRPERSON AND MEMBERS OF THE GENESEE COUNTY BOARD OF COMMISSIONERS, GENESEE COUNTY, MICHIGAN

LADIES AND GENTLEMEN:

BE IT RESOLVED, by this Board of Commissioners of Genesee County, Michigan, that the request by the Director of Court Operations for the 67th District Court to authorize the amended budget for the 5th division of the 67th District Court, changes in staffing positions, and computer upgrades, all as described in the memorandum presented to this Board, is approved (a copy of the memorandum request dated November 17, 2015, and supporting documentation being on file with the official records of the November 23, 2015, meeting of the Finance Committee).

SUBMISSION NO.:

PRESENTED: 12-14-15

ADOPTED:

RESOLUTION AUTHORIZING CITY OFFICIALS TO ADOPT THE SUPPORT EMERGENCY OPERATIONS PLAN OF THE CITY OF FLINT

BY THE CITY ADMINISTRATOR:

The City of Flint has elected to be incorporated into the Genesee County Emergency Management Program and has developed a Support Emergency Operations Plan, dated September 24, 2014. This is a support plan to the Genesee County Emergency Action Guidelines.

By becoming part of the county emergency management program, the City of Flint and Genesee County have certain responsibilities to each other. This Support Emergency Operations Plan has been developed to identify the responsibilities between the City of Flint and Genesee County in regards to pre-disaster emergency management activities. It also provides for the City of Flint government agencies to respond to various types of emergencies or disasters that affect the community.

IT IS RESOLVED that the appropriate City officials to all things necessary to adopt the City of Flint's Support Emergency Operations Plan.

Peter M. Bade, Chief Legal Officer

Jody N. Lundquist, Chief Financial Officer

Natasha L. Henderson, City Administrator

Dr. Karen W. Weaver, Mayor

CITY COUNCIL:

Kerry Nelson, Council President

PRESENTED TO CITY COUNCIL: 12/14/2015

ADOPTED BY CITY COUNCIL: 12/14/2015

RECEIVERSHIP TRANSITION ADVISORY BOARD:

RESOLUTION STAFF REVIEW FORM

DATE: December 14, 2015

Agenda Item Title: **Resolution authorizing City Officials to adopt the Support Emergency Operations Plan of the City of Flint.**

Prepared By: City of Flint Fire Department

Background/Summary of Proposed Action: The City of Flint has developed a Support Emergency Operations Plan, which provides a framework for the City of Flint to use in performing emergency functions before, during, and after various types of emergencies or disasters that affect the community. It is a support plan to the Genesee County Emergency Action Guidelines. Through this plan, the City of Flint continues to implement the National Incident Management System, participating in efforts to provide an effective and efficient incident management operation.

(Dept. Head/Authorized Staff)

Office of Mayor Karen W. Weaver, Ph.D.
City of Flint, Michigan, County of Genesee

Declaration of State of Emergency

Authority Emergency Management Act: Michigan Emergency Management Act 390 of 1976

BY THE MAYOR:

Whereas; in accordance with the Michigan Emergency Management Act, I am declaring a State of Emergency for the incorporated boundaries of the City of Flint, Michigan; and

Whereas; the City of Flint has experienced a Manmade disaster by switching to the use of the Flint River before connecting to KWA; and

Whereas; the City of Flint children have experienced increased blood lead levels since the switch to the Flint River; and

Whereas; this damage to children is irreversible and can cause effects to a child's IQ, which will result in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system; and

Whereas; this will increase the need for foster and adoptive parents as a result of social services needed due to the detrimental effects of the high blood lead levels; and

Whereas; I am requesting that all things be done necessary to address this State of Emergency Declaration, effective immediately; and

Whereas; this action is being taken to protect the health, safety, and welfare of the citizens of Flint; and

Whereas; I request that the Genesee County Board of Commissioners call a Special Meeting no later than the end of December 2015 to take action supporting this State of Emergency; and

Now, Therefore, I, Mayor Karen W. Weaver declare a State of Emergency in the City of Flint, effective, December 14, 2015;

Karen W. Weaver

Dr. Karen W. Weaver, Mayor

To all Recipients:

Transmitted herewith is the Support Emergency Operations Plan for the City of Flint in support to the Genesee County Emergency Action Guidelines (EAG). The plan provides a framework for the City of Flint to use in performing emergency functions before, during, and after a natural disaster, technological incident or a hostile attack.

The policies contained herein do not discriminate on the basis of race, color, national origin, religion, sex, age, disability or political beliefs.

This plan was adopted by Flint City under Resolution No. 150965.1 Dated 12/14/15. It supersedes all previous plans.

Karen L. Weaver — 12-14-15

Signature of Chief Executive Official (Mayor) — Date

Dr. Karen Weaver

CITY OF FLINT, MICHIGAN

INTRODUCTION TO THE PLAN

I. Purpose

The City of Flint has elected to be incorporated into the Genesee County Emergency Management Program. By becoming part of the county emergency management program, the City of Flint and Genesee County have certain responsibilities to each other. This Support Emergency Operations Plan has been developed to identify the responsibilities between the City of Flint and Genesee County in regards to pre-disaster emergency management activities. It also provides for City of Flint government agencies to respond to various types of emergencies or disasters that affect the community. This support plan is to be used in concurrence with the Genesee County Emergency Action Guideline, as it is a supporting document. The support plan will be maintained in accordance with the most current standards of the Genesee County Emergency Action Guidelines. Review of this support plan shall be accomplished concurrently with the county plan.

II. Scope

This plan is a flexible document in which changes from the content of the plan may occur due to unique nature of emergencies. Each agency that has a supported role in this plan or its elements has developed Standard Operating Procedures (SOP) which provides systematic instructions for accomplishing assigned functions. In addition, to support emergency preparedness and response efforts, the local government also conducts other activities such as personnel training, participating in exercises, encouraging chronic disease prevention techniques; educate the public on awareness activities, and use of appropriate land use planning decisions for mitigation and prevention purposes as well. Through this plan, the City of Flint continues to implement the National Incident Management System, participating in efforts to provide an effective and efficient incident management operation.

III. Plan Maintenance and Implementation

The plan has been developed together with local community, and county officials to ensure consistency within the county emergency management program documents. The plan is required to be approved by the City of Flint's Chief Executive Official every four years, or whenever the CEO changes and is to be forwarded to the County Emergency Management Office. Upon approval, it will be implemented, tested through exercises in concurrence with County officials, and review/updated to maintain currentness with the Genesee County Emergency Action Guidelines.

This plan has been provided to all municipal agencies, elected officials, the county emergency management office and the MSP/EMHSD district coordinator.

IV. Emergency Management Program Oversight

The City of Flint has appointed the Chief of Fire to serve as the city's emergency management liaision responsible for working with the County Emergency Management Coordinator in matters pertaining to emergency management for the municipality. Pursuant the requirements in P.A. 390, of 1976, as amended, Section 19, Genesee County has adopted a resolution that incorporates the City of Flint into its emergency management program, necessary for diaster assistance.

CITY OF FLINT, MICHIGAN

BASIC INFORMATION

I. Community Profile

The City of Flint is situated in the center of Genesee County. At 33.42 square miles, it is the county's largest city. According to the United States Census Bureau, Flint's estimated population is 99,763.

Flint has an average number of people identified as individuals with special/functional needs for a city of its size. Many of these individuals reside in congregate care centers, but others reside in non-group homes where help is provided as needed or on-call.

According to the Genesee County Hazard Mitigation Plan, the three situations the community is most vulnerable to is: inclement weather (e.g. thunderstorms, hail, lightning and severe wind storms, snow, tornadoes), structure fires and hazardous material incidents. All of these incidents can happen anywhere within the community, but hazardous material incidents are more likely to occur on the major expressways and highways. I-475, I-69, M-21 & M-54 all pass through Flint while I-75/US 23 is very close to its western border. More information regarding hazard vulnerability can be found in the County's Hazard Mitigation Plan/Analysis.

Within the community, there are 19 sites that contain extremely hazardous materials. Pursuant to SARA Title III, off-site emergency response plans have been developed by the LEPC to prepare the fire department(s) to respond to the specific hazardous materials on the sites. In addition, the owners of the site(s) have reported the types of hazardous material that is housed on-site, as required by the Emergency Planning and Community Right-To-Know Act.

II. Emergency Management Authority

Pursuant to P.A. 390 of 1976, as amended, the municipal CEO may declare a local state of emergency for the City of Flint. Also, Sections 1-801and 3-306 of the Flint City Charter describe procedures regarding emergency rules and ordinances. Upon a declaration, PA 390 also authorizes the CEO to issue directives, such as restrictions to travel on local roads. The local declaration activates this emergency plan as well as the emergency operations center to conduct activities to ensure the safety of people, property, and the environment.

Since the City of Flint has been a recipient of federal preparedness assistance, a resolution has been adopted by the local government for establishing the National Incident Management System as the standard for incident management for all-hazards. Through the adoption, the City continues to implement the concepts of the NIMS through training, planning, and exercising activities.

III. Response Resources

The City of Flint maintains fulltime departments of both Police and Fire. They are responsible for providing public safety and welfare to the community. Each department is comprised of qualified emergency personnel, and maintains equipment capable of responding to emergencies. A list of resources that the departments use for emergency situations can be requested through the municipal emergency management liaison. Under certain circumstances, if the incident requires additional resources beyond the capability of the City of Flint, the CEO may enact mutual aid. This is a familiar practice within both departments.

IV. Emegency Management Organization

The City of Flint emergency management organization consists of a number of departments responsible for conducting activities in response to emergencies within the community. These departments have been assigned to specific emergency functions for which the municipality has identified necessary in order to provide an effective response to secure the safety of people, property, and the environment. Each agency is responsible for implementing pre-disaster activities to help prevent and/or prepare for various hazards that the community is vulnerable to such as: chronic diseases, flooding, hazardous material spills, inclement weather, tornadoes, and public disturbance to name a few; a more profound list can be found in the County's Hazard Mitigation Plan/Analysis. Prevention and preparedness activities include: awareness training, exercising, hygienic practices to prevent spreading of infectious diseases, stockpiling equipment, and educating people on how to care for themselves during an emergency.

The CEO serves as the incident manager for municipal coordination. At his/her side includes the Finance Director and the Emergency Management Liaison (EML). The EML's duties include planning, operations, and logistics.

The table lists the functions, assigned agencies, primary point of contact of municipal EOC representatives.

Function	Agency	Primary Contact
Direction and Control	City Hall	Dr. Karen Weaver, Mayor
	City Hall	City Administrator Natasha L. Henderson
Fire Services	Fire Department	Fire Chief David Cox Jr.

CITY OF FLINT, MICHIGAN
GENERAL EMERGENCY MANAGEMENT GUIDELINES

The following guidelines are general to the municipality, all agencies, and individuals who have a role in responding to an emergency within the community and coordinated by the City of Flint. Being that emergency planning is a work in progress guidelines are continuously reviewed and modified due to the situation and complexity of incidents.

a) Report to the local emergency operations center when activated for scheduled exercises or disasters, or delegate another individual to staff the EOC and implement the plan.

b) Implement mutual aid agreements or contracts with other organizations to supplement local resources that have been exhausted.

c) Ensure compliance with this plan and the County Emergency Plan, and any pertinent procedures and documents issued, which impact the provision of emergency services in the municipality.

d) Train department emergency personnel in emergency management functions and NIMS/ICS concepts.

e) Assists in the development, review and maintenance of the plan and of the County EOP.

f) Develop and maintain standard operating procedures for specific functions or actions identified in the plan.

g) Maintain a list of resources available by the departments/agencies.

h) Protect records and other resources deemed essential for continuing government functions and each agency's emergency operations in accordance to procedures and policies.

i) Establish mutual aid agreements and/or contracts with other jurisdictions/entities to supplement municipal resources.

j) Establish a system of coordination, such as the incident command system, within the EOC. Field operations, however, are required to use the incident command system.

k) Participate in the review and update of this emergency operations plan, in accordance to a schedule identified by the municipal emergency management liaison and the county emergency management coordinator.

l) Adapt and provide printed emergency management materials and verbal messages to those who are vision impaired, non-English speaking, or deaf/hard of hearing.

m) Conduct pre-disaster public awareness activities including education classes, self-care guidelines, communications plans, and protocols.

n) Make recommendations to the CEO regarding protective actions.

o) Record and log significant events throughout the duration of the emergency, as well as the decisions made by the incident commander and municipal CEO.

p) Continuously conduct emergency planning activities as it is a work-in-progress, periodically being reviewed and updated.

q) Understand your department's collective bargaining agreement as it pertains to emergencies (e.g. employee callbacks, pay rate changes.

CITY OF FLINT

EMERGENCY RESPONSE PROCEDURES

The following are procedures that the City of Flint conducts and coordinates with the county in response to a local state of emergency.

a) Information about a potential emergency should be directed to the Emergency Management Liaison (EML).

b) Assure that the municipal emergency response agencies, elected officials, and the county emergency management coordinator are notified of the situation.

c) Municipal agencies assess the nature and scope of the emergency or disaster.

d) If the situation can be handled locally, do so, using the following sequenced guidelines.

   a. The EML advises the CEO and coordinates all emergency response actions.

   b. The CEO declares a local state of emergency and notifies the county emergency management coordinator of this action.

   c. A local state of emergency declaration is forwarded to the county office.

   d. The emergency management liaison activates the emergency operations center (EOC). The EOC is located within Flint Fire Station #1 located at 310 E. Fifth St. If this location is unavailable an alternate locations is at the Genesee County Sheriff's Department.

   e. The EOC shall establish an incident tracking system such as the FBI's *Virtual Command Center.*

   f. Emergency Operations Center representatives are notified, through Genesee County 911, by the municipal Emergency Management Liaison to report to the EOC.

   g. The EML directs departments/agencies to respond to the emergency situation in accordance to each agency's functional guidelines indicated in the attachments to this plan. These departments/agencies shall report out their progress to the EOC on the hour.

   h. The CEO issues directives as to travel restrictions on local roads and recommends protective actions from the commanding agency. Protective action recommendations will be based on weather forecasting and if the incident complexity increases due to inability to respond rapidly and with a "ready" supply of resources to mitigate the incident.

   i. Notify the public officials, as well as the public, of the situation, through the Public Information Official, and take appropriate actions.

   j. Keep the county emergency management coordinator informed of the situation and actions taken.

e) If municipal resources become exhausted or if special resources are needed, request county assistance through the county emergency management coordinator.

f) If assistance is requested, the county emergency management coordinator assesses the situation and makes recommendations on the type/level of assistance. The County will also take the following steps:

1. Activate the County Emergency Operations Center
2. Activate the County Emergency Operations Plan/Emergency Action Guidelines
3. Respond with county resources as requested
4. Activate mutual aid agreements
5. Coordinate county resources with municipal resources
6. Notify Michigan State Police/ Emergency Management and Homeland Security (MSP/EMHSD) District Coordinator.
7. Develop a jurisdiction situation report and a damage and injury assessment report via and submit to the MSP/EMHSD.
8. Assist the municipality with prioritizing and allocating resources.

g) If county resources are exhausted, the county makes a request to the Governor to declare a state of emergency or state of disaster in accordance with procedures set forth in PA 390, as amended. The county shall not request state assistance or a declaration of a state of disaster or a state of emergency unless requested to do so by the CEO of City of Flint if the situation occurs solely within the confines of the municipality.

h) If state assistance is requested, the MSP/EMHSD District Coordinator, in conjunction with the county emergency management coordinator and municipal emergency management liaison, assess the disaster or emergency situation and recommends the necessary resources that are required for its prevention, mitigation, or relief efforts.

i) After completing the assessment the MSP/EMHSD District Coordinator immediately notifies the State Director of Emergency Management and Homeland Security of the situation.

j) The State Director of Emergency Management and Homeland Security notifies the Governor and makes recommendations.

k) If state assistance is granted, procedures are followed in accordance to the Michigan Emergency Management Plan and the County Emergency Operations Plan.

ADDENDA

CITY OF FLINT

EMERGENCY ACTION GUIDELINES

The following attachments provide guidelines for each function that has been assigned to the agencies in response to an emergency or disaster situation.

Attachment A: Direction and Control
Attachment B: Fire Services
Attachment C: Law Enforcement

APPENDIX 1:

FIRE SERVICES

HAZMAT RESPONSE GUIDELINES

The Fire Department is responsible for the response to hazardous materials spills. However, through a Memorandum of Understanding, the Genesee County Hazmat Team, will respond and assume a supportive role. In the event Genesee County's team is unavailable, a mutual aid request can be made of Oakland County's Hazmat Team or Region 3 Regional Response Team Network. Private companies are an option as well. Until a Hazmat team responds, the Fire Department's response will be acted in accordance to the following procedures.

a) Assume incident command upon arrival at the scene.

b) Establish scene security or coordinate with other available agencies to establish scene security.

c) Monitor and evaluate environmental health risks or hazards from hazardous materials releases.

d) Inspect possible sources of contamination.

e) Provide technical assistance and liaison with other appropriate agencies or organizations for the remediation of hazardous waste releases and other contamination sources.

f) Disseminate information to the Emergency Operations Center Public Information Officer on hazardous material releases issues.

g) Makes protective action recommendations based on severity and complexity of incident type.

h) Ensure PPE is fit tested to responders.

i) Prior to proceding with cleanup, analyze and evaluate the contamination and safety factors of the spill by a certified Safety Officer/technician.

j) Decontaminate equipment and gear.

Chief of Fire, David Cox Jr., has reviewed and approves the assigned guidelines. These will be maintained in accordance to the most current standards of the county's emergency plan.

Signature 9-23-14 Date

ATTACHMENT C

Flint/Genesee County Emergency Management Program

An amended resolution resolving that the appropriate City Officials do all things necessary to adopt the City of Flint's Support Emergency Operations Plan, a support plan to the Genesee County Emergency Management Program Action Guidelines developed to identify the responsibilities between the City of Flint and Genesee County in regards to pre-disaster emergency management activities, as requested by the Fire Department. [NOTE: Resolution attachment (City of Flint, Michigan Support Emergency Operations Plan - September 24, 2014) amended to add City Council President (Kerry Nelson) as a part of the Public Information Function under Basic Information Section IV, Emergency Management Organization.]

SEPARATED FROM MASTER RESOLUTION

SEPARATED FROM MASTER RESOLUTION

150958 Office Depot/Office Supplies/Additional Spending Amount

Resolution resolving that the Finance Department is authorized to issue purchase orders to Office Depot for office supplies, as requested by Development, in an amount NOT-TO-EXCEED $4,000.00, for an aggregate spend amount of $103,925.00, AND, resolving that the Finance Department has the discretion for the remainder of FY2016 to spend an additional amount of not more than 5% of the aforementioned aggregate spend amount to Office Depot for unanticipated requests that may be submitted. [City Administrator Submission No. CA1242015]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

150961 Budget Amendment/Police Department/FY15 National Sexual Assault Kit Initiative [SAKI]/U.S. Department of Justice Grant

Resolution resolving that the appropriate City Officials are authorized to do all things necessary to appropriate revenue and expenditure amounts in Fund-Dept No. 296-301.732, under Grant Code FDOJ-15-SAKI, in compliance with U.S. Department of Justice Grant Award No. 2015-AK-BX-K016, in the amount of $1,166,409.00, as requested by the Police Department to address the issue of unsubmitted sexual assault kits. [City Administrator Submission No. CA1262015]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

150962 Budget Amendment/Police Department/DANY Sexual Assault Kit Backlog Elimination Program/District Attorney's Office of New York [DANY]

Resolution resolving that the appropriate City Officials are authorized to do all things necessary to appropriate revenue and expenditure amounts in Fund-Dept No. 296-301.733, under Grant Code ODANY-15-SAK, in compliance with New York County District Attorney's Office Sexual Assault Kit Backlog Elimination Grant Program guidelines, in the amount of $163,590.00, as requested by the Police Department to address the issue of unsubmitted sexual assualt kits. [City Administrator Submission No. CA1272015]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

150963 Budget Amendment/Planning & Development/Professional Services in City of Flint Parks/Ruth Mott Foundation

Resolution resolving that the appropriate City Officials are authorized to process a budget amendment recognizing grant revenue and corresponding appropriation of funds under Grant Code LRM-16-PKMOW [in the amount of $68,400.00], as requested by Planning & Development for the mowing and maintenance of City parks between November 2015 and October 2016. [City Administrator Submission No. CA1282015]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

150964 Budget Amendment/5th Division/Consolidation of 67th and 68th District Courts

Resolution resolving that the amended 5th Division budget amendment for the consolidation of the Sixty-Seventh [67th] and Sixty-Eighth [68th] District Courts, as approved by the Genesee County Board of Commissioners, is hereby authorized as requested by the Finance Department. [City Administrator Submission No. CA1302015]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

No: 1 - Councilperson Mays

Absent: 1 - Councilperson Davis

150965.1 Amended Resolution/Support Emergency Operations Plan [SEOP]/City of Flint/Genesee County Emergency Management Program

An amended resolution resolving that the appropriate City Officials do all things necessary to adopt the City of Flint's Support Emergency Operations Plan, a support plan to the Genesee County Emergency Management Program Action Guidelines developed to identify the responsibilities between the City of Flint and Genesee County in regards to pre-disaster emergency management activities, as requested by the Fire Department. [NOTE: Resolution attachment (City of Flint, Michigan Support Emergency Operations Plan - September 24, 2014) amended to add City Council President (Kerry Nelson) as a part of the Public Information Function under Basic Information Section IV, Emergency Management Organization.]

A motion was made by Councilperson Mays, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

RE: Budget to Actual Revenue and Expenditure Report

Please find attached the Budget to Actual Revenue and Expenditure Report and Cash and Investment Summary for the period ending November 30, 2015 for your review and submission to the RTAB per Emergency Manager Order 20.

The City's Fiscal Year 2014-2015 audit has been completed. As required by Public Act 2: Uniform Budget and Accounting Act and City Ordinance #3855, audited financial statements for the fiscal year ending June 30, 2015 will be filed with the state and provided to Council no later than December 31, 2015. The column "YTD Balance 06/30/2015" reflects audited activity and ending fund balances. Fiscal Year 2015-16 Amended Budget amounts reflect all amendments adopted by City Council and confirmed by the RTAB as of December 9, 2015.

Please let me know if any additional information is necessary or if you have any questions.

Good afternoon,

Please find attached the remainder of the materials for the January 13th RTAB meeting. Because of the size, they are being sent in two emails. Also, the next meeting of the Flint City Council is scheduled for Wednesday, December 30, 2015 at 5:30 pm. I will send those materials after the meeting tomorrow.

Thank you.

V.	Adjournment	50

Flint, Michigan
Wednesday, December 9, 2015
2:02 p.m.

THE CHAIRPERSON: The meeting will please be in order. The time is 2:03.

First item of business roll call, please. Let the record reflect that all four members of the RTAB are present.

Item B, the Approval of the Agenda. I wish to note two amendments to the Agenda:

One is under New Business, Item C 1, Resolutions of the City Council meeting of October 12th, 2015, Resolutions 872 and 875 were already approved by the RTAB at its October meeting, so please remove those two resolutions.

And then, secondly, with regards to -- still under New Business, Resolutions from the Regular City Council meeting of November 9th, there are four resolutions listed there. But, upon further review, there were no actions taken by the City Council at that meeting that requires any approval by the RTAB so we'll strike Item Number 3 in its entirety.

Are there other additions or changes to the agenda, for this afternoon's meeting?

If not, is there a motion that the motion --

that the agenda, as amended, be approved?

MR. McMAHAN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: Without objection, the amended agenda is approved.

Item C, the approval of the October 14, 2015 RTAB meeting minutes. There's Attachment 1. Are there any corrections or additions to those minutes?

If not, is there a motion that the minutes of October 14 be approved at written?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Without objection, minutes of October 14 are approved.

Item 2, Unfinished Business, there is none.

Item 3, New Business, we have a standing agenda item for the Mayor and City Council President. We wish to welcome the new mayor who's here with us this afternoon.

Madam Mayor, we're glad to have you here. If you have any comments you'd like to make to this Board, please feel free. We're not going to hold you to the regular two minutes under Public Comment.

MAYOR WEAVER: Well, thank you. And I am

glad to be here. And I'm glad to have had the opportunity to now have met everybody on the RTAB. Some of you I knew and now I've met everybody so I just wanted to say I'm glad that that's happened now.

What I did was to go through the last set of minutes to see what had been reported out on so I did want to give an update about the last report. And, if you look at that, it was, of course, talking about water.

So I do want to let you know that water is still our top priority here in the City of Flint. And, while we have made the move to go back to Detroit water, we still have issues with lead exposure. And so one of the things we have to be mindful of is that the community is still taking the necessary precautions, we don't want them to get comfortable and relaxed and think, okay, we've made this switch and everything is okay. So we want to keep that up in people's mind.

But I have met with the State and what they have said is that they've agreed to continue to support the filter program. And, in fact, when we had our Town Hall meeting last night, we gave some out. And what we're doing differently is we're giving the replacements out along with the filters. But they have agreed to continue to support the filter program, so

we're pleased about that. We've got to continue to monitor the Detroit water and utilize the best technical expertise that we have available.

One of my concerns is that we know that, when the phosphate gets added, what we've been told is that there's going to be a visual impact and, while that's okay, I think it's going to be alarming to the community because they're going to say that, "You can't tell me cloudy water is good."

And so one of the things we know we have to do is we're going to do an increase with our PSAs because we do want to let them know ahead of time what to expect and -- but -- but that's the concern is -- is the trust factor.

So we're trying to work on that trust factor and let people know what's going on. And we've been doing -- I think -- I believe we've been doing a really good job with notifying the public and letting them know what the issues are and what we've been doing and the necessary steps that we've been taking. But I know that's going to raise red flags for them, even though we know that's what's to be expected.

And what I was told was that that would last anywhere from two to four months before we get to that maintenance dose. So we just need to let the public be

aware and we can continue.

And when I spoke with Lynn Meyers and Julie Wells, they're going to continue that lead education program. But, because of everything that's going on, we do know that we still need State and Federal funding to help deal with this problem. So we're going to be working diligently towards that accomplishment. Flint needs help and we know that we don't have the funds necessary to be able to make all of the changes and to provide the supports that are needed.

So that's just my update from the last report that was given. So I did want to have the opportunity to share that with you and let you know what our concerns are and what we're doing.

Thank you.

THE CHAIRPERSON: Okay. Thank you.

MR. McGHEE: Thank you.

THE CHAIRPERSON: Thank you, Madam Mayor.

Council President Nelson?

MR. NELSON: Good afternoon.

THE CHAIRPERSON: Good afternoon.

MR. NELSON: I think most of you know me. But, since we had met last, I've took over the responsibility of -- I've worked with our new

Madam Mayor, the City Administrator, we've come here and we've talked and meet.

And briefly, you know, water is our top priority; the Mayor stressed that from day one in her Town Hall meeting, she stressed it, again, to bring that trust back in this community and I think that's what we want across the board.

I will be at these meetings. I will not take this mic unless there is a difference in opinion. But, other than that, I will be here. I'm at your disposal, if you need us. Council Member VanBuren is here and Council Member Mays is always here. So you do have Council here present at all times.

Thank you.

THE CHAIRPERSON: Thank you.

Item B is the proposed 2016 Meeting Schedule for the RTAB, which we have an Attachment 2. Any questions or comments about that?

MR. McMAHAN: Not at this time.

THE CHAIRPERSON: Is there a -- a motion, then, that the proposed meeting schedule of 2016 for the RTAB be approved?

MS. WALKER-GRIFFEA: So moved.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

Item C, under New Business, we have Resolutions from several City Council meetings to approve. We'll begin with those resolutions from the Regular City Council meeting of October 12, 2015, Resolutions 828.1, 863, 864, 865 and 876. Were there any questions or comments with respect to any of those Resolutions?

MR. McMAHAN: No.

THE CHAIRPERSON: If not, is there a motion that those Resolutions be approved?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MS. WALKER-GRIFFEA: Support.

THE CHAIRPERSON: Those in favor, will you please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

From that particular meeting, we did pull Resolution 866, which was a budget amendment to the

Water and Sewer fund for fiscal year 2016. I thought we would use that as a vehicle to have discussion or at least a status report from either the City Administrator or the Finance Director regarding the Financial condition of those two funds.

MS. LUNDQUIST: Good afternoon. The budget amendment that is before you, the first quarter, recognizes the City's anticipation of adding an increase in the uncollectible accounts that the City anticipates as a result of the Preliminary Injunction Order.

It also includes or it is offset partially by a decrease in the capital improvement projects that were immediately identified to be eliminated with the anticipation of not only the loss of revenue from uncollectible accounts but with the specifics in the Preliminary Injunction Order that required us to reduce our rates. So, at this time, it's over $600,000 per month that the City is not billing as a result of the Preliminary Injunction Order.

Obviously, that has had a significant impact. We tried to anticipate those things with the first quarter budget amendment in carrying out the Preliminary Injunction Order and moving forward with issuing shut-off notices. It was identified that our

initial estimates of uncollectible accounts was most likely low. We're still waiting for final judgment from Judge Hayman on -- on the case.

But while we continue to act in compliance with the Preliminary Injunction Order, the amount that was set aside for us to be able to identify those accounts that had fallen delinquent since we issued bills with the reduced rate structure was -- we had outstanding 11.6 million. So we had identified 8.6 million for the initial first quarter budget amendment but it was, in fact, $11.6 million that we had outstanding as of August 17th.

And especially at September 1st when we reduced the rate structure to move forward with processing shut-off notices, that we anticipated not being able to collect because we cannot enforce collection with the shutoffs, for those.

We have seen a drastic uptick in receipts since our shut-off notices were issued last month and began to be due on December 1st. And if you'll bear with me one second.

For instance, without the ability to enforce payments through issuing and -- issue shut-off notices and then proceeding with those shutoffs, we have seen a drastic decrease in the number of payments we were

receiving per day. At the end of October, we had been down $4 million. I monitor this on a weekly basis so they're actual cash receipts.

So, from the period August 7th, when the Judge said that we could no longer issue shutoffs for delinquent accounts, through the end of October, comparing 2015 to 2014, we collected $4 million less in payments. That averaged at 1. -- at about 135 people less per day paying their bills.

I looked just briefly before this meeting, anticipating there might be a question. So, just for the month of November, we have an average of 335 people paying on their bills per day compared to 439 people the year before.

But, with, then, the public awareness that we had tried to raise when shut-off notices were mailed, we saw an increase just in the first week of December when those shut-off notices then became due, of 681 payments per day. So we did have people that did recognize that they had not been making payments and they came in and they started paying on those shut-off notices.

And that's about on par, exactly what we had the prior year. So I think that reflects greatly the City's need to be able to enforce payments and the fact

that it is an effective tool. So we hope that that trend now continues.

THE CHAIRPERSON: Is -- the $600,000 per month item that you mentioned, is that Water and Sewer combined or is it --

MS. LUNDQUIST: Correct. So the City reduced, per the Preliminary Injunction Order. And I can grab that language if you'd like me to read it specifically.

The Preliminary Injunction Order stated that the City was enjoined from charging and collecting Water and Sewer rates that include the September 16th, 2011, 35 percent rate increase. So the City took this language to mean that we were then required to remove that 2011 rate increase from our current per-unit rates and we did so for both water and sewer.

It was our preliminary charges; that's not that we took our current rates and reduced them by 35 percent, we took the dollar amount of that increase back from 2011 and removed them from our current rates because the City doesn't increase rates, we set rates.

So we don't say, okay, we're going to raise rates 35 percent this year on top of what they were last year, we don't raise them 12 percent the next year based on what they were. We say, No, we had this rate

and now we're setting this new rate. And then, in communicating that change to the public, we refer to it as an increase because people want to know where they're going to be hit in their pocketbooks, they want to know, "What does this rate increase mean to me?"

So -- if that answers your question.

THE CHAIRPERSON: And do you anticipate that the Water and Sewer funds will have sufficient cash to operate through the remainder of the current fiscal year?

MS. LUNDQUIST: We have through the remainder of this current fiscal year.

THE CHAIRPERSON: Do you expect that it will?

MS. LUNDQUIST: Yes.

THE CHAIRPERSON: Okay.

Yes?

MS. WALKER-GRIFFEA: I -- I have two questions for you.

MS. LUNDQUIST: Okay.

MS. WALKER-GRIFFEA: When I looked at this, I was wondering, where is the budget amendment for the reduction to the expenditures?

MS. LUNDQUIST: That -- let me turn to the page.

That's rolled into the appropriations line

item. So, if you'll look to underneath the Sewer fund appropriations, that's where the vast majority of those reductions occurred. Because we do have to keep in mind that it is our top priority to be ready and prepared to accept KWA water when it comes online and there is a significant amount of capital improvements.

So you do not see a drastic reduction in the water fund but in the sewer fund and sewer reductions appropriations of $3.8 million, that's in the second column, under First Quarter, Proposed Amounts, and those are the changes. So it goes from -- the appropriation went from 32 million to 28,5.

MS. WALKER-GRIFFEA: So, then, that is my second question: How did you figure the analyze -- the analyzed budget is that much when you're not taking in that much in that first quarter?

Because, if you did that times three, it would be much lower with what the expectation would be at the end.

MS. LUNDQUIST: I don't understand your question.

MS. WALKER-GRIFFEA: So I thought that you figured out, from the first quarter, what you're predicting it would be at the end, what you will take in, which seems to be a considerable amount depending

on what you took in the first quarter. Because, usually, you would look at that first quarter and then if you're doing a budget amendment, you would kind of base your prediction from that, which was very low, like 2.4 million, I think --

MS. LUNDQUIST: Right.

MS. WALKER-GRIFFEA: -- was the first quarter.

MS. LUNDQUIST: So are you talking about our projected revenue or are you talking about our -- the capital improvements that we eliminated?

MS. WALKER-GRIFFEA: The projected revenue.

MS. LUNDQUIST: I'm sorry, I misunderstood your question.

The projected revenue is shown as a decrease in charges for services on both the Water and Sewer fund, you could see "Charges for Services"; that's the second line item under Revenues for the Sewer fund. If you go over, that's a decrease of 5.9 million there. And then, under "Water fund, Charges for Services", a decrease of 8.6.

MS. WALKER-GRIFFEA: So you think that you're going to get more, eventually, coming in?

MS. LUNDQUIST: No. We hope that we stabilize our collection rate. I mean, at this point,

with the Preliminary Injunction Orders, we will not be able to do anything regarding rates. We can just only hope that we start collecting at a higher level than we have been, once we have the ability to enforce payment through shutoffs but we do not. And the -- I anticipate what I had said was enrolled into the charges for services. So those negative numbers would appear, the negative 5.9 and the negative 8.5. That takes into account two things: It takes into account, one, the fact at that we believe that we will have no ability to collect the outstanding accounts at the time of the Preliminary Injunction Order, and also the reduced revenue that we won't be able to bill.

So the -- at the time, our projection was we had $8.6 million that we will not be able to collect as well as we've had to reduce what we had originally estimated our total billed revenue would be by over $600,000 a month. So these line items include those two items, the uncollectibles as well as the reduced billed rates.

Oh, okay. So the City Administrator just asked me to note that part of the reason we see this, the zeros at the bottom of the Net Revenues in Appropriations is because the budget amendment reflects that, in order to balance the budget, this did call for

drawings from fund balance.

MR. McMAHAN: So you're fully offsetting that decrease in revenues with withdrawals from the fund balance and then decreasing it in Appropriations?

MS. LUNDQUIST: Exactly. So the fund balance is ultimately what is absorbing that loss.

MR. McMAHAN: Okay.

MS. WALKER-GRIFFEA: Okay. That makes sense.

MR. McMAHAN: So if I'm reading this correctly, you have a net reduction in revenue of approximately $14 and a half million of which, approximately, 10 -- 10 million is being offset with withdrawals off the fund balance?

MS. LUNDQUIST: Correct.

MR. McMAHAN: And the remaining four is being offset with decrease in Appropriations?

MS. LUNDQUIST: Exactly.

MR. McMAHAN: What are the implications of this in intermediate and long-term stability of the funds?

MS. LUNDQUIST: Devastating. I mean, it should not be under-estimated, the impact that this Preliminary Injunction Order has had on the City's finances. I mean, the fact of the matter is, when I took this position six months ago, we were on the

course for financial stability, we had a balanced budget. It definitely had its challenges in the coming years as we anticipate revenues either to, you know, have either a zero percent increase or a slight reduction and while expenditures continued to increase.

So we definitely knew that there were challenges ahead but we felt that we were on the path. And now with this Preliminary Injunction Order for the Water and Sewer funds, it has completely handicapped our ability to plan ahead, to be able to be proactive with our repairs and maintenance, to be able to address our lines. Even the meter replacement program, which is crucial to be able to accurately bill our customers, we had to place on hold. That was something I know that the residents were excited about, our City staff was proud of and we had to completely place on hold.

MR. McMAHAN: Is it also true, referring to the Budget and Expenditure Report, that that draw on the Sewer fund represents -- from the Sewer fund represents roughly 10 percent of the available fund balance and then the -- on the Water fund, specifically you have a $7 million draw to the fund balance. So that's essentially the fund balance; is that correct?

MS. LUNDQUIST: Yes. So I don't know if -- I mean, Mr. Headen actually smiled when he asked me, you

know, would we be okay through this fiscal year. And I believe we could get by and on track through this fiscal year perhaps but we very quickly would have to address what would happen when the Water and Sewer funds are out of money.

MR. McMAHAN: Is it fair to say that we are -- we are borrowing from the next fiscal year at some level to the health of next fiscal year to maintain a balanced budget this year?

MS. LUNDQUIST: Well, absolutely. I mean, the entire reason why the City has the financial stability ordinances, why the fast-track is naturally for governments to have fund balance reserve, is so that, when there is an event such as a Preliminary Injunction Order, when there are other events such as public health concerns with lead service lines, that the City has some funds set aside that they can respond to those.

We were fortunate enough to have fund balances in both our Water and Sewer funds at the time the Preliminary Injunction Order was issued in order to absorb this tremendous impact on our revenue and selections. But it has then tied our hands to how we would have otherwise been able to respond to the emergent lead issue, let alone anything else that may

come. So --

MS. WALKER-GRIFFEA: I have a question.

THE CHAIRPERSON: Yes?

MS. WALKER-GRIFFEA: If we don't approve this today, what does that do to anything that you're doing with the budget?

MS. LUNDQUIST: Well, so the budget amendments that are in front of you actually reduce expenditures and anticipate the -- let me back up.

So the General Appropriations Act mandates that the -- or that a municipality must adopt a budget amendment when revenue protections fall short of what had been anticipated when originally adopted. So this is the City's attempt, when an event occurs, to immediately take financial responsibilities and prudent planning to do so. We're still operating within the adopted Appropriations Act of the City. We're still acting within the adopted budget but this simply recognizes the events that have occurred.

MS. WALKER-GRIFFEA: Okay. Thank you.

MS. LUNDQUIST: Are there any other questions?

THE CHAIRPERSON: Any questions?

MR. McMAHAN: I have a lot of questions.

THE CHAIRPERSON: Please.

MS. WALKER-GRIFFEA: And I do, too. And I'm wondering, Mr. Chair, if there would be any way that we will be able to table this until we get more questions answered because I'm not ready to vote.

THE CHAIRPERSON: Sure. Is there a motion for that?

MS. WALKER-GRIFFEA: I move that we table --

MR. McMAHAN: Support. I support.

THE CHAIRPERSON: Motion's been made and seconded.

Assuming no discussion, those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Resolution 866 from the City Council meeting October 1, 2015 has been placed on the table.

Next item would be Item 2, Resolutions from the Regular City Council meeting of October 26. We have the resolutions there noted. Any questions about any of those resolutions at Attachment 4?

MR. McMAHAN: No.

THE CHAIRPERSON: If not, is there a motion that the Resolution listed in the October 26 meeting -- Regular City Council meeting be approved?

MR. McGHEE: So moved.

THE CHAIRPERSON: Support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Motion's been made and seconded.

All those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

Next item, the Resolutions from the Special City Council meeting of November 18, Resolutions were listed at Attachment 6.

Are there any questions regarding those resolutions?

MR. McMAHAN: I don't have any questions.

THE CHAIRPERSON: If not, is there a motion that those resolutions be approved?

MR. McGHEE: So moved.

THE CHAIRPERSON: Is there support?

MR. McGHEE: Support.

THE CHAIRPERSON: A motion's been made and seconded. Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

Resolutions from the Special City Council

meeting November 18th have been approved.

Next item on the agenda would be Item D, City Administrator Items. We have two items: Budget-to-Actual for September, under Attachment 8, and October, Attachment 9.

Ms. Henderson is going to speak now.

MS. HENDERSON: I am not going to let Ms. Lundquist address those report specifics. However, I do think that this amendment that was tabled does go hand-in-hand with this, with our financial reporting, in the sense that I would like to clarify that, in tabling this item, it basically -- we have to come forward with the first quarter with all quarterly amendments and this is inclusive of the City taking all of the capital improvement projects off the table and moving those.

So I just wanted to make that clear, that all capital improvement projects, that's what you see, that's what's been affected when you look at the -- the $8 million and then, also -- let me get to 866 and the 5 -- I think 5.9 and then we also we accounted for not filling any of the vacant positions unless they were definitely needed, that would be a position such as -- a position that requires the certification. So I know it's been tabled but I would like for you all to -- I'm

respectfully asking for you all to -- to look at that so we will be in compliance with what has been set forth, that we bring quarterly amendments to the Council every month and they -- I mean, quarterly. And they have approved this amendment because they understand that -- that we had to take the capital improvement plans off the table.

And so, to just prolong that is to say that, at some point, we are going to realize that money and we will be able to do the capital improvement projects but I would like to account for the fact that we -- that's a loss and that's money that we will not recoup and we will definitely not be able to -- if it were recouped, it wouldn't be in this fiscal year.

So we're coming again with a quarterly amendment very soon. We didn't have a meeting last month and this was, I guess, brought to you -- it would have been in October?

So I just don't want us to get in a habit of, like, delaying these things. So I'm respectfully asking that you all will take that off the table and approve it in the sense that the City Council is showing that they are willing to be fiscally accountable and they have even approved that and recognized the decline in revenue and the fact that we

had to take all of the capital improvements that we had planned and move those back and we're also inserting that into the master plan as well.

And so I think it would be good for the RTAB to recognize that the Council is taking responsibility and accountability and actually looking at the fact that the finances don't support that and they've done that and I would just hate to see that the RTAB did not support that. So I just felt compelled to come --

THE CHAIRPERSON: Are the items of which you speak of such a crucial nature that they cannot wait until our meeting on the 13th of next month?

MS. HENDERSON: Yes, I believe so. And this is why: Because we are going to come forward with another quarterly amendment and we need the quarterly amendment that we've brought forth to you now so that we can do another quarterly amendment. Because we're going to -- going to have to continue to do quarterly amendments and we would like those quarterly amendments done in a timely manner, and that's why I would like for this one to be done because this is a first quarter amendment and then we have to do a second quarter amendment, a third quarter amendment and then we have a fourth quarter amendment.

And, just seeing where we are right now, like

close to the end of the second quarter and we don't have a first quarter amendment approved and the Mayor -- I mean, well, the Council had approved an amendment and they understand that we cannot afford the capital improvements and they have agreed that we will not go forward with those improvements.

And they have actually reflected that being fiscally responsible by reflecting that, okay, we're not -- we're taking the capital improvements off of the table, we're not doing any layoffs at this time but we're being responsible and we're saying we're planning ahead and we see what loss we have -- we've had at this time and we are, like, going to go ahead and amend the budget accordingly.

And so I just think that -- that that helps with the Council, with bringing things forward, that actually supports fiscal sustainability and responsibility and accountability.

MR. McMAHAN: Mr. Chairman?

THE CHAIRPERSON: Certainly.

MR. McMAHAN: I think you misread -- I think you misread -- for one thing, you misread our hesitation here. I mean, what that report actually -- and I won't speak for my colleague. Maybe she may have a different take on this.

But what this report and this budget -- for one thing, this is -- these budget amendments are annualized numbers so I'm -- one question I would have is, these will come back with another amendment. Am I to infer from that that you are going to come back for additional amendments to the Water and Sewer funds so -- with, again, annualized totals?

I mean, when a budget amendment is made, it's made for the year's budget for the annual budget, correct, these are annualized numbers?

MS. HENDERSON: To keep in line that that's why we have an ordinance that stated that we must do quarterly amendments, and that is to support --

MR. McMAHAN: Okay, I understand.

MS. HENDERSON: And that's what we're -- we actually have to abide by that if we see that --

MR. McMAHAN: I understand. I understand.

MS. HENDERSON: Okay.

MR. McMAHAN: The question then becomes, the -- the Finance Director for the City has -- has said that these amendments and their implications on the long-term -- on the budget are -- what was the quote, "devastating"?

MS. HENDERSON: Yeah, "devastating". Any bad word that you can use to say that but it doesn't

change.

MR. McMAHAN: But what this Board -- and that this is her inflection in her answer is, "We're okay, This year was not lost on us." We're -- so we take that to understand we're not okay next year. Because these funds, if this trend continues, these funds do not exist in order to do fund balances, exist to support. So I guess, from my perspective, and --

And you may have a very different take on this.

MS. WALKER-GRIFFEA: Not at all.

MR. McMAHAN: -- is that when bringing forth an amendment like this, I would like to understand a little bit better the -- well, since one of the things that this Board is charged with is oversight and -- of the long-term financial health on the City in the transition process, hopefully, to step out of the process.

But, in the interim, one thing I would like to understand better is, how does this, you know -- where does this put us in June?

What is the thinking and what is the advanced planning that's occurring for next year as we go forward?

Is that -- is that --

MS. WALKER-GRIFFEA: Yes. And I think that was what I was trying to ask the Finance Director initially, when I -- when I did ask, did it need to be -- was there anything that would hinder us to -- to table it for another month and she said there was some losses that were set aside but, in the end, there really wasn't, which is why I shared that I wasn't ready, at this point, to do that.

But the other thing is, it sounds like that there may be other amendments coming for the next year and, as we were talking about that annualized number at the end and how it came up.

So, if you're saying that this is still coming, then I'm then now questioning the number we have right now. Are -- is -- are we assured that this is where it's going to be as it was brought to us earlier or do we think that it's not, which then means I really need to understand what's going on.

MS. HENDERSON: And that is -- and that is exactly what -- I understand what both of you all are saying. However, that is why we quarterly amend the budget; because it's no secret that we have pending litigation. That has everything to do with how things could be just, say, in the third or fourth quarter.

MR. McGHEE: I understand.

MS. HENDERSON: So in the first quarter, this is what was projected and this is -- this was a significant impact. And, to get to where we were now, we had not realized the -- all of the loss that we know we would lose in the sense that, as far as our charging, we knew that we would be charging less. So, therefore, that went into, "Okay, we need to take these capital improvement projects out" and then also, "Oh, we have these positions that are vacant, we don't need to fill these -- these positions."

So this is planning ahead, in the sense that we have already accounted for income that we already know we will not receive.

MR. McMAHAN: We understand.

MS. HENDERSON: So it is -- like I just did want to explain that this is planning out and this is what we're trying to, like, ensure that we continue to do. This is -- this is clearly like planning for until the end of the year and even into the next year.

MR. McMAHAN: Let me change the nature of the question. Let's assume that this budget -- we approve this budget amendment and you bring in no further budget amendments forward to us or you bring them forward and they have zeros in the columns, right, so that this is the status at the end of the year. What

is your thinking going into the next fiscal year; how is this --

I guess, is that a fair way --

MS. WALKER-GRIFFEA: Uh-huh.

MR. McMAHAN: How do you see this -- kind of in the longer term, how do you see this playing out?

Because what we don't want -- I speak only for myself. What we don't want to do is get to June of next year and then have this crisis of understanding what's happening to the structure. We would like some -- some visibility into the -- to the trajectory from here. Because you know this is the reality, we know this is the reality. This is ultimately -- I applaud the Council for having -- for codifying it this way. I don't have any problem and -- with what you are saying. I just --

MS. WALKER-GRIFFEA: Right. But I'd like to jump in. I know, when you listen to the City Council, that, when this came up, I want to say that Councilperson Mays talked about what happened in another meeting and how things were explained to them so that they could come to the agreement of this.

We have not had that opportunity.

MR. McMAHAN: I'm with you on that.

MS. WALKER-GRIFFEA: And so I think that, if

we had the opportunity to ask those questions to understand what's being done, then it may be that we could go ahead and approve this without any issues. But right now we have not.

MS. HENDERSON: I guess -- I mean, from -- from where I stand, it's -- it's clear that we are -- under our judgment, we know that our revenues are decreased and so we know to continue with a budget that -- because this is to say that we're going to continue as though the budget that we have is correct, that's in place, that those are our projections and that's where we're going. That is false. And that's why I believe that we should be supporting the amendment of this budget.

Also, it helps us -- we're in budget training now. We have to -- we're due a two-year budget. But -- and to not accept or realize that, hey, our revenues are significantly dropping; two, those capital improvement projects, we have set those aside.

So, even going into the next year, we don't know if we're going to be able to include any of those projects but it helps us for planning for us to be able to adjust based upon projections when we're doing two-year budgets. And so I guess, myself personally, I can't understand because this is looking well into the

future. We didn't look like -- this is not for just one month, this is for what we see as the rest of the year.

However, we cannot predict what is going to happen with, like right now, we -- we have pending litigation about the rates that we're charging now or whether we can do shutoffs. We cannot control that. However, what we can do is project and we are projecting off of what we definitely know we are charging now, which is less. So we can project that.

And then, also, we can look at, like, how many people are paying this time, this year, and then looking back at last year as to how they were paying. So there are a lot of projections in it. And that's what -- with governmental budgeting, with all of your revenue sources, being property taxes and income taxes, those are your main sources. And even with these enterprise funds, you have to project these are business-type funds. And for us to continue with a budget that says, That seems as though we're going to be exactly like we were when we -- when that budget was put in place, with the two-year budget, I just don't understand how we would go forward with this without having to amend this and then we go into budget planning for the next budget. I just -- and I just

wanted to say that, thinking it doesn't have to happen. But I just felt, as the City Administrator, that I should say something because this did take -- this is not planning for one quarter, this is planning for the rest of this year.

THE CHAIRPERSON: Let me just ask you, are there specific questions that we can reduce to writing and submit those and get answers to those questions?

MS. WALKER-GRIFFEA: That's what I thought we would -- I mean, that's how we did it before.

THE CHAIRPERSON: Why don't -- why don't we do this:

Are you agreeable to passing the Resolution with written conditions, one of which would be receiving adequate responses to any further questions that we submit?

MS. WALKER-GRIFFEA: I could do that.

MR. McGHEE: Yeah.

MR. McMAHAN: Does that satisfy you?

MS. WALKER-GRIFFEA: That would.

MR. McMAHAN: I mean, I'm right there with you. I know exactly --

THE CHAIRPERSON: We are -- we are in a procedural cul-de-sac and we're going to back away out of it.

First, is there a motion to remove from the table, the previous Resolution 866 that was tabled a moment ago?

MS. WALKER-GRIFFEA: I move to remove the motion, the tabled motion.

THE CHAIRPERSON: Is there support?

MR. McGHEE: Support.

THE CHAIRPERSON: Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

That motion is adopted. So the result of that motion is Resolution 866 is now before us again.

And so now, as I understand, we're going to entertain a motion to adopt Resolution 866 with the condition that any RTAB member that wishes to do so can submit written questions to, let's say, the City Administrator or Mr. Cline and receive answers back by, let's say, no later than our January 13, 2016 meeting.

Have I adequately stated just what we're looking for?

MS. WALKER-GRIFFEA: Before the January 13th meeting, so we can already have it reviewed.

THE CHAIRPERSON: Okay.

MS. WALKER-GRIFFEA: So I'd say a week

before, if that's fine.

THE CHAIRPERSON: Okay. So roughly by January 6th?

MS. WALKER-GRIFFEA: Uh-huh.

THE CHAIRPERSON: So that would be the motion. Is there a support for that motion?

MR. McGHEE: I'll support.

THE CHAIRPERSON: Any discussion?

If there's no discussion upon the motion, those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

MS. HENDERSON: If I may, sir.

THE CHAIRPERSON: Yes?

MS. HENDERSON: I thank you for offering that consideration, I really do appreciate that consideration. And we will have those to you before the end of December because we have all the information that accompanies this so we will get that to you.

And thanks again.

THE CHAIRPERSON: Please.

MS. LUNDQUIST: I just would like to reiterate her thanks. It helps us procedurally as we do prepare for the second quarter budget amendment

that's proposed in January. So it helps us with our timeline to be able to anticipate and really gauge, you know, where we are and where we're going.

And then I would also like to note that we had an internal staff training for our Directors. It was put on by Dr. Eric Scorsone on Monday afternoon and then Council graciously attended and the hope-found beneficial, my training that -- even so, that was just that past Monday, December 7th, as we prepare to go into our first budget cycle now that the City Council and Mayor are charged with developing a budget.

So that's an exciting time that we're looking forward to and happy to provide you with a timeline that is out laid for the 2016 -- for 2016 for the development of our fiscal year '17/'18 budgets with a three-year projection, that that, as I said, is a process that is now just starting and we kicked it off with training by Dr. Scorsone.

THE CHAIRPERSON: Okay. While we have you here, I think I do have two questions with regard to the budget to actual. We can look at the one for October -- or excuse me -- under the October memo for September, as an example, I wasn't sure that I understood the columns.

And I'm looking roughly at the -- under

revenues of the general fund, the last four columns that are the amended 2015/'16 budget. Now take, for example, income tax as an example, where the amended budget has roughly $13.5 million and then the next column over to the right, Year-to-Date Balance, 2.3 million. Is that the amount that has been collected so far --

MS. LUNDQUIST: Correct.

THE CHAIRPERSON: The amount that's budgeted?

MS. LUNDQUIST: Yes.

THE CHAIRPERSON: And then the next column to the right is available balance, which I really take to mean is the amount that's been budgeted hasn't been collected.

MS. LUNDQUIST: Correct.

THE CHAIRPERSON: Because I assume, with regards to the income tax, the bulk would come in between now and next April 30. So is it -- it's really not the available balance. In other words, it hasn't all been collected and that's the amount that could be spent, it's really the uncollected part of what hasn't -- of what's been budgeted?

MS. LUNDQUIST: Correct. But there aren't -- so, just as a matter of formatting, there isn't a separate column heading when it switches from revenues

to expenditures so available balance is simply showing the amount either not collected or unexpended.

THE CHAIRPERSON: Okay. Okay. Thank you. And then the other item has to do with revenues and expenditures. As I compare fiscal years '15 to '16, the amended budgets, the amount of revenue looks as if it was -- has declined about 6 million -- $6 and a half million, from 57.8 million to 51.3 million. But on the expenditure side, the expenditures year-to-year are projected to go up about 3 million -- 48.3 million to 51.3 million. And I'm wondering what the impact of that is to have a year-to-year projection of your General fund expenditures going up at the same time that the revenues are -- are going down.

MS. LUNDQUIST: Right. So, as I had alluded to earlier, the general reality not only for the City of Flint but for municipalities across the country are that revenues are remaining rather stagnant but expenditures are continuing to increase as we continue to have energy costs, as we continue to have said increases with our union contracts, et cetera.

The large difference that you see that's noted between fiscal year '14/'15 and fiscal year '15/'16 is that we do not anticipate State Treasury to authorize another emergency loan. So there was a

$7 million emergency loan last fiscal year, that's the last line under revenues that we did not budget for it again in fiscal years '15/'16.

So, taking that out of our revenues, you will see that we were rather conservative with our estimates with very little to no increase in our revenue line items but we do take into account those increase for expenditures.

THE CHAIRPERSON: And then I gather from your point that, on the expenditure side, most of these increases are, in one way or another, baked in with your collective bargaining agreements and so forth that you have no control over; is that the point?

MS. LUNDQUIST: Correct. Or our annual payments for our pension systems. So those are known things for which the City does not have control but it's obligated to pay. Or even our emergency loan payments that we did not have last year but we did have to budget for in this current fiscal year.

THE CHAIRPERSON: Okay. Thank you.

Any other questions regarding the items of Budget-to-Actual Reports?

Without objection, then the September and October Budget-to-Actual Reports will be received.

Item 4, Public Comment.

Mr. Cline, anyone that has signed up for Public Comment?

MR. CLINE: Yes, we do have two individuals that signed up for Public Comment. But, before I get to that, just a moment of -- I received a question from the audience and I just wanted to double check because, perhaps, I missed it. And, if I did, I apologize. But did the Board address the resolutions from the November 23rd meeting?

THE CHAIRPERSON: November --

MR. MAYS: That would be Item Number 5 under New Business on the second page of the agenda.

It would be Resolutions 929, 932, 936 and 937.

THE CHAIRPERSON: It appears we did not.

MS. WALKER-GRIFFEA: Yeah, I think Natasha got up and we changed over.

MR. McMAHAN: I thought -- Mr. Chairman, I thought that we had removed those at the beginning.

THE CHAIRPERSON: We had removed Item 3 which would have been --

MR. McMAHAN: Oh, okay. My fault.

THE CHAIRPERSON: But not November 23rd.

Under Attachment 7, Resolutions 929, 932, 936 and 937, any questions regarding those resolutions?

If not, is there a motion that those resolutions from November 23rd be approved?

MR. McGHEE: So move.

THE CHAIRPERSON: Is there support?

MR. McMAHAN: Support.

THE CHAIRPERSON: Motion's been made and seconded. All those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion's adopted.

Now Public Comment.

MR. CLINE: All right. I'm glad I asked. So, all right, we had two individuals that signed up for Public Comment. So I'll just announce them now.

First one will be R.L. Mitchell and then followed by Eric Mays.

THE CHAIRPERSON: Please bear in mind the previously adopted motion of two minutes per individual remains in effect.

Mr. Mitchell, good afternoon.

MR. MITCHELL: Yeah. All I want to say is Merry Christmas and happy New Year and I hope you consider Ms. Henderson's -- and don't table the situation that Ms. Henderson the Financial Management offer you for 2016. Work with her in the new year to

come, as a citizen of Flint.

THE CHAIRPERSON: Thank you.

Councilman Mays?

MR. MAYS: All right. Good afternoon. You know I kind of got excited and, you know, I got a couple notes, so in two minutes I'm going to be flying. Reprimand me to sit down, whatever. But I kind of got excited when I seen you all table that because those are the type of questions that I asked in the Council meetings. If I looked at the expenditures that related to the emergency, I told them, when you bring me a budget amendment to spend 2 million for Detroit water, I want to know if I'm spending 10 or 12 million and then I'm waiting on the State or my foundation to reimburse me or make it plant.

My colleagues, just as you guys did -- I'm going to kind of chastise you a little bit -- they counseled the Finance Committee meeting this past month. And I didn't see the reasons. I know where they was at and what they was doing. I take my job very seriously. I didn't like for you all to counsel the November meeting. If the RTAB is going to be involved in our business, then the RTAB need to have some joint sessions with Council.

They take you all way more seriously than

they take me. I'll try to find out what's happening as it relates to details but, remember, I told you, when they say "the Council", we vote differently. I don't always vote with the majority of the five because I'm like you, if I don't know the details, I'm not ready to rubber stamp it.

So you was on the right track but don't get laxed. If you don't take this responsibility to steer the ship, I don't want to look down the road six months, a year from now and then everybody done fumbled the ball. We got revenues generating opportunities. I told them we could have taken a million out the Water and Sewer fund, distributed bottled water and generate revenue because you're selling bad water now, you can distribute good water and get another million or two.

So I want you all to continue to take it seriously. I got excited, I said, "They're going to table" and then guess what? You did just like some of my colleagues. So we'll see if you get your written answers. I'm sure you will. But I want to see you really get into this finance, just as I'm trying to do. You all seem to have a little more power. You know, I don't believe in RTABs. So let's see what you do.

God bless you.

THE CHAIRPERSON: Thank you, Councilman. I

would just --

MR. MAYS: And that's under the two-minute rule. All of that need to go away.

THE CHAIRPERSON: I appreciate that.

MR. MAYS: Maybe one day we'll really talk.

THE CHAIRPERSON: I just want to correct one thing, which is it's not our responsibility to steer the ship. We're not a legislative body. We're not City Council. That responsibility for day-to-day operations and decision-making for the City rests where it should, with the Mayor, City Council and the City Administrator.

We may be along for the ride, to use your ship analogy, but we don't have responsibility for steering the ship, we basically react to actions that are brought to us by the City Administrator or by the Council.

You won't see us initiating management policy because it's not our responsibility. Contrary to what you may think, our responsibility is really quite limited. Our job is to assist you as Council members, the Mayor and the City Administrator.

But you're not typically going to see us micromanaging and trying to substitute our judgment with your judgment. But we do have certain

responsibilities and, as you witnessed this afternoon, we have to get order to charge those responsibilities, to exercise due diligence of our own. But the primary responsibility for steering the ship resides with the elected officials and with the City Administrator.

At least that's my point of view. But other of my colleagues may have a different point of view and they're welcome to express that.

MR. McMAHAN: No, I absolutely am in concurrence. You know, it's distressing for me to see often in the media and other -- other forms an expression of the RTAB as a legislative body. We are not a legislative body. We do not initiate policy. We do not initiate, we react to. And we have oversight function, as I -- as I understand our responsibility, it's not legislative.

MS. WALKER-GRIFFEA: And I'd just like to say, I think that we are a support and we're here support what the Mayor and what the City Manager's trying to accomplish. And so, for me, when I saw what happened, is that we need -- or at least I'm going to speak for me.

I need more information so that I can be a better support system to move the process on and I guess more timely information as well so I can digest

it and understand what's being brought forward. So I'm running with you, Mr. Chair, that we will be here to ride.

THE CHAIRPERSON: I guess that's probably the four of us are probably more interested in seeing our jobs made irrelevant than anyone in the City of Flint.

MS. WALKER-GRIFFEA: Exactly.

MR. McMAHAN: But that, having taken on that job, we take it, that oversight obligation, seriously. And, to you, we'd like to have that information so that we can discharge our responsibilities as partners and as collaborators --

MS. WALKER-GRIFFEA: Exactly.

MR. McMAHAN: -- appropriately.

MS. WALKER-GRIFFEA: Exactly.

MR. McGHEE: Yeah. And essentially, as a matter of due diligence, if we have some of that information here, it's to that point to make sure that we offer the proper diligence. And even though we don't initiate policy and are responsible for the delegation of resources, it is our charge as well because due diligence in how we conduct our -- just thinking back, since we were initiated, I truly believe that most things that the Council and the Mayor and our City Administrator agreed upon, we never had a problem

with.

I know we tabled an open decision but it wasn't because there was a disagreement I had but it was just to -- actually, to create the space for Counsel to have conversations with the -- the body requesting those. Because they didn't take that opportunity in first.

So our goal is definitely not to operate in a braided way but, more so, in a lended way until we --

THE CHAIRPERSON: I do want to acknowledge Mr. Larkin who's in the audience who's occupying a chair at this meeting. I want to thank him for his service on the RTAB over these many months and wish him the best in his new position with the City.

MR. LARKIN: Thank you.

MR. MAYS: How did you recognize him with a haircut?

THE CHAIRPERSON: Yes.

MR. McGHEE: Just lastly, I would just like to, once again, welcome in our new mayor.

MAYOR WEAVER: Thank you.

THE CHAIRPERSON: Is there any further business before this Board?

If not, is there a motion that we adjourn?

MR. McMAHAN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: Without objection, we are adjourning.

(Meeting was concluded at 3:08 p.m.)

There is no limit such as "not to exceed" indicated in the Proposal. They talk about a lump sum for longer term services through 2016. I cannot determine how many hours are necessary, it depends on the extent of the problems and how difficult they are to resolve.

Sent: Monday, February 02, 2015 1:34 PM
To: Agen, Jarrod (GOV); Stanton, Terry A. (Treasury); Wurfel, Sara (GOV); Wurfel, Brad (DEQ); Biehl, Laura (GOV); Hollins, Harvey (GOV); Clayton, Stacie (GOV); Walsh, John (GOV); Brownfield, Michael (GOV); Allard, Claire (GOV); Rexford, Tori (GOV)
Subject: Flint event on Tuesday
Attachments: 2 FDCVT Grant Awards draft.docx; Briefing Flint grant announcement.docx; RELEASE Flint water grants.docx

Good afternoon team,

Just wanted to touch base on Tuesday's event in Flint. Unless told otherwise, I'm continuing to prepare for the event.

I touched base with Harvey and Stacie, who recommended we proceed. Harvey is approaching some stakeholders about appearing at the event, and will forward those names to me later today.

I left a message with Dick Posthumus to see if he has any concerns about proceeding.

The Senate Democrats said Sen. Ananich will want to appear. Katie Carey from the House said she would forward information to Rep. Neeley and Phelps. I have not heard back from her yet.

I've attached the backgrounder and the draft releases from Governor's Communications and Treasury. I've sent a message to the mayor's office about a quote, but have not heard back yet.

Brad and I spoke about Director Wyant's role and potential comments. He will point out that there are things the state can do to help monitor the situation, but also will note that the city's water infrastructure is aging, which contributes to the problems.

We need some direction on an advisory. Should this be listed on a typical advisory from the governor's office, or come from Treasury? Do we even issue an advisory in favor of just contacting media directly in the morning?

Please give the draft releases a read for potential changes, or let me know of other concerns.

Thank you!

Dave

Dave Murray, Governor
(517) 335-6397

Gov. Rick Snyder announces grants helping distressed municipalities with water, public safety, appraisal issues

$8 million awarded for projects to improve services, quality of life

Gov. Rick Snyder today awarded $8 million to eleven municipalities to fund various improvement projects, including water system and street lighting enhancements and technology upgrades through the Financially Distressed Cities, Villages, and Townships Grant Program.

Municipalities are eligible for the grants if they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.

"Municipalities receiving this special funding are some of the areas hardest hit by the Great Recession," Snyder said. "I am pleased we can offer funding assistance to help these local governments improve various public services their taxpayers and residents expect and deserve."

Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability. There was $8 million appropriated for the program with a $2 million cap, per local unit.

The following communities will receive funding this year, with projects and amounts noted (alphabetical order):

Local Unit	Project Description	Amount
City of Benton Harbor	Complete a property reappraisal to provide updated and accurate assessing records. Additionally, community enhancement through blight management and sidewalk replacement.	$475,000
City of Benton Harbor	Water system enhancement through water main replacements and fire hydrant repairs.	$434,960
City of Ecorse	Public safety enhancement through improved street lighting.	$350,000
City of Flint	Water system enhancement through improved waste management.	$1,100,000

City of Flint	Water system enhancement through leak detection and pipe assessments.	$900,000
City of Hamtramck	Complete a property reappraisal to provide updated and accurate assessing records.	$167,860
City of Hamtramck	Upgrade City Hall security.	$50,000
City of Hamtramck	Public safety enhancement through improved street lighting.	$404,600
City of Highland Park	Water system enhancement through meter replacement, leak detection, and system repairs.	$2,000,000
City of Inkster	Complete a property reappraisal to provide updated and accurate assessing records.	$73,460
City of Inkster	Water system enhancement through fire hydrant repairs.	$150,000
City of Inkster	Provide a backup power source for public safety.	$30,000
City of Inkster	Public safety enhancement through the creation of a multi-jurisdictional narcotic team.	$240,000
City of Inkster	Public safety enhancement through police officer training.	$41,970
City of Inkster	Public safety enhancement through the deployment of an additional police officer.	$320,000
City of Lincoln Park	Public safety enhancement through updated technology.	$143,490
City of Melvindale	Public safety enhancement through fleet replacement of police vehicles and updated technology.	$88,000
City of Pontiac	Community enhancement through blight management.	$125,000
City of River Rouge	Public safety enhancement through improved street lighting. Additionally, infrastructure replacements to City Hall.	$591,508
Royal Oak Township	Public safety enhancement through improved street lighting	$86,559
Royal Oak Township	Public safety enhancement of police services.	$217,593

All appropriated funding has been spent. No future rounds will occur in FY 2015.

####

Briefing: Grant announcement in Flint

Tuesday, Feb. 3, 2015, 3-4 p.m.
Haskell Community Center, 2201 Forest Hills Ave. Flint
Governor's communications: Dave Murray, murrayd1@michgian.gov, 517[redacted]
DEQ communications: Brad Wurfel, wurfelb@michigan.gov[redacted]
Treasury communications: Terry Stanton, stantont@michigan.gov[redacted]

Purpose

The state government is providing support for the Flint government as it addresses issues with its water system. The state on Tuesday is announcing that Flint is receiving two grants totaling $2 million related to water system improvements through the Financially Distressed Cities, Villages and Townships grant program. DEQ Director Dan Wyant will address ongoing efforts with his agency to test Flint water and explain why the city is facing some of its problems. Senate Minority Leader Jim Ananich, D-Flint, will discuss his appreciation for the ongoing support for the city and its residents.

Attending

- Harvey Hollins, director of the Michigan Office of Urban Initiatives
- Dan Wyant, director of the Michigan Department of Environmental Quality
- Wayne Workman, deputy treasurer, Michigan Department of Treasury
- Jerry Ambrose, Flint emergency manager
- Dayne Walling, Flint mayor
- State Sen. Jim Ananich
- State Rep. Sheldon Neeley
- State Rep. Phil Phelps

Agenda

3:00 PM – 3:05 PM:	Harvey Hollins announces that Flint has received two grants totaling $2 million.
3:05 PM – 3:10 PM:	Dan Wyant discusses the state's ongoing role in monitoring Flint's water and any assistance that has been provided and will continue to be provided.
3:10 PM – 3:15 PM:	Mayor Dayne Walling remarks about appreciation for state assistance.
3:15 PM – 3:20 PM:	Sen. Jim Ananich remarks about appreciation for state assistance.
3:20 PM – 3:25 PM:	Rep. Neeley remarks.
3:25 PM – 3:35 PM:	Harvey Hollins closing remarks, opens floor to media questions.
3:35 PM	Event ends, though this might be optimistic.

Background

- The quality of Flint water has been a high-profile concern in recent weeks, with residents complaining about the color, taste and smell of tap water since a switch to Flint River water as a temporary source as a pipeline is built to Lake Huron as a water source starting in 2016.
    - Residents have attended meetings with jugs of brownish water.
    - U.S. Kildee has worked with labor and community groups to distribute bottled water.

- Mayor Walling has issued a letter (included below) calling for state and federal assistance for the city, including forgiveness of some $20 million in debt through the Drinking Water Revolving Loan Fund and calling for the governor to come to Flint personally.
    - Walling also submitted a guest column to the Flint Journal with similar requests.
        - He said the loan forgiveness is needed for the city to upgrade its water treatment process.
    - Governor and Mayor Walling had a telephone conversation on Friday, and the mayor has pledged to work together on solutions.

- Rep. Sheldon Neeley also has sent the governor a letter, saying that his constituents "are on the verge of civil unrest."

- The Department of Environmental Quality has been monitoring the water situation, with a detailed backgrounder and talking points attached below.

- The Treasury Department is announcing Tuesday that Flint is among the cities receiving a combined $8 million the Financially Distressed Cities, Villages and Townships grant program.
    - The announcement of the other grants will follow the Flint announcement.
        - The Flint grants are $1.1 million to allow the city to replace the functions of the old incinerator with new water pollution control facility allowing for the disposal of waste to landfills.
        - The other is $900,000 to allow the city to hire a contractor to perform a leak detection survey, which will lead to prioritizing repairs.
    - A breakdown of the grants is included below.

Treasury breakdown of Flint grants

Flint Incinerator: The grant project entails shutting down the current Water Pollution Control Facility Incinerator (due to the incinerator not being up to new EPA standards). In order to meet EPA standards, it would cost roughly $8.8M in upgrades to the current incinerator. The grant funding will allow them to replace the functions of the old incinerator by constructing new facilities which will allow for the disposal of waste to landfills.

Budget Breakdown	
Construction Contractor	$1,050,000
Project Management	$50,000
Total	$1,100,000

Flint Leak Detection: The grant project will allow the city to hire a contractor to perform a leak detection survey of the city water lines. The city will receive a map of leak locations and an assessment of leak severity. This data will allow the city to prioritize leak repair. The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes. The assessment will guide the city's water main replacement program.

Budget Breakdown	
Project Planning	$90,000
Mobilization of Crew to Site	$27,000
Leak Detection < 16" diameter	$378,000

Leak Detection 16" diameter or >	$270,000
Pipe Condition Assessments	$135,000
Total	$900,000

DEQ backgrounder on Flint water

Following the formal approval of Flint into the KWA in 2012, DWSD sent Flint a letter saying their contract was thereby terminated (by early 2013).

Genesee County has been using DWSD water without a contract since May 2014. But Flint took the letter to imply a water cutoff, and promptly turned to DEQ with a proposal to use the Flint River (their historic backup system).

This proposed shift was pitched primarily as a money saver. But it put the city in the business of water production, where they historically had been in the business of water transmission. DEQ approved the use of the river as a source, based on the treatment plant's past performance as a standby facility and the improvements we outlined prior to a switchover.

Several municipalities around the state use surface water supplies (rivers): Blissfield near Monroe, Manistique, and Alma to name a few.

The city completed the upgrades at the water plant the facility and DEQ approved it April 2014.

There were some initial hiccups. Last summer, there were a couple of 'boil water' notices issued. One for a water test that showed e. coli, one for a break in the water main.

The challenge to using the Flint River as a source is that the condition of the water is variable and changes with season and weather. It has substantially more organic matter than deep lake sources like Lake Huron. This organic matter is mobilized by high water events, and warm weather also can account for more organic material in the water.

The treatment of the organic matter is done with chlorine. One might conclude that the continual answer is just to use more chlorine to achieve water safety. However, at some point on the continuum, the chlorine and organic matter create TTHM – total trihalomethanes – as a byproduct. When the standard for those is exceeded over several consecutive quarters of testing, the supply is required by law to issue public notice and submit an approved plan for addressing the situation.

You'll note that this regulatory approach means TTHM testing is done quarterly. That means people who use the system are exposed to TTHM for several months before the public notice is required. It's because TTHM is a chronic health threat. Over the long term (measured in decades), continued exposure can contribute to some known health problems. If this were an immediate health threat, customers would receive immediate notification to boil their water or not use it.

Put in context, the EPA (which established the standard and the rule) estimates the existence of the TTHM standard prevents an estimated 280 bladder cancer cases each year ... out of more than 330 million people who use public water supplies around the country.

It's not "nothing." State and federal law requires quarterly testing for TTHM and that the public be informed of it when the annual average of four quarters' worth of consecutive testing shows TTHM

levels exceeding 80 parts per billion. Flint's results managed to exceed the annual average in three quarters, and they must develop a plan to address it.

But it's not like an eminent threat to public health. Unlike an e. Coli or even total coliform bacteria maximum contaminant level, which require immediate public notification and response and are part of daily / hourly testing of public water supplies, TTHMs pose a public health concern with chronic, long-term exposure.

It's clear the nature of the threat was communicated poorly. It's also clear that folks in Flint are concerned about other aspects of their water – taste, smell and color being among the top complaints.

The Safe Drinking Water Act requires public water supplies be tested for more than 90 regulated contaminants, including microbial contaminants. The act, and the program here in Michigan, work to ensure that water is safe to drink. The act does not regulate aesthetic values of water. Here are some factors affecting the aesthetics of water in Flint.

1. It's the Flint River. The water supplied by DWSD historically came from Lake Huron. It's softer. With hard water, you get a different flavor and feel. It's why General Motors suspended use of Flint Water – it was rusting their parts. Also, there's the 'organics' factor (discussed previously).
2. The system is old. Flint has more than 500 miles of water pipes. More than half of those pipe miles are more than 75 years old. Much of it is cast iron. Hard water can react with cast iron and exacerbates the rusty factor, which creates that brown water that angry residents were holding up in jugs for the media cameras last week. Valve failure has also been a key challenge. The system has an estimated 7,500+ valves. When they stick open or stick shut, it affects the hydraulics of the system and increase areas of stagnation. The city has a backlog of valves that need to be addressed. They've done half a dozen or so since November.
3. Flint is old. Many of the homes served by the system are old. Brown water complaints may also be attributable to cast iron pipes in customers' service connection to the city lines. The DEQ has been encouraging people with water coloration concerns to contact the city and see whether it is the service line or the City's line causing the issue. Again, discoloration is not an indicator of water quality or water safety, but we recognize that nobody likes it.

In summary, the City of Flint has tremendous need to address its water delivery system. We are not aware that they have any capital improvement funds for preventative maintenance in place, much less line replacement project monies that will require hundreds of millions.

The City was approved for a Revolving Fund loan in 2008 or 2009. As a Distressed Community, they qualified for flexible terms and 2 percent interest rate Revolving Fund Loan. After they were notified they were approved for the loan, they declined it. Previous SRF loans from the state to Flint bear an outstanding balance of $20.7 million today.

The DEQ continues working with the city to address the TTHM issue. They can take interim steps – from scrubbing the insides of transmission lines to carefully monitoring the hydraulic challenges in their system – to address customers' aesthetic concerns. Their TTHM numbers already are showing dramatic improvement; the November testing showed only one of seven sample points exceeding the standard.

The key now is that the standard is an average of three quarters' worth of results. It will be some time before they are officially "not in violation." However, depending on weather in 2015, it's not unforeseeable that we will be having this conversation again by next Christmas.

The key to the conversation is that TTHM is not a top health concern. That's key because residents need to understand TTHM in context, and it is key because it appears the mayor has seized on the public panic (sparked, frankly, by their poor communication of the violation notice) to ask the state for loan forgiveness and more money for their infrastructure improvement.

Another key thing to remember is that once the city connects to the new KWA system in 2016, this issue will fade in the rearview.

Key messages:

1. The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.
2. Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.
3. Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.
4. TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure. The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.
5. The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.
6. The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.
7. Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ.

Mayor Walling's Facebook post

Friend,

Access to clean, safe, affordable water is a basic human right.

That's why I just sent Gov. Snyder my Flint Water Improvement Plan. It focuses on the areas of safety, quality, access, investment and education. My letter urges the governor to quickly implement these ideas so that Flint's water is 100% safe.

Please contact Gov. Snyder by calling (517) 335-6397 (or by clicking here) and ask him to take action immediately to implement my plan and ensure Flint's water is safe.

My plan offers new ideas and also builds on successful models of utility, energy and assistance programs at the state and federal levels. Here is my plan:

Safety & Quality

- 100% Safety is the standard

- City of Flint releases testing data to assure safety and expands testing to households with support from the Michigan Department of Environmental Quality
- Support alternatives for those advised not to drink the water by their doctors through the Michigan Health Endowment Fund and community partners to protect the vulnerable like seniors and infants
- Bring on experienced river water treatment operational management in the City of Flint
- Require water testing data to be released quarterly by law in all Michigan communities

Access

- Announce an amnesty program for turn-ons and reduce the turn-on cost in Flint
- Develop a revised payment plan policy to allow customers to come back on to the Flint system
- New Federal and State partnership to establish new Drinking Water Emergency Assistance Fund for customers (modeled on Federal and State energy utility programs: Low Income Home Energy Assistance Program; Michigan Energy Assistance Program; State Emergency Relief)

Investment

- Accelerate water system improvements outlined in the City of Flint Capital Improvement Plan through Federal and State Investments
- State approves City of Flint's Distressed Cities Fund applications
- Federal and State forgiveness of payment to Drinking Water Revolving Loan Fund
- Federal and State financing for future improvements
- City Water Department implements budgeted FY15 projects including leak detection, valve repairs, new pipes and meter replacements

Education

- Develop a community partnership to provide household and business customers with information on testing and conservation
- Ongoing partnership with Michigan Department of Human Services, United Way, Salvation Army and community organizations to provide information on water assistance
- Expand youth energy initiative to assist households with conservation and efficiency (piloted in summer 2014 with Northwestern High School students, EcoWorks and Consumers Energy)

The struggle with our water has gone on for too long. The state must take action and do its part. Please ask Gov. Snyder to take action immediately to implement my plan and ensure Flint's water is safe. Thank you for your ongoing support.

Gov. Rick Snyder awards Flint $2 million in Distressed Cities grants for water system infrastructure improvements

Funding to be used for leak detection, waste incinerator replacement

LANSING, Mich. – Gov. Rick Snyder today awarded Flint $2 million in grants for water system infrastructure improvements, part of an overall $8 million plan to help cities through the Financially Distressed Cities, Villages, and Townships Grant Program.

Flint is among six municipalities receiving grants through the program. The city will use the funding to detect leaks in its water lines and replace its Water Pollution Control Facility Incinerator.

"There are opportunities for the state government to assist Flint city leaders as they address issues related to the city's water system," Snyder said. "These grants will help recovering cities improve public services and infrastructure, improving the quality of life for all residents."

The grants to Flint were announced today at the Haskell Community Center by Harvey Hollins, director of the state's Office of Urban Initiatives and Wayne Workman, the state's deputy treasurer. They were joined by Dan Wyant, director of the Michigan Department of Environmental Quality, Flint Emergency Manager Jerry Ambrose, Mayor Dayne Walling, state Senate Minority Leader Jim Ananich, state Reps. Sheldon Neeley and Phil Phelps.

Flint was awarded $900,000 to allow the city to hire a contractor to perform a leak detection survey of the city water lines. The city will receive a map of leak locations and an assessment of leak severity, allowing the city to prioritize leak repair. The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes. The assessment will guide the city's water main replacement program.

The city also was awarded $1.1 million to shut down its current Water Pollution Control Facility incinerator and replace it with new facilities which will allow for the disposal of waste in landfills. The existing facilities are not up to federal Environmental Protection Agency standards.

Municipalities are eligible for the grants of they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.

Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability. There was $8 million appropriated for the program with a $2 million cap, per local unit.

The last LG agenda – for our meeting this morning.

Local Government Meeting
January 20, 2015

Key Updates

Royal Oak Township
- Burgess issuing a consent agreement order to clarify invoicing process, and awarding a pending bid for legal services

Highland Park
- Water leak has been shut off following pipes bursting
- Kathy Square learning the issues of the water system
- Still working through issues related to engaging a third party operator for water system
- Call Friday on blight certificate related to high school sale

Flint
- Jerry Ambrose began as EM on 1/13/15
- Mayor's letter to Governor on water issue amid increasing public concern
- 50% of assessments are manual overrides

Pontiac
- Economic Development Director hired recently
- Meeting in late January with legal team to discuss OPEB approach - here and in other communities

Hamtramck
- First RTAB meeting scheduled during the week of January 26th

Ecorse
- 5 year budget proposed by council not balanced
- Ongoing issues with interim City Manager

Wyandotte
- 93% of assessments are manual overrides

I left a message with Dick Posthumus to see if he has any concerns about proceeding.

The Senate Democrats said Sen. Ananich will want to appear. Katie Carey from the House said she would forward information to Rep. Neeley and Phelps. I have not heard back from her yet.

I've attached the backgrounder and the draft releases from Governor's Communications and Treasury. I've sent a message to the mayor's office about a quote, but have not heard back yet.

Brad and I spoke about Director Wyant's role and potential comments. He will point out that there are things the state can do to help monitor the situation, but also will note that the city's water infrastructure is aging, which contributes to the problems.

We need some direction on an advisory. Should this be listed on a typical advisory from the governor's office, or come from Treasury? Do we even issue an advisory in favor of just contacting media directly in the morning?

Please give the draft releases a read for potential changes, or let me know of other concerns.

Thank you!

Dave

Gov. Rick Snyder announces grants helping distressed municipalities with water, public safety, appraisal issues

$8 million awarded for projects aimed at improving services, quality of life

LANSING, Mich. -- Gov. Rick Snyder today awarded $8 million to eleven ~~six~~ municipalities to fund various improvement projects, including water system and street lighting enhancements and technology upgrades through the Financially Distressed Cities, Villages, and Townships Grant Program.

Municipalities are eligible for the grants if ~~of~~ they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.

"Municipalities receiving this special funding are some of the areas hardest hit by the Great Recession," Snyder said. "I am pleased we can offer funding assistance to help these local governments improve various public services their taxpayers and residents expect and deserve."

Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability. There was $8 million appropriated for the program with a $2 million cap, per local unit.

The following communities will receive funding this year, with projects and amounts noted (alphabetical order):

Local Unit	Project Description	Amount
City of Benton Harbor	Complete a property reappraisal to provide updated and accurate assessing records. Additionally, community enhancement through blight management and sidewalk replacement.	$475,000
City of Benton Harbor	Water system enhancement through water main replacements and fire hydrant repairs.	$434,960
City of Ecorse	Public safety enhancement through improved street lighting.	$350,000

City of Flint	Water system enhancement through improved waste management.	$1,100,000
City of Flint	Water system enhancement through leak detection and pipe assessments.	$900,000
City of Hamtramck	Complete a property reappraisal to provide updated and accurate assessing records.	$167,860
City of Hamtramck	Upgrade City Hall security.	$50,000
City of Hamtramck	Public safety enhancement through improved street lighting.	$404,600
City of Highland Park	Water system enhancement through meter replacement, leak detection, and system repairs.	$2,000,000
City of Inkster	Complete a property reappraisal to provide updated and accurate assessing records.	$73,460
City of Inkster	Water system enhancement through fire hydrant repairs.	$150,000
City of Inkster	Provide a backup power source for public safety.	$30,000
City of Inkster	Public safety enhancement through the creation of a multi-jurisdictional narcotic team.	$240,000
City of Inkster	Public safety enhancement through police officer training.	$41,970
City of Inkster	Public safety enhancement through the deployment of an additional police officer.	$320,000
City of Lincoln Park	Public safety enhancement through updated technology.	$143,490
City of Melvindale	Public safety enhancement through fleet replacement of police vehicles and updated technology.	$88,000
City of Pontiac	Community enhancement through blight management.	$125,000
City of River Rouge	Public safety enhancement through improved street lighting. Additionally, infrastructure replacements to City Hall.	$591,508
Royal Oak Township	Public safety enhancement through improved street lighting	$86,559
Royal Oak Township	Public safety enhancement of police services.	$217,593

All appropriated funding has been spent. No future rounds will occur in FY 2015.

~~Applications for the next round of Financially Distressed Cities, Villages, and Townships Grant Program will be available on the Department of Treasury website this spring. Applications must be submitted to Treasury by the close of business on XXX. XXX 31, 2015.~~

~~Preference is generally given to applicants from local units in which:~~

- ~~A financial emergency has been declared in the past five years;~~
- ~~An approved deficit elimination plan for the general fund is currently in place; or,~~
- ~~Two or more conditions indicating "probable financial distress" currently exist~~

~~For more information about FDCVT grants, including an application for cities, villages, and townships, visit www.michigan.gov/revenuesharing.~~

# # # #

We do not think this footnote is needed (however if you leave it in, you need to put the * at the point of reference and change "distress" to "stress".

~~*Conditions of "probable financial distress" relating solely to school districts are not included as conditions for FDCVT, as school districts are not eligible~~

6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Tower built with C-GAP funds. Procedure necessary to transfer asset to Consortium? Need to have assessment of value? Value exceeds $50,000, the intent to transfer was included in the last two updates to the Financial and Operating Plan. Responses send to R. Byrne last week.	Update
7) Transition Activities			
	a) Update of Transition Management Plan	A planning calendar for the next three months is being developed.	NEW

8) Other Items

	Last Report	Status
MDNR and Purchase of CSX rail area	Requesting DNR authorize full amount of appraised property value to be paid by DNR grant. **Note from Planning and Development Director:** In brief, the City hired an appraiser for the Grand Traverse Greenway trail to complete acquisition of the CSX properties. We forwarded the appraisal of $170,000 to the DNR for approval to proceed with negotiations with CSX. During our negotiations, CSX disputed the appraisal and submitted their own appraisal for the property of $330,000. After reviewing the CSX appraisal, DNR told the City that they would be willing to increase the grant up to $215,000 for acquisition, but the City would have to make up the difference. After doing additional research on similar properties including acquisition of the Genesee Valley Trail in the City of Flint, we realize that CSX offer is not unreasonable We asked DNR to reconsider and allow us to have our appraisal amended so that we can fully use the DNR grant for the $330,000 asking price. (Our DNR grant allocation is $700,000 more than enough to cover the $330,000 asking price. Thus far, DNR has been unwilling to provide the additional funding and suggested we talk to MDOT about making up the difference. I think the MDNR is concerned about setting precedent for future trail acquisition, but I don't think it matters if MDOT is routinely paying more.	Awaiting update from Treasury. Randy will get back to us on this.

Subject: FW: Selection of Water Quality Consultant

Wayne and Ed:

I have reviewed the documentation and conclude that the City does not have to get Treasurer approval to proceed because they solicited proposals from eight consulting firms as per PA 436 12(3). Please let me know if you have any questions.

Subject: Selection of Water Quality Consultant

Per conversation this morning, I am confirming that the City of Flint utilized a competitive process in the selection of a Water Quality consultant.

The attached RFP was released on January 15, with an initial response date of January 26. However, the response date was changed to January 29.

The RFP was posted on the City's website and invitations to respond were sent to the following firms:

Greeley and Hansen

Black and Veatch

CDM Smith

Arcadis

Hazen and Sawyer

Stantec

Fleis & Vandenbrink

HDR Inc.

The City received one response from Veolia. After review, it was determined that the respondent firm met the qualifications, and following initial discussion with the firm, it was also determined that the firm could initiate work quickly We are in the process of finalizing a initial phase agreement at a cost not to exceed $40,000. This initial phase will allow the firm to be on site and to conduct an initial evaluation of the City's current situation. Future phases will be negotiated consistent with their proposal and the requirements set forth in the RFP.

I am pleased with the proposal we received, and believe that it will provide us with that "extra set of eyes" to assure us and the public that we provide safe water and that we are taking the necessary steps to improve water quality.

Jerry Ambrose, Emergency Manager

City of Flint

INVITATION TO BID

OWNER:

THE CITY OF FLINT
DEPARTMENT OF PURCHASES AND SUPPLIES
1101 S. SAGINAW ST., 3RD FLOOR
FLINT, MI 48502

PROPOSAL NO.: 15-573

SCOPE OF WORK:

The City of Flint (The City), Department of Purchases & Supplies, is soliciting sealed proposals for the following:

Water Quality Consultant

per the attached specification.

If your firm is interested in providing the requested services, please submit 1 original and 2 copies of your detailed proposal to the City of Flint, Department of Purchases and Supplies, 1101 S. Saginaw St. Rm. 304, Third Floor, Flint, MI, 48502, by **Monday, January 26, 2015 @ 12:00 PM (EST)**. Please note: all detailed proposals received after 12:00 PM (EST) will not be considered. Faxed proposals into the Purchasing Department are not accepted.

The City of Flint may hold proposals for a period of 120 days from opening, for the purpose of reviewing the results and investigating the qualifications of proposals prior to making an award. The City of Flint reserves the right to waive any irregularities and accept or reject any or all proposals submitted. Vendors located within the corporate city limits of Flint, Michigan may be given a seven percent (7%) competitive price advantage. Additionally, if the lowest responsible bidder is not located with the limits of the City of Flint, but is located within the county of Genesee, and said Genesee County responsible bidder does not exceed the bid of the lowest non-local bidder by more than three and one-half percent (3 ½ %), the County vendor may have a competitive advantage.

The City reserves the right to waive any irregularities and accept or reject any or all

proposals submitted.

The City is an equal opportunity employer.

The successful bidder must comply with all requirements and pay prevailing wages and fringe benefits on this project per the City's Resolution R-12 adopted 4/8/91.

Pursuant to the requirements of 1976 P.A. 453 (Michigan Civil Rights Act) and 1976 P.A. 220 (Michigan Handicapped Rights Act), the local unit and its agent agree not to discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment or a matter directly or indirectly related to employment because of race, color, religion, national origin, age, sex, height, weight, marital status or because of a handicap that is unrelated to the person's ability to perform the duties of nondiscrimination provision identical to this provision and binding upon any and all contractors and subcontractors. A breach of this covenant shall be regarded as a material breach of this contract.

All materials furnished must be new, of latest model and standard first grade quality, or best workmanship and design, unless otherwise expressly specified. Bidder, if required, must furnish satisfactory evidence of quality materials, offers of experimental or unproven equipment may be disregarded.

Bidder shall protect against expense of any nature, shall bear costs of any suits which arise, and shall pay all damages which may be awarded against the City for the use, under this specification, of any patented device, process, apparatus, material or invention.

Bidder is not permitted to take advantage of any obvious errors or omissions in specifications.

The City reserves the right to reject any or all bids, or split awards by items, unless otherwise stipulated, or to accept any bid which will best serve its interests.

The Director shall not knowingly accept a proposal from a vendor /contractor who is in default on the payment of taxes, licenses, fees or other monies due the City. Purchase agreements with bidders who are found to have been in default at the time of award of such agreement shall be voided.

The bidder acknowledges that by signing this document that he/she is duly authorized to make said offer on behalf of the company he/she represents and that said proposal is genuine and not sham or collusive and not made in the interests or on behalf of any person not therein named, and that he/she and said bidder have not directly induced or solicited any other person(s) or corporation to refrain from responding to this solicitation and that he/she and said bidder have not in any manner sought by collusion to secure to himself/herself and said bidder any advantage over any other bidder.

Any questions regarding this proposal should be submitted by either fax (810-766-7240) or e-mail djones@cityofflint.com by Tuesday, January 20, 2015 by 5:00 PM. Responses to any questions will be posted to the City's website under this project number no later Wednesday, January 21, 2015.

Sincerely,

Derrick F. Jones
Department of Purchases & Supplies

Enclosure

All additional proposal documents, requirements, addendums, specifications and plans/drawings (if utilized) are available on the Purchasing page of the City of Flint's web site at "http://cityofflint.spudsoftware.com/?page_id=4694" under "open bids" and the specific bid or proposal number assigned to this notice.

INSTRUCTIONS TO VENDORS

General

1) **PRE-BID INFORMATION AND QUESTIONS:** Each bid that is timely received will be evaluated on its merit and completeness of all requested information. In preparing bids, Bidders are advised to rely only upon the contents of this Request for Proposal (RFP) and accompanying documents and any written clarifications or addenda issued by the City of Flint If a Bidder finds a discrepancy, error or omission in the RFP package, or requires any written addendum thereto, the Bidder is requested to notify the Purchasing contact noted on the cover of this RFP, so that written clarification may be sent to all prospective Bidders. **THE CITY OF FLINT IS NOT RESPONSIBLE FOR ANY ORAL INSTRUCTIONS.**

2) **RFP MODIFICATIONS:** The City of Flint has the right to correct, modify or cancel the RFP, in whole or in part, or to reject any Bid, in whole or in part, within the discretion of the City of Flint, or their designee. If any such changes are made, all known recipients of the RFP will be sent a copy of such changes. If any changes are made to this RFP document by any party other than the City of Flint, the original document in the City of Flint's files takes precedence.

3) **BID SUBMISSION:**

   a) The Bidder must include the following items, or the bid may be deemed non-responsive:
   i e. All forms contained in this RFP, fully completed.

   b) Bids must be submitted to the Purchasing Department, City of Flint, 1101 S. Saginaw Street – Room 304, Flint, Michigan 48502 by the date and time indicated as the deadline. The Purchasing Department's time stamp will determine the official receipt time. It is each Bidder's responsibility to insure that its bid is time stamped by the Purchasing Department by the deadline. This responsibility rests entirely with the Bidder, regardless of delays resulting from postal handling or for any other reasons. Bids will be accepted at any time during the normal course of business only, said hours being 8:00 a.m. to 5:00 p.m. Local Time, Monday through Friday, legal holidays as exception.

   c) Bids must be enclosed in a sealed opaque envelope, box or package, and clearly marked on the outside with the following: RFP Title, RFP Number, Deadline and Bidder's name.

   d) Submission of a bid establishes a conclusive presumption that the Bidder is thoroughly familiar with the Request for Bids (RFP), and that the Bidder understands and agrees to abide by each and all of the stipulations and requirements contained therein.

   e) All prices and notations must be typed or printed in ink. No erasures are permitted. Mistakes may be crossed out and corrections must be initialed in ink by the person(s) signing the bid.

   f) Bids sent by telegraph, facsimile, or other electronic means will not be considered unless specifically authorized in this RFP.

   g) All costs incurred in the preparation and presentation of the bid are the Bidder's sole responsibility; no pre-bid costs will be reimbursed to any Bidder All documentation submitted with the bid will become the property of the City of Flint.

   h) Bids must be held firm for a minimum of 120 days.

   i) Term - Contract and/or all other procurement documents shall be effective until completed to the satisfaction of the City of Flint. The City of Flint reserves the right to cancel or not renew all or any part of the procurement agreement/contract at any time

4) **EXCEPTIONS:** Bidder shall clearly identify any proposed deviations from the Terms or Scope in the Request for Bid. Each exception must be clearly defined and referenced to the proper paragraph in this RFP. The exception shall include, at a minimum, the Bidder's proposed substitute language and opinion as to why the suggested substitution will provide equivalent or better service and performance. If no exceptions are noted in the Bidder's bid, the City of Flint will assume complete conformance with this specification and the successful Bidder will be required to perform accordingly. Bids not meeting all requirements may be rejected

5) **DUPLICATE BIDS:** No more than one (1) bid from any Bidder, including its subsidiaries, affiliated companies and franchises will be considered by the City of Flint. In the event multiple bids are submitted in violation of this provision, the City will have the right to determine which bid will be considered, or at its sole option, reject all such multiple bids.

6) **WITHDRAWAL:** Bids may only be withdrawn by written notice prior to the date and time set for the opening of bids. No Bid may be withdrawn after the deadline for submission.

7) **REJECTION/GOOD STANDING:** The City of Flint reserves the right to reject any or all bids, or to accept or reject any bid in part, and to waive any minor informality or irregularity in bids received if it is determined by the City of Flint, or their designee, that the best interest of the City will be served by doing so. No Bid will be considered from any person, firm or corporation in arrears or in default to the City on any contract, debt, taxes or other obligation, or if the Bidder is debarred by the City of Flint from consideration for a contract award.

8) **PROCUREMENT POLICY:** Procurement for the City of Flint will be handled in a manner providing fair opportunity to all businesses. This will be accomplished without abrogation or sacrifice of quality and as determined to be in the best interest of the City. The City of Flint and their officials have the vested authority to execute a contract, subject to City Council and Mayoral approval where required.

9) **BID SIGNATURES:** Bids must be signed by an authorized official of the Bidder. Each signature represents binding commitment upon the Bidder to provide the goods and/or services offered to the City of Flint if the Bidder is determined to be the lowest Responsive and Responsible Bidder.

10) **CONTRACT AWARD/SPLIT AWARDS:** The City of Flint reserves the right to award by item, group of items, or total bid to the lowest responsive, responsible Bidder. The Bidder to whom the award is made will be notified at the earliest possible date. Tentative acceptance of the bid, intent to recommend award of a contract, and actual award of the contract will be provided by written notice sent to the Bidder at the address designated in the bid if a separate Agreement is required to be executed. After a final award of the Agreement by the City of Flint, the Contractor/Vendor must execute and perform said Agreement. All bids must be firm for at least 120 days from the due date of the bid. If, for any reason, a contract is not executed with the selected Bidder within 14 days after notice of recommendation for award, then the City may recommend the next lowest responsive and responsible Bidder.

11) **NO RFP RESPONSE:** Bidders who receive this RFP but who do not submit a bid should return this RFP package stating the reason(s) for not responding. Failure to return this form may result in removal of the Bidder's name from all bidder lists.

12) **FREEDOM OF INFORMATION ACT REQUIREMENTS:** Bids are subject to public disclosure after the deadline for submission in accordance with state law.

13) **ARBITRATION:** Contractor/Vendor agrees to submit to arbitration all claims, counterclaims, disputes and other matters in question arising out of or relating to this agreement or the breach thereof. The Contractor's agreement to arbitrate shall be specifically enforceable under the prevailing law of any court having jurisdiction to hear such matters. Contractor's obligation to submit to arbitration shall be subject to the following provisions:

(a) Notice of demand for arbitration must be submitted to the City in writing within a reasonable time after the claim, dispute or other matter in question has arisen. A reasonable time is hereby determined to be fourteen (14) days from the date the party demanding the arbitration knows or should have known the facts giving rise to his claim, dispute or question. In no event may the demand for arbitration be made after the time when institution of legal or equitable proceedings based on such claim dispute or other matters in question would be barred by the applicable statute of limitation.

(b) Within fourteen (14) days from the date demand for arbitration is received by the City, each party shall submit to the other the name of one person to serve as an arbitrator. The two arbitrators together shall then select a third person; the three together shall then serve as a panel in all proceedings. Any decision concurred in by a majority of the three shall be a final binding decision.

(c) The final decision rendered by said arbitrators shall be binding and conclusive and shall be subject to specific enforcement by a court of competent jurisdiction.

(d) The costs of the arbitration shall be split and borne equally between the parties and such costs are not subject to shifting by the arbitrator.

14) **BID HOLD:** The City of Flint may hold bids for a period of 120 days from opening, for the purpose of reviewing the results and investigating the qualifications of bidders prior to making an award.

15) **NONCOMPLIANCE:** Failure to deliver in accordance with specifications will be cause for the City of Flint and they may cancel the contract or any part thereof and purchase on the open market, charging any additional cost to the Contractor/Vendor.

16) **DISCLAIMER OF CONTRACTUAL RELATIONSHIP:** Nothing contained in these documents shall create any contractual relationship between the City and any Subcontractor or Sub-subcontractor.

17) **ERRORS AND OMISSIONS:** Bidder is not permitted to take advantage of any obvious errors or omissions in specifications

18) **INTERPRETATION:** In the event that any provision contained herein shall be determined by a court of competent jurisdiction or an appropriate administrative tribunal to be contrary to the provision of law or to be unenforceable for any reason, then, to the extent necessary and possible to render the remainder of this Agreement enforceable, such provision may be modified or severed by such court or administrative tribunal having jurisdiction over this Agreement and the interpretation thereof, or the parties hereto, so as to, as nearly as possible, carry out the intention of the parties hereto, considering the purpose of the entire Agreement in relation to such provision.

19) **LAWS AND ORDINANCES:** The bidder shall obey and abide by all of the laws, rules and regulations of the Federal Government, State of Michigan, Genesee County and the City of Flint, applicable to the performance of this agreement, including, but not limited to, labor laws, and laws regulating or applying to public improvement, local government, and its operational requirements.

20) **LOCAL PREFERENCE:** Bidders located within the corporate city limits of Flint, Michigan may be given a seven percent (7%) competitive price advantage and those located in Genesee County, MI may be given a three and a half percent (3 ½%) competitive price advantage.

21) **MATERIAL WORKMANSHIP AND STANDARDS OF PERFORMANCE:** The bidder agrees to exercise independent judgment and to complete performance under this Agreement in accordance with sound professional practices. In entering into this Agreement, the City is relying upon the professional reputation, experience, certification and ability of the bidder. The bidder agrees that all of the obligations required by him pursuant to this Agreement shall be performed by him or by other employed by him and working under his direction and control. The continued effectiveness of this Agreement during its term or any renewal term shall be contingent, in part, upon the bidder maintaining his operating qualifications in accordance with the requirements of federal, state and local laws. All materials furnished must be new, of latest model and standard first grade quality, or best workmanship and design, unless otherwise expressly specified. Bidder, if required, must furnish satisfactory evidence of quality materials, offers of experimental or unproven equipment may be disregarded.

22) **MODIFICATIONS/CHANGES/PRICE VARIATIONS:** Any modification to this agreement must be in writing and signed by the authorized employee, officer, board or council representative authorized to make such modifications pursuant to the State law and local ordinances. Commodities subject to market price variation shall be considered on all term agreements subject to a 30-day advance written notification from the vendor. Such notice must be substantiated by a written price change from the manufacturer and shall be required for both price increases and decreases.

23) **NON-COLLUSION:** The bidder acknowledges that by signing this document that he/she is duly authorized to make said offer on behalf of the company he/she represents and that said bid is genuine and not sham or collusive and not made in the interests or on behalf of any person not therein named, and that he/she and said bidder have not directly induced or solicited any other person(s) or corporation to refrain from responding to this solicitation and that he/she and said bidder have not in any manner sought by collusion to secure to himself/herself and said bidder any advantage over any other bidder.

24) **NON-DISCRIMINATION:** Pursuant to the requirements of 1976 P.A. 453 (Michigan Civil Rights Act) and 1976 P A 220 (Michigan Handicapped Rights Act), the local unit and its agent agree not to discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment or a matter directly or indirectly related to employment because of race, color, religion, national origin, age, sex, height, weight, marital status or because of a handicap that is unrelated to the person's ability to perform the duties of nondiscrimination provision identical to this provision and binding upon any and all contractors and subcontractors. A breach of this covenant shall be regarded as a material breach of this contract.

25) **SUBCONTRACTING:** No subcontract work shall be started prior to the written approval of the subcontractor by the City. The City reserves the right to accept or reject any subcontractor.

26) **UNION COMPLIANCE:** Contractor agrees to comply with all regulations and requirements of any national or local union(s) that may have jurisdiction over any of the materials, facilities, services or personnel to be furnished by the City.

27) **WAIVER:** Failure of the City to insist upon strict compliance with any of the terms, covenants or conditions of this Agreement shall not be deemed a waiver of that term, covenant or condition or of any other term, covenant or condition. Any waiver or relinquishment of any right or power hereunder at any one or more times shall not be deemed a waiver or relinquishment of that right or power at any other time.

28) **JURISDICTION OF OMBUDSMAN:** Any person, business or other entity submitting a bid or bid in response to a request by the City consents to be subject to the jurisdiction of the Ombudsman of the City of Flint and to comply with the respective Charter provisions governing the Ombudsman's duties, jurisdiction and powers.

29) **PREVAILING WAGE:** The successful bidder providing any contractual labor services must comply with all requirements and pay prevailing wages and fringe benefits on this project per the City's Resolution R-12 adopted 4/8/91. The bidder is aware of City of Flint Resolution #R-12 dated April 8, 1991, a copy of which is annexed hereto and incorporated herein, and agrees to abide by all of the applicable covenants and requirements set forth in said resolution. Not applicable to this project.

30) **CITY INCOME TAX WITHHOLDING:** Contractor and any subcontractor engaged in this contract shall withhold from each payment to his employees the City income tax on all of their compensation subject to tax, after giving effect to exemptions, as follows:

(a) Residents of the City:
At a rate equal to 1% of all compensation paid to the employee who is a resident of the City of Flint.

(b) Non-residents:
At a rate equal to 1/2% of the compensation paid to the employee for work done or services performed in the City of Flint.

These taxes shall be held in trust and paid over to the City of Flint in accordance with City ordinances and State law. Any failure to do so shall constitute a substantial and material breach of this contract.

31) **CONTRACT/PROCURMENT DOCUMENTS:** The invitation for bids, instructions to bidders, bid, affidavit, addenda (if any), statement of bidder's qualifications (when required), general conditions, special conditions, performance bond, labor and material payment bond, insurance certificates, (if required), technical specifications, and drawings, together with this agreement, form the contract, and they are as fully a part of the contract as if attached hereto or repeated herein

32) **DISCLAIMER OF CONTRACTUAL RELATIONSHIP WITH SUBCONTRACTORS:** Nothing contained in the Contract Documents shall create any contractual relationship between the City and any Subcontractor or Sub-subcontractor.

33) **EFFECTIVE DATE:** Any agreement between the City and the contractor shall be effective upon the date that it is executed by all parties hereto.

34) **FORCE MAJEURE:** Neither party shall be responsible for damages or delays caused by Force Majeure or other events beyond the control of the other party and which could not reasonably have anticipated the control of the other party and which could not reasonably have been anticipated or prevented. For purposes of this Agreement, Force Majeure includes, but is not limited to, adverse weather conditions, floods, epidemics, war, riot, strikes, lockouts, and other industrial disturbances, unknown site conditions, accidents, sabotage, fire, and acts of God. Should Force Majeure occur, the parties shall mutually agree on the terms and conditions upon which the services may continue.

35) INDEMNIFICATION: To the fullest extent permitted by law, Contractor agrees to defend, pay on behalf of, indemnify, and hold harmless the City of Flint, its elected and appointed officials, employees and volunteers and other working on behalf of the City of Flint, including the Project Manager, against any and all claims, demands, suits, or losses, including all costs connected therewith, and for any damages which may be asserted, claimed, or recovered against or from the City of Flint, its elected and appointed officials, employees, volunteers or others working on behalf of the City of Flint, by reason of personal injury, including bodily injury or death and/or property damage, including loss of use thereof, which may arise as a result of Contractor's acts, omissions, faults, and negligence or that of any of his employees, agents, and representatives in connection with the performance of this contract. Should the Contractor fail to indemnify the City in the above-mentioned circumstances, the City may exercise its option to deduct the cost that it incurs from the contract price forthwith.

36) **INDEPENDENT CONTRACTOR:** No provision of this contract shall be construed as creating an employer-employee relationship It is hereby expressly understood and agreed that Contractor is an "independent contractor" as that phrase has been defined and interpreted by the courts of the State of Michigan and, as such, Contractor is not entitled to any benefits not otherwise specified herein.

37) **NO THIRD-PARTY BENEFICIARY:** No contractor, subcontractor, mechanic, material man, laborer, vendor, or other person dealing with the principal Contractor shall be, nor shall any of them be deemed to be, third-party beneficiaries of this contract, but each such person shall be deemed to have agreed (a) that they shall look to the principal Contractor as their sole source of recovery if not paid, and (b) except as otherwise agreed to by the principal Contractor and any such person in writing, they may not enter any claim or bring any such action against the City under any circumstances. Except as provided by law, or as otherwise agreed to in writing between the City and such person, each such person shall be deemed to have waived in writing all rights to seek redress from the City under any circumstances whatsoever.

38) **NON-ASSIGNABILITY:** Contractor shall not assign or transfer any interest in this contract without the prior written consent of the City provided, however, that claims for money due or to become due to Contractor from the City under this contract may be assigned to a bank, trust company, or other financial institution without such approval. Notice of any such assignment or transfer shall be furnished promptly to the City.

39) **NON-DISCLOSURE/CONFIDENTIALITY:** Contractor agrees that the documents identified herein as the contract documents are confidential information intended for the sole use of the City and that Contractor will not disclose any such information, or in any other way make such documents public, without the express written approval of the City or the order of the court of appropriate jurisdiction or as required by the laws of the State of Michigan.

40) **RECORDS PROPERTY OF CITY:** All documents, information, reports and the like prepared or generated by Contractor as a result of this contract shall become the sole property of the City of Flint.

41) **SEVERABILITY:** In the event that any provision contained herein shall be determined by a court or administrative tribunal to be contrary to a provision of state or federal law or to be unenforceable for any reason, then, to the extent necessary and possible to render the remainder of this Agreement enforceable, such provision may be modified or severed by such court or administrative tribunal so as

to, as nearly as possible, carry out the intention of the parties hereto, considering the purpose of the entire Agreement in relation to such provision. The invalidation of one or more terms of this contract shall not affect the validity of the remaining terms.

42) **TERMINATION:** This contract may be terminated by either party hereto by submitting a notice of termination to the other party. Such notice shall be in writing and shall be effective 30 days from the date it is submitted unless otherwise agreed to by the parties hereto. Contractor, upon receiving such notice and prorated payment upon termination of this contract shall give to the City all pertinent records, data, and information created up to the date of termination to which the City, under the terms of this contract, is entitled.

43) **TIME PERFORMANCE:** Contractor's services shall commence immediately upon receipt of the notice to proceed and shall be carried out forthwith and without reasonable delay.

44) EVALUATION OF BIDS/BIDS: The City's evaluation of these proposals will be based on the criterion of price, experience, qualifications, capacity, and ability to produce the required deliverables at an accelerated pace

Insurance/Worker's Compensation: Contractor shall not commence work under this contract until he has procured and provided evidence of the insurance required under this section. All coverage shall be obtained from insurance companies licensed and authorized to do business in the State of Michigan unless otherwise approved by the City's Risk Manager. Policies shall be reviewed by the City's Risk Manager for completeness and limits of coverage. All coverage shall be with insurance carriers acceptable to the City of Flint. Contractor shall maintain the following insurance coverage for the duration of the contract

(a) Commercial General Liability coverage of not less than one million dollars ($1,000,000) combined single limit with the City of Flint, and including all elected and appointed officials, all employees and volunteers, all boards, commissions and/or authorities and their board members, employees and volunteers, named as "Additional Insured." This coverage shall be written on an ISO occurrence basis form and shall include: Bodily Injury, Personal Injury, Property Damage, Contractual Liability, Products and Completed Operations, Independent Contractors; Broad Form Commercial General Liability Endorsement, (XCU) Exclusions deleted and a per contract aggregate coverage. This coverage shall be primary to the Additional Insured, and not contributing with any other insurance or similar protection available to the Additional Insured, whether said other available coverage be primary, contributing, or excess.

(b) Workers Compensation Insurance in accordance with Michigan statutory requirements, including Employers Liability coverage.

(c) Commercial Automobile Insurance in the amount of not less than $1,000,000 combined single limit per accident with the City of Flint, and including all elected and appointed officials, all employees and volunteers, all boards, commissions and/or authorities and their board members, employees and volunteers, named as "Additional Insured." This coverage shall be written on ISO business auto forms covering Automobile Liability, code "any auto."

(d) Professional Liability - Errors and Omissions. All projects involving the use of Architects, civil engineers, landscape design specialists, and other professional services must provide the City of Flint with evidence of Professional Liability coverage in an amount not less than one million dollars ($1,000,000). Evidence of this coverage must be provided for a minimum of three years after project completion. Any deductibles or self-insured retention must be declared to and approved by the City. In addition, the total dollar value of all claims paid out on the policy shall be declared. At the option of the City, either the insurer shall reduce or eliminate such deductibles or self-insured retention with respect to the City, its officials, employees, agents and volunteers; or Contractor shall procure a bond guaranteeing payment of losses and related investigation, claim, administration, and defense expenses.

Contractor shall furnish the City with two certificates of insurance for all coverage requested with original endorsements for those policies requiring the Additional Insured. All certificates of insurance must provide the City of Flint with not less than 30 days advance written notice in the event of cancellation, non-payment of premium, non-renewal, or any material change in policy coverage. In addition, the wording "Endeavor to" and "but failure to mail such notice shall impose no obligation or liability of any kind upon the company, its agents or representatives" must be removed from the standard ACORD cancellation statement These certificates must identify the City of Flint, as the "Certificate Holder." Contractor must provide, upon request, certified copies of all insurance policies. If any of the above polices are due to expire during the term of this contract, Contractor shall deliver renewal certificates and copies of the new policies to the City of Flint at least ten days prior to the expiration date. Contractor shall ensure that all subcontractors utilized obtain and maintain all insurance coverage required by this provision.

Background Information

On May 1, 2014 the City of Flint (the City) completed a transition to using water provided by Detroit Water and Sewer Department to drawing water from the Flint River and utilizing our plant to treat and distribute the water. In the subsequent months, many of the eight testing sites around the City were returning low chlorine residual levels and several of those sites developed into positive tests for total coliform and resulted in the issuance of boil water notices for precautionary measures. Numerous valve replacements and additional chlorination resultinged in more consistent chlorine residuals throughout the system.

Quarterly reporting to the Michigan Department of Environmental Quality (MDEQ) of Disinfectant Byproduct Levels resulted in trihalomethane levels above the maximum contaminant level (MCL). Seven of eight test sites are currently below the MCL but the annual average has triggered a violation notice from the MDEQ dated December 16, 2014. The City has worked with an engineering team to develop an Operational Evaluation Report (see Exhibit A) as required by the violation and has submitted that report to the MDEQ. The next testing period is scheduled for the middle of February 2015 and an updated Operational Evaluation report which incorporates the results of that test is due to the MDEQ no later than March 1, 2015.

The City is anticipating during the middle of 2016 to begin receiving and treating raw water from Lake Huron via the Karegnondi Water Authority (KWA). The City's Water Plant will still be capable of drawing water from the Flint River and will need to be proficient in treating both bodies of water. It is planned that the Flint River will be a permanent back-up source in providing water to the citizens of Flint.

Scope of Services

The City is seeking a consultant to review and evaluate the water treatment process and distribution system, provide recommendations to maintain compliance with both state and federal agencies, and assist in implementing accepted recommendations. The City will have the selected vendor provide reports to reflect their findings and provide continual oversight in implementing any approved recommended practices to improve the quality of water until implementation of the KWA project.

Deliverables

The City is requesting that the selected vendor provide the following reports in their order of appearance:

- Evaluation of the City's processes and procedures to maintain and improve water quality;
- Report that outlines recommendations that will improve the water treatment and distribution system.

The City is requesting that the selected vendor provide coordination in implementing any selected recommendations that will result in improving the overall process of treating and distributing water until such time that the City is receiving and successfully treating Lake Huron water.

Information Required to Submit Proposal

The City has deemed this project a priority and will be requesting the selected firm to produce the requested information in an expedient manner. Firms interested in submitting a proposal based on the information requested in this document must submit the following information:

- **Company's Information**-The proposal shall list the legal name of the firm, its address and phone number, and firm's history.
- **Firm Qualifications, Experiences and References**-The proposal should state the size of the firm, personnel that will be assigned to this project, and other significant projects performed in the past five years that are similar to this request for proposal. Indicate the scope of work provided and the name and telephone number of the client.
- **Staff Experience**-The proposal should provide information on each staff member to include experience, relevant education, degrees, certifications and any other pertinent information or a resume.
- **Project Scope** – Provide a statement discussing the firm's understanding of the requested services, potential obstacles that may occur during this project, and a work plan and timeline in preparing and submitting the requested deliverables.
- **Price for Services**-Vendor is to provide a pricing schedule to perform the requested services. Pricing should include a lump sum to provide the requested reports, an hourly rate schedule of personnel that will be utilized to perform the requested services, and a detail timeline that articulate the completion of the requested reports.
- **Other**-Please include any other information that you think would be helpful in allowing the

City to make an informed decision in the selection process.

Subject: Response to Invitation to Bid – Proposal No.: 15-573
Water Quality Consultant

Dear Mr. Jones:

In response to your Request for Bid/Proposal (RFP), **Veolia Water North America Operating Services, LLC** (Veolia) is pleased to have the opportunity to provide this letter submittal. We have prepared a response that is focused on providing the **City of Flint** with a complete solution to address the immediate reliability and operational needs of your water system throughout your continuous operations – whether under the current draw from Flint River or future draw from Lake Huron.

In reviewing the challenges that the City of Flint is facing, we present a longer-term approach for the Operational Evaluation Report, which involves implementation and monitoring through 2016 and the transition to Lake Huron supply. Our commitment to the City of Flint is to make sure the utility can identify the immediate issues through the proposed report, and also secure its future by addressing and fixing these issues identified in the report, build capacity for the future, and better manage the change in water sources in 2016.

Depending on the City's preference, Veolia's expertise to reinforce operations is available to Flint through performance advisory services using our innovative Peer Performance Solutions (PPS), or through longer-term contract operation and maintenance (O&M) type services. Both approaches are designed to help the City of Flint benefit from operational reliability and utility-wide efficiencies.

With the PPS approach, Veolia addresses fundamental issues from the ground-up to deliver improved reliability, compliance and efficiencies for major water and wastewater agencies. Under this model, our Subject Matter Experts (SMEs) would work in collaboration with the City's management team, your line managers and your operators to develop the path forward that suits your needs – both now and into the future. Over the course of this process the City remains in control of all levels of management at all times and benefits from Veolia's expertise through the support of a small team of on-site experts, who in turn can access the rest of our company's worldwide resources.

Veolia's PPS approach is highly data-driven to identify and implement cost savings and deliver utility optimization and organizational best practices. One key example of this model at work is in our ongoing contract with the Pittsburgh Water & Sewer Authority (PWSA). That partnership began in 2012 and was just (this past month) extended for a new term. Working with PWSA, Veolia is implementing a long-term strategy to improve water quality and customer service, increase efficiency, and overcome financial challenges.

PWSA serves the needs of more than 310,000 people in the greater Pittsburgh area, and Veolia assisted them in realizing more than $5.5 million annually in recurring revenue and efficiencies. This involved working with PWSA to establish a Distribution System Optimization Plan with the State of Pennsylvania, to implement a Process Control Management Plan at their water treatment plant, to identify early warnings for non-compliance trends, to update their laboratory Quality Control/Quality Assurance (QA/QC) program, to initiate performance monitoring methods, and to initiate the use of compliance metrics in order to improve relationships with regulatory agencies. We also implemented a Community Outreach Program to improve the public's perception of PWSA and create positive media attention for the agency.

Veolia is also applying the PPS model for New York City's water and wastewater operations. Under a contract that began in 2011, Veolia has reviewed all aspects of that utility's practices to assess potential improvements. Working collaboratively with the City's water and wastewater operators and managers, Veolia focused on areas including: chemical use and pricing; labor productivity; inventory management; sludge process optimization; and overall O&M activities. Under this approach, our firm identified opportunities that are expected to yield annual recurring financial benefits of more than $100 million by 2016 -- to date, more than $90 million in savings and revenue enhancements have been reported by New York City.

The highly collaborative PPS partnership model evolved as an alternative to Veolia's traditional O&M services delivery approach, an approach that our firm first applied over 42 years ago under the first municipal contract operations partnership in the U.S. – an ongoing partnership with the City of Burlingame, California. Today, our firm continues to use this model to provide water and wastewater services to over 160 municipal clients. To demonstrate the depth of our firm's award-winning experience in the operation of surface water plants we have included a list of Veolia-operated plants as an attachment to this letter. Veolia's contract operations services are also available to Flint, as an alternative to PPS.

In the remainder of this letter, we outline our approach to: providing immediate assistance related to the review and evaluation of the water treatment process and distribution system; development of recommendations and a report for maintaining compliance with both State of Michigan and federal agencies; and assistance in implementing accepted recommendations from the report. The report that Veolia would develop for the City would outline findings and provide recommendations for continual oversight of the approved recommended practices to improve the quality of water until the implementation of the Karegnondi Water Authority (KWA) project.

Veolia's Understanding and Proposed Approach to Providing the Water Quality Consultant Scope

Our longer-term approach would begin by addressing the immediate assistance outlined in your RFP, and then service beyond that scope. Under this expanded scope, Veolia would help with the transition from the Flint River source to Lake Huron water to avoid a repeat of this scenario. That transition is expected to be in place in 2016 and will complete the City's transition from using water provided by the Detroit Water and Sewerage Department (DWSD) to drawing water from the Flint River, using the City-owned water plant.

With a Notice of Proceed issued, Veolia would mobilize a team of experts, including our two prominent water SMEs, from our corporate Technical Services Group (an in-house team of technical and management experts that support the company's projects and operations throughout North America). These experts would include:

- **Marvin Gnagy, P.E. - Water Process and Quality Manager** – He has more than 37 years of water quality management experience, and is a certified Water Operator in Ohio and a registered Professional Engineer. Mr. Gnagy has completed projects that have involved the set of tasks that the City as defined under this contract, and was most recently engaged as a part of a Veolia team of experts that worked with DWSD and the City of Detroit on a program to evaluate their water and wastewater operations and proposed solutions. This included conducting an intensive due diligence examination of Detroit's water and wastewater facilities and operations, and the development of two reports, a Peer Review Report, which looked at the current operations with a focus on identifying immediate and long term needs, and a Transition Plan: Retail Services for the City of Detroit, which outlined the issues facing the DWSD and the City as the water and wastewater operations changed under a new regionalization approach. Through that work, Mr. Gnagy understands the City of Flint's drivers for this new project, and will be able to use the work that Veolia has done to date for the DWSD to aid in identifying the optimal solution for your water system and the transition from DWSD to your own operations.

  Mr. Gnagy's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water & Groundwater Treatment and Disinfection Byproducts (DBP) Reduction – Mr. Gnagy has very broad experience with both river water and groundwater treatment on project work involving unit process design and operations to meet drinking water standards and water quality goals. Indeed, he has

conducted numerous studies involving DBP (particularly THM) reduction to meet drinking water standards, establishing treatment alternatives and process targets for THM compliance solutions.

- Master Plan Development and Unit Process Improvements – Mr. Gnagy prepared the master plan and performed plant evaluations for unit process improvements to meet future drinking water standards for the City of Adrian, Michigan's10-MGD water treatment plant. That plan discussed multiple options for process improvements and chemical feed adjustments, specifically targeted for THM control treatment. Jar testing was used to define the chemical dosing and treatment scheme that resulted in the most effective THM reduction solution for the city. He also served as Project Manager for a DBP Reduction Study for the City of Akron, Ohio's 67-MGD water supply plant. That study reviewed jar testing evaluations and historical monitoring records to develop the necessary treatment process adjustments to effectively reduce THMs in the drinking water. Computer models were developed using the data obtained to predict the chemical treatment needs based on source water quality, and to predict THM concentrations following treatment adjustments using the chemical treatments selected. Recommendations included chemical feed adjustments and further study related to advanced treatment technologies.

  Other work in this area included serving as the Project Manager for an optimization study for the Village of Blissfield, Michigan's 2.2-MGD water treatment plant to determine needs for improved turbidity and THM concentrations. All major unit processes and chemical feed systems were evaluated for optimal treatment needs. Jar testing and plant operating adjustments were made weekly to improve water quality and process control. Implementation of organics control treatment was accomplished that successfully achieved compliance with both the turbidity and THM compliance requirements.

  Mr. Gnagy also conducted plant reviews, performed process design changes, designed new flocculation equipment replacements, and designed and started-up new washwater handling operations for several of DWSD's water treatment plants. That worked involved three plants, the Southwest, Lake Huron and Springwells water plants, and focused on improving operations and to meet drinking water compliance.

A full resume for Mr. Gnagy is provided as an attachment at the end of this letter.

- **Theping Chen, P.E. - Process and Operations Optimization Manager** - He has close to 30 years of water engineering, operations and research experience, and he spent 15 years as a water consulting engineer in Michigan and is a registered Professional Engineer in the State of Michigan. Mr. Chen's experience includes working with DWSD on various projects related to master plan, source water protection, water quality management, treatment process optimizations including PAC and ozone design criteria development, taste and odor control, residual management and capital improvement program development. He has also worked extensively with the Michigan Department of Environmental Quality (MDEQ) on compliance issues with focus on water quality compliance, and is a well-published author at the national and state level conferences.

  With Veolia, Mr. Chen has been engaged in supporting the ongoing operations and management contract for the City of Buffalo, New York's water operations, and in providing technical support for Veolia's water plant operations at the cities of Gloucester and Brockton, Massachusetts; with that work including jar testing evaluation and compliance strategies development for DBPs.

  Mr. Chen's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water and Groundwater Treatment – Mr. Chen has broad experience with both river water and groundwater softening treatment on projects including: on-call engineering, comprehensive needs assessment, filter and chemical system rehabilitation projects for the City of Marion, Ohio's 9.1-MGD water treatment plant (treating combined groundwater and river source water), under a scope of work that involved investigating DBP control strategies and conceptual design of a UV treatment system; a comprehensive regulatory review and capacity evaluation for the City of Dayton, Ohio's two groundwater water treatment plants (96-MGD each); and a comprehensive disinfection and DBPs compliance strategy review for the City of Ann Arbor, Michigan's water treatment plant (a combined surface and groundwater softening plant with at rated capacity of 27-MGD) as part of an overall Water Master Plan project.

- Ozone and Disinfection Technologies - His experience in this area included completing ozone system study, design, construction management and optimization projects for more than 10 municipal water treatment plants.
- DBP Compliance – Mr. Chen's experience in this area includes: optimizing and upgrading ozone systems, and proposing the use of biological filtration to enhance the TOC removal to control DBPs for the City of Shreveport, Louisiana's water treatment plant; optimizing chlorination application, conducting a review of contact time calculation to minimize DBP formation, and proposing UV system upgrades for the City of Marion, Ohio's water treatment plant; evaluating a commercial (self-fabricated) aeration system for installation in elevated and ground-level water storage tanks to reduce the hot spots in Northern Kentucky water treatment plant's water distribution system; and development of tracer test program to calibrate the water quality model for the City of Akron, Ohio.

A full resume for Mr. Chen is provided as an attachment to this letter.

These staff will be responsible for delivering on the immediate tasks that the City has defined:

- Reviewing and evaluating the City's water treatment process and distribution system. This will include evaluating the City's processes and procedures to maintain and improve water quality.
- Developing a report on the finding of the evaluation, with specific recommendations to maintain compliance with both State of Michigan and federal agencies. This will include outlining recommendations that will improve the water treatment and distribution system.
- Assisting the City in implementing accepted recommendations. This will include providing continual oversight and support for the implementation of any approved recommended practices. Recommendations will focus on those areas that will improve the overall process of treating and distributing water, including improvements to water quality until the implementation of the KWA project (anticipated to be by mid-2016) under which the City will be receiving and treating Lake Huron water.

In addition to Mr. Gnagy and Mr. Chen, our core staff group, would be assisted by other technical, operations, management and communications experts from Veolia to proceed promptly into implementation simultaneously.

We believe that addressing the fundamental issues concerning water quality compliance and operational reliability is much more complex than the recommendations study and advisory services approach outlined in your RFP.

We want to ensure that the utility can fix these immediate issues effectively and without delays, while at the same helping the City to begin to build capacity for the future and better manage the 2016 water source change in a systematic way – with all the relevant stakeholders engaged along the way.

In undertaking these tasks, Veolia understands that in 2014 the City completed the transition from using water provided by DWSD to drawing water from the Flint River – utilizing your own water plant to treat and distribute water to those served by your system. Since that transition process was completed, it was found that many of the City's eight water quality testing sites exhibited low chlorine residual levels, and several of those sites developed had positive tests for total coliform, which resulted in issuance of boil water notices for precautionary measures. To address this, the City implemented valve replacements and additional chlorination that yielded consistent chlorine residuals throughout the system. However, quarterly reporting to the MDEQ of Disinfectant Byproduct Levels resulted in trihalomethane levels above the maximum contaminant level (MCL), with an annual average level that triggered a violation notice from the MDEQ.

To date the City, working with an outside engineering team, developed and submitted to the MDEQ an Operational Evaluation Report. The next testing period is scheduled for the middle of February and an update to this report will be required by March 1, 2015. That update will incorporate the results of the tests required by the MDEQ.

The City is expecting to work with the selected Water Quality Consultant to complete the required testing and prepare the updated Operational Evaluation Report. As a secondary element of this task, the City is seeking to retain the selected Consultant to aid in the implementation of these suggestions.

Veolia excels at the day-to-day operation issues and understands how to fix them using diverse and subject matter expertise in a structured, bottom-up type, staff engagement process. That is why we designed the PPS approach to help convert the report findings into actionable items for the City of Flint's staff and then help them implement those changes. This would involves making sure that your staff understand why changes are being made, ensuring that they have the training necessary to make the changes, and then following up to be certain what is planned works or if not then provide help making adjustments. This will involve also a monitoring process to make certain the changes are on track for management and the public.

All of this can then be used to help the City to be prepared to begin receiving and treating raw water from Lake Huron through the KWA. The end goal of this process will be to develop within the City's staff a better understanding and capability to handle the changes in water, whether drawing water from the City of Flint's or the new KWA supply sources.

Veolia's Anticipated Level of Effort

In order to respond to the immediate needs of your defined scope of work, we anticipate mobilizing a team of technical, operations, maintenance and communications SMEs to: calibrate daily water quality samples with the City's hydraulic model; refine the operational strategies for the plant and distribution system; coordinate daily efforts across plant, operations and maintenance staff; and to alleviate continued concerns from the public through a public communications process. The elements of this approach would be delivered under a management and staffing approach which allows for collaboration between the City and Veolia's technical and management team.

For purposes of the scope of services outlined in the City's RFP, Veolia's core staff would be charged at a common rate of $225/hour, plus expenses.

For the longer-term type of approach, Veolia would set a single lump sum price for the study, implementation and long term services after review and discussion with the City on selecting your preferred approach – the PPS approach or the contract O&M approach. At that time, we can also explore an incentive-based (risk/reward) type of approach, one which is common under PPS contracts, where Veolia's fee is based on achieving performance targets that we would mutually agree upon. As demonstrated in our work with water and wastewater clients, Veolia's PPS model has provided great insight into working with large utility staffs to change the culture and ensure implementation of ideas that improve the utility's performance.

The methodology for implementing a PPS approach, as outlined on Figure 1 (below), includes each of the following steps:

- Preparation – This stage involves the mobilization of resources (Veolia and the City), a joint project kickoff meeting (Veolia and the City), development and implementation of a communications plan (Veolia and the

Subject: Response to Invitation to Bid – Proposal No.: 15-573
Water Quality Consultant

Dear Mr. Jones:

In response to your Request for Bid/Proposal (RFP), **Veolia Water North America Operating Services, LLC** (Veolia) is pleased to have the opportunity to provide this letter submittal. We have prepared a response that is focused on providing the **City of Flint** with a complete solution to address the immediate reliability and operational needs of your water system throughout your continuous operations – whether under the current draw from Flint River or future draw from Lake Huron.

In reviewing the challenges that the City of Flint is facing, we present a longer-term approach for the Operational Evaluation Report, which involves implementation and monitoring through 2016 and the transition to Lake Huron supply. Our commitment to the City of Flint is to make sure the utility can identify the immediate issues through the proposed report, and also secure its future by addressing and fixing these issues identified in the report, build capacity for the future, and better manage the change in water sources in 2016.

Depending on the City's preference, Veolia's expertise to reinforce operations is available to Flint through performance advisory services using our innovative Peer Performance Solutions (PPS), or through longer-term contract operation and maintenance (O&M) type services. Both approaches are designed to help the City of Flint benefit from operational reliability and utility-wide efficiencies.

With the PPS approach, Veolia addresses fundamental issues from the ground-up to deliver improved reliability, compliance and efficiencies for major water and wastewater agencies. Under this model, our Subject Matter Experts (SMEs) would work in collaboration with the City's management team, your line managers and your operators to develop the path forward that suits your needs – both now and into the future. Over the course of this process the City remains in control of all levels of management at all times and benefits from Veolia's expertise through the support of a small team of on-site experts, who in turn can access the rest of our company's worldwide resources.

Veolia's PPS approach is highly data-driven to identify and implement cost savings and deliver utility optimization and organizational best practices. One key example of this model at work is in our ongoing contract with the Pittsburgh Water & Sewer Authority (PWSA). That partnership began in 2012 and was just (this past month) extended for a new term. Working with PWSA, Veolia is implementing a long-term strategy to improve water quality and customer service, increase efficiency, and overcome financial challenges.

PWSA serves the needs of more than 310,000 people in the greater Pittsburgh area, and Veolia assisted them in realizing more than $5.5 million annually in recurring revenue and efficiencies. This involved working with PWSA to establish a Distribution System Optimization Plan with the State of Pennsylvania, to implement a Process Control Management Plan at their water treatment plant, to identify early warnings for non-compliance trends, to update their laboratory Quality Control/Quality Assurance (QA/QC) program, to initiate performance monitoring methods, and to initiate the use of compliance metrics in order to improve relationships with regulatory agencies. We also implemented a Community Outreach Program to improve the public's perception of PWSA and create positive media attention for the agency.

Veolia is also applying the PPS model for New York City's water and wastewater operations. Under a contract that began in 2011, Veolia has reviewed all aspects of that utility's practices to assess potential improvements. Working collaboratively with the City's water and wastewater operators and managers, Veolia focused on areas including: chemical use and pricing; labor productivity; inventory management; sludge process optimization; and overall O&M activities. Under this approach, our firm identified opportunities that are expected to yield annual recurring financial benefits of more than $100 million by 2016 -- to date, more than $90 million in savings and revenue enhancements have been reported by New York City.

The highly collaborative PPS partnership model evolved as an alternative to Veolia's traditional O&M services delivery approach, an approach that our firm first applied over 42 years ago under the first municipal contract operations partnership in the U.S. – an ongoing partnership with the City of Burlingame, California. Today, our firm continues to use this model to provide water and wastewater services to over 160 municipal clients. To demonstrate the depth of our firm's award-winning experience in the operation of surface water plants we have included a list of Veolia-operated plants as an attachment to this letter. Veolia's contract operations services are also available to Flint, as an alternative to PPS.

In the remainder of this letter, we outline our approach to: providing immediate assistance related to the review and evaluation of the water treatment process and distribution system; development of recommendations and a report for maintaining compliance with both State of Michigan and federal agencies; and assistance in implementing accepted recommendations from the report. The report that Veolia would develop for the City would outline findings and provide recommendations for continual oversight of the approved recommended practices to improve the quality of water until the implementation of the Karegnondi Water Authority (KWA) project.

Veolia's Understanding and Proposed Approach to Providing the Water Quality Consultant Scope

Our longer-term approach would begin by addressing the immediate assistance outlined in your RFP, and then service beyond that scope. Under this expanded scope, Veolia would help with the transition from the Flint River source to Lake Huron water to avoid a repeat of this scenario. That transition is expected to be in place in 2016 and will complete the City's transition from using water provided by the Detroit Water and Sewerage Department (DWSD) to drawing water from the Flint River, using the City-owned water plant.

With a Notice of Proceed issued, Veolia would mobilize a team of experts, including our two prominent water SMEs, from our corporate Technical Services Group (an in-house team of technical and management experts that support the company's projects and operations throughout North America). These experts would include:

- **Marvin Gnagy, P.E. - Water Process and Quality Manager** – He has more than 37 years of water quality management experience, and is a certified Water Operator in Ohio and a registered Professional Engineer. Mr. Gnagy has completed projects that have involved the set of tasks that the City as defined under this contract, and was most recently engaged as a part of a Veolia team of experts that worked with DWSD and the City of Detroit on a program to evaluate their water and wastewater operations and proposed solutions. This included conducting an intensive due diligence examination of Detroit's water and wastewater facilities and operations, and the development of two reports, a Peer Review Report, which looked at the current operations with a focus on identifying immediate and long term needs, and a Transition Plan: Retail Services for the City of Detroit, which outlined the issues facing the DWSD and the City as the water and wastewater operations changed under a new regionalization approach. Through that work, Mr. Gnagy understands the City of Flint's drivers for this new project, and will be able to use the work that Veolia has done to date for the DWSD to aid in identifying the optimal solution for your water system and the transition from DWSD to your own operations.

  Mr. Gnagy's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water & Groundwater Treatment and Disinfection Byproducts (DBP) Reduction – Mr. Gnagy has very broad experience with both river water and groundwater treatment on project work involving unit process design and operations to meet drinking water standards and water quality goals. Indeed, he has

conducted numerous studies involving DBP (particularly THM) reduction to meet drinking water standards, establishing treatment alternatives and process targets for THM compliance solutions.

- Master Plan Development and Unit Process Improvements – Mr. Gnagy prepared the master plan and performed plant evaluations for unit process improvements to meet future drinking water standards for the City of Adrian, Michigan's10-MGD water treatment plant. That plan discussed multiple options for process improvements and chemical feed adjustments, specifically targeted for THM control treatment. Jar testing was used to define the chemical dosing and treatment scheme that resulted in the most effective THM reduction solution for the city. He also served as Project Manager for a DBP Reduction Study for the City of Akron, Ohio's 67-MGD water supply plant. That study reviewed jar testing evaluations and historical monitoring records to develop the necessary treatment process adjustments to effectively reduce THMs in the drinking water. Computer models were developed using the data obtained to predict the chemical treatment needs based on source water quality, and to predict THM concentrations following treatment adjustments using the chemical treatments selected. Recommendations included chemical feed adjustments and further study related to advanced treatment technologies.

  Other work in this area included serving as the Project Manager for an optimization study for the Village of Blissfield, Michigan's 2.2-MGD water treatment plant to determine needs for improved turbidity and THM concentrations. All major unit processes and chemical feed systems were evaluated for optimal treatment needs. Jar testing and plant operating adjustments were made weekly to improve water quality and process control. Implementation of organics control treatment was accomplished that successfully achieved compliance with both the turbidity and THM compliance requirements.

  Mr. Gnagy also conducted plant reviews, performed process design changes, designed new flocculation equipment replacements, and designed and started-up new washwater handling operations for several of DWSD's water treatment plants. That worked involved three plants, the Southwest, Lake Huron and Springwells water plants, and focused on improving operations and to meet drinking water compliance.

A full resume for Mr. Gnagy is provided as an attachment at the end of this letter.

- **Theping Chen, P.E. - Process and Operations Optimization Manager** - He has close to 30 years of water engineering, operations and research experience, and he spent 15 years as a water consulting engineer in Michigan and is a registered Professional Engineer in the State of Michigan. Mr. Chen's experience includes working with DWSD on various projects related to master plan, source water protection, water quality management, treatment process optimizations including PAC and ozone design criteria development, taste and odor control, residual management and capital improvement program development. He has also worked extensively with the Michigan Department of Environmental Quality (MDEQ) on compliance issues with focus on water quality compliance, and is a well-published author at the national and state level conferences.

  With Veolia, Mr. Chen has been engaged in supporting the ongoing operations and management contract for the City of Buffalo, New York's water operations, and in providing technical support for Veolia's water plant operations at the cities of Gloucester and Brockton, Massachusetts; with that work including jar testing evaluation and compliance strategies development for DBPs.

  Mr. Chen's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water and Groundwater Treatment – Mr. Chen has broad experience with both river water and groundwater softening treatment on projects including: on-call engineering, comprehensive needs assessment, filter and chemical system rehabilitation projects for the City of Marion, Ohio's 9.1-MGD water treatment plant (treating combined groundwater and river source water), under a scope of work that involved investigating DBP control strategies and conceptual design of a UV treatment system; a comprehensive regulatory review and capacity evaluation for the City of Dayton, Ohio's two groundwater water treatment plants (96-MGD each); and a comprehensive disinfection and DBPs compliance strategy review for the City of Ann Arbor, Michigan's water treatment plant (a combined surface and groundwater softening plant with at rated capacity of 27-MGD) as part of an overall Water Master Plan project.

- Ozone and Disinfection Technologies - His experience in this area included completing ozone system study, design, construction management and optimization projects for more than 10 municipal water treatment plants.
- DBP Compliance – Mr. Chen's experience in this area includes: optimizing and upgrading ozone systems, and proposing the use of biological filtration to enhance the TOC removal to control DBPs for the City of Shreveport, Louisiana's water treatment plant; optimizing chlorination application, conducting a review of contact time calculation to minimize DBP formation, and proposing UV system upgrades for the City of Marion, Ohio's water treatment plant; evaluating a commercial (self-fabricated) aeration system for installation in elevated and ground-level water storage tanks to reduce the hot spots in Northern Kentucky water treatment plant's water distribution system; and development of tracer test program to calibrate the water quality model for the City of Akron, Ohio.

A full resume for Mr. Chen is provided as an attachment to this letter.

These staff will be responsible for delivering on the immediate tasks that the City has defined:

- Reviewing and evaluating the City's water treatment process and distribution system. This will include evaluating the City's processes and procedures to maintain and improve water quality.
- Developing a report on the finding of the evaluation, with specific recommendations to maintain compliance with both State of Michigan and federal agencies. This will include outlining recommendations that will improve the water treatment and distribution system.
- Assisting the City in implementing accepted recommendations. This will include providing continual oversight and support for the implementation of any approved recommended practices. Recommendations will focus on those areas that will improve the overall process of treating and distributing water, including improvements to water quality until the implementation of the KWA project (anticipated to be by mid-2016) under which the City will be receiving and treating Lake Huron water.

In addition to Mr. Gnagy and Mr. Chen, our core staff group, would be assisted by other technical, operations, management and communications experts from Veolia to proceed promptly into implementation simultaneously.

We believe that addressing the fundamental issues concerning water quality compliance and operational reliability is much more complex than the recommendations study and advisory services approach outlined in your RFP.

We want to ensure that the utility can fix these immediate issues effectively and without delays, while at the same helping the City to begin to build capacity for the future and better manage the 2016 water source change in a systematic way – with all the relevant stakeholders engaged along the way.

In undertaking these tasks, Veolia understands that in 2014 the City completed the transition from using water provided by DWSD to drawing water from the Flint River – utilizing your own water plant to treat and distribute water to those served by your system. Since that transition process was completed, it was found that many of the City's eight water quality testing sites exhibited low chlorine residual levels, and several of those sites developed had positive tests for total coliform, which resulted in issuance of boil water notices for precautionary measures. To address this, the City implemented valve replacements and additional chlorination that yielded consistent chlorine residuals throughout the system. However, quarterly reporting to the MDEQ of Disinfectant Byproduct Levels resulted in trihalomethane levels above the maximum contaminant level (MCL), with an annual average level that triggered a violation notice from the MDEQ.

To date the City, working with an outside engineering team, developed and submitted to the MDEQ an Operational Evaluation Report. The next testing period is scheduled for the middle of February and an update to this report will be required by March 1, 2015. That update will incorporate the results of the tests required by the MDEQ.

The City is expecting to work with the selected Water Quality Consultant to complete the required testing and prepare the updated Operational Evaluation Report. As a secondary element of this task, the City is seeking to retain the selected Consultant to aid in the implementation of these suggestions.

Veolia excels at the day-to-day operation issues and understands how to fix them using diverse and subject matter expertise in a structured, bottom-up type, staff engagement process. That is why we designed the PPS approach to help convert the report findings into actionable items for the City of Flint's staff and then help them implement those changes. This would involves making sure that your staff understand why changes are being made, ensuring that they have the training necessary to make the changes, and then following up to be certain what is planned works or if not then provide help making adjustments. This will involve also a monitoring process to make certain the changes are on track for management and the public.

All of this can then be used to help the City to be prepared to begin receiving and treating raw water from Lake Huron through the KWA. The end goal of this process will be to develop within the City's staff a better understanding and capability to handle the changes in water, whether drawing water from the City of Flint's or the new KWA supply sources.

Veolia's Anticipated Level of Effort

In order to respond to the immediate needs of your defined scope of work, we anticipate mobilizing a team of technical, operations, maintenance and communications SMEs to: calibrate daily water quality samples with the City's hydraulic model; refine the operational strategies for the plant and distribution system; coordinate daily efforts across plant, operations and maintenance staff; and to alleviate continued concerns from the public through a public communications process. The elements of this approach would be delivered under a management and staffing approach which allows for collaboration between the City and Veolia's technical and management team.

For purposes of the scope of services outlined in the City's RFP, Veolia's core staff would be charged at a common rate of $225/hour, plus expenses.

For the longer-term type of approach, Veolia would set a single lump sum price for the study, implementation and long term services after review and discussion with the City on selecting your preferred approach – the PPS approach or the contract O&M approach. At that time, we can also explore an incentive-based (risk/reward) type of approach, one which is common under PPS contracts, where Veolia's fee is based on achieving performance targets that we would mutually agree upon. As demonstrated in our work with water and wastewater clients, Veolia's PPS model has provided great insight into working with large utility staffs to change the culture and ensure implementation of ideas that improve the utility's performance.

The methodology for implementing a PPS approach, as outlined on Figure 1 (below), includes each of the following steps:

- Preparation – This stage involves the mobilization of resources (Veolia and the City), a joint project kickoff meeting (Veolia and the City), development and implementation of a communications plan (Veolia and the

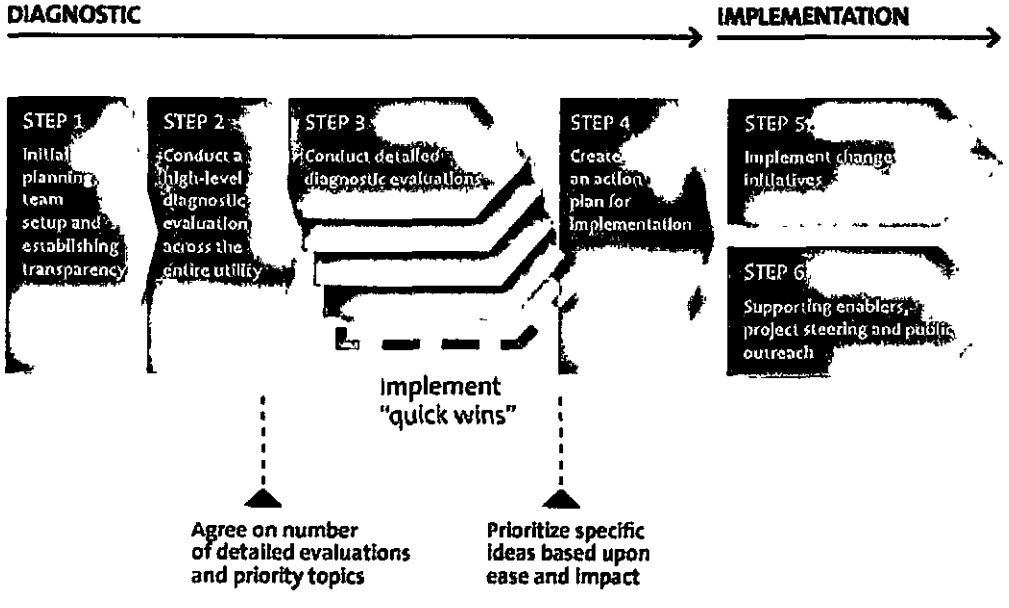

Figure 1. Veolia Peer Performance Solutions (PPS) – Service Delivery Model

City), and data collection (Veolia). The City and its consultants have already done a lot of work on the problem and are achieving some success.

- Top-down Analysis – This stage involves data analysis, benchmarking, field observations, interviews and idea generation workshops. This would be done to assure how effective current changes have been and if there are any additional actions to be taken.
- Bottom-up Analysis – This stage involves detailed analysis and modeling of the available options, working in collaboration with the City's management team and staff.
- Action Plan – This stage involves defining specific steps for a recommendation based on the actual, current state and desired state performance of an asset.
- Plan and Report – This stage involves the final development and delivery of a written report summarizing findings and presenting analyses and recommendations

These actions are what we would provide during the study phase of the project, and the following actions are what we would do to implement study recommendations

- Implementation – Putting plans into action. This involves working with O&M and management staff to carry out the proposed plan. This effort I focused on building capacity and confidence within the staff to solve the problem.
- Monitoring and Repeat – Monitoring the process and then repeating it, digging even deeper into the organization for additional savings and improvements.

Using this type of plan and approach, Veolia can address the immediate scope/needs defined for the Water Quality Consultant task, and work with the City of Flint to provide a long-term and sustainable approach for the needs of your water treatment and supply system.

Addressing the Requirements of the Invitation for Bid

Veolia recognizes that we are submitting this Proposal as an alternative approach for the City of Flint to consider within the procurement process that you have defined, and in that regard we are providing the other specific information that your have requested as part of the formal RFP response, including:

- Company's Information – Veolia Water North America Operating Services, LLC is the respondent, and the contact information for our firm is as follows: Veolia - 101 West Washington Street, Suite 1400 East, Indianapolis, IN 46204 - Telephone: 317/917-3700
- Firm Background and History – Veolia is a company that traces our history in providing operations and related services to municipal clients back more than 42 years. Today our firm ranks as the leader in the delivery of O&M and related services, including those under the PPS model. This include serving as the operator and manager of over 180 municipal wastewater systems (processing over 1.66 billion gallons a day of flow) and some 90 municipal water systems (providing over 715 million gallons a day of water).

Today, Veolia ranks grown as the leading water services provider in North American market, with more projects, operations, resources, expertise and demonstrated success than any other services provider. This record of performance and market leadership is affirmed in the most recent survey from the publication Public Works Financing (opposite), which shows Veolia's better than 40% market share, with revenues and a renewal rate that lead the industry. What these market leading indicators serve to show is that we can meet the standards of experience and capabilities that the City of Flint is requiring under this new contract.

Figure 2. Veolia Service Delivery Models and Experience

- Firm Qualifications, Experiences and References - Like the City of Flint, we are at our core utility managers and service providers, and Veolia understands the need for high quality, efficient service and dependable reliability. We also work with communities like yours to deliver services under a variety of contract models, each focused on providing our municipal partners with the best value under a long-term and sustainable approach and customized to their objectives. Figure 2, above, outlines our experience with various service delivery models, each of which involves working with clients to develop a customized approach to meet their particular needs and objectives. This table also shows the key advantages of each type of service delivery approach, with **green** being optimal in terms of ease of execution and delivery and **red** being the most challenging and complicated in terms of delivery. This table also highlights example projects where our firm has successfully delivered each of these approaches (and many of those are highlighted under the reference projects section of this letter). What this table also shows is that Veolia can offer alternative transaction structures, including long-term lease, concession arrangement or sale/purchase.

  As we discussed above, Veolia currently operates and manages 90 municipal water systems (providing over 715 million gallons a day of water); at the end of this letter we have provided a summary table of this experience.

  Following here we provide some of the specific clients/projects as the core references that we are submitting for the City of Flint's consideration:

  - **Pittsburgh Water and Sewer Authority (PWSA), Pittsburgh, Pennsylvania** - The PWSA's Board of Directors unanimously selected Veolia in 2011 to deliver an innovative approach to managing the system, provide measurable results to customers and demonstrate an ability to quickly and easily collaborate with employees. In 2014, this management assistance/PPS contract was extended for a new term, recognizing the success of the effort to date.

    Since the beginning of this partnership, Veolia has assisted the PWSA in realizing more than $5.5 million in annually recurring revenue and efficiencies.

    PWSA provides water and sewer services to 310,000 people in the City of Pittsburgh and surrounding areas. The agency hired Veolia to: 1) provide interim executive management services, leading 270 public employees in the delivery of water and wastewater services in the greater Pittsburgh area; and, 2) conduct a study to identify ways to cut costs and improve service. Under a management assistance scope, Veolia has worked with the PWSA to establish financial controls that limit spending and increase accountability, foster competition among companies seeking to do business with and on behalf of the PWSA, and identify opportunities for operational efficiencies having a direct impact on the utility's bottom line.

Under this contract, Veolia's management team is integrated into PWSA's organization to manage the agency's staff at their offices and operations sites, while another team of experts jointly identifies and evaluates improvement opportunities. This joint effort aims to help the PWSA improve the utility's customer service and performance levels.

Veolia in North America – Experience Profile

- 188 Municipal and Commercial Clients
  - 90 Municipal Water Treatment Facilities
    - 2,952 Miles of Distribution System Lines
    - 87 Water Pump Stations
    - 171 Water Wells
  - 183 Municipal Wastewater Treatment Facilities
    - 5,286 Miles of Collection System Lines
    - 1,158 Wastewater Pump Stations
    - 31 Industrial Pretreatment Programs
  - 13 Billing/Collection Operations
  - 23 Meter Reading Operations - 147,399 Meters Read
  - 4 Public Works Operations (other than Water/Wastewater)
  - 6 Operations Assistance/Peer Performance Solutions Projects
  - 53 Energy Installations (owned/operated/managed)
    - 631.6 MW of Energy Generation/Supply Capacity
    - 290,394 tons per day of Chilled Water Capacity
    - 443 MMBTU/hour Total Hot Water Capacity
    - 13.2 million pounds/hour of Total Steam Capacity
- 95 Industrial Clients
  - 60 Industrial Wastewater Treatment Facilities
  - 23 Industrial Water Treatment Facilities
- 913.3 Million Gallons Water Treated Daily
- 1.7 Billion Gallons Wastewater Treated Daily
- 293,089 Dry Tons of Biosolids Processed/Year
- 19.2 Million+ Population Served Daily

The study phase of this project (Phase 1) was completed, and that work effort helped PWSA improve the customer service and performance levels by utilizing in-depth diagnostics of current operations. Veolia also developed recommendations for improvement that were approved by the PWSA board, and we are now supporting PWSA employees in implementing initiatives aimed at reaching new performance metrics. The Phase 1 report identified measures that will lead to annually recurring savings. During the partnership's first year, a team of water and wastewater experts from Veolia helped PWSA improve the utility's customer service and performance levels by conducting in-depth diagnostics of current operations, developing recommendations for improvement and supporting PWSA employees in implementing initiatives aimed at reaching new performance metrics. The analysis and resulting operational changes helped PWSA reduce its cost of operations and increase the utility's revenue by, among other things, re-securing a large commercial customer. The total impact of these changes has allowed the PWSA to approve an annual budget without a water rate increase.

Early quick-wins under Phase 1 work for this project involved optimizing water production run-times at the membrane plant, which will reduce chemical costs by $350,000 annually, and implementing enhancements at the customer service call center that slashed the call-abandonment rate almost immediately and reduced customer call waiting time by half. A key focus of the work is on identifying efficiencies in O&M practices for over $3 billion in above- and below-ground infrastructure that serves the water and sewer conveyance needs of customers across 54 square miles. The initial tasks in this area involved working with the PWSA's managers and staff to meet Consent Decree (CD) obligations to state and county regulators. Under this initiative, Veolia's management and support teams worked to organize the department and create a culture of responsibility and accountability for the success or failure of projects. Veolia also worked with the PWSA's local and national engineering consultants and contractors to get them back on schedule, clearing a backlog of potentially litigious disputes, which allowed projects to move forward. Other tasks included working on the feasibility of creating a stormwater authority to better assess stormwater usage and create additional revenue for increased levels of service. Additionally, Veolia assisted with the planning for a more than $150 million Capital Improvement Program (CIP) covering three years. This initial program addressed the PWSA's most critical infrastructure needs. The underground (water and sewer) pipelines in Pittsburgh are 80 to 100 years old and winter line breaks are a constant occurrence, so the PWSA is continually replacing underground assets.

Throughout these efforts, Veolia's Pittsburgh-based team worked side-by-side with the PWSA's staff, helping them execute the utility-approved initiatives and training them to sustain the work after the work of this partnership is complete.

- Client Reference: Alex Thomson, Chairman of the Board, PWSA c/o Houston Harbaugh, P.C. - Three Gateway Center, 401 Liberty Avenue, 22nd Floor, Pittsburgh, PA 15222 - Telephone: 412/281-5060 - Email: athomson@hh-law.com

- **City of Buffalo, New York** - In 2010, Veolia began a 10-year partnership with the City for O&M of their water supply system which serves more than 77,000 customer accounts. This is the largest water system under contract O&M in New York State, with facilities and operations that include: a 160-MGD surface water treatment plant; 814 miles of water distribution system, customer service management (meter reading, billing and collections); capital program management; and underground asset management (UGAM) and above-ground asset management programs.

"The Buffalo Water Board... is confident that we have selected the best operator for our system ... Veolia Water's demonstrated focus on service has convinced us that our long-term partnership will result in notable advances ... We expect Veolia Water to move us forward through the next decade with marked efficiency improvements and technological advances while maintaining our exceptional water quality."
– Oluwole McFoy, Chairperson, Buffalo Water Board
Speaking at the start of the contract in 2010.

In additional, Buffalo was one of the first cities in the U.S. to use the Veolia North American Meter Testing Facility. Under that approach, some 400 meters from the City have been sent to the facility on an annual basis for accuracy testing and evaluation of remaining life. On average, Veolia repairs/replaces more than 3,400 meters annually in Buffalo, and customer service metrics involve answering up to 7,000 calls a month in one minute or less and collecting 96% of meter revenue. Some 96% of all meters in the City are true-read type, with only 4% being estimated, and over 3,000 commercial and industrial accounts in Buffalo are now on mobile-read AMR systems.

Veolia transitioned the City's water operations to our firm under a delegated management type of contract, with the O&M staff remaining direct City employees working under supervision of Veolia's management team. Under this arrangement, Veolia has worked with the City and the staff to establish new work disciplines and procedures and to drive performance and enhance the quality of service. A core part of this effort involved establishing some 20 performance metrics to track and determine performance and accountability under this partnership.

In the area of customer service, Veolia implemented new customer service phone/information systems and partnered with the Water Authority service center staff to implement a process of a customer service cultural change that have enhanced performance and provided a better customer experience.

  - Client Reference: O.J. McFoy, Water Board Chairperson, City of Buffalo, City Hall, 65 Niagara Street, Rm. 1101, Buffalo, NY 14202 - Telephone: 716/851-4333 - Email: omcfoy@sa.ci.buffalo.ny.us

- **Tampa Bay Water, Florida** - Veolia has worked with this agency since 2000 under multiple contracts that have focused on water treatment, storage and supply.

  Tampa Bay Water, a regional water authority, serves the needs of over 2.5 million people in the communities of Tampa and St. Petersburg, and this agency ranks as the largest wholesale treated water supplier in Florida.

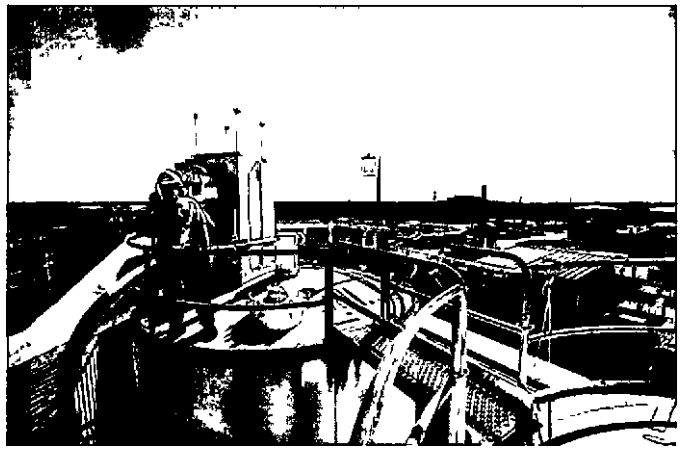
  Veolia's initial project with Tampa Bay Water began in April 2000 when, following a year-long selection process among four competitive teams, they awarded our company a $135 million, 15-year (with a 5-year option) contract to design, build and then operate a new 60-MGD Regional Surface Water Treatment Facility.

  Since that time, the Tampa Bay Water-Veolia Water Public-Private Partnership has constantly expanded over the years – a testament to the quality of our work and our client's trust and satisfaction.

Veolia's initial design-build-operated (DBO) contract was for a 66-MGD surface water treatment plant, and that was followed by additional service agreements for the maintenance of a 30-MGD groundwater treatment facility, O&M of a 15-billion reservoir, and an engineering-procurement-construction management (EPCM) type contract for a new 45-MGD hydrogen sulfide treatment plant and 20-MGD high-lift pumping station.

Tampa Bay Water also awarded Veolia Water a second DBO contract to expand (nearly doubling the size) the original surface water plant from 66-MGD to 120-MGD.

Today the Public-Private Partnership between Tampa Bay Water and Veolia Water is the largest in Florida, and the surface water treatment plant is among the most technologically sophisticated in the world.



The Public-Private Partnership between Tampa Bay Water and Veolia Water, which began in 2000 and now encompasses multiple projects for the water treatment and supply, ranks as the largest and most successful of its type in the State of Florida. The project has been recognized with numerous awards, including the 2013 Plant Operations Excellence Award from the Florida Department of Environmental Protection.

- Client Reference: Mr. Matt Jordan, General Manager, Tampa Bay Water - 2575 Enterprise Road, Clearwater, FL 33763 - Telephone: 727/796-2355 - Email: mjordan@tampabaywater.org.

- **DeKalb County Department of Watershed Management (DWM), Georgia** - DeKalb County is Georgia's third-largest county, with more than 700,000 residents. The DWM hired Veolia in 2014 to assist in identifying cost savings and customer service improvement, and work completed to date has involved conducting a comprehensive and independent review of their water and wastewater operations.

  DWM's operations include: a 140-MGD water treatment plant; 65 pump stations; two wastewater treatment plants (20-MGD and 36-MGD in capacity); more than 5,000 miles of water and sewer pipe; and a customer service operation that provides services to 700,000 residents in the Atlanta metropolitan region.

  The County and Veolia estimate that this review could produce as much as $8 million in savings annually for DeKalb ratepayers, reducing costs and helping mitigate rate increases.

  After a thorough analysis of existing operations, Veolia has presented a proposal to transform the entire customer service organization and leverage existing technological solutions to reduce wait times and increase satisfaction for customers. In addition to customer service, Veolia will support implementation of best practices across the utility's administration, planning, operations, maintenance and capital programs, and billing and collections.

  In tandem with the assessment, Veolia is working with the DWM to implement County-approved operations and management initiatives focused on achieving measurable operational, revenue and organizational enhancements to ultimately reduce operating costs and improve service levels, allowing DWM to provide more efficient and sustainable services.

  Some of the early wins under this contract have included: construction and maintenance wrench-time findings that offer the potential for more than $1 million in annual impacts; efficiency studies of field operations crews at the wastewater plant that identified more than $1 million in annual savings through in-sourcing current contractor spend; and more than $500,000 in annual savings identified in the areas of chemicals and power at the water treatment plant. Veolia continues to work with the County as we focus on shaping a long-term approach to meeting their needs.

  - Client Reference: Dr. James M. Chansler, P.E., Director DWM, DeKalb County - 1580 Roadhaven Drive, Stone Mountain, GA 30083 - Telephone: 770/621-7234 - Email: jmchansler@dekalbcountyga.gov

- **New York City, Department of Environmental Protection (DEP), New York** - Veolia began working with the DEP in 2011 to optimize their operations and help implement savings initiatives. New York City's water and wastewater operations that serve over 9 million people daily, delivering over 1 billion gallons of clean water and treating more than 1.3 billion gallons of wastewater per day. These operations include: 13 wastewater treatment plants; a new 290-MGD water treatment plant; 6,000 miles of sewers; and 7,400 of miles of distribution lines.

  The primary scope of this PPS program involved reviewing all aspects of this utility's operations to assess potential improvements in areas including: chemical use and pricing; labor productivity; inventory management; sludge process optimization; and overall O&M. Additionally, the project identified such enabling steps as public outreach, legislative initiatives and other processes for the implementation of recommendations.

  Veolia's final report for the Phase 1 work ultimately identified over 100 implementable measures for the City's consideration. Throughout the first phase of this innovative partnership, the City's employees worked alongside our project team under a joint management and governance structure to identify operational and organizational efficiencies. In order to capture "quick wins," our joint team identified and implemented several cost-saving initiatives within the first three months: chemical procurement modifications, for example, yielded million dollars in annual recurring savings.

  Under this approach, Veolia has identified opportunities that are expected to yield annually recurring financial benefits of more than $100 million by 2016, and, to date, over $90 million in savings and revenue enhancements have been reported by New York City's DEP. These benefits represented between 9% and 11% of the agency's $1.2 billion fiscal year 2012 budget.

  In June 2012, Veolia received notice to proceed with the official implementation phase, Phase 2, which involves implementing the approved recommendations of the assessment phase (Phase 1) under a four-year contract. To implement this phase of the project, we mobilized a world-class team to work with the City's staff in their offices and at their water and wastewater operations locations.

  Veolia's unique partnership, New York City's Operational Excellence (OpX) program, is focused on enhancing water and wastewater services, streamlining workflows, boosting efficiency and continuously identifying opportunities for improvements that will allow DEP to maintain its high level of customer service, safety and productivity while minimizing rate increases for its roughly 836,000 ratepayers. To achieve this, DEP set an ambitious goal for the OpX program right from the start – to achieve significant operating benefits by 2016. The program goes beyond individual projects and encompasses transformational initiatives, including enhancing performance management, strengthening core capabilities in human resources and procurement and fostering an organizational culture focused on performance and continual improvement. To reach these goals, the Veolia-led team worked with DEP to:

  - Review current O&M practices for potential improvements in terms of energy usage and production opportunities, chemical usage and pricing, labor productivity, inventory management and optimal sludge processes.
  - Recommend implementable measures to improve and/or streamline operations and maintenance, increase efficiencies, enhance productivity and reduce costs.
  - Support public outreach, legislative initiatives, and other processes required to implement recommendations.
  - Work with DEP staff to implement the recommended initiatives.

  During the top-down and bottom-up analysis work conducted in Phase 1, which continues in the Phase 2 work, the Veolia team identified current strengths within DEP's operation and noted five key areas where improvements will have significant financial benefits for the agency: efficient and sustainable use of resources and materials; enhanced workforce effectiveness; improved revenue collection; development of a metrics-based performance culture; and strengthening DEP's support services. The OpX program confirmed that DEP is a world leader in meeting drinking water and wastewater compliance, performing

well above the average of similar utilities. In the first six months of the OpX program, 100+ individual improvement ideas were identified and evaluated.

- Client Reference: Mr. Steve Lawitts, Chief Financial Officer, New York City DEP - 59-17 Junction Boulevard, 8th Floor, Flushing, NY 11373 - Telephone: 718/595-6576 - Email: slawitts@dep.nyc.gov.gov

- **City of Indianapolis, Indiana** - From 2002 to August 2011 (when the City completed the sale of its water system assets to a quasi-governmental utility services provider), Veolia operated what was (at the time) the largest water system O&M contract in the U.S. The Indianapolis water system is a regional operation, serving the needs of almost one million people in central Indiana, and included: four surface water treatment plants, ranging in size from 16-MGD to 96-MGD; five groundwater treatment plants, ranging in size from 2-MGD to 24-MGD; a 4,300-mile water distribution system; and pumps, storage tanks and reservoirs. The City's water system includes 38,000 fire hydrants, 300,000+ customer accounts, meter reading (310,000 meters – residential, commercial and fire), meter replacement program, and billing & collection (600,000 accounts). A key element of the project focused on customer service improvements, and over the nine years of work in managing this system (prior to the sale of the utility by the City), Veolia achieved a customer satisfaction rate of at least 90% (independent survey) and answering 88% of 70,000 monthly calls within 30 seconds. Improvements that were implemented by Veolia in the area of customer service includes empowering customer service employees to resolve most issues on the first call ("One and Done"); responding to 99% of emergency calls within 60 minutes; maintaining the operations ranking in the top quartile for performance in billing accuracy, customer complaints and O&M (AWWA benchmarking survey); ensuring customers were not without water for more than 12 hours; providing customers with 24-hour access to their billing and account information.

  Over the course of this nine-year contract, Veolia stopped a trend of substantial annual customer rate increases and had achieved a cumulative $83.1 million in savings at contract completion in 2011. At the end of the contract, our annual operating costs were some $2 million less than the previous management's had been when we started in 2002. We also improved the quality of operations by simultaneously achieving ISO 9001 and 14001 certifications, making the City the only major U.S. city to achieve both certifications.

  Veolia also worked with this client to establish a set of key performance indicators (KPIs) that formed the basis for the award of a portion of our fee. Under the incentive plan, a portion of our fees were paid only if we met specified customer service, water quality, operations and other performance measures. By directly linking performance to compensation, this partnership established a new model in the water outsourcing industry. Over the nine-year life of this agreement, Veolia achieved over 90% of incentive payment fees.

  - Client Reference: Mr. Sam Odle, Past Chairman, Board of Waterworks - City of Indianapolis, 3939 Priority Way S. Drive, #400, Indianapolis, IN 46220 - Telephone: 317/706-6349 - Email: samuallodle@gmail.com

- **Atlanta/Fulton County, Georgia** - Veolia, in a 50-50 joint venture with a minority-owned business enterprise, began operating the Atlanta-Fulton County Treatment Plant (which opened in November 1990). Over the term of this contract, Veolia has worked with the facility owner, the Atlanta/Fulton County Water Resources Commission (AFCWRC), to triple the capacity of this water treatment plant using a variety of process improvement and capital improvement approaches.

  The scope of work for this project has involved all aspects of facility O&M, as well as working with the AFCWRC for facility expansion and upgrade. Over the past decade, Veolia implemented a pilot program to increase the plant's 30-MGD production capability to meets its rated flow of 45-MGD (as rated by the Georgia Environmental Protection Division, GEPD), with no capital expenditures. Subsequent efforts increased the plant's rated capacity to 56-MGD; with an ultimate treatment capacity of 135-MGD. Water demand is so great that the AFCWRC began Phase II earlier than planned to upgrade the plant to 90 MGD. The plant has been running at this new flow capacity since March 1998.

  Veolia's O&M program has also reduced the power, chemicals, and overall operations costs, with savings passed on 100% to the AFCWRC. In addition, we have had no change orders to the contract even though the plant capacity expanded to 90 MGD under our current agreement.

The project also includes O&M responsibility for a 200-MGD raw water pumping station, dual 54-inch raw water pipe, more than 800 million gallons of reservoir capacity, and the treatment plant. The raw water pumping station—located on the Chattahoochee River—and raw water mains connect it to the surface water treatment plant. Major process equipment at the plant includes raw water traveling screens, grit removers, pumps, chemical addition/feed systems, meters, rapid-mix and flocculation chambers, declining-rate filters, clearwell storage, and finished-water pumps.

The success of the water operations project also led to a new contract with Fulton County for the O&M of their regional wastewater facilities, as highlighted above, and in 2014 Veolia was again selected for the renewal of the water operation contract under a competitive renewal process.

- Client Reference: Ms. Kathy Crews, General Manager - Atlanta-Fulton County Water Resources Commission - 9750 Spruill Road, Alpharetta, GA 30202 - Telephone: 678/942-2790 - Email: kcrews@afcwrc.com

- **District of Columbia Water and Sewer Authority (DC Water), Washington, DC** - DC Water is the largest wholesale customer of the Washington Aqueduct (Aqueduct), a federally-owned public water supplier operated by the U.S. Army Corps of Engineers. Veolia was retained to conduct a comprehensive evaluation of the Washington Aqueduct operations and related organization processes, and then recommend improvements that will add value to the delivery of services to its wholesale customers.

  Working in collaboration with Aqueduct staff, Veolia brought in experts to complete the evaluation phase (Phase 1), focused on identifying ways to ensure that DC Water is receiving reliable, quality drinking water at efficient production cost. More than 25 individual improvement ideas were identified and thoroughly evaluated during the four-month study phase, and up to 15% in savings were identified by the Veolia at the Aqueduct. The cumulative annual impact of successfully transforming operations is projected to be between $8 million and $12 million total (OPEX and CAPEX) recurring yearly saving.

  Veolia worked to review every aspect of the Aqueduct's operations, including the treatment process, maintenance and support functions. This review included the Aqueduct's capital program and also included an assessment of the key financial metrics and a high-level asset valuation.

  Additionally, our team worked to benchmark the Aqueduct operations against some of Veolia's own operations, as well as other publicly operated utilities in order to identify gaps in performance and efficiency. This comprehensive analysis work involved site visits to the treatment facilities, discussions with staff, hands-on observations of the work performed, and in-depth review and analysis of all of the documentation provided. For example, the maintenance assessment involved over 100 hours of wrench-time observations, and for the procurement scope, we reviewed all of the contract specifications, terms and conditions. As part of this work, our teams conducted over a dozen one-on-one discussions and workshops with leadership and staff.

  Veolia's team also analyzed data available across the organization and built new databases where necessary to generate insight. For instance, we used the CMMS data to develop the Pareto analysis in the maintenance section of the final report. To recommended implementable measures, Veolia facilitated workshops to generate, prioritize and refine initiatives across the different scope areas of the assessment. Most of the prioritization took place during the Steering Committee meetings, which included both Washington Aqueduct and DC Water participation and input. The Wholesale Customer Board was also involved in the review process through a presentation in September 2013 that summarized the primary findings and recommendations of the study. Working with the Washington Aqueduct and DC Water, Veolia identified approximately 10 improvement initiatives for maintenance, six initiatives in capital planning, five initiatives for water treatment, three initiatives for operations and two initiatives for support functions, including procurement. All of these more than 25 initiatives are supported by proposed enhancements in communications, training and performance management. These activities are often referred to as "enablers," which help organizations get the most out of their initiatives by properly supporting them with investments in these three overlapping activities.

Veolia has been selected to continue into Phase 2, Implementation, and that work (which will begin in 2015) will involve advising Aqueduct management and staff, coaching them on how to perform the recommended enhancements, measuring progress and refining approaches. The focus of this approach will be on ensuring that the staff can carry on this work and that the Washington Aqueduct can continue to benefit from our expertise long after our contract concludes.

- Client Reference: Thomas P. Jacobus, General Manager - Washington Aqueduct, Baltimore District, U.S. Army Corps of Engineers, 10 South Howard Street, Baltimore, MD 21201
  - Telephone: 202/764-0031 - Email: thomas.p.jacobus@usace.army.mil

- Staff Experience – Veolia has provided resumes for the two core staff proposed for this project as an attachment to this letter. These resumes provide the requested information on each staff member, including experience, relevant education, degrees, certifications and any other pertinent information related to the base of experience they bring to this partnership with the City of Flint.
- Project Scope – At the start of this letter we provided a statement discussing our firm's understanding of the requested services and our approach to providing the services requested.
- Price for Services – With our proposed approach, presented earlier in this letter, Veolia provide a pricing schedule (hourly rates for key staff) to perform the requested services.
- Affidavit – Veolia has completed the required Affidavit and it is provided as part of our submittal (as an attachment to this letter).

Finally, as we discussed at the start of this letter, Veolia is offering this as an Alternative Bid/Proposal, which is being submitted to you in the requested form and format – an executed original and two copies of our letter proposal submittal – and remains a valid offer for 120 days from the date of submittal. Further, our Bid/Proposal is based on the City's RFP and other documents and information provided as part of the procurement process, as well as on the contractual concepts under which Veolia normally provides the services outlined in this letter. Veolia's Bid/Proposal also assumes the negotiation and execution of a mutually acceptable contract consistent with those concepts. We would note that contractual provisions that often require discussion and further agreement include, among other provisions, warranties, indemnities, casualty risks, insurance, environmental liability, ownership of wastes, consequential damages, contractual limits of liability and remedies for breach or default and termination. We do not believe that these matters should present any serious obstacles to the negotiation of a contract, and we are prepared to meet with you to discuss them at your convenience.

As the Veolia Executive Sponsor for this proposed work with the City of Flint, I will be the key contact as we move forward with this process. Further, as we discussed in our meetings with you, my background for this key role includes a combination of utility management experience, as well as experience in leading Veolia's PPS work with other major communities and water utility operations in the U.S.

I am also the former President and Manager of the water system for the City of Indianapolis, which Veolia operated and managed for over nine years. Under that O&M contract, our firm achieved an industry-first in performance standards and quality management.

My contact information for the purposes of this Proposal is as follows:

Mr. David Gadis – Senior Vice President – Sales – Municipal and Commercial Development
Veolia Water North America Operating Services, LLC
101 West Washington Street, Suite 1400 East, Indianapolis, Indiana 46204
Telephone: 317/716-5683 – Fax: 317/917-3718 – Email: david.gadis@veolia.com

I invite you to contact me should you have any questions with regard to our Bid/Proposal, or if you need any additional information.

We very much look forward to your review of this submittal and the next steps in this procurement process for this proposed new partnership.

Sincerely yours,

David Gadis
Senior Vice President
Veolia Water North America Operating Services, LLC

Attachment 1

Resumes for Key Staff

VEOLIA

Marvin C. Gnagy, Jr., P.E.

VEOLIA

Education:

BS, Chemical and Environmental Engineering, University of Toledo

Registrations/ Certifications:

F-1 Waterworks Operator, Michigan

Registered Professional Engineer, Ohio

Class IV, Water Supply Operator, Ohio

Class III, Wastewater Operator, Ohio

Memberships/ Affiliations:

American Water Works Association

Operator Training Committee of Ohio (OTCO)

Background:

Mr. Gnagy is the Water Process Manager with the Engineering and Optimization group of Veolia Environnement North America (Veolia)'s Municipal and Commercial Technical Support Group. In this role he provides support for Veolia's design/build, design/build/operate (DBO) and operations, maintenance and management (O&M) projects in the U.S. and Canada. This includes providing technical and capital project support to municipal, commercial and other projects in the water and energy business lines.

Mr. Gnagy joined Veolia in 2010, and prior to his current role he worked as the Municipal Water Technical Manager with Veolia Water North America Operating Services, LLC (Veolia Water)'s Technical Direction Group. In these technical leadership roles, he has provided engineering and operational expertise to projects related to troubleshooting process and equipment problems, achieving water quality goals, maintaining regulatory compliance, optimizing treatment and chemical processes, maintaining system water quality and participating in the development of new projects throughout North America.

Mr. Gnagy has also worked as part of the teams engaged in the delivery of projects under Veolia Water's Peer Performance Solutions (PPS) project approach. This new approach involves working with large water and wastewater utilities in to conduct detailed operations evaluations that lead to operations efficiencies and cost saving for their operations. In this work, Mr. Gnagy has provided support for some of the largest water and wastewater utility operations in the U.S., including that for New York City, New York.

Mr. Gnagy has over 33 years of experience in management, operation, maintenance, design and construction of water treatment systems. He is experienced with chemical treatment operations and troubleshooting for the optimization of treatment processes and operational sequencing.

Mr. Gnagy also has experience in conventional and advanced treatment technologies, and has been involved with solving treatment issues and providing regulatory compliance. His experience includes: water supply development and monitoring; chemical treatment; mixing applications; taste and odor control; oxidation and coagulation treatment; chemical softening; ion exchange softening; clarification; filtration techniques; membrane filtration and membrane softening; disinfection methods; pumping operations; bench-scale, pilot testing and demonstration studies; high-rate treatment technologies; dewatering and solids handling; and process monitoring and optimization. His design experience has provided operator-friendly solutions to solve both regulatory and operational issues for a number of water treatment systems in the U.S.

In addition, Mr. Gnagy has specific knowledge of regulatory drivers and compliance in multiple state, and he has been involved with the development of site-specific operating strategies that help treatment plants achieve water quality goals and regulatory standards.

Work History:

- **2013-Present: Water Process Manager – Engineering and Optimization Group – Municipal and Commercial Technical Support Group – Veolia Environnement North America**
  - Works as part of an in-house specialty team that provides technical and management support for new and ongoing projects with municipal and commercial clients. This involves supporting projects under the water treatment and supply, wastewater collection and treatment, and energy utility operations and management business lines.
  - Served as Subject Matter Expert in the area of water operations for a contract with the Detroit Water and Sewerage Authority (DWSD) and the City of Detroit to evaluate their water and wastewater operations and proposed solutions. This includes an intensive due diligence examination of the facilities and operations and development of two reports, a Peer Review Report, which looked at the current operations with a focus on identifying immediate and long term needs for the DWSD, and a Transition Plan: Retail Services Report for the City. These reports outlined the issues facing the DWSD and the City as the water and wastewater operations changed under a new regionalization approach.
- **2010-2013: Municipal Water Technical Manager – Technical Direction Group - Veolia Water North America Operating Services, LLC**
  - Worked as part of the Veolia Water PPS team in New York City (operations evaluation and identification of improvements for the City's water supply systems), as well as the team involved in implementing a PPS project with DC Water and Sewer Authority (DC Water), Washington, DC. The DC Water project involved conducting an independent comprehensive review of the operations and management of the Washington Aqueduct (WAD). The focus of this work was on examining WAD's operations, considering: overall operational efficiency; reliability and security of supply; and total water quality management. The project with New York City involved operations efficiency studies that identified utility-approved opportunities expected to save the City $108–$130 million per year; Veolia Water is currently engaged in the implementation phase (Phase 2), which will cover the next five years.
  - Responsible for providing technical and operational expertise to current and ongoing Veolia Water projects. Participated in the development of new projects throughout North America.
  - Provided technical consultation and process troubleshooting for water treatment plant operations throughout the U.S., including a variety of conventional and advanced water treatment processes and the specialized equipment they employ.
- **2009-2010: Water Resources Manager - Brown and Caldwell**
- **2005-2009: Water Resources Manager/Operations Manager - URS Corporation**
- **1996-2005: Operations Specialist/Senior Design Engineer - Arcadis**
- **1989-1996: Operations Specialist - Jones & Henry Engineers**
- **1986-1989: Superintendent of Water - City of Defiance, Ohio**
- **1979-1986: Superintendent of Water - City of Berea, Ohio**
- **1977-1979: Water and Wastewater Operator - Village of LaGrange, Ohio**

Other Key Experience:

- Involved with the testing design and optimization of treatment processes including: source water characterization and oxidative organics fractioning; carbon adsorption; enhanced coagulation techniques; effective mixing applications; high-rate clarification processes; solids contact clarification; high pressure and low pressure membrane technologies including ultrafiltration (UF) and nanofiltration (NF); TOC removal and DBP control; enhanced softening techniques; anion exchange processes; chlorine and chlorine dioxide disinfection; chloramination; precipitative

softening and recarbonation; tube and plate settlers; sludge management (pumping and processing, gravity thickening, lagoon storage and dewatering, land application, filter press dewatering and centrifuge dewatering); and laboratory analyses and operations.

- Significant experience in distribution system operations, including pumping operations, booster disinfection techniques, water quality monitoring, taste and odor investigations, iron and manganese related issues, unidirectional flushing programs, cross connection control, and repair and maintenance of piping systems.
- Served as Project Manager for a number of water treatment plant design projects related to implementation of chemical and treatment process improvements aimed at achieving compliance with drinking water standards, and improving plant operations and water quality. Provided construction oversight for the projects once construction of the improvements began.
- Provided chemical and process optimization services for a number of water treatment plants across the U.S. defining needed upgrades in operating practices and/or process equipment to enhance water quality and reduce operating costs.
- Conducted a number of bench-scale, pilot-scale, and full-scale process investigations related to identification of operating strategies and advanced treatment technologies to meet more stringent drinking water standards and developed recommendations for process treatments and equipment necessary to achieve regulatory compliance.
- Designed and equipped municipal drinking water laboratories for process monitoring, bacteriological analyses, algae identification and speciation, and advanced instrumentation and analyses.
- Prepared site-specific water and wastewater treatment plant operations and maintenance manuals for more than 120 systems across the U.S. outlining operating strategies, equipment descriptions, process control techniques, instrumentation and control systems, troubleshooting, and maintenance activities.
- Developed operating standards and training manuals related to jar testing and coagulation operations, mixing applications, solids contact clarification, water and wastewater disinfection, lime-soda softening and recarbonation techniques, filter inspection techniques, formation and control of DBPs, and an overview of the Stage 2 D/DBP and LT2 ESWT Rules. Also served as principle instructor for these courses since their development.
- Instructor for basic and advanced water treatment courses for the Operator Training Committee of Ohio; and instructor for basic math, basic chemistry, and basic hydraulics for the Michigan Department of Environmental Quality.

Theping Chen, P.E.

VEOLIA

Education:

BS, Environmental Engineering, East China University of Chemical Technology, 1985

MS, Environmental Engineering, University of North Carolina at Chapel Hill, 1991

Registration:

Registered Professional Engineer, Michigan

Additional Training and Certification:

Construction Documentation Technologist

Memberships/ Affiliations:

American Water Works Association (Past National committee members on Source Water Protection, Taste & Odor, and Organic Contaminant Control)

Water Environment Federation

International Ozone Association

(Current PAG board of directors, and past conference planning committee),

International UV Association

Background:

Mr. Chen is a Process and Operations Optimization Manager with the Engineering and Optimization group of Veolia Environnement North America (Veolia)'s Municipal and Commercial Technical Support Group. In this role he provides support for Veolia's design/build, design/build/operate (DBO) and operations, maintenance and management (O&M) projects in the U.S. and Canada. This includes providing technical and capital project support to municipal, commercial and other projects in the water and energy business lines.

Mr. Chen has almost 30 years of water system engineering, operations and research experience. He joined Veolia in 2014 and has been engaged in supporting the delivery of projects under O&M and Peer Performance Solutions (PPS) project approaches. The PPS approach involves working with large water and wastewater utilities in to conduct detailed operations evaluations that lead to operations efficiencies and cost saving for their operations. In this work, Mr. Chen has provided support for some of the largest water and wastewater utility operations in the U.S., including that for New York City, New York, and Washington, DC. Most recently he was part of the Veolia team that worked with the Detroit Water & Sewerage Authority in conducting an operations assessment, which yielded a comprehensive due diligence report and a second future planning/operations report for a regional approach for the water and wastewater operations.

Mr. Chen's experience includes working as a Senior Technical Specialist, Senior Project Manager, Technical Manager, as well as Research and Development (R&D) Specialist. He has extensive experience in water, wastewater treatment and water quality, and has worked on numerous study, planning, design, and services during construction projects. This work has included master planning, water and wastewater treatment, taste and odor control, asset management, biosolids management, residual management, and water quality.

Work History:

- **2014-Present: Process and Operations Optimization Manager – Engineering and Optimization Group – Municipal and Commercial Technical Support Group – Veolia Environnement North America**
  - Works as part of an in-house specialty team that provides technical and management support for new and ongoing projects with municipal and commercial clients. This involves supporting projects under the water treatment and supply, wastewater collection and treatment, and energy utility operations and management.
  - Served as a Technical Support Manager for PPS and O&M project sites, including:
    - DC Water and Sewer Authority (DC Water), Washington, DC. - Project involved conducting an independent comprehensive review of the operations and management of the Washington Aqueduct (WAD). The focus of this work was on examining WAD's operations, considering: overall operational efficiency; reliability and security of supply; and total water quality management.

Under the DC Water PPS project task, a key work task included: conducting a workshop evaluating the induction mixer to improve rapid mixing, review of water quality and chemical dosages, alternatives for controlling algae in the two water treatment plants) for the Washington Aqueduct McMillan Water Treatment Plant.

- Pittsburgh Water & Sewer Authority (PWSA), Pennsylvania – This PPS project has involved evaluating the operations of this agency's water and wastewater operations. This utility serves more than 300,000 people in the greater Pittsburgh area. A main area of focus for the work was on the development of Key Performance Indicators (KPIs) that were used to drive system improvements for the PWSA. Work tasks engaged in under this contract involved evaluating the algaecide alternative, and CAL-FLO replacing lime.
- Detroit Water & Sewerage Department, Michigan – Served as part of a team that worked with the DWSD along with Counties in the greater Detroit area in shaping comprehensive water and wastewater solutions considering the needs of the City and those of customers in the surrounding County areas. The work involved developing a comprehensive Peer Review Report, along with a second report (Retail Report) that discussed issues surrounding the formation of the Great Lakes Water Authority and the impact of that on operations of the DWSD and the City of Detroit. These reports involved performing extensive due diligence of the City's water and wastewater assets, preparing reports documents and supporting materials, and then presentations to multiple parties, including state level and judicial, City and County managers. Work tasks under that contract included conducting a process review for the DWSD's five water treatment plants.
- City of Buffalo, New York – This is an O&M contract that began in 2010 for operations and management of a water system serving a population of 280,000, with facilities and operations that include: a 160-MGD surface water treatment plant; 814 miles of water distribution system, customer service management (meter reading, billing and collections); capital program management; and underground asset management (UGAM) and above-ground asset management programs. Involved in supporting this operation in soliciting bids for an induction mixer and streaming current monitor, and alternative evaluations for these systems.
- City of Brockton, Massachusetts – This is an O&M contract that began in 1988 and includes: water operations for a 1.3-MGD and a 24-MGD surface water treatment plant, two raw water pump stations (40-MGD capacity), and two ground storage tanks (11.4 million gallons capacity); and wastewater operations for a 20.49-MGD tertiary wastewater treatment plant, three pump stations, and an 18 dry ton per day multiple-hearth sludge incinerator. Served as the Lead Technical Support Specialist for the conduct of a comprehensive water quality and water treatment plant review. This included evaluating alternatives for algae control, TOC and manganese removal, and evaluating manganese removal and short filter runtime, as well as backwash pump cavitation issues.
- Owned and Managed Energy Operations – Conducted a comprehensive system operation and optimization review for two Veolia energy makeup water treatment plants, including: Kendall Station Cogeneration in Cambridge, Massachusetts and the Grays Ferry Cogeneration Plant in Philadelphia, Pennsylvania. This included performing a review of river source water pretreatment alternatives, and identifying optimization opportunities of the ultrapure water treatment processes.

- **2013-2014: Independent Water Consultant – Solon, Ohio**
- **2012-2013: Project Principal - ARCADIS US Water – Cleveland, Ohio**
  - Served as Task Lead for softening water treatment plant upgrade and expansion evaluation for:
    - Dayton and Montgomery County Water Efficiency Master Plan, Ohio- Worked as the senior consultant and lead author of the three tasks reports, including: Task 5 - Water Treatment Plant Capacity Evaluation and Assessment for two 96-MGD softening water treatment plants; Task 6

– Regulatory Review and Compliance Assessment; and Task 9 – Evaluation of Groundwater Wells Reclassification's Impact on Water Treatment.

- Delaware County Water System Master Plan, Ohio – Served as the Task Lead for water treatment. The work involved evaluating the historical water productions and forecasted the future water production profile. Evaluated the treatment plant expansion and upgrade needs for four surface water and groundwater softening plants to best utilize the available source of supply to meet the future water supply needs. Provided recommended scope of work, process schematic and opinion of cost for upgrading and expanding the water treatment plants.
- Northeast Ohio Regional Sewer District (NEORSD) - Cleveland, Ohio – Worked as a Technical Consultant/ O&M Manual Task Process Engineer for the NEORSD's Southerly Wastewater Treatment Plan's biosolids handling facility. Responsible for preparing an O&M manual for the centrifuge dewatering system.
- Eureka Resources, Pennsylvania - Served as Process Mechanical Design Task Leader for a new frac wastewater treatment plant. The process included: oil/water separators; primary clarifiers; pH adjustment units; membrane biological reactors; crystallizer; sludge thickening and dewatering units; and various raw wastewater and treated wastewater storage tanks. Lead the design documentation preparations and coordinated and reviewed the P&ID drawing development.
- New York City, Department of Environmental Protection, New York - Performed a quality assurance and quality control (QA/QC) role for the NYDEP's Groundwater Treatment BOD report. Reviewed basis of design report for treatment of three well sites which uses treatment processes such as air stripping with and without vapor GAC adsorption, liquid GAC adsorption, and chemical oxidation followed by filtration for iron and manganese removal.
- City of Monroe, Michigan – Served as the Technical Lead for the City's Water Treatment Plant Ozone System Improvement Study. Assessed the current conditions of the existing system, evaluated different generator and ozone contactor improvement alternatives, and made recommendations and provided opinion of cost for each alternative.
- Other Work - Supported winning proposals for Akron Water Quality Modeling, Alliance Joint Dewatering System, and Minneapolis Water Pool of Consultants. Served as: Technical Knowledge and Innovation and Technical Community of Practice member; Client Account Manager for Aqua Ohio and Pennsylvania American Water; and manager and support specialist for business development efforts, including pursuits with DWSD, NEORSD, the Louisville Water Company, the City of St. Louis, the MSD, the City of Toronto's wastewater treatment plant, the City of Ann Arbor's water treatment plant, the City of Toledo's water treatment, and the Warren County water treatment plant.

- **2012: Technical Director and Technical Practice Network Leader, Water and Urban Development - AECOM Asia - Hong Kong/Shanghai China**
  - Served as the Technical Practice Network Leader and the Team Leader for: Asian Development Bank/JiangXi Government Boyang Lake Water Resource Management project; Project Manager of Shanghai Wastewater Treatment Plant Sludge Management Strategy Optimization Study; and Process Lead for the 50-MGD first membrane filtration plant feasibility study, and first 37-MGD sea water desalination plant feasibility study proposal in Hong Kong.
- **2010-2012: Regional Director, Water and Urban Development - AECOM China – Shanghai**
  - Served as the Regional Director for Water and Urban Development in China with responsibility for: operation, strategic plan development, client management, business development and project delivery and staffing management of PRC WUD business line; leading the team winning record numbers of ADB and WB funded PPTA, ADTA and loan implementation projects (over $10M USD) in 12 months; conducting high profile national strategy and policy projects in China on Boyang Lake

Water Resource Management (largest fresh water lake in PRC), National Stormwater Management and Water Logging Prevention Policy Study, and National Wastewater Treatment Plant Sludge and Wastewater Reuse Technology and Policy Study for PRC; consulting on wastewater treatment plant sludge management technical route studies for Beijing and Shanghai, two largest municipalities in PRC, including two of world's largest wastewater treatment plants: the Beijing GaoBeiDian plant and the Shanghai BeiLongGang plant; and serving as Process Manager for the Hong Kong Shatin Water Treatment Plant reprovisioning (expansion from 90-MGD to 145-MGD) with ozone and two-stage filtration (one biological) treatment processes.

- **2010: Senior Project Manager/Senior Technical Specialist - AECOM - San Francisco, California**
  - Worked as Senior Project Manager supporting AECOM Water operations and projects in North America. This included:
    - Project Manager and Lead Process Engineer on the Groundwater Reuse project for NASA Ames Research Center in Moffat Field, California. Upgraded the collection system from three pump-and-treat groundwater treatment systems, conducted hydraulic analysis and designed the pump and control upgrades. Designed the modifications of converting the existing 240,000 gallon tank into a RO permeate storage tank. Lead the alternative evaluation, and design services for treating the three different sources of pump-and-treated groundwater. Prepared the D/B contract for construction of a new 850,000 gallon tank. Designed the upgrade to the RO pretreatment system including the installation of dual media filter, UV reactor, and chemical feed system. Designed the refurbishment of the RO system including the new pumps, sensors, and RO membrane elements. Designed the new CIP system, and CIP waste neutralization and disposal system and piping, RO concentrate disposal system and piping. Designed and upgraded the control system for the RO permeate distribution system, provided the constant pressure in the system that allows the auto-source switching in the event the distribution system loss of pressure.
    - Engineering Manager for a multi-year, as-needed, system-wide zebra mussel study and control project with the California Department of Water Resource.
    - Senior Technical Consultant on the City of Portland, Oregon's, 225-MGD Bull Run Water Treatment Plant Chlorination Alternative Study. Evaluated bulk hypochlorite storage and feed, low strength (0.8% wt.) onsite generation of hypochlorite, high strength (12% wt.) onsite generation of hypochlorite, and onsite gas chlorine generation technologies. Conducted the conceptual design, including sizing, layout, list of equipment, construction and O&M cost estimate. Conducted the market research on installations, operation experience and cost.
- **2006-2009: Global Drinking Water Oxidation & Disinfection Technical Practice Workgroup Leader, Project Manager and Senior Technical Specialist – Metcalf & Eddy, Inc. (later acquired by AECOM) – Cleveland, Ohio**
  - Served in multiple roles for an engineering and operations company, including serving as: Global Drinking Water Oxidation and Disinfection Technical Workgroup Leader; International Ozone Association Champion; Ohio American Water Company (OAWC) Client Coordinator; Senior Technical Specialist; and Project Manager.
  - Key project work and accomplishments included: developing the company's first project for from both Ohio American Water and Pennsylvania American Water, and then managing the treatment plant projects with these two clients; developed the $25 million Ashtabula Water Treatment Plant design/build project with the OAWC; organized the workshop for IO3A and IUVA/IO3A conferences; served as Project Manager and Lead Process Engineer for the OAWC Marion Water Treatment Plant chemical and filter systems improvements project; served as Project Manager for the OAWC Marion Water Treatment Plant needs assessment study, and on-call engineering services for both water and wastewater systems; served as Project Manager for the Elyria Water Treatment Plant intake study and preliminary design project; served as the Lead Technical

Engineer on the Shreveport ozone system improvement study and preliminary design project; served as the Lead Technical Engineer on Miami-Dade County Water and Sewer Department's Hialeah Water Treatment Plant filter backwash improvement alternative evaluations; served as the Project Manager and Lead Process Engineer for the Pennsylvania New Castle water treatment plant filter-to-waste addition project; and Project Engineer for the Northeast Ohio Regional Sewer District's ECT-4 Baffled Drop CSO Shaft Physical Model Study.

- **2001-2006: Multiple Technical and Management Roles - CH2M HILL – Detroit, Michigan**
  - Worked in multiple roles, including: Northeast Regional Water Process Practice Leader; Northeast Regional Water Treatment Technology Leader; member of the Detroit Client Service Management Team; Member of the Northeast Regional Water Service Team; Technical Director of China Water Business Group; and Project Manager.
  - Responsibilities in these roles included: contributing to developing strategic business plan for local, and region-wide markets; maintaining client contact and involvement in business development efforts for strategic water projects; and contributing to business development for water projects in Ann Arbor, Louisville, Cincinnati and other communities in the Mid-West.
  - Worked on multiple projects with the DWSD, including:
    - Task Manager for DWSD's 50-year Comprehensive Water Master Plan. This work involved: evaluation of capacity development; analysis and projection of significant industrial flows and loadings; and projected flows from significant industrial users (SIU) and quality in the next 50 years by decade, industrial category, and geographic areas, within DWSD's service area.
    - Task Project Manager for the summary and evaluation of Detroit wastewater treatment plant capacity and performance, as part of the development of a comprehensive wastewater master plan for the DWSD. The plant has a rated secondary treatment capacity of 890-MGD, and primary treatment capacity of 1,700-MGD. Summarized the design criteria; assessed the existing and near-term capacity under the comprehensive treatment plant renovation project for both liquid and solids processing streams; conducted water quality and compliance status analysis; and discussed the suitability of the plant to meet future expansion and treatment needs including the proposed additional dewatering from CSO basins.
    - Project Manager and Lead Process Engineer for improvements to two wastewater treatment plant pump stations, including pickle liquor buildings, the polymer utilization building, and main plant influent building rehabilitation for DWSD. The wastewater treatment plant has a secondary treatment capacity of 890-MGD. Replaced all polymer delivery pumps, pickle liquor feed and transfer pumps, and influent sampling pumps. Managed the selection and sizing of various chemical and wastewater transfer pumps, with specific consideration of handling chemicals and high solids applications, and designed the new piping layout and control system. Assisted in preparing the specifications for various pumps and pipes and oversaw the design and specification of the basket strainers. Prepared construction documents and provided services during construction.
    - Managed an evaluation of long-term solids disposal alternatives as part of the development of a comprehensive wastewater master plan for DWSD. The plant has a rated secondary treatment capacity of 890-MGD. Conducted a thorough review of the current solids production and handling practices at the plant; reviewed the applicable treatment technologies and current and future regulations; and developed various alternatives and implementation plans as well as a scoring system to rank and select the recommended alternatives. Also developed capital and operations cost estimates for each alternative.
    - Project Manager and Lead Engineer for field sampling activities review and pre-audit service for the DWSD. Reviewed program documents and QA/QC procedures as well as the standard operating procedures. Audited the field sampling safety issues, reviewed EPA auditing reports

and pertinent federal regulations and EPA guidelines, and recommended areas that needed improvement.

- Manage and Lead Engineer for the preparation of a low-interest loan application for the Drinking Water State Revolving Fund for the DWSD. Prepared an overview project plan for the 2004-2008 loan programs, successfully securing $30M per year in low-interest loans from the Michigan DWSRF.
- Task Manager for a source water protection project for DWSD. Summarized the pertinent federal and state regulations and international charters and agreements related to the Great Lakes and reviewed the associated watershed initiatives, trends, and programs, as well as the current and future monitoring technologies. Investigated the existing spill notification system and procedures and conducted a national survey on the early-warning monitoring and source water protection programs. Developed the framework for establishing a source water protection program. Made recommendations for short-, intermediate-, and long-term improvement and proposed the scope and estimated cost of the near-term capital improvement project needs of this first source water protection plan for a surface water utility in Michigan.
- Task Manager for the development of a water quality management and treatment plant capital improvement plan for DWSD, covering their five water treatment plants (with a combined capacity of over 1.7 billion gallons per day. Reviewed the past and ongoing projects, reviewed the short-term and long-term water quality regulations. Developed short- and long-term water quality goals. Conducted a thorough assessment and evaluation of the current treatment process for capacity, technology and performance. Selected future treatment technologies and prepared the conceptual preliminary design and cost estimate for each plant, including ozone and UV installations. Coordinated ongoing plant improvement projects and developed a capital improvement plan for plants that would meet both system growth and water quality needs while maintaining a limited increase (6-7 percent) of water rate to DWSD customers in the future.
- Task Manager for the development of DWSD's Wastewater Master Plan, which addressed: Significant Industrial Flows, Capacity and Performance Evaluation of the Detroit Wastewater Treatment Plant, Wholesale User Survey, and Long Term Solids Disposal Plan tasks.
- Managed the development of a customer survey and service plan for the DWSD. Designed the survey form and managed the design and distribution of the survey questionnaires.
- Project Engineer for the update of DWSD's industrial pretreatment program local limits database, including modification of the program and local limits calculation.
- Project Engineer for Phase I and project manager for Phase II of an atmospheric deposition study for the DWSD, addressing the air deposition addition of mercury, cadmium, and PCBs loads to the headworks of a wastewater treatment system. Developed a quality assurance project performance plan and field sampling standard operating procedures, and coordinated the lab SOPs. Managed the water-phase sampling and led data analysis. Interfaced with subcontractors and labs; conducted detailed chronicle and statistical data analysis of pollutant concentrations, fluxes, or loadings for dry deposition, wet deposition, runoff, ambient, and treatment plant influent and effluent. Developed several approaches in estimating the quantitative relationships between the air deposition and runoff, air deposition and the plant headworks loadings of PCBs, mercury, and cadmium. Prepared responses to the steering committee's review comments. Conducted all data treatment and prepared the final study report, providing the crucial information for the state to establish the regulatory policies toward these chemicals.

- Served as Senior Technical Consultant and Lead Engineer for a brackish groundwater treatment pilot study and preliminary design of the reverse osmosis water treatment plant at Moron Air Force Base in Spain. Led the technical evaluation and process design for providing portable water

to the base by evaluating, piloting, and designing a 1-mgd groundwater treatment facility. Conducted the desktop evaluation for alternative technologies to remove hardness, nitrate, TCE, and salinity from the groundwater sources. Developed the test plan and conducted the pilot tests on GAC, ion-exchange demineralizer, and reverse osmosis processes. Provided air-stripping unit troubleshooting, scale control evaluation, and preliminary design. Evaluated concentrate disposal alternatives and developed the construction cost estimate.

- Served as the Project Manager and Lead Process Engineer for the evaluation and design of an ozone system to remove geosmin-caused drinking water tastes and odors from the Lucerne Water Treatment Plant for the California-American Water Company. Evaluated the bench treatability data, designed the ozone and ozone/H_2O_2 application dose, and established the remaining ozone system design criteria, including a construction cost estimate. Prepared preliminary design of the system and evaluated different types of ozone generators, ozone dissolution methods, and ozone contactors. Determined final design, which included a LOX-feed ozone generator with side-stream injection skid and a pipeline contactor with the options of using an ozone contactor for disinfection (ozone alone) and taste and odor removal (ozone/H_2O_2) or T&O removal only.
- Served as the Lead Process Engineer for construction and start-up of the 17-MGD Windsor Water Treatment Plant's new ozone system. The scope includes the construction management, start-up of the ozone system, optimization of the ozone residual analyzer layout and design and upgrade of the ozone-quenching agent with calcium thiosulfate to increase quenching capacity and safety. Participated in the resizing of the tanks and redesign of the layout and spill containment area. Participated in process and start-up troubleshooting, including how to achieve the desired log inactivation of Cryptosporidium and residual quenching during winter season.
- Served as a Senior Consultant for ozonation design for the 167-MGD Tacoma, Washington, water treatment plant. Developed design criteria and evaluated bench testing results on geosmin and MIB removals. Employed the experimental design approach. Conducted statistical analysis of the experimental data, summarized the findings and conclusions of the tests, and prepared the study report.
- Served as Senior Consultant for an algal toxin removal project for the American Water Works Research Foundation (AWWARF). Prepared the testing plan using statistical experimental design methodology for ozone oxidation, UV/H_2O_2 oxidation, and PAC adsorption of the microcystin-LR. Conducted a statistical analysis on the testing results and prepared the study reports.
- Managed and served as Lead Technologist for a filter backwash and recycle stream evaluation and improvement study for the 27-MGD water treatment plant in the City of Ann Arbor, Michigan. Investigated the filter backwash and other recycle stream practices, as well as the average and peak instantaneous flow of each stream, and evaluated the potential hydraulic and water quality impact to the treatment process. Facilitated a plant staff workshop to develop operational and process improvements. Prepared report to submit to the Michigan Department of Environmental Quality.
- Served as Process Engineer for the development of a master water plan for the City of Ann Arbor, Michigan. Led a water treatment plant process criteria evaluation and evaluations of the treatment of 1,4-dioxane from the groundwater.

- **1992-2001: Multiple Technical and Management Roles - TETRA TECH MPS - Detroit and Ann Arbor, Michigan**
  - Worked as Project Manager, Senior Project Engineer, Project Engineer; and Water/Wastewater Technology Council Member.
  - Served as Process and Project Engineer for the Baby Creek combined sewer overflow control study for DWSD. Conducted a literature review, provided dry and wet weather multi-stage sampling of the CSO events, and performed bench-scale evaluations of various disinfection options, including UV, ozone, sodium hypochlorite, peracetic acids, and sodium bromide with sodium hypochlorite.

Proposed recommendations and disinfection design criteria. Prepared the disinfection study report and reviewed the final design study report.

- Served as Lead Engineer for a drinking water taste-and-odor study for DWSD, which received the 1998 Research and Technical Practices Award from the Michigan Section of the AWWA and required the development of monitoring and experimental plans and analytical standard operating procedures. Trained senior chemists to become flavor panelists, coordinated the monitoring efforts and flavor profile analysis, interfaced with clients, and conducted comprehensive powdered activated carbon and ozonation treatability studies to remove the taste- and odor-causing compounds from the water. Investigated a broad range of operational parameters and identified their impact to the odorant removals. Developed mathematical models for quantitative assessment of operational parameters and performance prediction.
- Served as Project Manager and Lead Engineer in the development of ozonation design criteria for taste and odor control and Cryptosporidium inactivation for DWSD. Conducted an ozone demand and decay study, and developed the design criteria for meeting the requirement of disinfecting Giardia and Cryptosporidium. Assessed the impact of the proposed treatment technologies on the current operation. Prepared the progress and final study reports and made presentations to the client.
- Served as Lead Engineer examining powdered activated carbon and chlorine interaction impact on T&O compound removal and contact time value for DWSD. Performed CT calculations under various conditions for four water treatment plants and made design and operational recommendations.
- Served as Process Engineer for an implementation assessment of PAC storage, dosing, and delivery facilities at four water treatment plants for DWSD. Developed the design criteria for upgrading the powdered activated carbon dosing systems and reviewed the conceptual design and cost estimate of the PAC feeding system. Also provided an engineering feasibility valuation of building centralized PAC storage and dosing facilities. Reviewed the contact time calculations under various PAC addition points for the four plants and developed design criteria for alternative PAC dosing systems.
- Served as Process Engineer for a backwash and residual management improvement project for DWSD. Developed the treatment process basis of design criteria and conceptual design for handling the backwash water and plant treatment residual for four water treatment plants with a combined capacity over 1,600-MGD. Conducted the historical data analysis and scenario analysis for determining the optimum equalization volume and treatment process design capacities.
- Served as a Co-principal Investigator which involved conducting an investigation for a taste-and-odor materials evaluation workshop for the American Water Works Research Foundation. Convened an international expert panel to develop a new AWWA drinking water standard for testing materials from taste and odor perspectives. Organized a workshop, managed literature review, and prepared the final standard and project report.
- Served as Resident Project Engineer for a seven-month pilot study to treat the low-strength, organics-containing cooling water for the Upjohn Company in Kalamazoo, Michigan. Participated in the planning, initiation, and operation of a 30-gpm carbon fluidized bed biological reactor. Coordinated with the client, vendor, and project manager and prepared weekly and final project reports.
- Served as Field Project Engineer for a three-month feasibility study for the Kellogg Company of Battle Creek, Michigan, for the treatment of high-strength BOD/COD cereal-production wastewater using a pilot upflow anaerobic sludge blanket bioreactor. Obtained optimum operation and design conditions and addressed typical operation interference such as shock loads of BOD and TSS.

- Served as Project Engineer for Michigan's Rouge River CSO control study for a national wet weather demonstration project. Trained the sampling crew, developed the field sampling SOPs, and coordinated with the weather service. Conducted detailed data analyses, such as concentration and load profiles for different pollutants, removal efficiencies, and overflow discharge quality. Drafted final report and provided recommendations for sampling and design of the future CSO basins.
- Served as Project Engineer for Michigan's Rouge River settling column study, as part of a CSO control study for a national wet weather demonstration project. Developed the experimental and sampling plans, trained technicians, performed data analysis, and drafted the report.
- Assisted in the evaluation of CSO control technologies and performance of retention basins in the Rouge River watershed. Assisted in evaluating the retention basin's effectiveness in disinfecting and removing numerous pollutants. Reviewed existing column testing protocol and proposed new protocol using modified columns and Imhoff cones. Developed a protocol for evaluating disinfection and the standard data analysis procedures to be used at all basins within the Rouge watersheds. Reviewed the mathematical models (steady-state settling model, statistical models, and dynamic models) available for predicting the basin long-term performance and individual event performance and assessed their advantages and limitations. Worked with modeling experts to develop new dynamic models for the project and developed the protocol for disinfection evaluation.

- **1991-1992: Process and Environmental Engineer (Biotech scale-up and Groundwater remediation projects) - ARCTECH, Inc. - Alexandria, Virginia**
- **1988-1991: Research Assistant and Graduate Student (Thesis: Enzymatic Oxidation of Phenolic Pollutants) – University of North Carolina at Chapel Hill, Department of Environmental Engineering – Chapel Hill, North Carolina**
- **1985-1988: Research & Design Engineer (industrial wastewater treatment) and Teaching Assistant – East China University of Chemical Technology, Department of Environmental Engineering and Institute of Chemical Environmental Engineering**

Publications:

- **Completed numerous technical articles, reports and other publications on topics related to water and wastewater treatment, water quality and research and development related topics.**

St. Mary's Child Development Center

Big Ten Basketball Tournament Committee

American Water Works Association (AWWA)

Awards:

Indiana Basketball Hall of Fame

2005 Achievement in Business Award, Center for Leadership and Development

2006 Sam Jones Award, Indianapolis Black Chamber of Commerce

Background:

Mr. Gadis is Vice President and Manager for Sales with the Municipal and Commercial Group of Veolia in North America. In this role he leads a team that is responsible for new project development and the support of ongoing projects and client relationships. This work has included supporting alternative project delivery approaches to municipal clients in the North American market. His recent work has focused on working with Veolia's team at the City of Detroit, Michigan, to support the identification of utility needs and solutions/approaches to address the City's water and wastewater utility.

Mr. Gadis was also a part of the Veolia team that working with the New York City Water Board and New York City Department of Environmental Protection (DEP) under the Operational Excellence (OpX) program. This team is charged with examining water and wastewater operations in the City with the goal of developing recommendations to streamline workflows, boost productivity, identify opportunities for efficiency gains, and keep future water rate increases as low as possible.

Prior to his current role, Mr. Gadis was the President of Veolia Water Indianapolis, LLC, the company that was charged with managing the water system providing service to almost a million in Central Indiana. The scope of this contract involved operating, maintaining and managing a water treatment, storage and supply system, a customer service organization responsible for meter reading for some 310,000 connections for the City of Indianapolis and an additional 15,000 connections through contracts with surrounding communities, as well as billing and revenue collection for 600,000 accounts. The contract also included a capital project component, and Veolia Water managed and implemented in excess of $200 million in capital work to improve the City's aging water infrastructure.

Prior to that, Mr. Gadis managed the procurement and operations of the Indianapolis Water operations, with responsibility for administering the Veolia Water Indianapolis minority-owned (MBE), woman-owned (WBE) and other locally-owned business involvement efforts. The success of this was demonstrated in the company's unmatched success in achieving local involvement in all aspects of the project work at levels that well exceeded all of the City's goals and expectations-- keeping 92% of the dollars spent in the local economy and maintaining a 35% M/WBE participation level. He also provided leadership for Veolia Water's local involvement program in Indianapolis, with involvement in numerous community service organizations in the community. Additionally, Mr. Gadis has played a key role in shaping Veolia Water's national program for MBE/WBE recruitment and involvement in governmental and industrial projects at sites across North America.

Mr. Gadis has over 23 years of overall business experience, with more than 14 years of management experience, and his involvement with the Indianapolis water facilities began back in 1998, working as the Director of Procurement for Indianapolis Water Company. He joined Veolia Water Indianapolis in 2002 on the transition of the water facilities.

Key Experience:

- 2013-President: Vice President and Manager – Sales – Municipal & Commercial Group - Veolia North America – Indianapolis, Indiana
  - Provides leadership for a Sale team and new project development for Veolia's water and energy utility services line in North America.
  - Work has included the development and support for projects under Veolia's Peer Performance Solutions (PPS) approach, including a new project with the DeKalb County, Georgia, Department of Watershed Management (DWM). This work is focused on helping the County identify cost savings and help improve customer service by conducting a comprehensive and independent review of their water and wastewater operations. DWM provides services to 700,000 residents in the Atlanta metropolitan region through its system of water treatment and distribution, customer service, and wastewater collection and treatment.
- 2010-2013: Vice President – Municipal Sales Group – Veolia Water North America Operating Services, LLC – Indianapolis, Indiana
  - Provided leadership for the company's sales and development program that has focused on identifying and developing innovative utility operations solutions for major cities in the U.S.
  - Worked as a part of the Veolia Water team for the Operational Excellence (OpX) program with New York City. The work is divided into two phases, with the Veolia Water Team first conducting an initial evaluation and recommendation phase that will result in a final report in 2012 of recommendations on how DEP can improve productivity and reduce costs. Based on that report, DEP has the ability to accept or reject any of the proposed operational changes and cost-saving measures. Improvements that DEP chooses will be implemented over a four-year period.
- 2008-2010: President – Veolia Water Indianapolis, LLC - Indianapolis, Indiana
  - Served as the Executive officer for Veolia Water's operations of the City's water systems, under a project that was completed in 2011.
  - Served as a part of the transition management team responsible for managing the transfer of the water operations (owned by the City) to a new owner and operator. The sale of the City's water treatment and supply assets, which serve almost 1 million people in the region, was completed in 2010, and the transition of services was completed in August 2011. The key challenges of that process involved maintaining the levels of service and quality for the customers that rely on the water system, and providing ongoing operations, maintenance and management services as the new owner is allowed to implement its own operations and management approach.
- 2003-2008: Vice President and Chief Operating Officer – Veolia Water Indianapolis, LLC - Indianapolis, Indiana
  - Responsible for day-to-day operations of the company, including field services, production, engineering, construction, procurement, risk management, asset management, laboratory services, health and safety, security, IOS9001 and 14001, as well as the company's MBE/WBE program.
- 2002-2003: Vice President of Shared Services – Veolia Water Indianapolis, LLC - Indianapolis, Indiana
  - Responsible for procurement, fleet, risk management, warehousing, health and safety, security, and M/WBE development.
- 2000-2002: Vice President – Water Materials Unlimited (Indianapolis Water Company subsidiary) – Indianapolis, Indiana
- 1998-2000: Director of Procurement - Indianapolis Water Company - Indianapolis, Indiana

- Acted as Director of Supply Chain Management, with responsibility for a $15 million budget, $8 million in sales, non-regulated business development, and $7.5 million minority vendor program.
- Responsible for liability and property insurance claims, developing and administering the company's risk goals and objectives, and overseeing the procurement of goods and services.

- **1995-1998: Vice President – Monroe Guaranty Insurance – Indianapolis, Indiana**
  - Responsible for claims management, including $125 million of claims expenses.
- **1989-1995: Midwest Regional Manager – USF&G Insurance Company – Indianapolis, Indiana**
  - Managed 16 branch office operations, 120 employees and $200 million in written premiums. Responsible for re-engineering efforts in the company.
- **1984-19889: Senior Claims Adjuster – USF&G Insurance Company – Indianapolis, Indiana**
  - Responsible for handling general liability, auto and property claims, and special investigations.

Attachment 2

Summary Table –
Water Treatment Plant O&M Experience

VEOLIA

Attachment 2. Veolia - Water Treatment Plant O&M Experience Summary				
Client/Location	**Flow**	**Scope**	**Major Process(es)**	**Dates**
Ashburnham-Winchendon Joint Water Authority, MA	2 MGD	O&M of Surface Water Treatment Plant	Trident Filtration, Microfloc Microfiltration	2001-Ongoing
Blackwell, OK	1.55 MGD	O&M of Groundwater Treatment Plant	Conventional Treatment with Filtration	2001-Ongoing
Brockton, MA	24 MGD	O&M of Surface Water Treatment Plants	Conventional and GAC Filtration	1988-Ongoing
	1.3 MGD		Upflow Clarification, Direct Filtration, Microfloc Microfiltration	
Gloucester, MA	10 MGD	O&M of (two 5-MGD) Surface Water Treatment Plants	Conventional Treatment, Rapid Mix, Rapid Sand Filtration	2009-Ongoing
Heavener, OK	3 MGD	O&M of Surface Water Treatment Plant	Clarification, Filtration and Disinfection	1996-Ongoing
Latimer County, OK	0.23 MGD	O&M of Surface Water Treatment Plant	Surface Water Treatment Plant	2007-2017
Lynn, MA	15 MGD	O&M of Surface Water Treatment Plant	Rapid Mix Direct Filtration	1987-Ongoing
Leominster, MA	4 MGD	Design/Build and O&M for Multiple Surface Water Treatment Plants	Multi-Media Direct Filtration	1988-Ongoing
	2 MGD		GAC Filtration	
	1.2 MGD		Conventional (Rapid Mix, Upflow Pulsating Clarification, GAC Filtration)	
Sturbridge, MA	1.6 MGD	O&M of Groundwater Treatment Plant	Iron Removal Plant with Pressure, Greensand, Mixed-Media Filtration	1989-Ongoing
Westborough, MA	3.5 MGD	O&M of Surface and Groundwater Treatment Plants	Conventional Treatment, Multi-Media Filtration	1996-Ongoing
	2 MGD		Greensand Iron/ Manganese Removal	
City of Atlanta/ Fulton County, GA	90 MGD	O&M of Surface Water Treatment Plant	Conventional Treatment, Declining-Rate Filters	1991-Ongoing
Boonville, IN	2.9 MGD	O&M of Groundwater Treatment Plants	Iron/Manganese Oxidation, Dual-Media Greensand Pressure Filtration	1995-Ongoing
	1.9 MGD			
Buffalo, NY	160 MGD	O&M of Surface Water Treatment Plant	Conventional Treatment, Rapid Sand Filtration	2010-Ongoing
Canby Utility, OR	8 MGD	O&M of Surface Water Treatment Plant	Flocculation, Upflow Clarification, Filtration, UV Disinfection	2006-2016
Chattahoochee Valley Water Supply District, Lanett, AL	8 MGD	O&M of Surface Water Treatment Plant	Conventional Treatment, High-Rate, Multi-Media Filtration	1994-Ongoing

Attachment 2. Veolia - Water Treatment Plant O&M Experience Summary				
Client/Location	**Flow**	**Scope**	**Major Process(es)**	**Dates**
Discovery Bay, CA	8.21 MGD	O&M of Groundwater Treatment Plants	Iron Removal with Sand Filtration	2009-Ongoing
Edwardsville, IL	7.78 MGD	O&M of Groundwater Treatment Plants	Greensand Filtration and Zeolite Softening	1987-Ongoing
Hardinsburg, KY	2 MGD	O&M of Groundwater Treatment Plant and Surface Water Treatment Plant	Reverse Osmosis Filtration of Groundwater	1995-Ongoing
	1.2 MGD		Conventional Treatment, Surface Water Dual-Media Filtration with ClariCone Clarification	
Junction City, KS	10 MGD	O&M of Groundwater Treatment Plant	Aeration, Lime Softening	1989-Ongoing
Matewan, WV	0.05 MGD	O&M of Surface Water Treatment Plant	Conventional Filtration	2001-Ongoing
New London, CT	9 MGD	O&M of Surface Water Treatment Plant	Conventional Filtration	2008-Ongoing
National Park Service, Elwha River WTP, Port Angeles, WA	53 MGD	O&M of Surface Water Treatment Plant	Coagulation, Sedimentation	2009-Ongoing
Smugglers Notch, VT	0.15 MGD	O&M of Groundwater Treatment Plant	Pressure Vessel Filtration	1985-Ongoing
Springboro, OH	7 MGD	O&M of Groundwater Treatment Plant	Anthracite Multi-Media Filtration	1990-Ongoing
Tampa Bay Water, FL	120 MGD	DBO for Surface Water Treatment Plant (new plant and expansion)	ACTIFLO Flocculation, Ozonation, Carbon Filtration	2000-Ongoing
	30 MGD	O&M of Groundwater Treatment Plant	Hydrogen Sulfide Stripping via Aeration Towers and Scrubbers	
Tupelo, MS	12 MGD	O&M of Surface Water Treatment Plant	Infilco Filtration Systems	1991-Ongoing
Williamson, WV	4.2 MGD	O&M of Surface Water Treatment Plant	Direct Filtration & Conventional Filtration (GAC and Multi-Media)	1999-Ongoing
Wilsonville, OR	15 MGD	O&M of Surface Water Treatment Plant	ACTIFLO Flocculation, GAC Filtration Ozonation	2001-Ongoing
Yukon, OK	3 MGD	O&M of Groundwater Treatment Plant	Groundwater Treatment Plant	1991-Ongoing

To: Saxton, Thomas (Treasury)
Cc: Workman, Wayne (TREASURY)
Subject: RE: Flint Meeting

If we just could compare the old rates vs. the new Flint River rates it would help immensely. I think we can do something here that the ministers would like.

Subject: RE: Flint Meeting

My plan is to talk to Jerry A. et al. I don't have that old cost & rate info for Flint in my head. At the time it was more of Andy's gig but we will get it.
I will check too as to what they (the City) think of the rfp response for that water consultant i.e., if it is actually going to add value. And don't forget about that loan restructuring; that is about another $2mm+ that could be used to replace bad lines.

Subject: Flint Meeting

So, just so I understand, the rates went up from the Detroit rates when they went to the Flint River? If that is true I'd be pissed also. We probably need an accounting of this water issue. Costs to date, old rate v. today's rate, any new hook charges, etc.

In a discussion about this with Rich, he recited a conversation with Daddow in which Daddow said that the $847,000 a month is a reduction from their previous rate. Daddow had no objection to a shorter term fix as it would mitigate some of the costs that were to be added to the water charges at GLWA for present customers for a year and a half which Bob seemed to think made sense.

I asked him to review with Daddow this whole thing and see if they could be rehooked for 15 months or so.

We will need to collect some water rate info from our files including the E&Y study. Questions will go to Jerry Ambrose. Maybe we can talk just before 9:00 or sometime in the am about what we need to do. Thanks, Wayne

> Only problem with that is that the citizens of Flint say they are paying more now than they did when they were connected with DWSD. The city, after all, is not giving the water away free right now, so there is some kind of equalization that comes into play here. Additionally, we just gave them $2M so if we need to use it for a reconnect that's probably a good use of the money as opposed to people refusing to use city water. Since we're in charge, we can hardly ignore the people of Flint. After all, If GM refuses to use the water in their plant and our own agencies are warning people not to drink it, another expressing continuing concern over quality, and the differential between what we now collect and what we would pay DWSD is not significant, we look pretty stupid hiding behind some financial statement.

SUBJECT: City of Flint Water Rates

On April 17, 2013 Detroit Water and Sewerage Department (DWSD) sent a letter to the City of Flint terminating the existing water service contract between the City of Flint and Detroit. The termination of services was set to take effect one year later on April 17, 2014. This left a gap between the end of DWSD services and the start of the Karegnondi Water Authority (KWA). In order to fill a one year gap between the end of DWSD services and the start of KWA services the City estimated a financial benefit by switching to the river as a primary water source.

A memo from City of Flint to the residents, dated January 13, 2015 states that the final year that the City of Flint purchased water from DWSD, the cost was $12.4M. In 2014 the cost was projected to rise to $14.4M, and by 2015 the cost was projected to rise to $16M. The financial benefit for switching to the river was the opportunity to divert that revenue towards capitalizing the upgrade expenditures needed to run the plant and the development of a capital improvement program for the aged infrastructure without a significant increase to the water bill.

Cost Comparison of Using River Water vs. DWSD

River Water		DWSD	
Plant Upgrades	12,500,000	Plant Upgrades	12,500,000
Cost of Water	XX ‡	Cost of Water	16,000,000 †
	12,500,000		28,500,000

† - $16M is the City's estimate of costs based current water usage and DWSD's rate structure
‡ - $XXM is the City's costs for production of water netted of system improvement costs necessitated to bring the City to operational capacity with KWA when the system comes online

Robert,

Attached is the March 2013 DWSD cancellation notice, as well as an analysis of the business case for going to KWA. Also included is an analysis of the additional costs of obtaining water from DWSD even on a short term basis. Also fyi please find the rate study by RFC which confirms the City's decision to go to KWA.

Flint, Michigan 48502

Dear Ms. Brown:

Regarding: Termination of Contract for the Provision of Water Services by the City of Detroit, Water and Sewerage Department

On December 20, 1965, the City of Detroit, through its Board of Water Commissioners, (DWSD) and the City of Flint, Michigan (Flint) entered into a contract for the provision of DWSD treated water to Flint and the distribution by flint of that water to other Genesee County communities. Section 18 of that Agreement[1] provides:

18. The Board [DWSD] shall supply and sell water to the City [Flint] from the water system of the City of Detroit, and the City shall receive and purchase such water in accordance with the terms of this Agreement for an indefinite period of time but at least for a period of thirty-five (35) years from the date hereof. This Agreement may be terminated by either party after expiration of said 35-year period, upon one year's written notice served upon the other party by delivering the same to the Secretary of the Board or to the Clerk of the City as the case may be, or at any time upon mutual consent of both parties.

Please take notice that pursuant to this section, 18, of the above-referenced Agreement, DWSD is terminating this Agreement one year from today's date (April 17, 2014).

Sincerely yours,

Sue F. McCormick
Director

[1] Although the Agreement between DWSD has been subsequently amended, Section 18 remains unchanged and in full effect.

RE: Cost Comparison, KWA v DWSD

Mr. Kurtz:

The City of Flint is considering whether joining the Karegnondi Water Authority (KWA) is a better alternative for the residents and businesses of Flint than continuing to purchase water from the Detroit Water and Sewer District (DWSD).

An important part of this consideration is the relative cost of the alternatives. We have compared the current projected costs of continuing to purchase water from DWSD to the projected costs of purchasing water from KWA.

The projected costs of purchasing water from DWSD come from our current and past experience, as well as statements from DWSD about their future costs. The costs of purchasing water from KWA are based on the KWA Lake Huron Water Supply Study, as updated by its October 2012 Preliminary Engineering Report Update, Appendix 20, dated October 4, 2012.

Based on the current contract with DWSD, the FY13 cost of purchasing water for the City of Flint only (excluding the sale of water to Genesee County) is budgeted at $14.4 million. Past experience indicates that it is reasonable to assume a 10% increase annually in the capacity charge from DWSD and a 5% increase in the commodity cost. It is also reasonable to assume a 5% increase in operational costs for the Flint Water Treatment Plant. Consequently, it appears that the costs for continuing to purchase water from DWSD will increase to $22.7 million by FY20.

Conversely, joining KWA and participating in the construction of infrastructure to receive water will require an up-front cost to the City of $2.3 million, to be paid over the first three years of joining. This would be paid by the City during the construction period while the City continues to purchase its water from DWSD. However, once the construction is complete and water delivery commences, the City's capacity charge will be fixed, based on the debt service necessary to finance construction. Operational costs for KWA water delivery and the Flint WTP are projected to increase by 5% annually.

Based on the assumptions in this comparison, the annual projected cost of purchasing water for the City of Flint is 15% or $2.6 million LESS using the KWA option in the first year of operation, increasing to 27% or $6.1 million LESS in the fifth year of operation. The only caveat is that in order to achieve this, the City will need to upfront KWA $3.25 million over 3 years prior to KWA beginning water delivery.

Concerns have been raised about the potential of cost overruns and delays in construction. These are reasonable concerns. An additional analysis, assuming a 15% cost overrun, and a one-year delay in construction, indicates that the gain to be achieved from participating in KWA is lessened (from $2.6 million in the first year to $2.3 million) and the City's upfront contribution is increased to $10.4 million if the City is required to make its first year's debt service payment before operations begin. The City's gain from participating in KWA is delayed, but once operations begin, the City's annual costs are less than continuing with DWSD, becoming net positive in FY20. However, given the City's precarious financial position, it is likely that the City would need to find some source of capital if such an up-front payment were necessary.

Finally, we have also analyzed what constraints DWSD would need to impose on its contract with the City of Flint in order to be a positive financial option. It would appear that if the capacity costs to Flint were to be fixed at the FY13 level and if annual operating cost increases were capped at 2.25%, then the cost to the City of Flint could be less than KWA.

Attached are the three projections summarized above. First is the "Original Projection" utilizing the KWA Study. Second is the "Worse Case Projection" with cost increases and construction delays. Third is the reduced DWSD costs associated with fixed capacity costs and capped increases in operational costs.

Please contact me if you have any questions.

Gerald Ambrose
Director of Finance

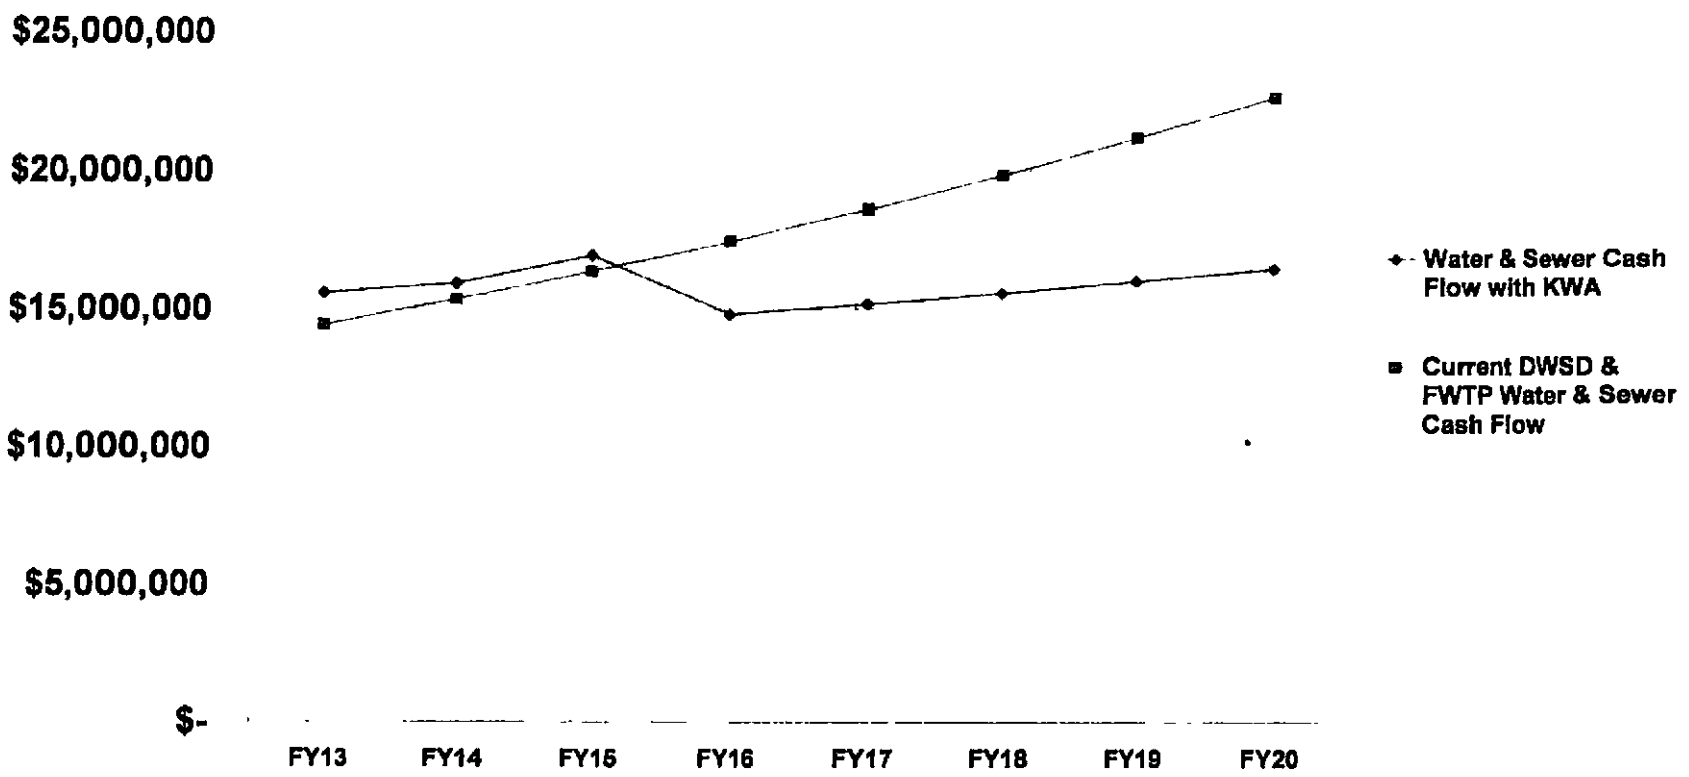
Original Projection - Summary Comparison: KWA vs DWSD



FINAL 10/31/2012

ORIGINAL PROJECTION
SUMMARY COMPARISON: KWA V DWSD

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,385,534	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
KWA Debt Service	$ -	$ -	$ -	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
FWTP Debt Service	$ -	$ -	$ -	$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
KWA operations	$ -	$ -	$ -	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
FWTP operations w KWA	$ -	$ -	$ -	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,936,535	$ 16,966,934	$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,385,534	$ 17,450,717	$ 18,616,851	$ 19,870,850	$ 21,219,435	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 2,562,568	$ 3,342,591	$ 4,190,874	$ 5,114,072	$ 6,118,851
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ 236,968	$ 3,579,559	$ 7,770,533	$ 12,884,605	$ 19,003,456

(1) This projection assumes that KWA begins delivery of water to Flint starting in July, 2016. Any interest on the bonds will be capitalized until that period. The City will be obligated to begin paying its $2,325,600 entry fee in FY13 - 2 payments of $581,400 in FY13, 1 payment in FY14 and 1 payment in FY15.

(2) The cost of the KWA option is projected to be $2,562,568 or 15% LESS than DWSD in the first year of operation (Year 4). This gain offsets the upfront costs of $2,325,600 by $236,968.

(3) The cost of the KWA option is projected to be $6.1 million or 27% LESS than DWSD in the 5th year of operation (Year 8).

(4) The cumulative savings by the 8th year from the beginning of the project are projected to be $19 million.

Detail of Original Cost Projections FINAL 10/31/2012

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,680	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1 10	1 10	1 10	1 10	1 10	1 10	1 10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1 05	1 05	1 05	1 05	1 05	1 05	1 05	
Flint WTP Operating Cost (3)	$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1 05	1 05	1 05	1 05	1 05	1 05	1 05	
TOTAL	**$ 14,413,858**	**$ 15,355,135**	**$ 16,365,534**	**$ 17,450,717**	**$ 18,616,851**	**$ 19,870,650**	**$ 21,219,435**	**$ 22,671,185**

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4 4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7 3 million, based on $12.46/unit ($12.46x1600unitsx385).

(3) Per FY13 Budget, annual cost of WTP is $4 1 million. Genesee County pays $1,386,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400		$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
Escalator				1 00	1 00	1 00	1 00	
Fixed Flint WTP Construction Cost (3)				$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
Escalator				1 00	1 00	1 00	1 00	
Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1 05	1 05	1 05	1 05	1 05	1 05	1 05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1 05	1 05	1 05	1 05	1 05	1 05	1 05	
TOTAL	KWA NOT AVAILABLE			**$ 14,888,149**	**$ 15,274,260**	**$ 15,679,676**	**$ 16,105,363**	**$ 16,552,334**

(1) The City will, upon joining, be required to pay an initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,400 annually. Since it is projected that fee will be assessed for 3 years, the City's upfront cost is projected at $2,325,600.

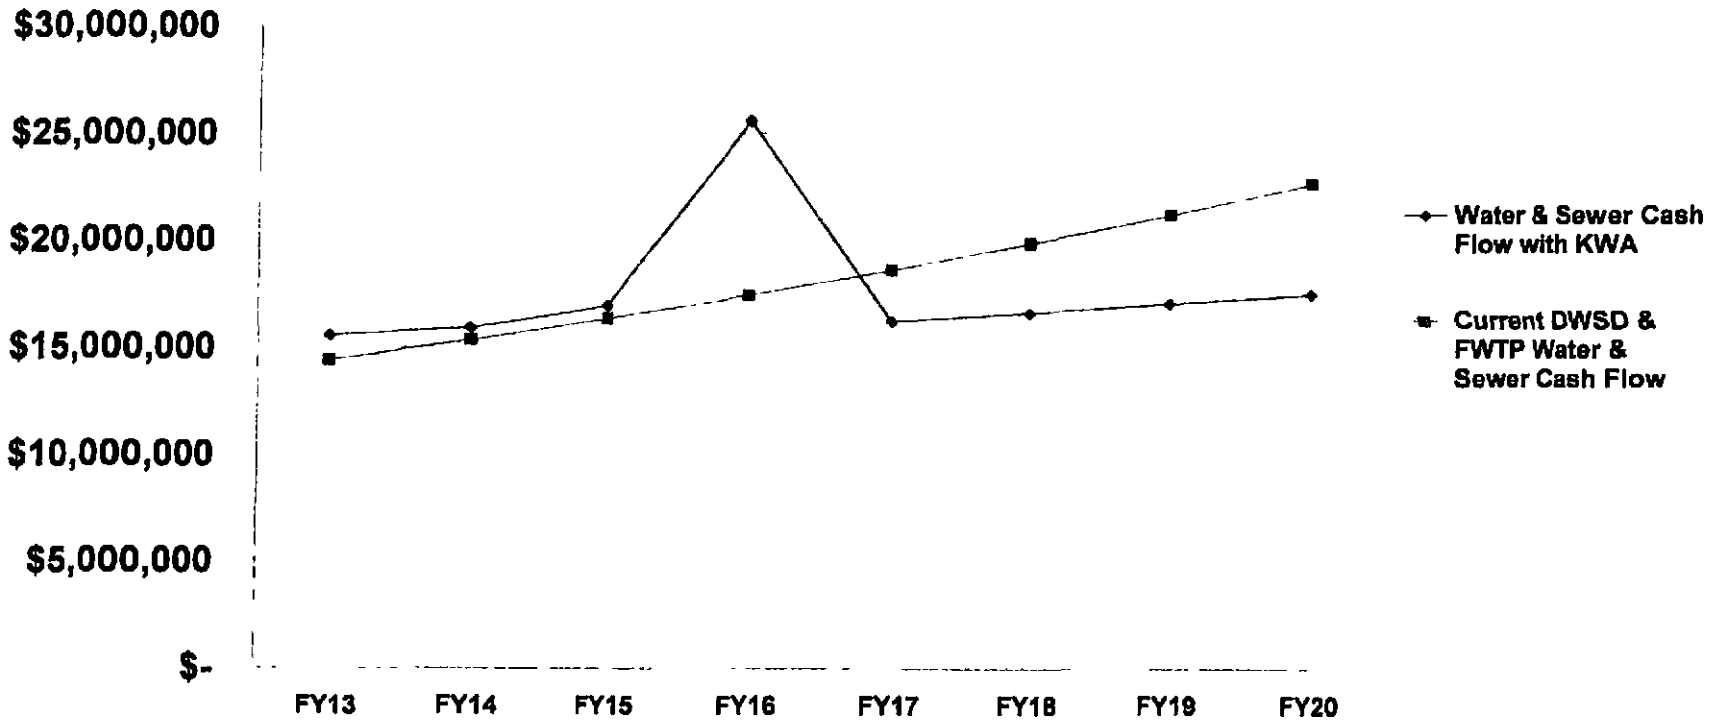
(2) Per KWA proposal, project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years; 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,588 plus $13,621,078 for 3 years = $313,284,792)

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15 (total principal = $8.185 million)

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost. 100%

(5) Per KWA proposal, initial commodity charge would be based on $1 30/unit or 7,500 gallons. Charge is based on 12MGD.

Worst Case Scenario - Summary Comparison KWA vs DWSD (15% Cost Overrun; One year delay in Water Supply delivery)



FINAL 10/31/2012

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,358,135	$ 16,366,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,436	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual KWA - DWSD	$ (1,162,800)	$ (581,400)	$ (581,400)	$ (8,240,826)	$ 2,267,700	$ 3,116,084	$ 4,039,182	$ 5,043,960
Cumulative	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (10,566,426)	$ (8,298,726)	$ (5,182,642)	$ (1,143,460)	$ 3,900,500

"Worse Case" scenario differs from Original in these respects:

(1) Delivery of water to Flint from KWA is delayed by one year and construction costs are 15% above the original projection. Consequently, the City is required to begin paying for debt service one year before KWA begins delivery of water. This is in addition to its obligation to pay its initial entry fee of $581,400 plus $581,400 annually for the first 3 years.

(2) Once KWA begins delivering water in year 5, the annual operating costs are less than DWSD by 12%. Considering $10.6 million in upfront costs in the first 4 years prior to KWA operation, the cumulative cost of KWA exceeds the cost of DWSD until year 8

(3) Cumulative savings by Year 8 are projected to be $3.9 million, compared to $18 million in the original projection

Detail of Worse Case Cost Projections — FINAL — 10/31/2012

Worse Case Scenerio

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,660	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116

Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE				$ 16,349,150	$ 16,754,565	$ 17,160,253	$ 17,627,226

(1) The City will, upon joining, be required to pay a, initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained At 18MGD, the City's cost is $581,000, for a total of $2,325,600

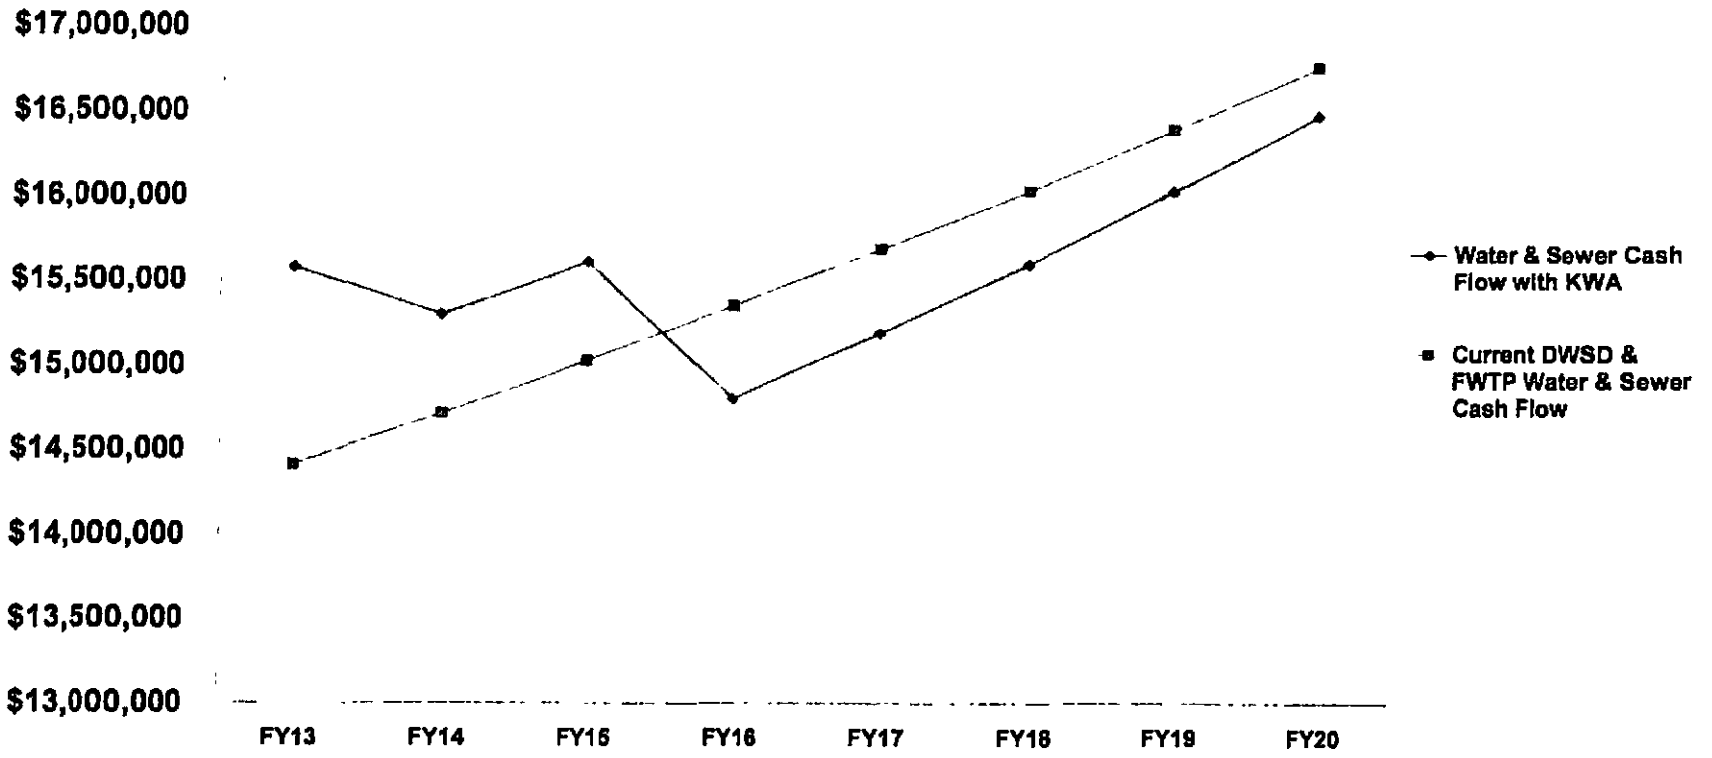
(2) Per KWA proposal, original project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 80mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years, 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,586 plus $13,621,078 for 3 years = $313,284,792) The costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17.

(3) Per KWA proposal, the cost of upgrading the Flint is $7 1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15 (total principal = $8 165 million) Again, costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17. Debt service is now on $9.4 million.

(4) Per FY13 Budget annual cost of WTP is $4 111,538. $1 6 million for electricity and chemicals & 2 FTE's are added. 100% City cost

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons Charge is based on 12MGD

ALTERNATE PROJECTION - SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED (Fixed Costs held constant; Commodity Costs Increased by 2.25% Annually)



FINAL 10/31/2012

ALTERNATE PROJECTION
SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED
(FIXED COSTS HELD CONSTANT; COMMODITY COSTS INCREASED BY 2.25% ANNUALLY)

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ 15,345,778	$ 15,678,562	$ 16,023,172	$16,380,091	$ 16,749,823

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 457,629	$ 404,302	$ 343,496	$ 274,728	$ 197,489
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (1,867,971)	$ (1,463,669)	$ (1,120,173)	$ (845,445)	$ (647,956)

(1) *This projection assumes* that DWSD fixed costs remain at 2013 levels and that operating costs increase by 2.25% annually

(2) KWA costs are as in the Original Projection.

(3) In this comparison, KWA costs are still less once operations begin (by 2.9%), and cumulative gain does not occur until after year 8 Over time, DWDS costs could be less with these limitations on cost increases.

* - Used 2013 data showing 8% increase over Nov data

1 Cubic Foot = 7 48051948 Gallons [Fluid, US]

NOTE: This does not include the reduction in expenses that would occur if we were to go back to DWSD on an interim period. Thos expenses would be in utilities, chemicals, and perhaps in personnel Those reductions would not exceed $5 million. Based on this, our statement that the cost of returning to DWSD would increase costs by $1 million per month is a conservative estimate.

Subject:	FLINT WATER NOTES

Hey, friends. Anticipating more coverage this week on Flint, want to make sure we are all looped in and on the same page. Treasury takes calls on funding and money and the EM. DEQ takes calls on water quality. Here's what I can share about the water quality part.

Total Trihalomethanes (TTHM) are a byproduct of too much chlorine to kill organic material in a water supply. They are among the 80 toxins water suppliers monitor. They are considered a long-term health hazard. As such, they're sampled from water systems every quarter. Systems are required to remain below 80 parts per billion on a yearly average (four quarters). Flint exceeded the average in the course of three quarters last year.

Water system operators around the state periodically get a high result for TTHMs. When consecutive quarters of testing remain at high levels, it's usually a sign that operators are using too much chlorine to address high levels of organic matter in their water source. This most frequently affects systems that use surface water as a source. And several municipal water systems around the state do use surface water (rivers) as a source.

When a water system exceeds this standard, the operator gets a very formally worded violation notice from DEQ that says, effectively, "hey, your numbers are high. Alert your customers and figure out how you're going to bring your numbers back down." This is not as serious as a boil water advisory situation. But, the (think decades) long-term risk of drinking water with high TTHMs is an increased risk of exposure to cancer causing agents, so it's not a situation that the state can accept as status quo.

Because TTHM is measured on an annual (quarterly) basis, it will take a couple quarters of clear results before the city's average falls below the guidelines. This means Flint will probably be issuing another public notice about TTHM in March, despite that the high samples were late last summer.

Flint's numbers have dropped dramatically since the November testing and they're presently in compliance with state drinking water standards.

The water as it leaves the plant is clean, sanitary and safe. However, the water supply system is old, poorly maintained and many residents' connections are also old and poorly maintained. Thus, some residents are experiencing water that smells off or is discolored. This is from the transmission system, not the production system. The three top issues appear to be

a. Hard water interacting with cast iron pipes, causing water that looks rusty (and likely tastes a bit irony)
b. Water sitting too long in the pipes because of valves not working properly or limited users in some sections of the system; or,
c. Residents with old homes that have cast iron connections contributing to the hard water issue.

So, how do we message this issue in light of the many variables at play?

1. Right now, water produced at the Flint plant is meeting state safe drinking water standards.
2. DEQ is aware that many residents have concerns about smell, color and other aesthetic qualities of their water. There are several potential causes for aesthetic water conditions. Residents with these concerns are encouraged to contact the City first to report problems. They also can contact the Michigan DEQ, but the City operates the system and needs to be alerted to concerns with their system to help document problem areas and prioritize improvements.
3. Total Trihalomethane (TTHM) is odorless and colorless. It is regarded as a long-term health concern. TTHM was included in the list of toxins screened under the Safe Drinking Water Act because of its potential for long-term potential health concerns. This is why it is only sampled quarterly. The water operator is required by law to notify residents when the annually averaged

standard has been exceeded, and the system operator is required to take active steps to get back into compliance with the standard for TTHM.

4. Residents received notice because the law requires transparency and works to help ensure residents can make informed decisions. The notice residents received early this month is a totally separate issue from the water discoloration issues some residents are reporting.
5. The DEQ continues working with Flint Water system operators to ensure that residents receive water that complies with state drinking water standards. This system is tested regularly and rigorously, and the results are reported to customers as outlined in the Safe Drinking Water Act.

Subject: RE: IMPORTANT MEDIA ISSUE Please call

Here's what our Bureau of Children and Adult Licensing emailed on Friday:

City of Flint Warns of Potential Health Risks Caused by the City's Drinking Water

The city says there's been too much disinfection byproduct in Flint's water system recently, something that – over many years could cause liver, kidney or central nervous system problems and an increased risk of cancer.

The notice from the city says Flint water is safe to drink but warns that those with a severely compromised immune system, who have an infant or who are elderly may be at increased risk and should seek advice about drinking water from their health care provider.

For others, there is no need to boil water or take other actions, the notice says.

It is recommended that licensed child care providers and licensed adult foster care and homes for the aged providers seek medical advice or use bottle water when serving individuals at increased risk as outlined above.

For more information, go to to the city's website at http://cityofflint.com.

Subject: RE: Flint Water Update

Thanks, Terry.
Heads up to all that Flint is required to do its quarterly TTHM sampling again in February. We expect their numbers to be in compliance. But we also expect that they were so far out of compliance in three quarters of 2014 that their annual average will still be out of compliance, which will require them to send another letter to the community in accordance with the safe drinking water act. So the show will, unfortunately, go on.

Subject: Re: Draft Water History Table

We are looking at it. Unfortunately I am in meetings for a while addressing water issues. But I can tell you this from a quick look - the average residential cost is in teh $150-$160 range. And the equity in the water fund is mostly the value of the assets. I don't know what your point is, but DO NOT conclude that we have $28 million in available cash. Most of it is the value of the capital assets in the system. And the impact of the disconnect from DWSD is not reflected in the FY14 statements since we did not disconnect until May 2014. The increase in value in FY14 is the sale of the pipeline. were it not for that, net equity would have declined.

Jerry

Robert below is an email from Dennis Muchmore which contains questions that we need to get the answers from Jerry this morning.

Let me know if you have any questions.

To: Saxton, Thomas (Treasury); Workman, Wayne (TREASURY)
Subject: A couple of things

1. I need Darnell Earley's new email and phone;
2. Do we have the numbers on the Flint project: Pre cost of DWSD cut off/Present cost for users? Cost of reconnect on Flint end?
3. Discussion with KWA contractors to get a fix on timeline for construction.

Hi Liz,

In regard to the answers to the questions, I have listed the responses for which I have information compiled below.

1. The "Units" from the Treasurer Analysis is million cubic feet. The amounts are derived from two separate sources of data to allow for an evaluation of an entire 12 month period. For the period from January through April (which is before the Flint River was utilized as the source of the water), the amounts represent the actual billings from the Detroit Water & Sewer invoices. For the period from May through December, the amounts are from the production totals that are reported to our Office from Brent Wright in Water Operations. I understand that there has been a decrease in units as the usage previously attributable to General Motors operations on the Flint water system has been diverted to the Genesee County system.

5. The total of the invoices the City of Flint paid for the DWSD water for the 12 months prior to May 1st was $25,503,911. The invoices were for 1,285,982.1 million cubic feet. The analysis total of $23,546,288 is based on the actual usage amounts (which included the aforementioned period from January through April when DWSD provided water) and will reflect lower usage as General Motors left the system, customer changes in usage, and variations in watering.

6. The estimated financial impact needs to be roughly defined due to assumptions pertaining to the incremental expenses incurred from treating the water from the river. Without a full year of history, developing trends for certain expenses is difficult and some billing cycles for certain additional material expenses like electric power lag by one month the actual period for which the expense was incurred. Also, because of certain positions being eliminated in the budget and with wage and benefit changes from contract concessions distorting the data, obtaining a "trued up" year over year comparison of expenses poses a challenge. Looking at the six months of actual data, the incremental additional expenses to treat the water from the river have been $1,469,962. This is compared with the budgeted incremental additional expenses that approximate $2,875,048.

These amounts need to be evaluated in conjunction with the $25,503,911 the City of Flint paid for the DWSD water for the 12 months prior to May 1st and the previously provided Treasurer Analysis total of $23,546,288.

If you have any questions or need more information, please let me know (I attached two workbooks which provides background information). Thank you.

Flint Hires International Urban Water Experts of

Veolia North America to Assess City's Water Issues

Flint, Michigan – February 10, 2015 – The City of Flint has retained a team of urban water experts from Veolia North America to conduct an analysis of the city's water system. Veolia, which is the world's largest water services and technology company, will assess how Flint's water is tested and distributed, including reviewing water treatment processes and operations, laboratory testing and analysis, and engineering reports that detail the city's treatment and distribution systems.

"We understand the frustration and urgency in Flint," said David Gadis, vice president of Veolia North America's Municipal & Commercial Business. "We are honored to support your community with our technical expertise so that together we can ensure water quality for the people of the city of Flint."

Veolia anticipates its analysis to take less than two weeks, at which time they will present findings to City officials, including the Mayor, City Council and the Emergency Manager. Once the findings are presented, city officials will determine how to move forward.

"Addressing the City's water challenges are the top priority right now and it is important to bring in an independent, highly qualified team to work with us to address the safety and quality issues," said Mayor Dayne Walling.

"Until we have completed our analysis, we cannot say for certain how long it will take to provide solutions to Flint's current water situation," said Gadis. "We have extensive experience handling challenging river water sources, reducing leaks and contaminants and in managing discolored water."

"Veolia worked diligently to respond to our Request For Proposal in a thorough, professional way and demonstrated the ability to immediately support us as we ensure safe, clean water for our residents," said Emergency Manager Jerry Ambrose.

The Veolia team hit the ground running Tuesday morning, meeting with water officials to provide an overview of the work to be conducted. "We look forward to helping Flint's team find ways to address and improve the city's drinking water operation," Gadis said.

The company designs and provides water, waste and energy management solutions to communities and industries across the country, including providing water and wastewater

services to 530 communities in North America. More information is available at www.veolianorthamerica.com.

> *A resend in response to the separate email you sent out last night on the DWSD response. Given that they have already reduced the annual cost from the $12.5M range to $10.5M range – even as the DWSD Board of Water Commissioners is about to raise the rates substantially for the coming fiscal year – the offer to Flint was reduced. Frankly, this alone would excite the locals. So far I have been requested to speak at no less than five local units' boards / councils and / or have working group sessions / meetings with City officials on DWSD. It is right now a very sensitive subject even as it has not gotten the media attention it will in the coming weeks. With the exception of a presentation I accepted no less than 4 months ago, I have turned them down or made arrangements to have DWSD – the folks actually in charge right now – to present. In the coming weeks, this is going to become the issue du jour.*
>
> *And, even as there were two courses of action on the use of a base (FY-2015 operating budget know to have flaws or the tender offer projections representing a forecast revised for matters not addressed formally by the BOWC through budget amendments) remains an open issue. A recently discovered timing issue in the contracts (namely, that the 'detailed rates' had to be provided to the locals at least 30 days advance of approval – and why they didn't know this in a contract they have been working on for eons is beyond me) may have resulted in the DWSD management determining the base outside even a public discussion of the BOWC or the Authority Board. The base issue is the cause of the range of the water rates being either 9% or 14% - and has a significant impact on the feasibility as described in the MOU. The more and more I learn, the less and less I want to know.*

Subject: Re: Flint - Random Thought DWSD

The rate we offerred Flint is a bit different than what we calculate for our contract customers. We adjusted the rate of return to reflect the short term, terminated contract status. In other words, the outstanding investment, that we made to serve Flint somewhat recently, will not be recovered without a long term contract. This differential rate of return is now being utilized by Genesee County who was served through the Flint contract, so add to the the additional complications. If we want to get to a lower rate for emergency 'short term' service, we can evaluate our options - but we would have to differentiate it somehow from Genesee or have additional revenue loss or legal exposure there and without a questions there will be huge political issues with our other customers.

Subject: Flint - Random Thought

Sue / Nikki – today I chatted with Rich Baird on the Flint matter given that they continue to have on-going water quality problems. Numerous articles are being written on this matter and I suspect it is getting a bit tense in Flint over this critical issue. They are balking at the cost of the DWSD water – which I understand may be a bit more expensive for them simply because of the distance and elevation – completely understandable. The attached letters indicate $847K per month at a standard commodity rate (which I now am beginning to realize is one of the volume flow issues giving rise to the situation we are in with all communities; but we'll leave that alone for the moment).

The attached letter suggest that they can re-connect to the DWSD using the same rates offered to other communities through June 30, 2015. This seems fair and would not exacerbate the already sensitive issue of the sizable rate increases the suburban and retail customers are now facing. Notwithstanding that matter, Mr. Baird inquired of some means of lowering the rate to encourage Flint to return to the DWSD fold on a marginal costing approach that covers some portion of the fixed costs but may be slightly lower than the amount offered in the letter.

The optics of this matter to the suburban customers now facing a 9% to 14% rate increases are troublesome (sans any provision for the balance sheet issues and with little or no provision for the Detroit retail customers likely collection issues arising from these rate increases – which is going to make this summer even more troublesome when the shut offs start circa March / April). How can a reduction occur in the Flint rate covering fixed costs such that additional volumes actually would serve to reduce what would otherwise be the present proposals on the table? Theoretically, it can be justified but it is steeped in cost accounting but if we can't seem to differentiate 'rates' versus 'revenue

requirement' how the heck can we justify something even more complicated to the residents or suburban customers? Perhaps I have answered my own question – it might be able to done and prove to be beneficial, but politically its DOA. The political barrier seems to be too high a hurdle – and the approach already taken of offering to reconnect at the rates and flow previously charged is the only rational approach possible without sending what is already a very sensitive public off the deep end.

Just musing on a Friday afternoon, but I think I answered the question that Rich and I chatted about in the last part of the paragraph above.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: February 11, 2015

TO: Tom Saxton, Chief Deputy Treasurer

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Water Rates

Attached and below is information regarding the increase in water and sewer rates for the City of Flint since 2010.

- The data shows the significant deficit position of the water fund which was not rectified until 2013 when water rates were increased by 26%. The data also shows the lack of capital investment for a system as old as Flint.

- This condition is acknowledged in the City's recently adopted Capital Improvements Plan which identified approximately $50M in needed capital improvements over the next several years. This deficiency was also noted in the rate study commissioned by the City of Flint in 2014.

- According to the City, if Flint reconnected to DWSD for the next 18 months, the estimated monthly cost would be more than $1M per month totaling approximately $18M. This includes a fixed monthly charge of $846,700 plus the cost of actual water usage, minus the cost of operational expenditures at the Water Treatment Plant. Even with the elimination of future capital improvements, most of the additional cost would need to be funded with an additional increase to existing rates. Such an increase could approach 30%.

- The option of purchasing DWSD water from the County would be on parity with purchasing water directly from DWSD.

- The KWA previously advised the City that the connection to KWA may take place in mid-2016, but has now stated that weather conditions permitting, the connection could be made as early as December 2015.

- The $8M capital costs to upgrade the Water Treatment Plant was made to be able to treat both river water and KWA water. This upgrade has been funded with the cost reduction in operating costs achieved by not buying water from DWSD during the interim period.

- As you are aware, the City has retained Veolia as an outside water consultant to assist in maintaining the safety and improving the quality of water produced by its water system, and their initial analysis is due to be completed within the next two weeks. In addition, the City's current budget includes $2M for replacement of a 2-mile pipeline segment that is anticipated to significantly address some of the current water issues.

Average monthly bill in 2015 - note that water and sewer are not billed separately; the charges are included within the same bill regardless of water usage.

Water service charge	$22.90
Sewer service charge	$34.48
Total service charge	$57.38

Per unit rate:	
Water	$ 7.92
Sewer	$ 5.17
Total per unit	$13.09

Average family of four uses 7 units per month.
Their bill for usage would be: 7 x 13.09 = 91.63 + 57.38 service charge = $149.

If additional information is desired, please let me know.

City of Flint Water Rate History

Year (Date Effective)	Average Monthly Water/Sewer Bill*	Percentage Change in Water/Sewer Rates	Water Fund** Total Operating Revenue	Water Fund** Unrestricted Net Position	Water Fund** Capital Improvements
2010	$64	12%	$31,956,754	-$5,795,973	$2,091,160
1/15/2011	$82	29%	$36,762,663	-$12,443,265	$1,403,916
9/16/2011	$111	35%			
7/1/2012	$111	26%	$44,854,439	-$8,758,091	$755,681
2013	$140	0%	$49,903,868	$834,447	$147,462
07/01/13 to 06/30/14	$140	0%	$43,552,152	$760,745	$3,301,700
07/01/14 to 06/30/15	$149***	6%	N/A	N/A	N/A

Note* Water rate information is based on average usage of 7 units per month with a 5/8" residential remote meter.

Note** Water fund information was compiled from the City of Flint's CAFR filed with the Michigan Department of Treasury.

Note*** Billing breakdown contained in attached memo.

Dennis – the attached pdf is the memo & table that hopefully addresses some of the info needs stemming from the meeting with the pastors last week. Jerry A. has looked at this document as well. In terms of key items at this point (that are mentioned in the memo)....

KWA may be hooked up by the end of this calendar year; weather permitting, etc. Even allowing for some slippage that is positive news

Whether you hooked to DWSD thru the county or directly; it is a $1mm add'l impact to the budget... an add'l 30% increase in rates over existing

They have $2mm already baked in the budget to fix that two mile 'bad' section of pipeline that might address a good portion of the current issues

They now have an outside consultant on the ground who is suppose to provide some preliminary indications next week to help improve the situation

Don't forget about the $2mm SRF loan restructuring (which we have not officially put on the table). Those $s would be available for more system improvements.

Again, sorry this took as long as it did. Let us know if this is what you had in mind or if you need anything else. Wayne – chime in if I missed anything.

See you @ 1:30

> > > When Flint left, the annual revenue profile for the Water System was initially reduced by $12.5 million, However, we immediately recalculated the rate for Genesee County (recognizing their higher demands), to effectively "claw back" about $2 million of the reduction, so the net Flint impact is ~ $10.5 million, or just under 2.5% of the (reduced) Water System rate revenue. Assuming that same amount could be replaced, and all else being equal, the

"system rate increase" could be reduced by about 3 percent, with a bit more of the reduction occurring in the suburban wholesale rate structure. Safe to say that (again, absent any other changes) the average suburban water rate increase would be closer to 8 percent compared to the current 11.1%.

Hope this helps . . .

CITY OF DETROIT
WATER AND SEWERAGE DEPARTMENT
OFFICE OF THE DIRECTOR

735 RANDOLPH STREET
DETROIT, MICHIGAN 48226-2830
WWW.DETROITMI.GOV

January 12, 2015

Mr. Darnell Earley, Emergency Manager
Mr. Dayne Walling, Mayor
City of Flint
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Messrs. Earley and Walling:

Regarding: Re-establishing Detroit Water and Sewerage Department Water Service

I was recently referred to a report in MLive in which there was reference to the City of Flint (City) potentially re-visiting its decision to utilize Flint River water as a water source prior to the completion of the KWA pipeline. Within that report, there appeared to be some incorrect assumptions about the cost of water service from the Detroit Water and Sewerage Department (DWSD). I write to you today to express the willingness of DWSD to resume delivery of drinking water to the City and its residents. We have monitored the water quality issues that have troubled the City since May, 2014, and understand that many of the difficulties stem from the limited access to source water. Please know that DWSD is ready, willing and able to resume service to the City if you so desire.

If the City is interested in a long term arrangement with DWSD, with this goal in mind, we offer that the City can immediately reconnect to the DWSD system at no additional charge to the City and at the same "expired contract" rate that the City was paying in April, 2014, modified to reflect the 4% increase experienced by all other wholesale customers in July, 2014. The resulting rate structure is a fixed monthly rate of $846,700 and a commodity rate of $14.92/Mcf. In order to facilitate contract negotiations, DWSD is willing to extend this rate to the City (and to Genesee County as the City's partner and former customer) until June 30, 2015.

We at DWSD take very seriously the matter of drinking water quality, and we are as concerned as you must be by the continued quality issues faced by the City. We are confident that DWSD can provide you with a solution for reliable, safe, high quality water on an expeditious timeline. Please contact me directly at (313) 224-4701 if you wish to discuss this offer further.

Sincerely yours,

Sue F. McCormick

Flint Water vs DWSD Water

	Monthly	Annual
Water Usage MCF	71594	859128
DWSD Price Per MCF	$14.92	
DWSD Fixed Charge/Month	$846,700	$10,160,400
Cost of Water/Month Avg.	$1,914,882	$22,978,590
Flint Incremental Cost of Treatment Plant Operation (to continue as a back-up only) Note 2	$239,587	$2,875,048
Net Cost Increase with DWSD - Note 3	$1,675,295	$20,103,542
Fllint Budgeted Water Revenue (FY15)		$37,000,000
New Fee Collection Level to Handle DWSD - Note 4		$48,403,542
Percentage Fee Change to Handle DWSD		30.82%

Note 1 - DWSD prices from 1/ /15 S. McCormick letter
Note 2 - Treatment Plant costs HC email 2/6/15
Note 3 - *Unknown: additional cost to GCDC for pipe lease/mo.*

Note 4 - In order to keep fee increases to the lowest level Flint would need to eliminate the $3 million set aside annually for future costs and completely eliminate the $8.4 million professional services expenses.

You may have already seen this (below) blurb from MLive. Also, I had a call from Jerry A. He indicated Veolia is coming to the same conclusion that it may involve tweaking of the process vs some major undertaking. We will know more next week.

I have also attached a table Wayne's & Jerry's staff put together. My sense is there is still this thought that hooking back up to DWSD is cost neutral or nearly so. Hopefully this table shows that is not the case. The info is consistent with we sent you the other day i.e., there is an estimated 30% rate impact.

FLINT, MI – A water quality expert who has spent years working with environmentalist Erin Brockovich is expected to speak at two events in Flint Saturday, Feb. 14.
Robert W. Bowcock, founder of Integrated Resource Management, met with Mayor Dayne Walling, Councilman Wantwaz Davis and others Friday, Feb. 13.
Bowcock said earlier this week that he believes small treatment and distribution adjustments could help fix some of Flint's water quality problems. He toured the city's water treatment plant Friday.
Walling declined to comment on his conversation with Bowcock, but city Councilman Eric Mays said he is anxious to hear his assessment and recommendations.

Davis said Bowcock was straightforward in giving his opinion that the city can cut back on some of the chemicals being used to treat water.

City spokesman Jason Lorenz issued a statement, saying, "The city of Flint honored a request for a tour of its water treatment plant submitted by Mr. Bowcock, as it has done with individuals and groups in the past.

"(Director of Public Works) Director Howard Croft and F-1 Licensed Treatment Operator Mike Glasgow guided the tour and answered all of Mr. Bowcock's questions. Tours of the Water Treatment Plant can be arranged by appointment for interested groups by calling 810-787-6537."

Bowcock is scheduled to join in a march for water quality through downtown Flint, which is planned to begin at 1 p.m. Saturday at Flint City Hall, 1101 S. Saginaw St., and end at The Durant.

Bowcock is also scheduled to speak at a forum at the Saints of God Church, 2200 Forest Hill Ave., Flint, from 3-4:15 p.m.

Brockovich, portrayed by Julia Roberts in a 2000 movie about her fight over the pollution of a California town, has been speaking out on Facebook about Flint's water issues for several weeks. Today, she posted a photo of Bowcock, Davis and march organizer Melissa Mays inside the Flint water plant, saying she was "so honored this community would seek my help ... and I am glad I could send Bob to get it done."

In addition to customer complaints about the price and quality of the water, there were several boil water advisories in Flint in 2014 and the city was found in violation of the Safe Drinking Water Act for excess total trihalomethanes in the water supply last year.

The city began using the Flint River as its source of drinking water in April after 50 years of handling only the distribution of already-treated Lake Huron water purchased from the Detroit Water and Sewerage Department.

Since that time, some citizens and members of the City Council have advocated abandoning the use of the river and purchasing lake water from the Detroit until the Karegnondi Water Authority pipeline is complete.

The city and Genesee County are partners in the KWA.

Flint Water vs DWSD Water					
	Monthly		Annual		
Water Usage MCF	71594		859128		
DWSD Price Per MCF	$14.92		$14.92		
DWSD Fixed Charge/Month	$846,700		$10,160,400		
Cost of Water/Month Avg.	$1,914,882		$22,978,590		
Flint Incremental Cost of Treatment Plant Operation (to continue as a back-up only) Note 2	$239,587		$2,875,048		
Net Cost Increase with DWSD - Note 3	$1,675,295		$20,103,542		
Flint Budgeted Water Revenue (FY15)			$37,000,000		
Potential Budget Reductions - $3million set aside, $8.4million prof services - Note 4			$11,400,000		
New Fee Collection Level to Handle DWSD Additional Cost			$48,403,542		
Percentage Fee Change to Handle DWSD			30.82%		New Rev. Level-Current Budget Level/Current Budget Level
Note 1 - DWSD prices from 1/12/15 S. McCormick letter					
Note 2 - Treatment Plant costs HC email 2/6/15					
Note 3 - Unknown: additional cost to GCDC for pipe lease/mo.					
Note 4 - In order to keep fee increases to the lowest level Flint would need to eliminate the $3 million set aside annually for future costs and completely eliminate the $8.4 million professional services expenses.

For Immediate Release

City of Flint to Form Water Advisory Committee from Members of the Community to Share Updates and Concerns

Flint, Michigan – February 16, 2015 – In response to the recent concerns regarding water quality in the City of Flint, a water advisory committee of 40 citizens consisting of business owners, elected officials and members of various community organizations is being formed. The committee's formation comes after the City hired the firm Veolia to provide an analysis of Flint's water system as well as recommendations on actions to improve water quality. The purpose of the committee will be to provide the community with ongoing information on the City's work to maintain a safe water supply and to improve quality.

In addition to gathering information from the City to share during their interactions with the community, committee members will also be expected to share the concerns they receive from the community in order for those concerns to be addressed. Mayor Dayne Walling pointed out that the level of connection between the City and the community provided by the committee is an important step toward ensuring that the public is engaged in this ongoing issue.

"Members of our community have concerns about the quality of their water, the costs associated with delivering it and the problems facing the infrastructure that brings it to them," said Mayor Walling. "As we worked to address each of these areas in turn, keeping our residents, businesses and visitors informed on the progress being made and keeping a dialogue open to hear any new concerns is crucial."

–CONTINUE–

Gerald Ambrose
Emergency Manager

Dayne Walling
Mayor

All meetings by the Water Advisory Committee will be open to the public and will be held at easily accessible locations throughout the city. Meetings will be held on a regular basis as work continues at least until the City is receiving its water from the Karegnondi Water Authority, which is anticipated to be in 2016.

The first meeting is anticipated to be during the first week of March, 2015. Letters have been sent to prospective members and confirmation is expected to be received by Friday, February 20, 2015. Any group who has not received an invitation and who would like to have a member participate can send a request to mayor@cityofflint.com.

A second, smaller group of experts in various areas surrounding water is also being formed. The Technical Advisory Committee will consist of members from the areas of health, government, industry, education and scientific research. That group will be announced later this week.

Groups and designated individuals asked to join the Water Advisory Committee:

Flint City Council President	Flint Community Schools
Chair Public Works Cmte.	Genesee County Commissioner
Concerned Pastors for Social Action	Genesee County Medical Society
Flint & Genesee Chamber of Commerce	Kettering University
Hurley Medical Center	Mott Community College
McLaren Flint	U of M Flint
Genesys Health System	Consumers Energy
The United Way	Flint River Watershed Coalition
Big Brothers Big Sisters	Hamilton Community Health Network

February 19, 2015 1-[redacted] Access code [redacted]

		Last Report	Status
1) Public Safety Update – FPD, MSP, (FFD, if needed)			
	a) FPD	Status Report	Update
	b) FFD	* SAFER Grant - Recommendation is to not apply in 2015, do apply in 2016 in light of anticipated FY17 shortfall.	Update
	c) Other update from Chief Tolbert and MSP		
2) Governor's Office Update – R. Baird, H. Hollins, B. Clement			
	a) District Court Consolidation	County Commissioners voted on 12/10/14 to approve "pursuant to the terms and conditions set forth in a MOU to be approved between City of Flint and Gen. Cty."	Meeting with County Rep. Feb 18. Waiting for proposed MOU from County.
	b) Local Income Tax Initiative	Additional source of funds still needed for City. H. Hollins working to find a new sponsor. Projected financial challenges associated with projection of FY17 budget may emphasize the rational.	No Change
3) Finance and Administrative Update			
	a) Financial Ordinances	Complete	Update
	b) Management Vacancies	MML has been selected to recruit candidates for Treasurer, HR Director and Finance Director. Search for Fire Chief to be added - effective date 7/1/15	Update

		Last Report	Status
	c) Budget	Dr. Scorsone to assist with updating financial projections by Feb. 18. Budget planning session held with Council on 2/16/17. Projected gap between revenues and status quo expenses is between $4.5million and $5.0million.	New
	d) DEP/RAP	Progress under DEP/RAP being revised.	No change
	e) Purchasing	Revised purchasing ordinance being enacted.	New
4) City Council Update			
	a) EM Order	An Order also being developed defining organizational reporting relationships to new City Administrator.	No Change
	b) Council/Mayor Compensation	Revision to Council and Mayor compensation is being developed.	Update
5) Water Issues			
	a) MDEQ Violation Notice	The next TTHM sampling was conducted 2/17/15, testing will be done by the MDEQ. Our most recent internal tests show water to be within federal/state guidelines. Expect to receive a violation notice from MDEQ, due to the running average calculation, in 7-10 days. The notice to customers will go out by mid-March.	Update
	b) Distressed Cities Grants	Announcements made for grant awards to Flint for Leak Detection and Sewage sludge Load Out Facility.	No Change
	c) Drinking Water Revolving Fund	Discussing possible restructuring of loans.	No Change
	d) Water Quality Consultant	Veolia will provide preliminary recommendations at the 2/18/15 Public Works Committee meeting - including process improvements, distributions system actions, communications improvements, and personnel support by way of new policies and procedures, training and new testing models. Priority budget, and timeline to follow within 1-2 weeks; much improvement has occurred as demonstrated by the most recent testing.	Update
	e) WAC/TAC	A Water Advisory Committee and a Technical Advisory Committee have been formed as part of the process of improving communication and receiving additional feedback.	New

		Last Report	Status
6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Preparing Tower Transfer justification package for EM and Council. Sending grant amendment request to E. Cole for use of current C-GAP grant to pay for consolidation expenses.	Update
7) Transition Activities			
	a) Transition Management	New Council Committee structure has been implemented and Council is now meeting twice per month. Council has been engaged in the planning and budget process for FY16-20, adopting updated Vision, Mission and Goals, and participating in a budget workshop led by Dr. Eric Scorsone. Next step will be for Council to receive 5 Year Revenue/Expense projections and adopt budget priorities. Begining in March, more business items will be sent to Council for consideration. Date specific transition calendar will need to be developed.	Update
8) Other Items			
	MDNR and Purchase of CSX rail area	Requesting DNR authorize full amount of appraised property value to be paid by DNR grant. **Note from Planning and Development Director:** In brief, the City hired an appraiser for the Grand Traverse Greenway trail to complete acquisition of the CSX properties We forwarded the appraisal of $170,000 to the DNR for approval to proceed with negotiations with CSX. During our negotiations, CSX disputed the appraisal and submitted their own appraisal for the property of $330,000 After reviewing the CSX appraisal, DNR told the City that they would be willing to increase the grant up to $215,000 for acquisition, but the City would have to make up the difference After doing additional research on simlar properties including acquisition of the Genesee Valley Trail in the City of Flint, we realize that CSX offer is not unreasonable We asked DNR to reconsider and allow us to have our appraisal amended so that we can fully use the DNR grant for the $330,000 asking price (Our DNR grant allocation is $700,000 more than enough to cover the $330,000 asking price Thus far, DNR has been unwilling to provide the additional funding and suggested we talk to MDOT about making up the difference I think the MDNR is concerned about setting precedent for future trail acquisition, but I don't think it matters if MDOT is routinely paying more	Awaiting update from Treasury.

VEOLIA

City of Flint, MI
City Council Public Works Committee
Interim Water Quality Report

Veolia Scope of Work

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Items of Note

- **Not in scope** – studying why the change from DWSD or the history of the utility
- **What we found** – A very frustrated community and a staff trying to solve the problem, having some success but frustrated with the pace of change

Everybody Is Checking the Safety of Water

- City, state, news media, universities and other groups
- Safe = compliance with state and federal standards and required testing
  - *Latest tests show water is in compliance with drinking water standards*
  - *Monthly report available on web page*
- More than 20,000 tests required annually for city
- Strict testing requirements in place (what and how to test)

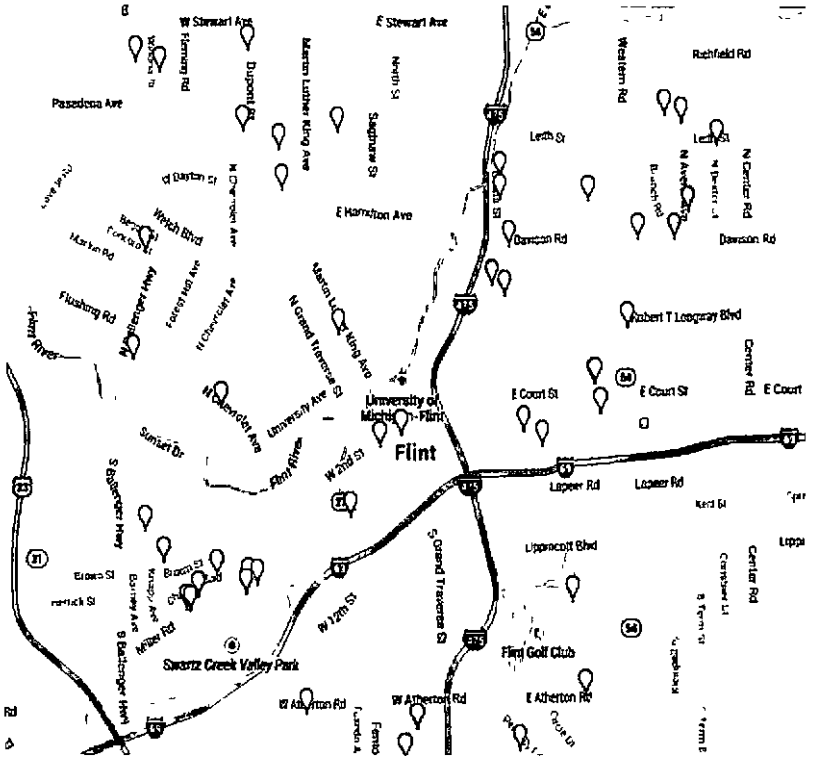
Why TTHM Notices?

- TTHM is formed as a result of the reaction between chlorine and organic material in the water
- City is required to test quarterly at 8 sites
  - *Last summer, several sites had more TTHM than allowed*
- City has reduced levels of TTHM and now all sites are in compliance
  - *Customer notification letters are required until tests are in compliance an average of four quarters*
- It will take at least 2 more quarters to lower average
  - *Even a change to DWSD water doesn't solve problem*
- Flint is not alone – hundreds of communities are facing TTHM issues

Why Discolored Water?

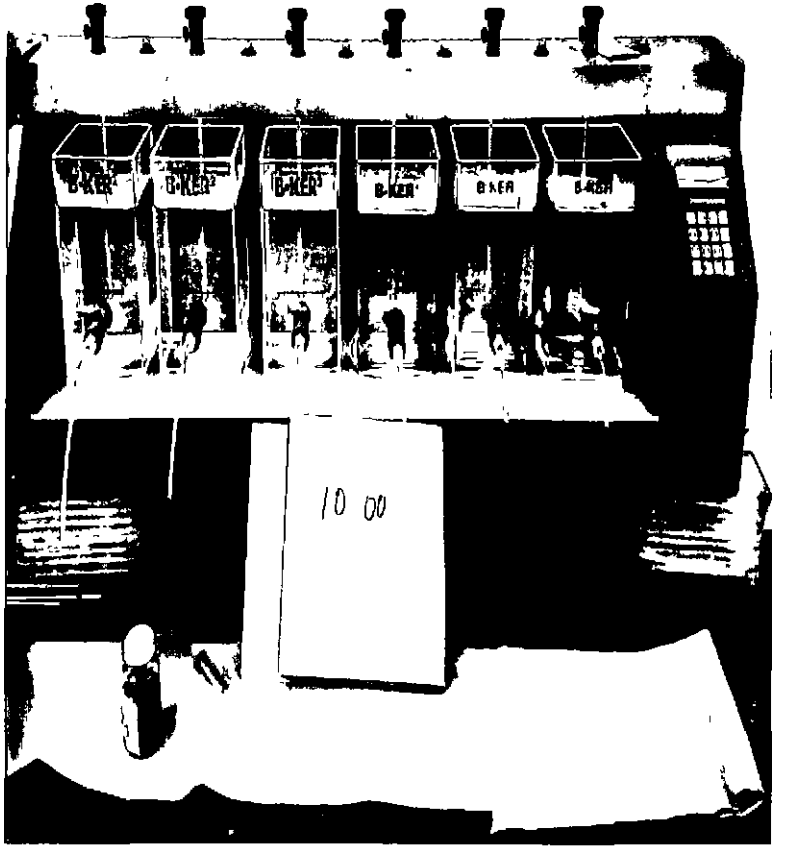
- Old cast iron pipes
- Always has been some discolored water problems – mostly after water breaks
- Efforts to reducing TTHM didn't help discoloration
  - *Doesn't mean the water is unsafe but it is not appealing and raises questions*
- City will test the water at your home – call 787-6537 or email flintwater@cityofflint.com
- Tracking customer complaints is important

Location of water quality complaints
The last 12 months – fewer than you think



Water Quality Can Be Improved

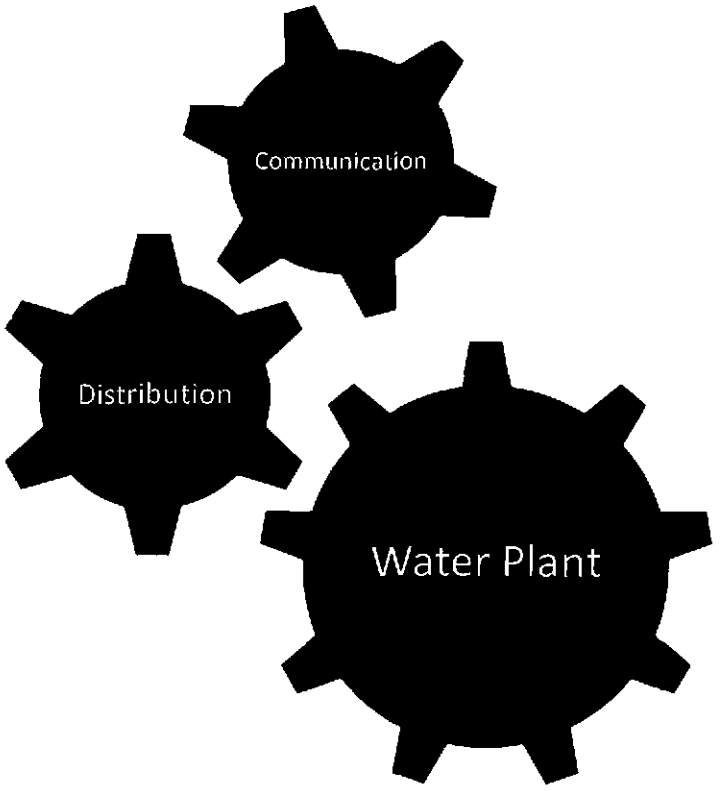
- Adjust the chemicals being fed – stop some, increase some and change some
- Provide better monitoring of water quality to help make adjustments
- Continue repair or replacement of broken parts
- Reduce the over capacity of the distribution system
- Do a better job explaining what is happening
- Do a better job of asking for help



VEOLIA

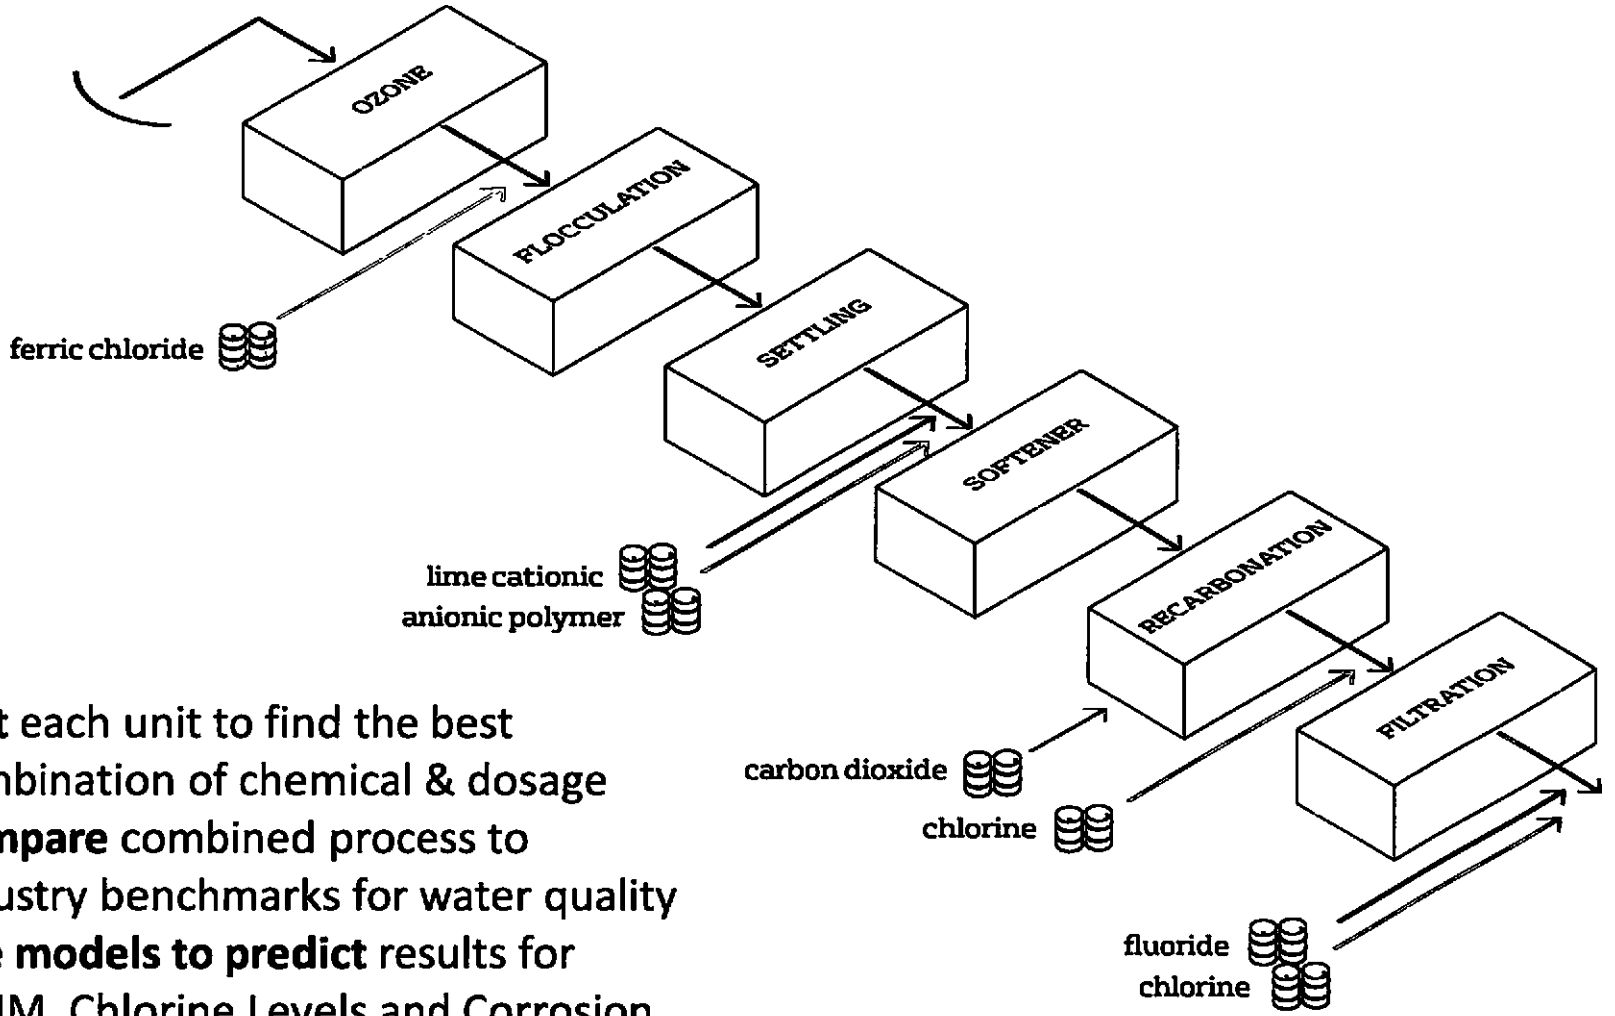
Further Explanation of Solutions

Solution Involves Coordination of 3 Activities



- Water plant improvements
  - *Optimize chemical dosages*
  - *Consider different chemicals*
  - *Change dosing points*
  - *Install granulated activated carbon*
  - *Complete plant upgrades*
  - *Implement best mgt practices*
- Distribution system improvements
  - *Fix broken valves*
  - *Ask for customer feedback*
  - *Reduce tank storage*
  - *Target line flushing*
  - *Run a hydraulic model*
- Better communication with customers
  - *Engage advisory committees*
  - *More accessible utility*
  - *Make it easy to access information*
  - *Better customer communication*

Optimize Plant Processes



- **Test** each unit to find the best combination of chemical & dosage
- **Compare** combined process to industry benchmarks for water quality
- **Use models to predict** results for TTHM, Chlorine Levels and Corrosion

Complete Plant Construction & Re Prioritize Capital

Cost effective plan in budget

- Complete water plant renovation
  - *Target SCADA and instrumentation in plant*
- Speed up valve turning contract & provide money for replacements
- Speed up hydraulic model update to reduce tank volume
- Evaluate installing of granulated activated carbon on filters

Weather can impact timing

Digging up a water valve for repair
Need good weather to start

Implement Best Management Practices

Activities to Help Operators Maintain Good Water Quality

- Process Control Management Plan
- Lab QA/QC Program
- Computerized Maintenance Management System
- Asset Management System
- Training and Certification Program
- Vulnerability Plan

Distribution System Improvements

- Speed up flow of water from plant to homes – 2 weeks plant to house
  - *Find closed valves & open them*
  - *Replace broken valves*
  - *Update hydraulic model*
  - *Reduce system storage*
- Track customer complaints
  - *Test customer water*
  - *Spot flush hydrants to clean areas of stagnant water in the system*

Flushing out discolored water

VEOLIA

Improving Customer Service

Make It Easy to Access Information and People

Develop a proactive customer communication plan

- Create advisory committees to help direct efforts and improve flow of information
- Establish a single point of contact to manage all water quality complaints
- Provide additional customer service training to staff
- Expand neighborhood and community outreach
- Change monthly billing statements from card to envelope with information

Example - Communicate in the field

NOTICE: ANNUAL FLUSHING PROGRAM

We are conducting our annual flushing program to enhance your water quality and clean the distribution system.

DC Water crews will be flushing hydrants in your area 10:00 p.m. to 6:30 a.m. on the following dates:

9/24 **through** 9/30

IMPORTANT INFORMATION

- Your water supply will not be shut off during hydrant flushing.
- You may notice slight water discoloration or low water pressure.
- During this time, customers can continue normal water usage, including drinking, bathing and laundry (unless water is discolored).

If you experience discolored water during this period:

- Run your cold water taps for 15 minutes. If it does not clear up, please contact our Drinking Water Division.
- Do not run your hot water. If you experience discolored water from your hot water tap for several hours, then it is recommended to drain and flush your water heater tank.

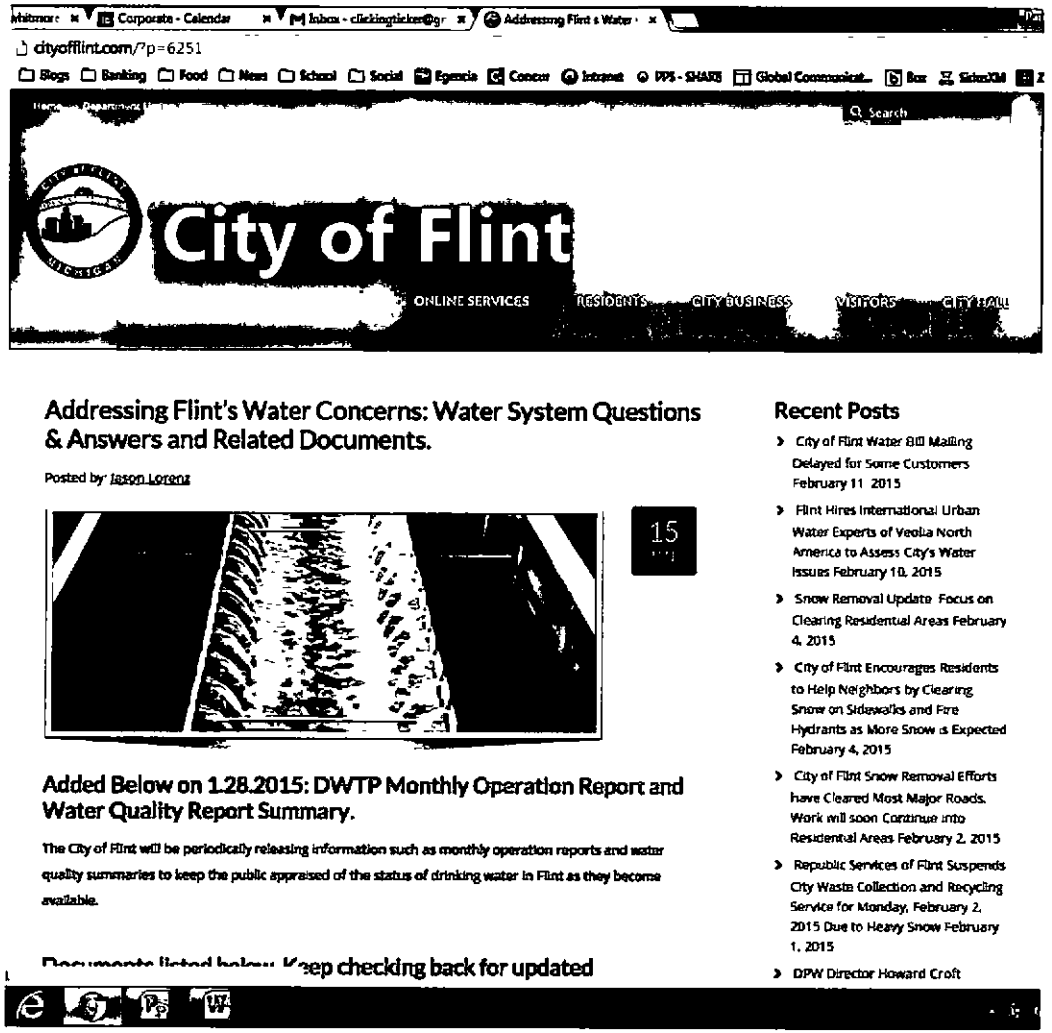
Provide field crews with additional communications tools to use to address questions or concerns from the public

Create door hangers, flyers, or yard signs to notify neighborhoods about main breaks, hydrant flushing, or system maintenance that may affect the public

Create a business card or other contact card with the name and phone number of the single point of contact with the Department of Public Works who is managing information flow

**sample door hanger provided by DC Water & Sewer Authority*

Clear, concise information is key



Simplify the reports on the web page dedicated to addressing water system questions

- *Create a single-page, easy to understand report for the public*
- *Use charts or provide other examples to demonstrate water quality testing and system or treatment plant improvements underway*
- *Provide name, phone number and email address for identified point of contact so customers can request more information*
- *Continue to provide Monthly Operation Report and Water Quality Report Summary for those customers interested in more technical information*
- *Use site to provide additional notice of field work that may impact customers*

VEOLIA

What Is Next

Next Steps

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Questions Being Heard

REMEMBER

We just started. Might not have an answer yet to your question

- **When will water improve -** The water has improved with current actions. More changes will occur over weeks and months because of safety reviews
- **Date of next update and final report** – An update will be provided next week and a report the following week.
- **Time frame for implementing recommendations –** The City is already started. Others a few days and some weeks or months due to State approval being required or weather.
- **Cost of changes** – Don't know yet but we are aware of the financial concerns

More Questions Being Heard

- **How are TTHM formed** – It's the reaction of chlorine to organics (leafs, dirt) in the water.
- **How to reduce TTHM** – Reduce organics before introducing chlorine and shorten time chlorine has to react with the organics
- **What causes discoloration** – Older lines, the iron parts of the system will leach iron into the water causing the discoloration. Other times its just air built up.
- **Why no discoloration with DWSD** – There was. Flint had a bad time with breaks of old line and is doing lots of construction. This stirred up the water and caused discoloration.

More Questions Being Heard

- **Can you test my water** – The city will test your water for free. But, only 2 of 20 people have taken the city up on the offer since it began offering the service.
- **Medical problems** – Some people may be sensitive to any water. Talk to your doctor. The City is communicating with the medical community.
- **Confidence that future problems will be avoided** – Recommendations will include putting programs in place to better respond to water changes and assure quality

		Last Report	Status
	c) Budget	Dr. Scorsone to assist with updating financial projections by Feb. 18. Budget planning session held with Council on 2/16/17. ✳ Projected gap between revenues and status quo expenses is between $4.5million and $5.0million.	New
Fiscal Stabalization Bonds	d) DEP/RAP	Progress under DEP/RAP being revised.	No change
	e) Purchasing	Revised purchasing ordinance being enacted.	New
4) City Council Update			
	a) EM Order	An Order also being developed defining organizational reporting relationships to new City Administrator.	No Change
	b) Council/Mayor Compensation	Revision to Council and Mayor compensation is being developed.	Update
5) Water Issues			
Specific recommendations forthcoming	a) MDEQ Violation Notice	The next TTHM sampling was conducted 2/17/15, testing will be done by the MDEQ. Our most recent internal tests show water to be within federal/state guidelines. Expect to receive a violation notice from MDEQ, due to the running average calculation, in 7-10 days. The notice to customers will go out by mid-March.	Update
	b) Distressed Cities Grants	Announcements made for grant awards to Flint for Leak Detection and Sewage sludge Load Out Facility.	No Change
	c) Drinking Water Revolving Fund	Discussing possible restructuring of loans.	No Change
	d) Water Quality Consultant	Veolia will provide preliminary recommendations at the 2/18/15 Public Works Committee meeting - including process improvements, distributions system actions, communications improvements, and personnel support by way of new policies and procedures, training and new testing models. Priority budget, and timeline to follow within 1-2 weeks; much improvement has occurred as demonstrated by the most recent testing.	Update
40 organizations	e) WAC/TAC	A Water Advisory Committee and a Technical Advisory Committee have been formed as part of the process of improving communication and receiving additional feedback.	New

		Last Report	Status
6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Preparing Tower Transfer justification package for EM and Council. Sending grant amendment request to E. Cole for use of current C-GAP grant to pay for consolidation expenses.	Update
7) Transition Activities			
	a) Transition Management	New Council Committee structure has been implemented and Council is now meeting twice per month. Council has been engaged in the planning and budget process for FY16-20, adopting updated Vision, Mission and Goals, and participating in a budget workshop led by Dr. Eric Scorsone. Next step will be for Council to receive 5 Year Revenue/Expense projections and adopt budget priorities. Begining in March, more business items will be sent to Council for consideration. Date specific transition calendar will need to be developed.	Update
8) Other Items			
	MDNR and Purchase of CSX rail area	Requesting DNR authorize full amount of appraised property value to be paid by DNR grant. **Note from Planning and Development Director:** In brief, the City hired an appraiser for the Grand Traverse Greenway trail to complete acquisition of the CSX properties. We forwarded the appraisal of $170,000 to the DNR for approval to proceed with negotiations with CSX. During our negotiations, CSX disputed the appraisal and submitted their own appraisal for the property of $330,000. After reviewing the CSX appraisal, DNR told the City that they would be willing to increase the grant up to $215,000 for acquisition, but the City would have to make up the difference After doing additional research on similar properties including acquisition of the Genesee Valley Trail in the City of Flint, we realize that CSX offer is not unreasonable We asked DNR to reconsider and allow us to have our appraisal amended so that we can fully use the DNR grant for the $330,000 asking price. (Our DNR grant allocation is $700,000 more than enough to cover the $330,000 asking price Thus far, DNR has been unwilling to provide the additional funding and suggested we talk to MDOT about making up the difference I think the MDNR is concerned about setting precedent for future trail acquisition, but I don't think it matters if MDOT is routinely paying more	Awaiting update from Treasury.

Subject: Re: Flint

Let's hope that you're right since people are paying the same or more than with Detroit water and getting pretty shaky quality. We're just diverting money that went to DWSD originally into the Flint repayment and debt scheme. I assume the advantage will disappear when KWA is up and running to pay the debt and costs of intake. Let's hope the community can see the value of this somehow.

>> Yesterday, I received a voice mail from R. Baird (still have not connected) that indicated that the City is actively working to resolve the water matter so as to avoid connecting to the DWSD. Veolia is assisting in this matter and will be issuing a report shortly. Nikki shared the above article that provides additional guidance as well.
>>
>> The voice mail from Mr. Baird indicated that the City is saving a fair amount of dollars in treating the water locally - albeit notwithstanding the known quality issues. The difference between DWSD and Flint treated water is helping to remediate other fiscal issues (potentially capital and operating) as the rates charged to the residents / commercial entities have not been changed, including perhaps other City fiscal issues. Given the active involvement of Flint in securing a resolution of this matter locally and not actively engaging DWSD in the discussions as an alternative course of action, I see no reason to pursue this matter any further. The ball is squarely in the court of the EM and Flint elected officials to resolve. RJD

>> Guys – I think we can craft a win here. In talking with Rich Baird, who has been working with Flint on this matter along with Dennis Muchmore from the Governor's staff, apparently Flint is consider this but is choking a bit on the amount to be billed. While I recognize that this amount is based on the prior contract, we are in a unique position over the next two weeks or so and before the BOWC takes action on the rates, budget, CIP and other related efforts on March 11 th (formally March 4 th). The win would be solving the water problem in Flint (generally agreed that this is there issue and comes from a poor decision to remove themselves from the DWSD's quality water product), serving to reduce the
>> FY-2016 suburban water rates already now in the public by perhaps 2% to 3%, and help to tamp down the media frenzy on this matter. It also demonstrates that flow is part of the problem – DWSD adds flow, rates go down.
>>
>>
>>
>> Right now, no one wins with Flint off the system – the rates for water remain at 11% for suburban wholesale, Flint has bad water and the press for both of us continues on this matter, along with the rate media issues.
>>
>>
>>
>> Here is what I propose. Drop the monthly rate for a defined period of time – they need a 15 month period. So let's drop the rate by say $50K monthly and make it a rate of $800K / month, fixed. In doing so, I suspect that the 11% rate can be dropped to roughly 8.5% to 9% (subject the Foster Group's more detailed analysis) – which show the public good
>> faith. Then, if they go past the 15 month time frame, we can add costs
>> on the rate at a semi-punitive approach - $850K $875K or more.
>>
>>
>>
>> I believe that there is a win / win here. If the proposal is not acceptable, then I'd like to hear an alternative if at all possible – particularly since th3e 11% isn't selling well in the media, given the misinformation out there in the public.

>> Actually, my quick take is about 8%.
>>
>>
>>
>>
>>
>> Some background:
>>
>> When Flint left, the annual revenue profile for the Water System was initially reduced by $12.5 million, However, we immediately recalculated the rate for Genesee County (recognizing their higher demands), to effectively "claw back" about $2 million of the reduction, so the net Flint impact is ~ $10.5 million, or just under 2.5% of the
>> (reduced) Water System rate revenue. Assuming that same amount could be replaced, and all else being equal, the "system rate increase" could be reduced by about 3 percent, with a bit more of the reduction occurring in the suburban wholesale rate structure. Safe to say that (again, absent any other changes) the average suburban water rate increase would be closer to 8 percent compared to the current 11.1%.

New Flint water consultant says city's problems can be fixed

Ron Fonger | rfonger1@mlive.com By **Ron Fonger | rfonger1@mlive.com**
on February 10, 2015 at 5:52 PM, updated February 10, 2015 at 5:53 PM

FLINT, MI -- The city's new water consultant says Flint doesn't have "problems that are not fixable" and pledged Tuesday, Feb. 10, to make recommendations for improving the quality of city water very quickly -- in about two weeks.

"Nothing you (are dealing with) hasn't been solved before," said Rob Nicholas, vice president for Veolia North America, the consultant who city officials introduced during a news conference Tuesday.

Emergency manager Jerry Ambrose said Veolia, the sole company to respond to a request for proposals issued by the city for a water consultant, will be paid $40,000 to deliver its recommendations for Flint's water system and potentially earn more if it's asked to do additional follow-up work.

Ambrose called Veolia's job here a "limited engagement" specifically to provide an outside, expert assessment of how to avoid future boil water advisories, violations of the Safe Drinking Water Act and to lessen customer complaints about the safety, appearance, smell and taste of city water.

Veolia is the world's largest water services and technology company. Its team started work in Flint Tuesday, assessing how city water is tested and distributed, including water treatment processes and operations, laboratory testing and analysis, as well as engineering reports that detail the city's treatment and distribution systems.

Ambrose hired the company after former emergency manager Darnell Earley started work on the request for proposals last month.

Earley said in January that the city had shown "some issues managing the supply" of public water since it started to use the Flint River as city's drinking water source in April.

Until April, Flint water had been in the water transmission business, delivering water from Lake Huron, treated by the Detroit Water and Sewerage Department, to business and residential customers.

At that time, the city began treating Flint River Water for daily use for the first time in 50 years, and customers have complained about the differences in quality of the water.

David L Gadis, also a vice president for Veolia, said his company has enough experience working with

problems, including total trihalomethances (TTHM) in other communities, that it can bring a new perspective to problems.

Gadis said his company sees Flint as an opportunity and said the city's issues are not unlike other communities that also rely on river water, which changes with the season and weather, making it far more variable than lake water.

"When we take a look at something, we bring a worldwide knowledge to the table," Gadis said. "What Flint will get is our capability."

Both Veila officials said Flint should have a citizen water advisory board and respond immediately to customer concerns about water that doesn't look, smell or taste right.

Although treatment of Flint River water is the first concern, Veolia officials said they won't hesitate to make suggestions about the city's planned use of raw water from Lake Huron next year or potential money-saving measures even though those are not immediate concerns.

"The immediate (objective) is to deal with Flint River water," Nicholas said. "We will look at the long-term (use of the river as a back-up water source in the future) as well as the short-term."

Flint Mayor Dayne Walling said Veolia has the capacity to help the city restore confidence in the drinking water supply.

Nicholas called TTHM "an unfortunate problem."

"You want to get it fixed as soon as you can,' he said.

Flint has made progress in removing excess TTHM from water, according to water sampling results from its most recent quarterly tests but tested beyond federal limits for the disinfection byproduct at each of eight test sites in August.

TTHM levels were high enough in 2014 that the city is certain to remain in violation of the Safe Drinking Water for several more months.

Walling said the city is working "extremely hard to address its water challenges, taking steps every day to improve the quality of the water."

Tom,
What are the total revenues collected from water and sewer rates for the following months: 9/14, 10/14, 11/14, 12/14?

To get a handle on the last table you sent Friday that was attached to your communication below, I attached an excel spreadsheet to help me understand this better. The yellow highlighted cell is where I need data filled in. I broke up the potential reduction ($3m and $8.4m) and spread them into the monthly and annual even though is sounds like the $8.4 million for professional services is a one-time or short-term expense. The pink highlight is the % increase in rates base on the table you sent last Friday which is different from the 24% rate increase I calculated…so where did I error?

Assuming there are fixed costs in the current rates via the Flint river, what are they?

Thanks,
Harvey

Tom,
Thanks. I'd like to get such a table out to the Flint stakeholders; however, before doing so, the table probably needs to be modified to better reflect the comparison between Flint River and DWSD.

Subject: Re: Re: Flint

You may have already seen this (below) blurb from MLive. Also, I had a call from Jerry A. He indicated Veolia is coming to the same conclusion that it may involve tweaking of the process vs some major undertaking. We will know more next week.

I have also attached a table Wayne's & Jerry's staff put together. My sense is there is still this thought that hooking back up to DWSD is cost neutral or nearly so. Hopefully this table shows that is not the case. The info is consistent with we sent you the other day i.e., there is an estimated 30% rate impact.

FLINT, MI -- A water quality expert who has spent years working with environmentalist Erin Brockovich is expected to speak at two events in Flint Saturday, Feb. 14.
Robert W. Bowcock, founder of Integrated Resource Management, met with Mayor Dayne Walling, Councilman Wantwaz Davis and others Friday, Feb. 13.
Bowcock said earlier this week that he believes small treatment and distribution adjustments could help fix some of Flint's water quality problems. He toured the city's water treatment plant Friday.
Walling declined to comment on his conversation with Bowcock, but city Councilman Eric Mays said he is anxious to hear his assessment and recommendations.
Davis said Bowcock was straightforward in giving his opinion that the city can cut back on some of the chemicals being used to treat water.
City spokesman Jason Lorenz issued a statement, saying, "The city of Flint honored a request for a tour of its water treatment plant submitted by Mr. Bowcock, as it has done with individuals and groups in the past.
"(Director of Public Works) Director Howard Croft and F-1 Licensed Treatment Operator Mike Glasgow guided the tour and answered all of Mr. Bowcock's questions. Tours of the Water Treatment Plant can be arranged by appointment for interested groups by calling 810-787-6537."
Bowcock is scheduled to join in a march for water quality through downtown Flint, which is planned to begin at 1 p.m. Saturday at Flint City Hall, 1101 S. Saginaw St., and end at The Durant.
Bowcock is also scheduled to speak at a forum at the Saints of God Church, 2200 Forest Hill Ave., Flint, from 3-4:15 p.m.
Brockovich, portrayed by Julia Roberts in a 2000 movie about her fight over the pollution of a California town, has been speaking out on Facebook about Flint's water issues for several weeks.

Today, she posted a photo of Bowcock, Davis and march organizer Melissa Mays inside the Flint water plant, saying she was "so honored this community would seek my help ... and I am glad I could send Bob to get it done."

In addition to customer complaints about the price and quality of the water, there were several boil water advisories in Flint in 2014 and the city was found in violation of the Safe Drinking Water Act for excess total trihalomethanes in the water supply last year.

The city began using the Flint River as its source of drinking water in April after 50 years of handling only the distribution of already-treated Lake Huron water purchased from the Detroit Water and Sewerage Department.

Since that time, some citizens and members of the City Council have advocated abandoning the use of the river and purchasing lake water from the Detroit until the Karegnondi Water Authority pipeline is complete.

The city and Genesee County are partners in the KWA.
